

Foundations of Education and the Teaching Profession

Gerry C. Areta, MAT

Faculty

Institute of Teaching and Learning
Philippine Normal University, Manila

Scope:

- Historical Foundations
- Philosophical Foundations
- The Teaching Profession
- Legal Foundations
 - ❖ Art. XIV of the 1987 Philippine Constitution
 - ❖ Education Act of 1982
 - ❖ R. A. 4670
 - ❖ R. A. 7836
 - ❖ Code of Ethics
 - ❖ Other Related Laws

LET Competencies:

- Determine ways and means to ensure high standards of personal and professional development;
- Determine the roles of the teachers as active members of the community and as global citizens responsible for the outcomes of their actions and for developing other citizens;
- Analyze historical, economic, socio-cultural, geographical, environmental, political and social-psychological factors that affect the role of the school as an agent of change;

LET Competencies:

- Interpret educational problems in the light of philosophical and legal foundations of education;
- Apply ethical principles and situations involving teacher's relationship with various groups of people; and
- Reflect on professional teacher's accountability to the learners' performance and achievement to the teacher's total involvement in the teaching profession

The Nature of Education

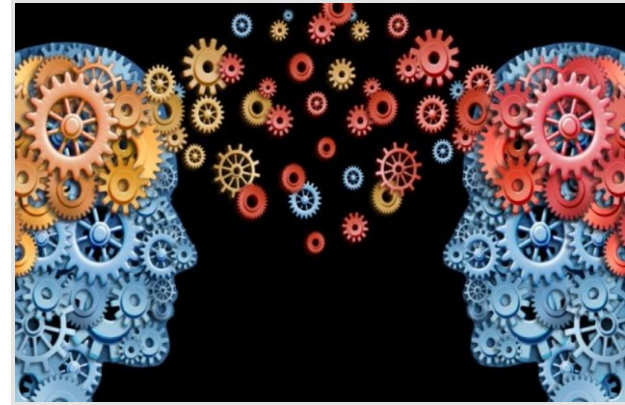

- From the Latin word “educare” or “educere” which means to **lead forth**.
- Process of acquiring knowledge, habits, attitudes, interest, skills and abilities and other ***tangible qualities*** through ***training instructions*** and ***self-activity***, and transmitting these vital elements of human civilization to ***posterity***.

Types of Education

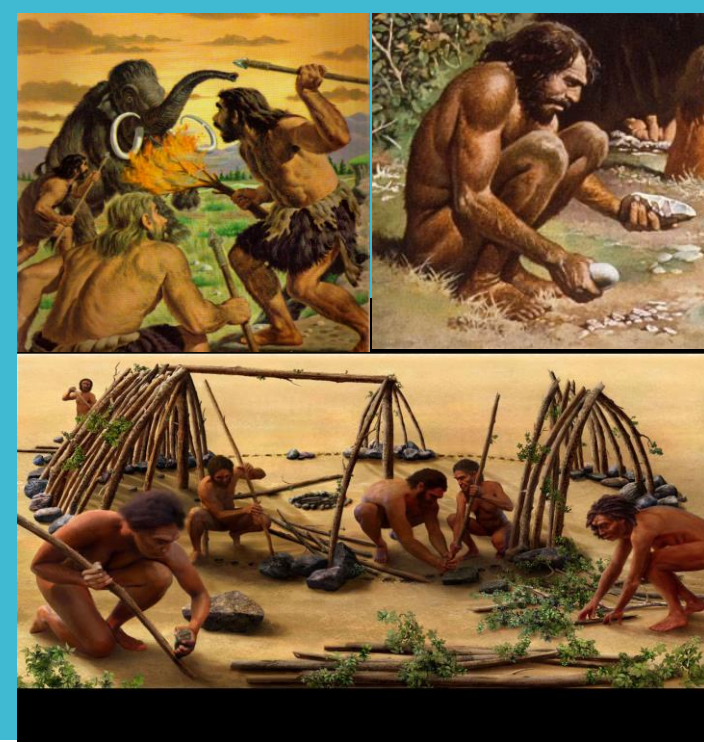

1. Formal Education – *hierarchically structured and chronologically graded learning* organized and provided by *formal school system* and for which **certification** is required in order to progress to higher levels.
2. Non-Formal Education – any *school-based educational activities* undertaken by agencies aimed at attaining specific learning goals for a *particular clientele*.
3. Informal Education – a type of education which *can be acquired anytime and anywhere*.

HISTORICAL FOUNDATIONS OF EDUCATION

Around the World and in the Philippines

Education during the *Ancient Period*

Aim:

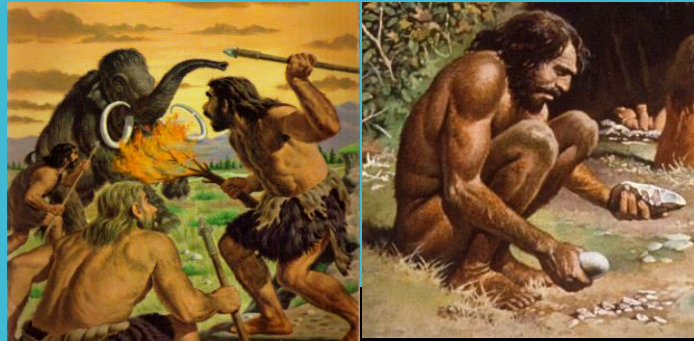

- 1) Education for survival and conformity to the tribe;
- 2) Preservation and transmission of traditions

Types:

- Vocational and Domestic Training
- Religious

Content: Broad, indefinite and unwritten ritualistic and prescriptive; non-graded; informal

Education during the *Ancient Period*

Methods:

- Enculturation
- Observation & Imitation
- Participation
- Simple telling & demonstration

Agencies:

- Home
- Environment

Effects

- Preservation of culture
- Survival of species
- Adjustment and adaptation to political and social life

Education for *Social Stability*

Aim:

- To recapitulate the past in order that the individual may or may not vary from it or advance beyond it

China – To preserve & perpetuate ancestral tradition

India – To preserve traditions of the caste system and religious beliefs

Egypt – To preserve religious traditions

Persia - To strengthen military traditions

Types: Moral Training/ Social Training and Theoretical/
Religious Training

Education for *Social Stability*

Methods:

- Direct imitation, trial and error, conscious imitation and indoctrination

Agencies: Home, pagoda, temple and under the trees or covered sheds

Influences:

- Liberal education in all levels
- Complimentary development of human person for social transformation of the state
- Holistic integration of human personality
- Education for individuality
- Stability but lacking in progressiveness

Education for *Business Development (Sumerian)*

HEAD	𒀭	𒀮	𒀯	𒀰
FISH	𒀱	𒀲	𒀳	𒀴
DONKEY	𒀵	𒀶	𒀷	𒀸
OX	𒀹	𒁀	𒁁	𒁂
SUN	𒁃	𒁄	𒁅	𒁆
GRAIN	𒁇	𒁈	𒁉	𒁊
ORCHARD	𒁋	𒁌	𒁍	𒁎
FLOUGES	𒁏	𒁐	𒁑	𒁒
WOMENLAND	𒁓	𒁔	𒁕	𒁖
ROSE	𒁗	𒁘	𒁙	𒁚

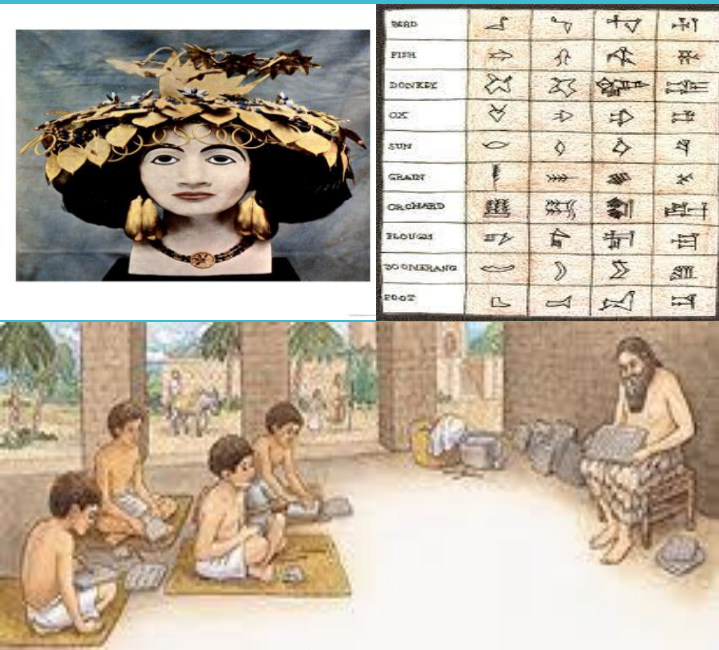

Aims:

- To train scribes to do ecclesiastical work in the temples that were mostly writing.
- To train people as bookkeepers to record their multifarious business transactions

Types:

- Writing Education
- Mathematical Education
- Language Education
- Vocational Education
- Professional Education
- Art Education

Education for *Business* *Development* *(Sumerian)*

Agencies:

- School, Home, Temple Schools and Apprentice Schools

Methods:

- Imitation and Copying
- "School Father" and "School Son"

Effects:

- Conservation of the early civilization's origins; medium of instruction and commercial language of the ancient world

Education for *Public Administration (Egyptian)*

Aims:

- To train the scribes to record the transactions of ecclesiastical and commercial business;
- To inculcate in the minds of the learners proper respect for the gods and the pharaoh;
- Utilitarian Education; and
- Preservation of cultural patterns

Types:

- Religious Education
- Vocational-Professional Education
- Military Education
- Education for public administration
- Priesthood Education
- Home Arts Education
- Writing, Reading and Language Education

Education for *Public Administration (Egyptian)*

Agencies:

- Home, Temple Schools, Military Schools, Court Schools and Vocational Schools

Methods:

- Apprenticeship, Dictation, Memorization, Copying, Imitation and Repetition, Observation and Participation

Education for *Public Administration (Egyptian)*

Effects:

- Development of civilization
- Created the first national government, basic forms of arithmetic and 365-day calendar
- Hieroglyphics
- Papyrus
- Developed the first religion to emphasize life after death
- Built great cities where skilled workers worked
- Pyramids as tombs for their rulers

Education for *Discipline* *(Jewish)*

Aim:

- Ethical and Religious Education – Education as obligation of parents and associated with the performance of ritual observances with learning Mosaic law

Methods:

- Oral and learning by practice, corporal punishment was regarded as an essential element

Chinese Education

Aim:

- Ideological and Ethical or Moral Learning;
- Cultural Learning
- Civil Service

Types:

- Ideological and moral education
- Language Education
- Vocational and Domestic Education
- Civic Education
- Military Education

Chinese Education

Methods:

- Confucian method – Outdoor teaching
- Direct and exact imitation
- Memorization

Hindu Education

Aims:

- Dharma – to provide individuals with value system
- Artha – to earn a living by honest means
- Kama – to enjoy life in moderation
- Moksha – to lead the soul toward God and achieving release from the rebirths

Contents:

- Literature
- Dancing
- Sports
- Law, Medicine, Mathematics
- Linguistics, Philosophy and Theology
- Military Training
- Astronomy, History, Grammar

Hindu Education

Social Divisions:

- Brahmans – priests or scholars
- Kshatriyas – rulers, administrators, soldiers
- Vaisyas – peasants – farmers, merchants
- Sudras – skilled artisans such potters, weavers, basketmakers and servants
- Panchamas, Pariahs or Untouchables – oppressed people

Methods: Imitation and Memorization

Early Hebrew Education

Aim:

- Humanitarian and Religious Education

Methods:

- Compulsory participation, oral, memorization, exposition and temple worship, Gnostic Method, teaching by example, Use of Proverbs and Parables

Contributions:

- Monotheism, Ten Commandments and the Bible

Early Greek Education (Spartan)

Aim:

- Military and Discipline – to make every citizen invincible in war, possessing physical perfection and complete obedience to the state and to develop a people unequalled in military skills and absolutely devoted and loyal to the state

Methods:

- Training, Participation, Testing for endurance, Discipline and Training and Motivation

Early Greek Education (Spartan)

Types:

- Physical Education
- Military Education
- Moral Training – prudence, obedience, patriotism, courage and endurance
- Music Education
- Gymnastics Education

Contribution:

- Nationalism, Patriotism, Discipline and Military Education

Early Greek Education (Athenian)

Aims:

- Good citizenship;
- Individual excellence in wisdom, beauty and strength for public usefulness
- Development of all human capacities (many sided-development)

Types: Civic training, moral training, physical education, intellectual education, art, music, poetry and dancing

Contributions: Olympic and free development of all human capacities

Roman Education (Ancient)

Aims:

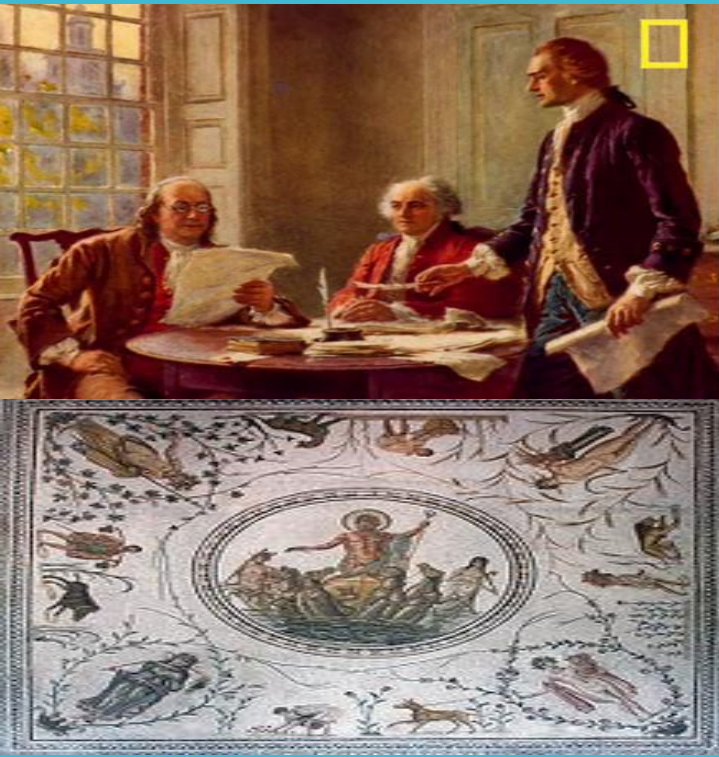

- Utilitarian Education
- Moral, religious, civic and political

Types: Physical and military training; civic training; moral training; religious training; vocational training

Agencies: "Ludus"; "Grammaticus"; "Rhetorical", Home, Farms, Military Camp and Forum

Methods: Direct imitation, memorization & discipline

Roman Education (Later)

Aims:

- Oratorical
- Civic Education

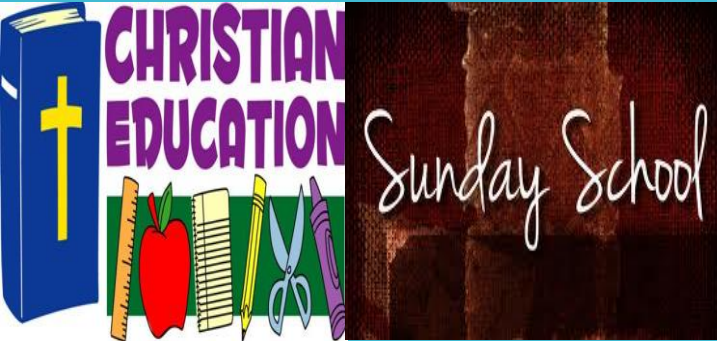

Types: Speech training, Civic training, Literacy Education, Vocational Education

Agencies: Litterator, Grammaticus, Rhetor and Athenaeum

Methods: Memorization, drill and writing exercises and public speaking practices

Contributions: ladderized educational system; civil law; setting forth of qualities of teachers

Early Christian Education

Aims:

- Education for Moral Regeneration
- Salvation – spreading the good news

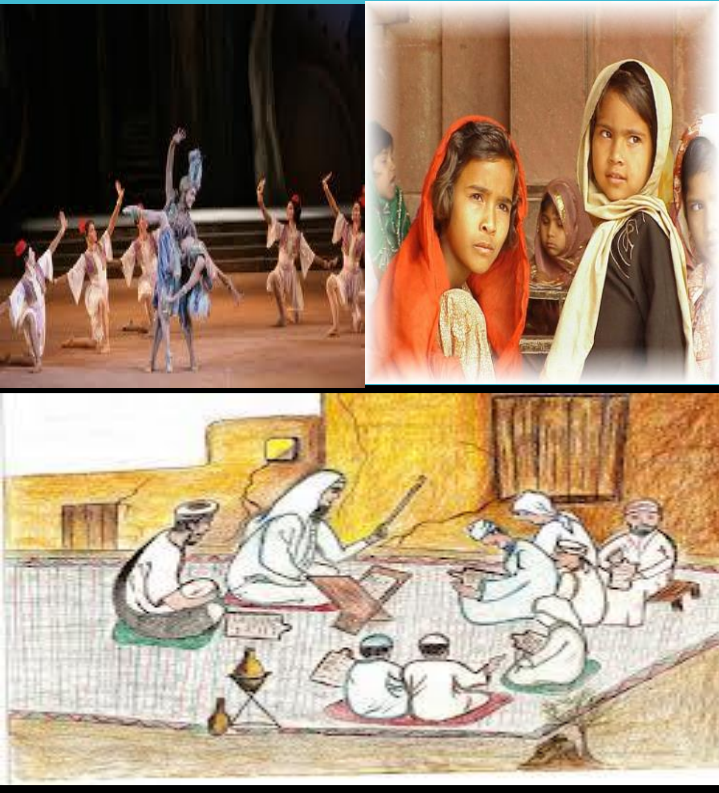

Types: Moral training, Spiritual training, Music Educ

Agencies: Home, Church, Catechumenal, Cathedral and Catechetical Schools

Methods: Catechetical method; memorization; exposition and exhortation; parable or short allegorical stories

Contributions: Ideal humanitarianism of Christ; Equality before God; Full recognition of the integrity of human persons; Baptism

Saracenic Education

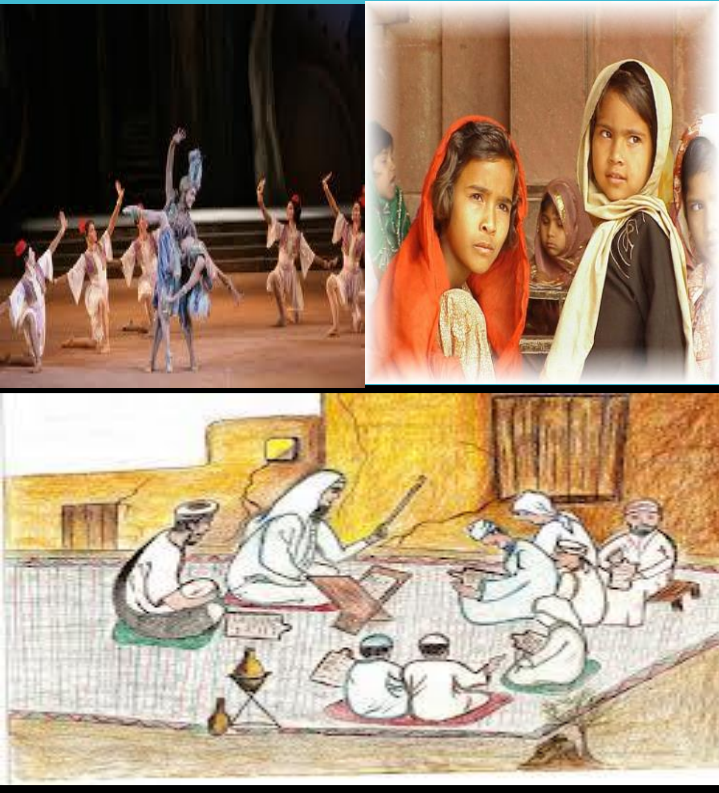

Aims:

- To apply religiousness in Islam;
- To apply science for practical purposes
- To develop and assimilate scientific knowledge
- To develop individual initiative and social welfare

Types: Religious Education, Professional Education, Vocational Education, Avocational Training, Science Education

Agencies: Mosque, kuttab, special departments, medical schools

Saracenic Education

Methods:

- Repetition and drill, memorization and imitation, lecture, observation, experimentation

Contributions: Hindu Arabic numerals, decimal system of notation, algebra and trigonometry, using laboratory and experimental method, practical application of science in any human activity, placing importance to libraries as centers of learning

Monasticism

Aims:

- Religious Discipline
- World renunciation, salvation of individual souls, To attain highest spiritual perfection
- To attain the ideals of chastity, poverty and obedience

Agencies: Monasteries and Monastic schools

Content: Trivium and Quadrivium

Organizations: Home, Economic Structure and Political State

Monasticism

Methods:

- Catechetical method, dictation, memorization, language, discipline and meditation, contemplation/ thoughtful reflection

Contributions: Preserving and spreading learning and culture by Christian monasteries, opposition to vices and corruption, taming the warlike spirits and dignity of labor

Scholasticism

Aim:

- Intellectual Discipline
- To support authority to the intellect to justify faith by reason

Agencies: Parish schools, monastic and cathedral schools; palace schools and university

Methods: Argumentative/Disputive method; lecture, repetition & examination method, Aristotelian Logic and Problem Method

Contribution: Organization of university and emphasis on intellectual training

Chivalry and the Age of Feudalism

Aim:

- Social Discipline
- Develop morality, responsibility, horsemanship, gallantry, religiosity and social graces to the sons of nobility

Agencies: Home, Court, Caste, Tournament Fields, Battle Fields, Troubadors, Minnesingers & Minstrels

Content: Religion, music, horse riding, hunting and tournaments, physical exercises, reading, writing literature in vernacular, etiquette, household duties & 7 free arts

Chivalry and the Age of Feudalism

Methods:

- Observation, imitation and practice; Apprenticeship and Motivation

Contributions:

- Use of vernacular for teaching, emphasis on learning of social graces & etiquette

Guild System of Education

Aims:

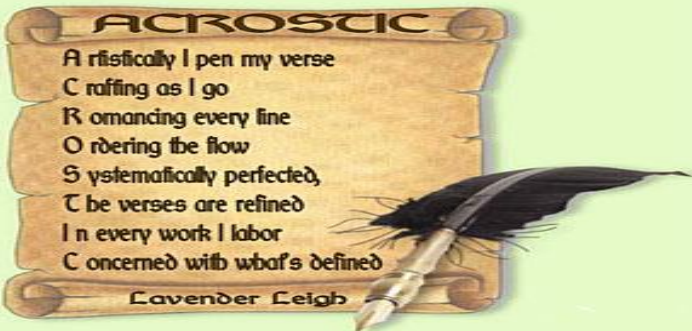

- Business interest and preparation for commercial and industrial life;
- Vocational Preparation

Agencies: Burgher Schools; Chantry School and Guild School

Methods: Observation, Imitation & Practice; Dictation, Memorization, Catechetical methods and Discipline

Contributions: Vocational training; Apprenticeship

Italian Humanism (De Feltre)

Aims:

- Academic freedom,, abundant living & Liberal Education

Agencies: Elementary, Secondary and University

Content: Poetry, Drama and Romance, Human Interests and Nature

Methods: Lecture, Writing themes, self-expression, Balanced Activities, Motivation, Elimination of corporal punishments

Contributions: Establishment of secondary schools, modern academic freedom, renewed interest in Classics, Use of Texts, Written themes

Northern Humanism (Erasmus)

Aims:

- Social, Religious and moral, literacy, literature and democratic

Agencies: Elementary, Secondary and University

Content: Biblical and classical literature, church catechism, Hebrew language, History, Geography and Science

Methods: Ciceronianism, Memorization, Pleasant classroom work, Excessive formalism, Religious Indoctrination and Humanistic Elements

Contributions: Class-a-Year Practice, Social Education

Reformation

Aims:

- Religious Moralism, Protestant Ethics, Literacy Promotion

Agencies: Vernacular School, Secondary School and University School

Methods: Ciceronianism, Memorization, Excessive formalism, & Religious Indoctrination

Contributions: Saxony Plan, Class-a-Year Plan and Vernacular Elementary School

Catholic Counter Reformation

The Catholic Reformation

Reforms, 1500-1545
Counter-Reformation, 1545-1600

Aims:

- Religious Moralism and Complete Obedience to the Church, Leadership Training and Education of the Poor and Spiritual Salvation

Agencies: Elementary Schools, Secondary Schools, Higher Schools, Teacher-Training Schools

Contributions: Conception of the roles of teachers, well-knit hierarchical structural organization of a school system, teacher education, grouping of pupils according to ability level, Phonetic Method, Discovery of New World and Industrial Revolution

Catholic Counter Reformation

The Catholic Reformation

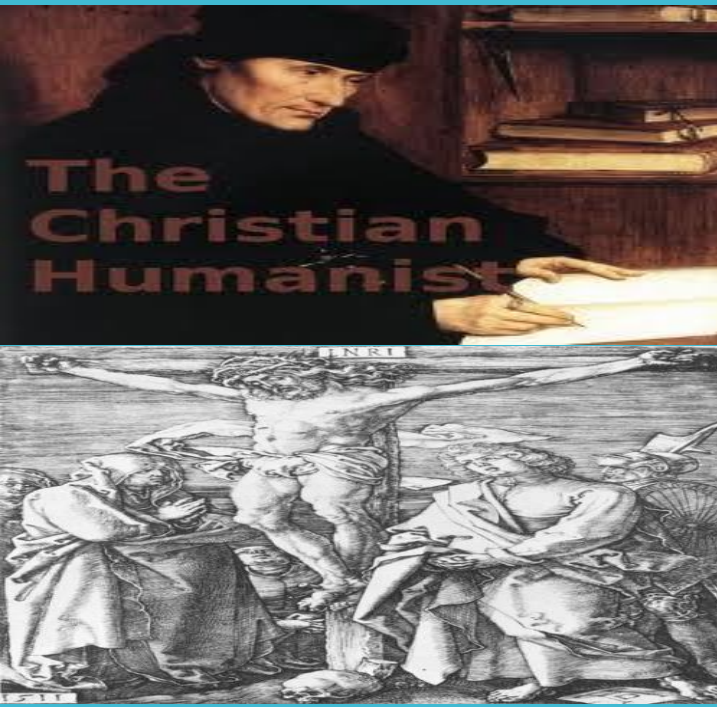

Reforms, 1500-1545
Counter-Reformation, 1545-1600

Methods:

- **Jesuits** (to train leaders) Doing a small amount of work at a time, doing it well and make sure it is retained; prelection and repetition, adapting the lesson to the students't abilities; participation, review and motivation by rivalry and emulation
- **Christian Brothers** (teach the poor) Grading according to ability; class recitation
- **Jansenists** (for spiritual salvation) Phonetic Method, Understanding before memorizing and use of textbooks

Humanistic or Verbal Realism

Aim:

- Complete knowledge and understanding as to fit the individual to the environment which we live

Views:

"Education should develop personality" – Vives

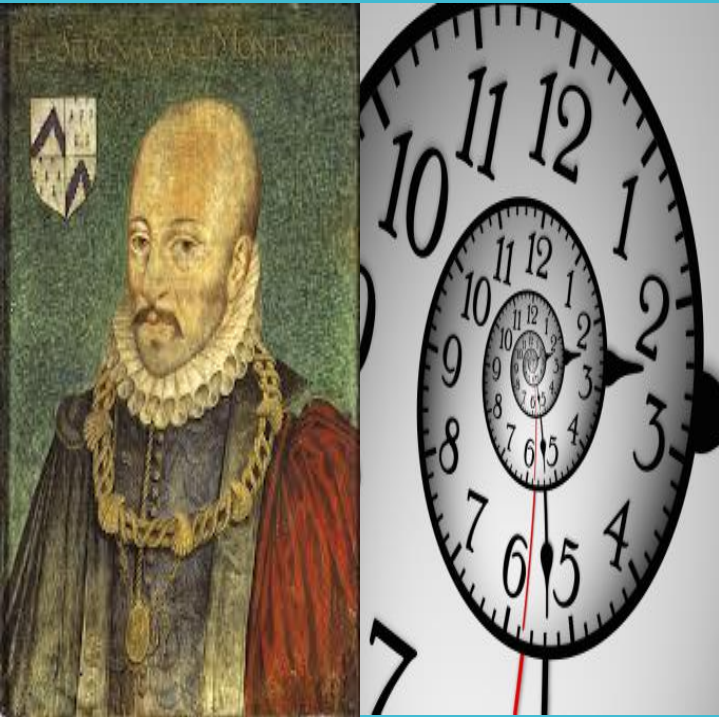

"Aim of learning was the development of the whole man." – Rabelais

"Education was to prepare for actual living." – Milton

Agencies: Home, Public day school, academy and university

Contribution: Practical education to adjust man to his environment

Social Realism (de Montaigne)

Aim:

- Pragmatic, Utilitarian, Social Relation and Decision-Making

Agencies: Tutor, Academies, Ritterakademie

Contribution: Tutorial system, finishing school and private military academies

Sense Realism (Comenius)

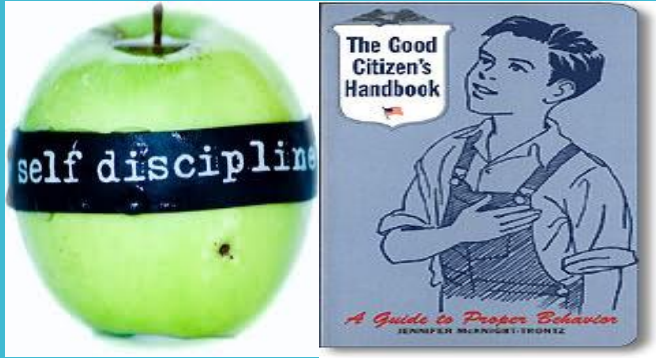

Aim:

- (Mulcaster) for harmonious society; (Bacon) increase scientific knowledge of man; (Ratke) Learning by senses; and (Comenius) religious, intellectual and practical

Agencies: Model educational institution; 6-year vernacular elementary school; school of Mother's Knee, Latin school, university, Pedagogpoium (school of science and language) Realschule (Pure and applied science)

Disciplinism

Aim:

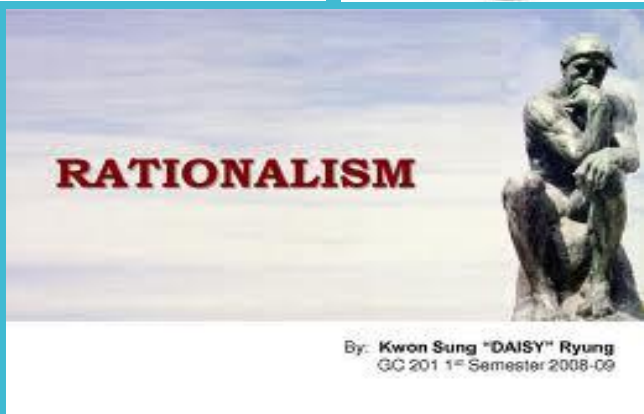

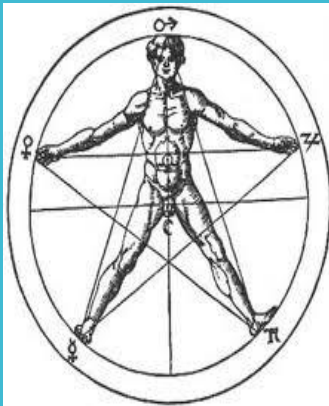

- Formation of habits through discipline

Agencies: Tutor, Elementary School, Secondary School, University

Types: Drill and exercise, sense learning, memorization, reasoning, corporal punishment was used extensively

Contribution: Formal Discipline

Rationalism

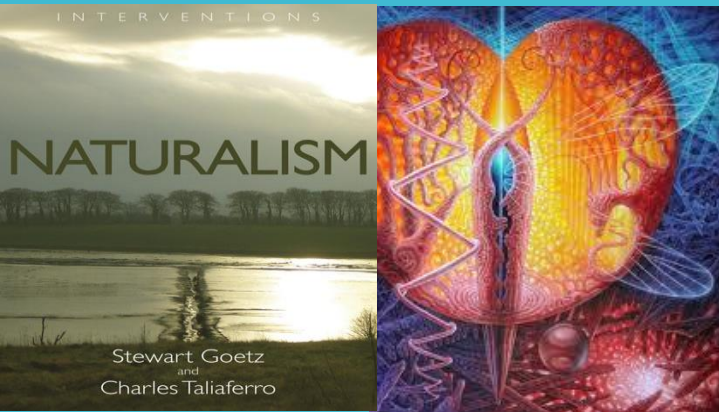

Aim:

- Development of individuals who could control all the aspects of life by reason

Agencies: Secondary and higher schools, encyclopedia, fashionable salons

Contribution: Training of creative thinking and reasoning, logic, inductive method

Naturalism

Aim:

- Preservation of natural goodness of man and virtue; individual freedom and creating a new society

Agencies: Home and Tutor

Contribution: 3 Modern Principles of Teaching – Principle of growth, pupil activity and individualization; Order of Nature – Need, Activity, Experience and Knowledge

History of Philippine Educational System

Pre-Spanish Period

Aim:

- For survival and conformity; for enculturation

Training: Domestic chores and practical/occupational honing of skills; Theoretical/ moral and spiritual awakening

Methods: Demonstration Method; Observation and Imitation; Indoctrination

Content: Broad, indefinite and unwritten; Unstructured/ incidental

Pre-Spanish Period

Evidences for an elaborate civilization:

- *Effective Technology* – ceramic industry 4000 BC
- *Predictive Sciences* – Preserved mummies
- *Art & Religion* – Petroglyphs or Line Drawings
- *Foreign Trade* – barter with Tang Dynasty
- *Big Population Center* – 20,000 in Manila
- *Megalithic Structures* – Payew of Ifugao
- *Government* – Barangay System
- *Laws* – Code of Kalantiaw
- *Warfare* – Barangay vs. Barangay

Spanish Period

Aims:

- Indoctrination of Christianity; Promotion of the Spanish language; Imposition of Spanish Culture

Agencies: Home, parochial schools, visitas, colegio, beaterio

Content: Christian Doctrine, arithmetic, music and various arts and trades, Spanish and vernacular

Methods: Dictation, Memorization, Moro-moro, cenaculo, zarzuela, etc.

Media of Instruction: Latin, Spanish, vernacular

Spanish Period

Type:

- Authoritarianism, Teacher-dominated, Subject-centered and imposition of severe discipline

Contributions:

- Upliftment of Phil. Education
- Establishment of an overall public school system
- Training of teachers
- Complete system of education
- Church domination in education
- Production of grammars and dictionaries

American Period

Aim:

- To promote democratic ideals and way of life

Agencies:

- Parochial schools, municipal schools, universities, public and secular schools, state university (UP)

Contents:

- English language, reading, writing, arithmetic, GMRC, civics, hygiene and sanitation, gardening, domestic science, American history and Philippine History

American Period

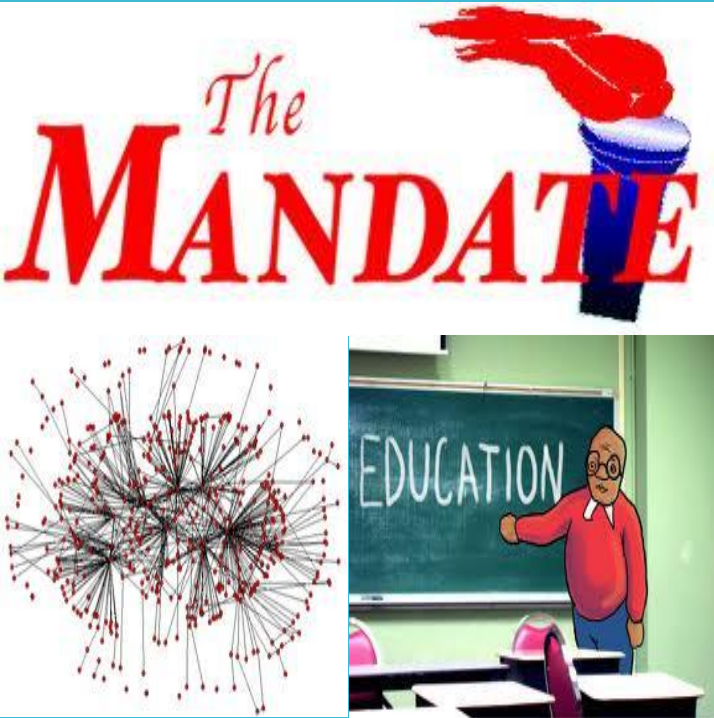

Method:

- Democratic way of teaching

Contributions:

- Religious freedom was enforced
- Emphasis on citizens of the future
- Citizenship education for adults
- Democratic ideal as a philosophy was emphasized
- Supervision of schools took the role of guidance and consultancy

American Period (Legal Mandate)

BAP: “America would assume full control and administration of Philippine affairs”

Ed Act 1901: Act No. 74

- Establishment of a highly centralized
- Importation of Thomasites
- Separation of Church and State
- Creation of Philippine Normal School

Reorientation of the Aims based on Monroe Survey

- Training for self-government and Provision of English as a common language

Commonwealth Period

Aims: To develop moral character, personal discipline, civic conscience and vocational efficiency; and to teach the duties of citizenship

Agencies: Public and Private (Sectarian and Non-sectarian) School

Content: Character Education and Citizenship Training

Legal Mandate

Exec. Order No. 17 – Quezon Code of Ethics – which laid the foundation of emerging philosophy of Philippine education

Commonwealth Period

Exec Order No. 134 – Tagalog as the basis of a national language

Exec Order No. 263 – required the teaching of Filipino national language in the senior year of all high schools and in all years in the normal school

Education Act of 1940 (C. A. 586) –

- a. Reduction of the 7-year elementary education
- b. 7 years as school entrance age
- c. National support for elementary education
- d. Compulsory attendance of primary children in G1
- e. Adoption of a double-single sessions in the primary grade with 1 T, 1 class assignment of intermediate teachers

Japanese Era

Aims:

- Understand the East Asia Co-Prosperity Sphere;
- Eradication of reliance to western states;
- Fostering a Filipino culture as orientals;
- Elevating the morals giving up on materialism;
- Diffusion of elementary education and promotion of vocational education
- Diffusion of the Japanese language and termination of the use of English; and
- Inspiring the people with the spirit of labor

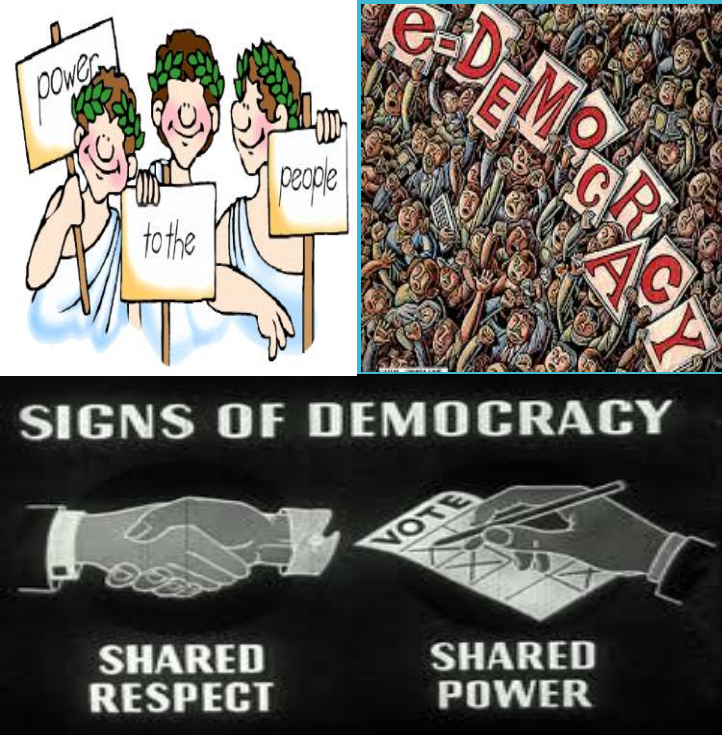

Japanese Era

Agencies / Content:

- Training at schools on vocational, technical and agriculture;
- Opening of vocational schools
- Establishment of agricultural schools and colleges
- Curricular content was centered on values rooted on love for labor; emphasizing vocational education; diffusing the use of Nippongo; and teaching physical education and singing Japanese songs

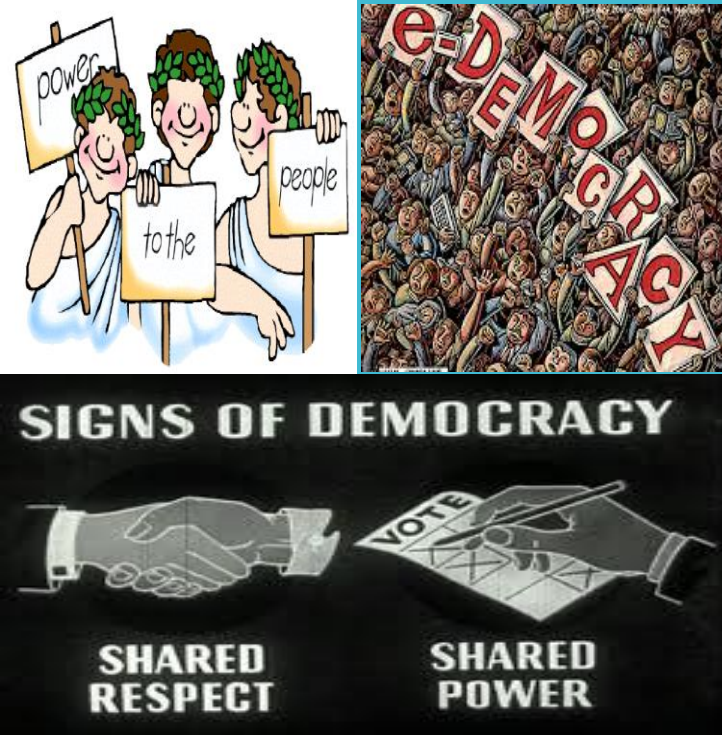

Third Republic

Aim: Full realization of the democratic ideals and way of life

- Democracy is upon the intrinsic worth of the individual
- Realization of capacities in a social contract
- Society is not separated from the individual
- Democracy thrives on change: dynamic & flexible
- Fosters persuasion and consensus and rejects coercion & indoctrination

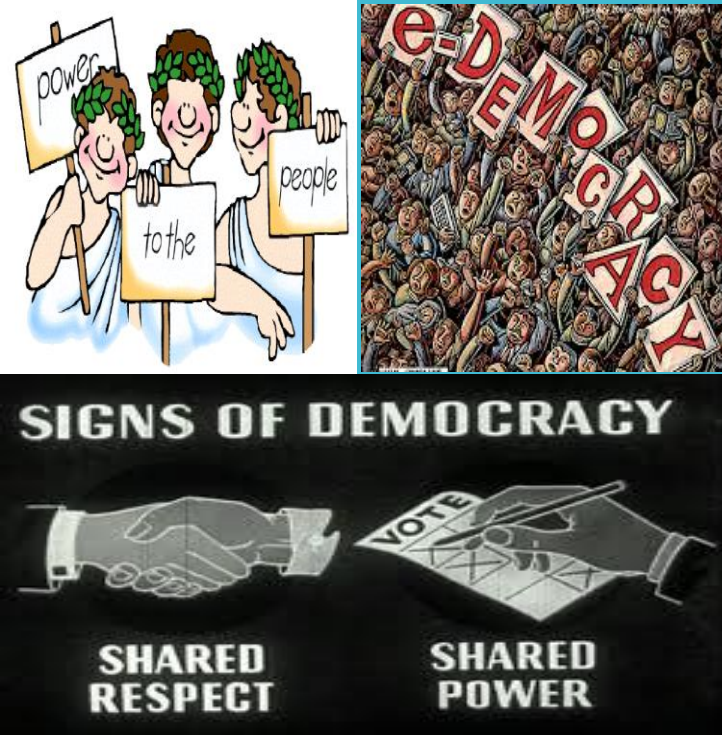

Third Republic

Legal Mandates: Screening and adoption of textbooks in public schools (R.A.139)

- Civil Service eligibility of teachers (R.A. 1079)
- BNE was tasked to formulate educational policies
- Compulsory daily flag ceremony and singing of National Anthem (R.A. 1265)
- Study of life, works and writing of Rizal (R.A. 1425)
- Nationalization of elementary education and abolishment of matriculation fees (R.A. 4007)
- Promotion of the socio-economic status of public school teachers (R.A. 4670)

Third Republic

Legal Mandates:

- Finance and support provincial schools and Special Education Fund and local school board (R.A.5447)
- Rise of Barrio High Schools by Dr. Pedro T. Orata (R.A. 6054)
- Constitutional Convention (R.A. 6132)
- Exec. Order No. 202 – Presidential Commission to Study the Philippine Education

New Society

Aims: (P.D. 6-A of 1972)

- Provision for a broad education which will enhance self-actualization
- Manpower training in middle-level skills; and
- Development of the high-level professions and evaluation

Aims: (1973 Constitution)

- To foster love of country;
- To teach the duties of citizenship; and
- Develop moral character, self-discipline and scientific, technological and vocational efficiency

New Society

Agencies/ Contents Studied:

- Curricular changes in Elem Ed
- Focused on education
- Integration of values in all learning areas
- Emphasis on mastery learning
- Curricular changes in secondary education
- Increased in time allotment
- YDT and CAT introduced as new courses
- Elective offerings as part of the curriculum

New Society

Medium of Instruction: Bilingual Policy

Educational Programs:

- Proj IMPACT – Inst'l Mngmt by Parents, Community & Teachers
- ISOSA – In School- Off-School Approach
- CPS – Continuous Progression Scheme
- PRODED – Program for a Decentralized Educational Development
- NCEE – National College Entrance Exam
- NEAT – National Elem Assessment Test
- NSAT – National Secondary Assessment Test

New Society

Legal Mandates:

- P.D. No. 1 – decentralization of DECS
- PD 146 – NCEE Law
- PD 907 – Tertiary honor students are granted civil service eligibility
- Dep Order No. 25 – Bilingual Education Program
- P.D. 1006 – Teachers are considered professional and teaching as a profession upon passing PBET
- BP 232 – Establishment and Maintenance of Integrated System of Education
- Voluntary Accreditation
- Government Financial assistance to private school

Post EDSA

Aim: Promote national development and values education

- **Implementation of NESC**
- Fewer learning areas, emphasis on mastery learning
- Focused on development of 3R's
- Emphasis on the development of intellectual skills
- Focus on the development of humanism and Filipinism in all learning areas

Post EDSA

Implementation of SEDP

- Subjects generally oriented to the development of values;
- Specific competencies
- Concept-based subject areas
- Uni-disciplinary treatment of curriculum content

Post EDSA

Implementation of NSEC

- Multi-disciplinary treatment of curriculum content
- Student-centered
- Cognitive-affective manipulative based curriculum
- Values education as separate subject area
- Emphasis in Science and Technology
- Uses bilingual policy
- Critical Thinking emphasized

Post EDSA

Education for All – Future Direction – anchored on humanitarianism and equalitarianism

- **ECCD** – Early Childhood Care and Development
- **UQPE** – Universal Quality of Primary Education
- **EOI** – Eradication of Illiteracy
- **CE** – Continuing Education

Post EDSA

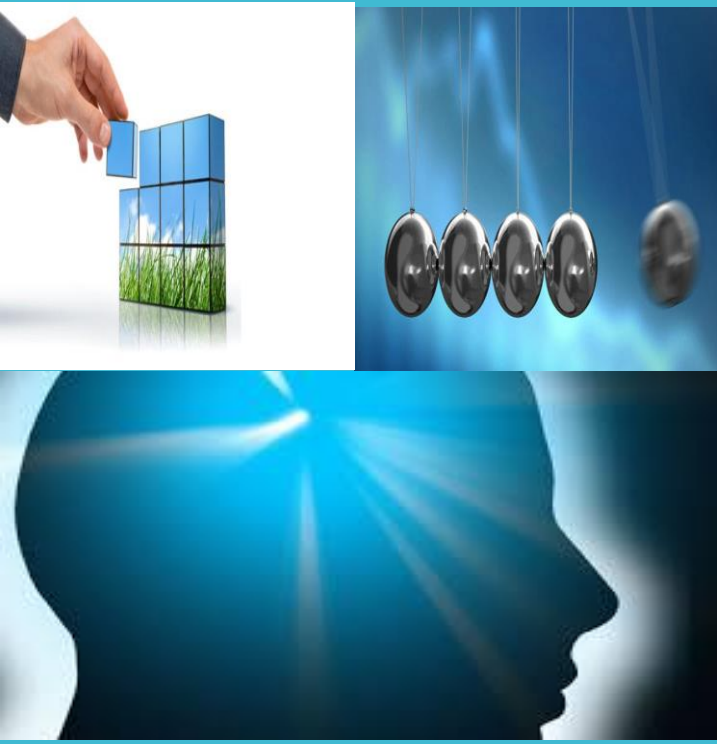

Provisions:

- RA 6850 – granting of civil service eligibility who have rendered at least 7 years of service
- Trifocalization of Educational System – RA 7796, RA 7722, RA 9155
- CENTREXES (RA 7784)
- RA 7836
- Technical-vocational reform
- RA 7323 – Student Employment Law

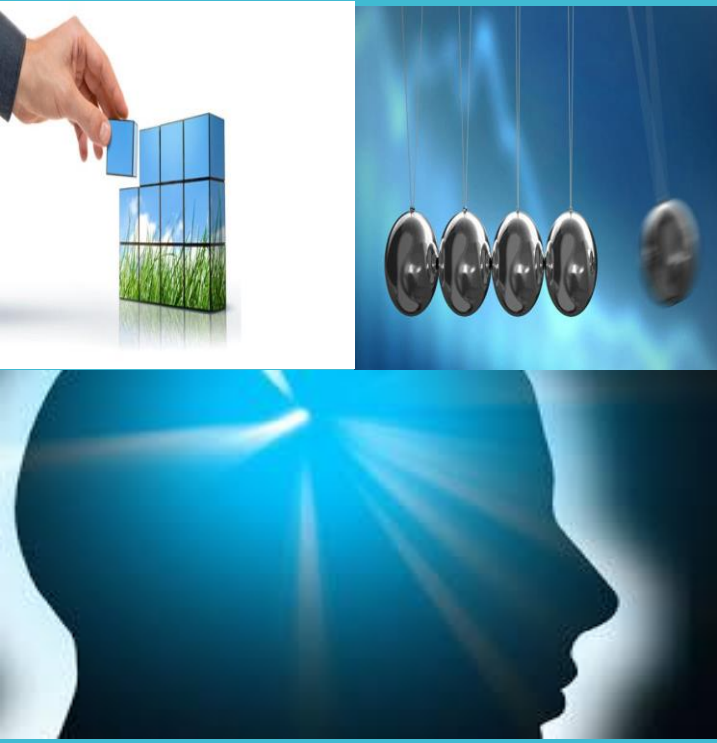

Philosophical Foundations of Education

Nature of Philosophy

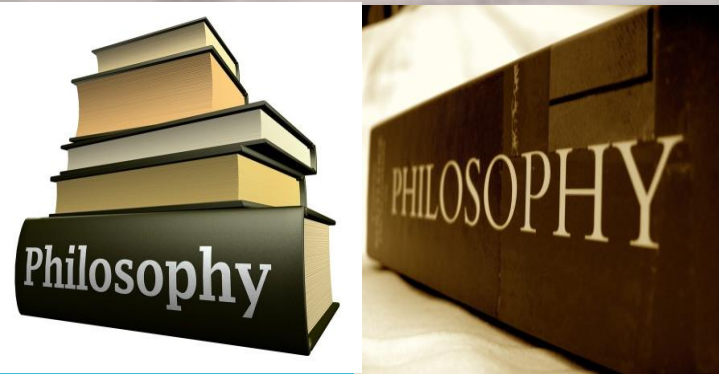

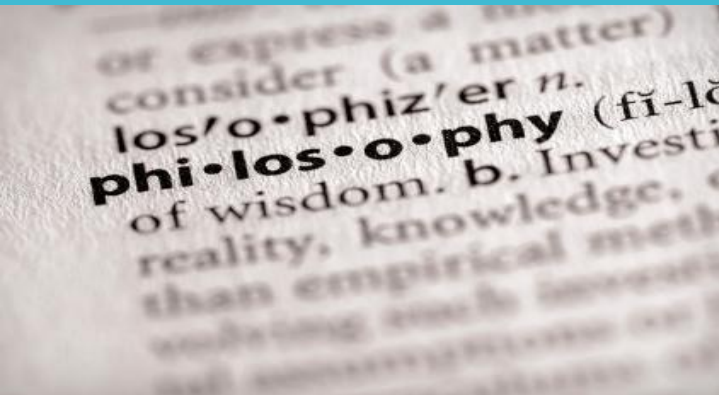

- from the Greek ***philein*** which means to love and ***Sophia*** meaning wisdom
- A set of ideas formulated to understand the basic truth about the nature of being and thinking
- It is the science of beings in their ultimate reasons, causes and principles acquired by human reason alone (C. Brittle)
- It is the study of general and fundamental problems concerning matters such as *existence, knowledge, truth, beauty, law, justice, validity, mind and language*

Importance of Philosophies of Education

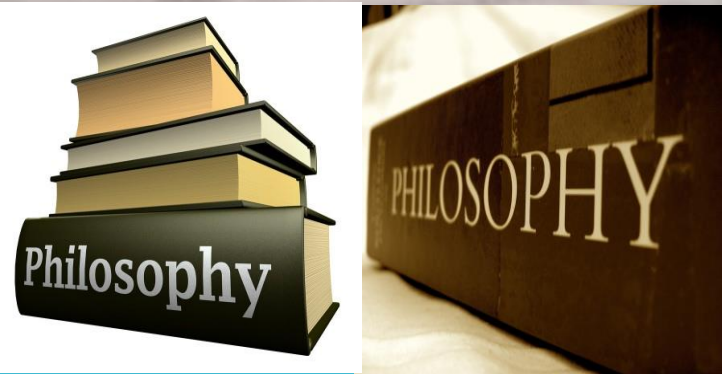

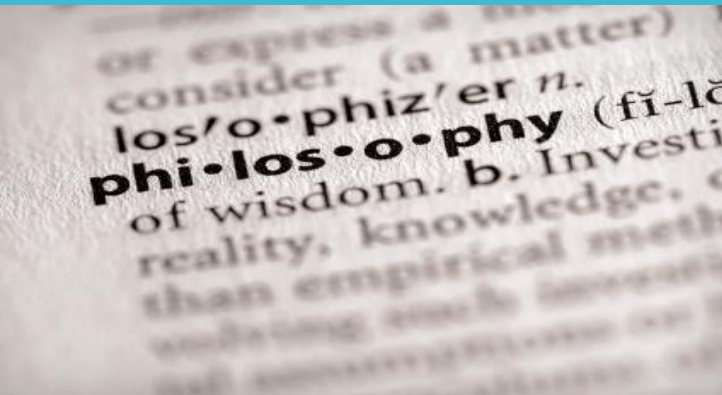

- Provides guidelines in the formulation of educational policies and programs & in the construction of curricula
- Provides direction toward which all educational efforts should be exerted
- Provides theories & hypotheses in education that may be tested for their effectiveness and efficiency
- Provides norms or standards for evaluation purposes

Types of Philosophy

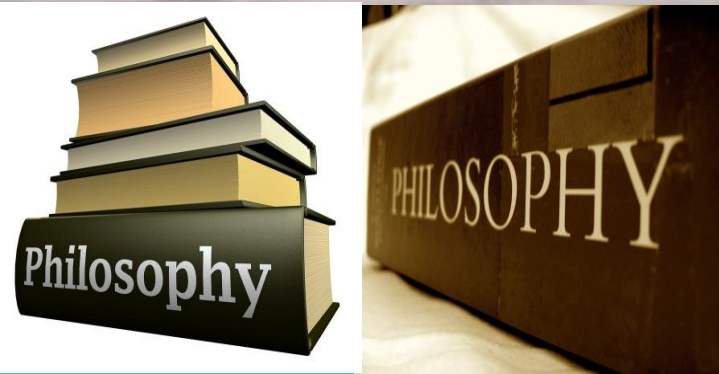

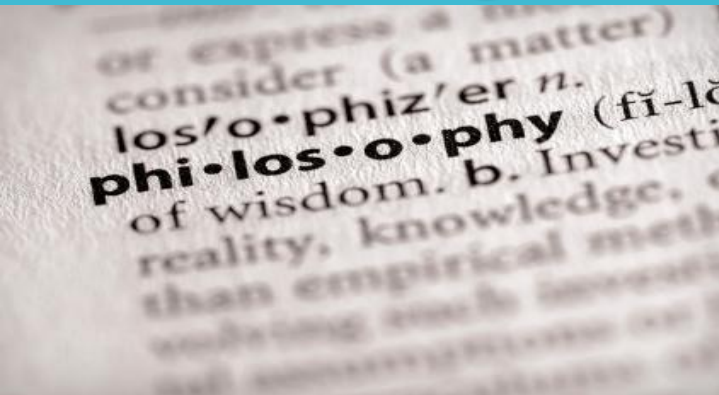

1. **Speculative or Synoptic** – systematic thinking designed to arrive at world views, coherent systems of thought or world outlook.
2. **Prescriptive or Normative** – reflective thinking that strives to formulate goals, norms or standards to guide human thinking & conduct.
3. **Analytical or Critical** – critical thinking that aims to examine ideas, concepts, issues or problems with the purpose of clarifying them.

Branches of Philosophy

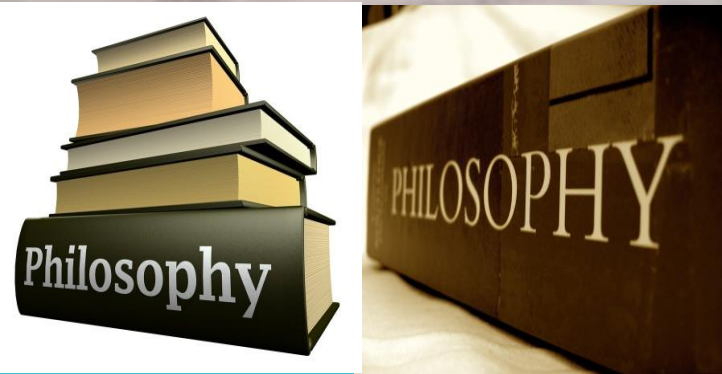

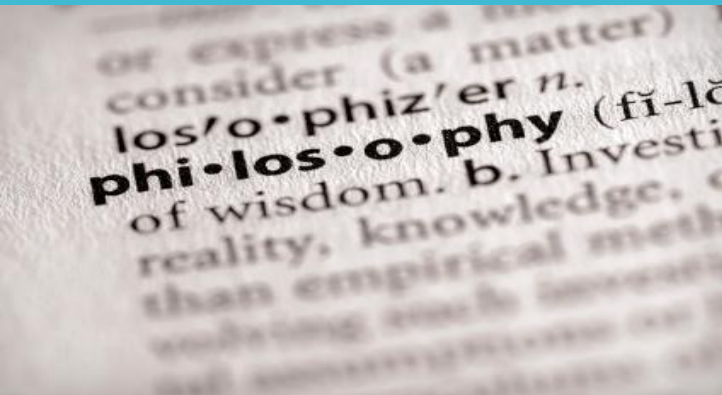

1. **Metaphysics** – theory of reality. It deals with the nature of being and reality, essence of God, as well as the origin and purpose of the universe.
2. **Epistemology** – study of knowledge. Its concerns are the nature, processes and ways of establishing the validity of knowledge.
3. **Logic** – the science and art of correct thinking/reasoning.
4. **Axiology** – deals with values in general thinking.

Positions in relation to knowledge

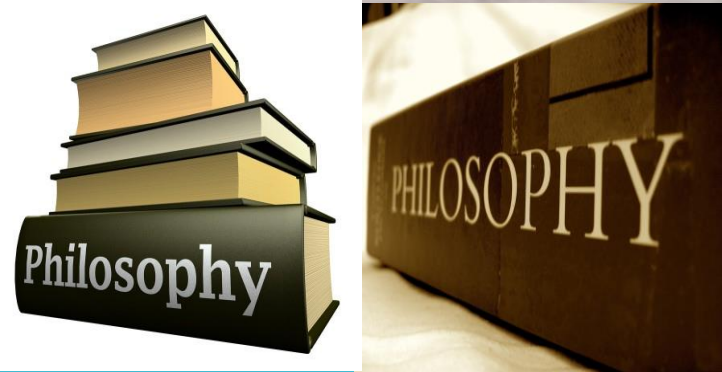

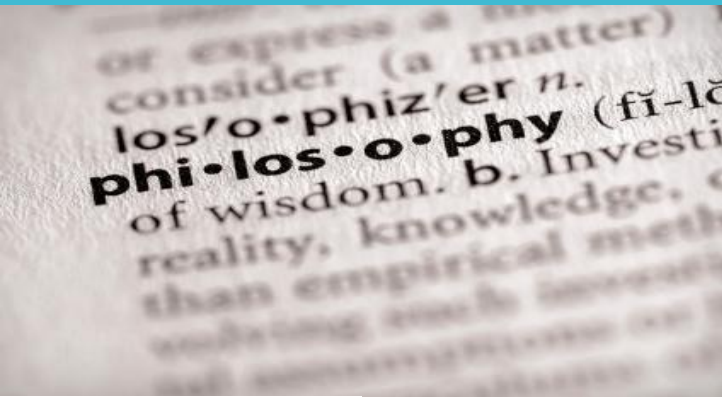

- **Agnosticism** – “not being able to know”. Believes in the impossibility of knowledge
- **Skepticism** – the doubting or questioning attitude towards knowledge
- **Affirmation of knowledge** – is the belief on the possibility of knowledge

Types of knowledge in relation to observation

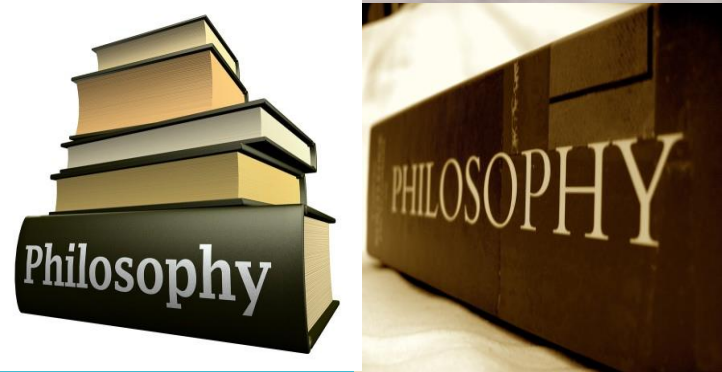

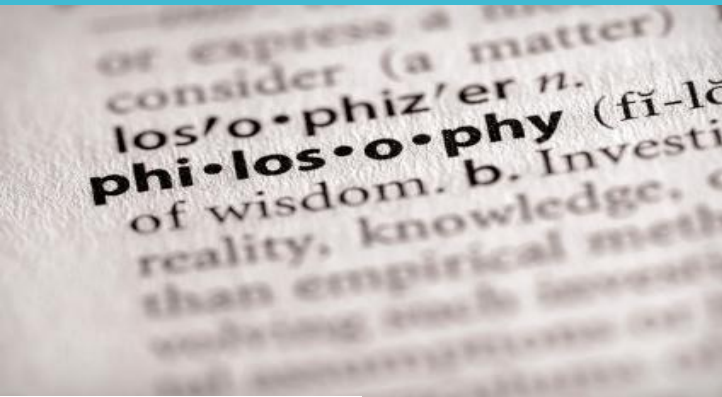

- **A priori** – “from before hand”. It is the reasoning that knowledge comes from pure reason alone and knowledge is independent and even comes before experience.(Rationalism)
- **A posteriori** – “from behind hand”. It advanced the idea that knowledge comes from experience. (Empiricism)

Types of knowledge accdg to means of acquiring them

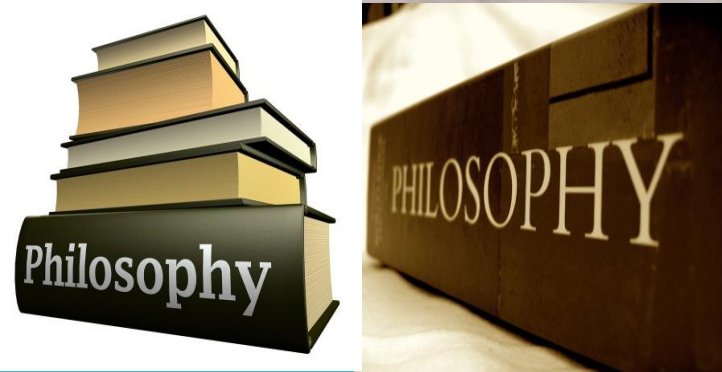

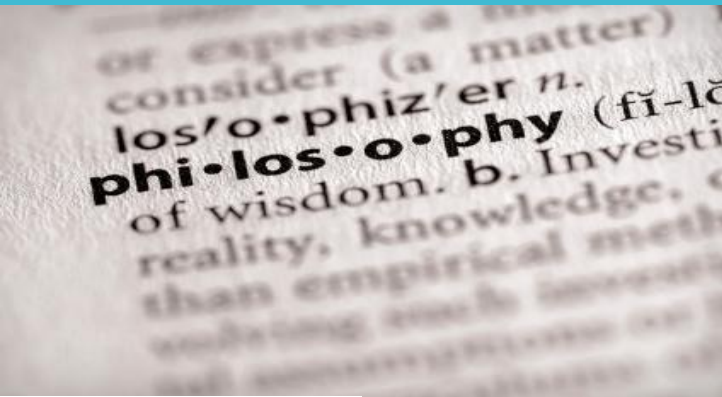

- **Empirical** – sense perception, or scientific knowledge
- **Rational** – primarily from reason
- **Intuitive** – intuition, sudden flash of insights
- **Authoritative** – authority or expertise
- **Revealed** – disclosed by God to man

Modes of Thinking

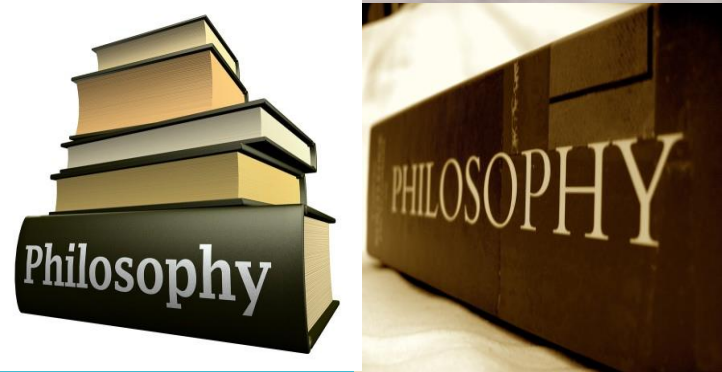

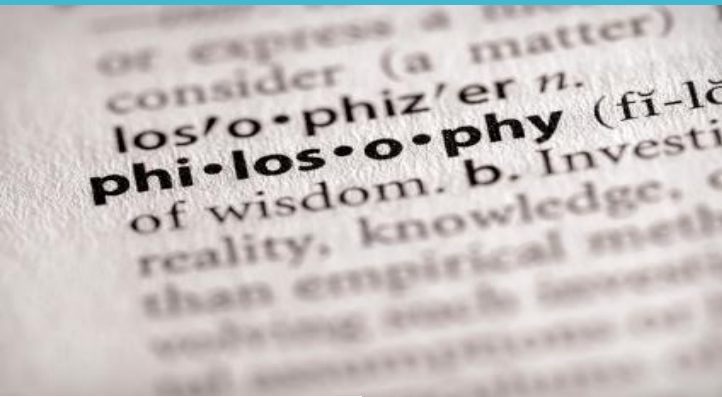

- **Inductive** – from particulars to general or universal
- **Deductive** – from general to specific/ particulars/ Syllogisms
- **Dialectic** – contrast or conflict of ideas, e.g. Hegelian Dialectic
- **Experimental** – testing of hypothesis that uses induction and deduction

Kinds of Values

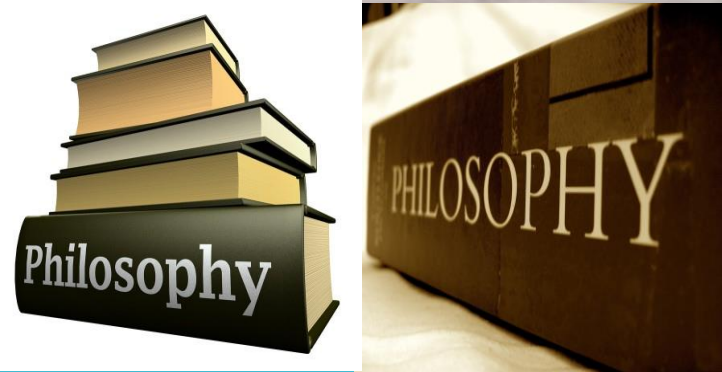

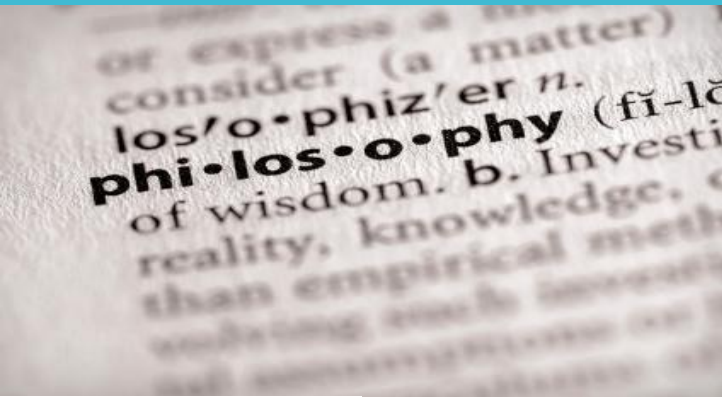

- **Ethics** – theory of morality
- **Aesthetics** – realm of art and beauty
- **Religious** – realized through worship, experience and service
- **Educational** – derived from the educative process
- **Social** – realized in community through individual's relation to society
- **Utilitarian** – harmonious adjustment to or efficient control of the forces of the physical environment

The East and West Philosophies

- Distinctions between religion and philosophy is not so important to the East, while the dichotomy works in the West.
- Eastern thinks of time in cyclical manner but the West thinks straightforward.
- The East resorts or relies much on intuition and mysticism. The west relies on logic and science

Man's Nature: Concepts of Man

- **Man is one Self.** Individuality is given up voluntarily and places the group above oneself. Man's way of life is characterized by harmony (***wa***) and peace with nature (***tao***).
- **Concept of freedom.** Man has no free choice it is laid out of his birth.
- **Concept of ideation.** The material aspect of knowledge is always coupled with the spiritual.
- **Ethics.** Logic is intuitional rather than logical; experiential rather than rational.

Hinduism

- Reincarnation
- Transmigration of souls
- Law of karma
- Believes that bondage to suffering arises from the involvement of puruska (self) with prakriti (nature) and release it when ignorance is overcome by Yoga
- It sees God as guiding the world in accordance with the law of karma

Buddhism

- Is a way of life by which one can free himself from ignorance and suffering and establish peace and happiness of mind
 - Goal: Attainment of **Nirvana** – a state of mind of complete peace
1. Things are in constant change;
 2. All beings are subject to suffering;
 3. Nothing exist without cause;
 4. There is no independent, categorical and permanent self
 5. All beings have a Buddha nature

Buddhism

- 4 Noble Truths
 1. Truth of existence of suffering
 2. Truth of the cause of suffering w/c is ignorance
 3. Truth of cessation of suffering
 4. Truth of the path to cessation of suffering
- Enlightenment
 1. Eightfold path
 2. Six Paramitas

Confucianism

- Human nature is originally good, hence, government should rely on moral example and social education
- Nature and principles are good because it is the characteristic of heaven and earth to create, to produce, to give life and therefore to love.
- Men should be the master of their own destinies.
- The primacy of family and duties of the members should be taught, stressing harmony, unity and goodness of ethical life.

Taoism

- “All things originate from ***Tao*** (nature), conform to Tao, and to Tao they last return.
- Metaphysics of impermanence and change and the person who attains a clear vision of the essential harmony of things.
- Eternal principles of the Absolute
- Totality of beings and things
- Phenomenal world and its order
- Eternal nature of the good man and the principle of his action

Zen Buddhism

- One to harmony with the universal, all-permeating rhythm of the *cosmos* (nature)
- When Zen operates successfully. The symptoms of disharmony, consciousness (a danger sign) and will (sickness) disappear so that one is left in a condition of “elation” or “sense of wonder,” where the self becomes irrelevant.
- It advocates teaching that does not make use of rational analysis
- Pupils cannot learn unless he first has made all his mistakes for until then he cannot even begin to understand his teacher.
- Dependence on oneself, intuition and silent meditation

Islam

- “Islam” means to surrender
- “Muslim” those who submit
- Five Pillars: Shahada, Salat, Zakat, Sawm and Hajj
- Articles of Faith
 1. There is only one true God whose name is Allah
 2. Angels are supernatural beings who are inferior to God, but superior to man.
 3. There are 4 inspired books of Scriptures, which God has revealed to man
 4. Allah has spoken to man through many prophets
 5. There will be a resurrection of the dead and a judgment day at the end of the world

Realism

- Views reality based on what we observe with our senses
- Schools exist to reveal the order of the world and universe
- Students are taught factual information

Nature:

- Values are dependent upon the attitudes of the sentiment beings experiencing them.
- Investigating and reasoning are important in any effective adjustment to the real world in the control of experiences.

Realism

Assumptions

- Primary qualities of experience exist in the physical world.
- Mind is like a mirror receiving images from the physical world
- The mind of a child is a tabula rasa upon which the world proceeds to write its impressions
- Nature is a primary self-evident reality
- Consciousness is not a substance but an awareness of experience

Realism

Educational Aim

- Gives direction and form to individual's basic potentialities
- Determines the direction of the individual's inherited tendencies
- Provide an education that could produce a good individual and a good society by meeting 4 principal needs of an individual: aptitude, self-determination, self-realization and self-integration.

Curricular Emphasis: combination of disciplines and problem-centered concepts or real problems

Realism

Teaching Methods: Scientific Method

Character Development: Training in rules of conduct

Teacher's Roles:

- Help the students realize irresistible necessity of earth's physical forces
- Help develop initiative and ability to control their experiences
- Help realize that they can enter into the meaning of their experiences
- The students would be taught factual information for mastery

Realism

School's Roles:

- Further develop discipline
- Utilize pupil activity through instruction
- Speak with authority
- Regard the pupil as more superior than other objects
- Change in the school would be perceived as a natural evolution toward perfection of order.

Idealism

- Emphasizes the importance of mind, soul or spirit. Truth is in consistency of ideas. Reality is a world within a person's mind.
- Schools exist to sharpen the mind and intellectual processes

Nature:

- Its origin can be traced back to Plato's ideas
- Stresses the mental, moral and spiritual nature of an individual and his universe
- Advocates that education is both a basic need and a basic right of man

Idealism

Assumption:

- God is the absolute ideal and all positive values are fully realized and enjoyed through Him
- Every individual is born good, and is capable to sense, perceive and think
- The self is the ultimate reality of individual experiences
- The individual self has all the freedom for self-determination
- One's perception of the world is rooted in his existence
- Values depend on how persons pass & enjoy them
- Social values are realized when an individual recognizes that he is part of the total society

Idealism

Educational Aim:

- To develop the individual spiritually, mentally and morally

Curricular Emphasis

- Subject matter of mind: Literature, History, Philosophy, Religion, Mathematics and Arts

Teaching Methods

- Lecture-Discussion, Excursion, Question and Project Method

Idealism

Character Development:

- Imitation and Emulation of heroes

Role of Teachers:

- Chief source of inspiration
- Creator of educational environment

Role of School

- Agency of the society
- Thinking institution

Pragmatism/ Experimentalism

Pragmatism is primarily conceived with the knowledge process, the relationship of ideas to action – reflective thinking

Experimentalism believes that things are constantly changing. Reality is what you experience. Truth is what works right now and that goodness comes from group decisions.

- Schools exist to discover and expand the society we live. Students study social experiences and solve problems

Pragmatism/ Experimentalism

Nature:

- Encourages people to find processes that work in order to attain desired goals
- Practical consequences are the criteria of knowledge, meaning and value
- Conservative

Assumptions

- The world is uncertain and incomplete
- Past is used in dealing with the future
- Experience is incidental in the process of acting, doing and living
- Sensation is an avenue of active relation with the world

Pragmatism/ Experimentalism

Educational Aim:

- Social efficiency
- Train the students to continuously and actively quest for information and production of new ideas needed to adjust to an ever-changing society

Curricular Emphasis

- Creation of new social order
- Problem-based and problem integrated
- Interdisciplinary subject areas
- Academic and vocational disciplines

Pragmatism/ Experimentalism

Teaching Methods

- Experimental methods
- Creative and constructive projects
- Field trips
- Laboratory work
- Library work
- Activity-centered
- Pupil-centered
- Opportunity to practice democratic ideals

Pragmatism/ Experimentalism

Character Development

- Making group decisions in light of consequences

Roles of Teachers

- Keeps order in class
- Facilitates group work
- Encourages and offers suggestions, questions and help in planning
- Curriculum planner

Role of School

- Miniature society
- Gives a balance and genuine experience for democratic living
- Place where ideas are tested, implemented and restructured

Perennialism

- The most conservative, traditional or flexible philosophy.
- Education should focus on developing rationality
- Education is preparation for life and students should be taught the world's permanencies through structured studies.
- Assumes that man's basic or essential characteristic is his ability to reason

Nature

- Truth is constant and universal
- Education is good if it enables the student to acquire knowledge of unchanging principles
- Great ideas have the potential to solve problem in any area.

Perennialism

Assumption

- Education should promote continuing search for truth since it is universal and timeless.
- Education should cultivate human's rational mind
- Education should stimulate humans to think critically and thoughtfully

Educational Aim:

- To develop power of thought, internalize truths that are universal and constant

Perennialism

Curricular Emphasis

- Great ideas or universal principles
- Focused on arts and sciences and areas such as History, Language, Math, Science, Literature and Humanities

Teaching Methods:

- Subject centered
- Methods of disciplining the mind through reading and discussion

Perennialism

Character Development

- Develop the intellect of all learners and prepare them for life

Role of Teachers

- A known master of discipline

Role of School

- Produce intellectually elite individuals to become intellectual

Progressivism

It emphasizes the concept of progress which asserts that human beings are capable of improving and perfecting their environment

Nature

- Exactly opposite of perennialism
- Child-centered

Educational Aim:

- To provide the pupil the necessary skills to be able to interact with his ever changing environment

Progressivism

Assumption

- The curriculum should be derived from the needs and interests of the students
- Effective methods of teaching must consider interests and needs of the students
- Effective teachers provide experiences that will make students active than passive
- Effective education is one that provides the learners with a future better than the past

Progressivism

Curricular Emphasis

- Activity and experience-centered on life functions

Teaching Methods

- Cooperative Learning Strategies
- Reflective Strategies
- Problem Solving Strategies

Character Development

- Improvement and reform in the human condition

Progressivism

Role of Teachers

- Act as resource person
- Guide or facilitate
- Teaches students how to learn and become active problem solvers

Role of School

- Develop personal and social values
- Set up a classroom environment along the lines of democracy

Essentialism

- Traditionalism or conservatism
- Assumes that the values of men are embedded in the universe, waiting to be discovered and understood.
- There is a core of essential and traditional subjects; certain literary classic, language, religion, mathematics, science and history and other materials

Nature: Emphasis is on race experience or the social heritage

Essentialism

Assumption:

- The study of knowledge & skills for the individual are imperative for him to become a productive member of the society

Educational Aim:

- Education provides sound training of the fundamental skills
- Education develops individuals to perform justly, skillfully and magnanimously

Curricular Emphasis: 3R's and essential subjects, Hard sciences and vocation courses

Essentialism

Teaching Methods:

- Deductive method, Drill method, Recitation, Giving assignments or homework, Testing and evaluating, Systematic analysis and synthesis

Character Development

- Values of discipline, hard work and respect for authority

Essentialism

Role of Teacher

- Provide stimulating activities for learning
- Prepare well-organized lesson to prove he is an authority of instruction

Role of School

- Ensure master of essential skills
- Prepare students for real life situations
- Teach students to communicate clearly and logically
