

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

PROFESSIONAL EDUCATION NOTES

A. The Teaching Profession (23)

FOUNDATION OF TEACHING-LEARNING PROCESS: THE TEACHER AND THE COMMUNITY, SCHOOL CULTURE AND ORGANIZATIONAL LEADERSHIP

Foundations of Education

Philosophical Foundations of Education

Some of the most common philosophies of Education

Philosophy	Description
Idealism	Mind and spirit
Realism	Senses; Teach and see (Tangible)
Pragmatism	Practical use; learning by doing; skill
Essentialism	Body of knowledge; going back to basic; content focus
Perennialism	Forever and unchanging
Existentialism	Freedom and choice (what to exist)
Social Reconstructionism	Changing the society
Progressivism	Child-centered; progress/ development of person
Hedonism	Pleasure principle
Utilitarianism	Greater good for greater number; betterment of others
Rationalism	Logical and critical thinking
Behaviorism	Behavior learned from the environment

Historical Foundations of Education

Key Periods on the History of Education

Historical Period	Description
Primitive Societies	→ Survival skills → Practical skills
Greeks	→ <i>Athens</i> : developing well-rounded persons → <i>Sparta</i> : developing soldiers
Romans	→ sense of civic responsibility, administrative and military skills
Arabic	→ Commitment to Islam → Expertise in mathematics, medicine, and Science
Medieval	→ Religious commitment → Social order
Renaissance	→ Humanists as experts in the classics
Reformation	→ Commitment to a particular religious domination → General literacy

Periods of Development in Philippine History

Historical Period	Description
Pre-Spanish Period	→ Survival skills → Practical skills
Spanish Period	→ Beginning of formal instruction/ education → Introduction to Christianity

	→ Educational Decree of 1863: elementary schools in every town/ pueblo
American Period	→ Democratic Ideals → Free public Education
Philippine Commonwealth	→ Nationalism
Japanese Occupation	→ Love for labor → Vocation Education → Health Education
Third republic	→ Full realization of democracy
The New Society	→ Education for national development
Fifth Republic	→ Corazon Aquino: Values Education → Fidel Ramos: Trifocalization → Gloria Arroyo: DepEd → Benigno Aquino III: K-12 → Rodrigo Duterte: Free tertiary Education

Sociological Aspects of Education

Social Science Theories

Theory	Description
Structural – Functionalism <i>Herbert Spencer and Robert Merton</i>	→ Society as a system of <u>interconnected</u> parts, each having a unique function → Purpose of schooling • Intellectual • Political • Economic • Social
Conflict Theory <i>Karl Marx</i>	→ Society as <u>competition</u> for limited resources → Two opposing sides, both aiming for status quo → Education as a powerful means of maintaining power structure
Symbolic Interactionist <i>George Herbert Mead, Herbert Blumer, Charles Cooley and Max Weber</i>	→ Society as the product of shared symbols, e.g. <u>meanings</u> that individuals attach to events → Major tenets • Individual's actions based on meaning • Different people give meaning to the same thing • Meanings change as individuals interact with one another

Violence

Forms of Violence	Description
Physical	Using a part of their body or an object to control a person's action
Sexual	One is forced to participate in sexual activity
Emotional	Someone says or does something to make another feel worthless
Psychological	Someone uses threats, causing fear
Spiritual	Uses an individual's spiritual beliefs to control
Cultural	Individual is harmed as a result of his/her culture, religion, or tradition
Verbal	Use of language (written or verbal) to harm an individual

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Financial	Someone control/ misuse another's financial resources
Neglect	Someone has the responsibility to take care of someone else but does not

- Schools conducting livelihood skills-training seminars

Global Issues that concern Schools

Current Global Issues

- Climate change
- Pollution
- Violence
- Security and well-being
- Lack of education
- Unemployment
- Government corruption
- Malnourishment and hunger
- Substance abuse
- Terrorism

UN Sustainable Development Goals (SDG) 2015 - 2030

- Based on the principle of "leaving no one behind"
- Emphasis on holistic approach to achieving sustainable development
- It follows Millenium Development Goals (MDG) 2000 - 2015

United Nations' 17 Sustainable Development Goals (SDGs)

School Partnership

Partnership: *two parties helping each other for mutual benefit*

What Communities can do for Schools

- Brigada Eskwela
- Curriculum Development
- Work immersion
- Enrichment class
- Youth development programs
- Community Service

What Schools can do for the Community

- Classrooms for organizational meetings
- Schools as polling place and medical missions
- School as an evacuation center
- Facilities used for community assemblies
- Courts used for local celebrations and sports league

Legal Bases for Community Involvement

Governance of Basic Education Act (RA 9155):

encouragement of local initiatives for the improvement of schools, school heads to establish school and community networks

Education Act of 1982 (BP 232):

schools establishing appropriate bodies for assistance and support of school and the promotion of common interest

Adopt-a-school program Act (RA 8525):

allows private entities to assist public school in certain areas

Education for All 2015:

schools to continue harnessing local resources

The Teacher's Ethical and Professional Behavior

From the code of ethics for professional teachers - article III:

Teacher's Role in the Community

Section	Description
1	Teacher as facilitator of learning
2	Teachers to provide leadership and initiative to participate in community involvements
3	Teachers to behave with honor and dignity
4	Teachers to study and understand local customs and traditions
5	Teachers to inform community about the school's work accomplishments and needs (e.g. Parent-Teacher association, School Governing Council)
6	Teacher as intellectual leader in the community
7	Teacher's harmonious relationship with other professionals, government officials and people
8	Teachers to refrain from proselytization (convert other's faith)

Functions of School Head

Roles	Description
Visionary principal, motivator, advocate and planner	→ Leads in setting school's VMG
Builder of networks and support systems	→ Organize/ Expand, school community and local government → Leads in developing and maintaining school (Improvement plan and Management information System)
Curriculum developer	→ Creates conducive physical and psychological climate → School curriculum → Innovative instructional method
Fiscal Resource Manager	→ Personnel, physical and fiscal resources → Encourage and accepts donations, gifts, bequests and grants for educational purposes

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

National Competency-based Standards for School Heads

Domain	Competency Standards
<i>Domain 1:</i> School Leadership	→ Developing VMGO → Database strategic planning → Problem solving → Building high performance teams → Coordinating with others → Leading and managing change
<i>Domain 2:</i> Instructional Leadership	→ Assessment for learning → Developing programs and/or adapting to existing programs → Implementing programs for instructional improvement → Instructional supervision
<i>Domain 3:</i> Creating a student-centered learning climate	→ Setting high social and academic expectations → Creating school environments focus on the needs of the learners
<i>Domain 4:</i> HR Management and Professional Development	→ Creating a professional learning community → Recruitment and hiring → Managing performance of teachers and staffs
<i>Domain 5:</i> Parent Involvement and Community Partnership	→ Parental Involvement → External community partnership
<i>Domain 6:</i> School Management and Operations	→ Managing school operations → Fiscal management → Use of technology in management of operations
<i>Domain 7:</i> Personal and professional attributes and Interpersonal Effectiveness	→ Professionalism → Communication → Interpersonal security → Fairness, honesty and integrity

Philippine Professional Standards for School Heads

Domain	Description
<i>Domain 1:</i> Leading Strategically	→ Setting direction, goals, and objectives of schools
<i>Domain 2:</i> Managing School Operations and Resources	→ Managing systems and processes in schools
<i>Domain 3:</i> Focusing on Teaching and Learning	→ Promoting quality teaching and learning

<i>Domain 4:</i> Developing Self and Others	→ Nurturing themselves and others
<i>Domain 5:</i> Building connections	→ Enagging stakeholders towards improvement of school

PPSSH: Career Stages

- **Career stage 1:** Acquired the prerequisite qualifications for the school head position
- **Career stage 2:** Apply the required knowledge and understanding of the authority responsibility and accountability expected of them
- **Career stage 3:** Consistently display in-depth knowledge and understanding of the authority responsibility and accountability expected of them
- **Career stage 4:** Consistently exhibit mastery in their application of the authority responsibility and accountability expected of them

Competency framework for Southeast Asian School Heads

General competencies

- (1) Strategic Thinking and Innovation
- (2) Managerial Leadership
- (3) Instructional Leadership
- (4) Personal Excellence
- (5) Stakeholder Engagement

Organizational Leadership

- Directing and coordinating individuals to achieve a goal or a mission
- Setting strategic goals while managing individuals within the organization

Leadership vs. Management

Management	Leadership
Administration: transactional	Innovation: transformational
Work-focused	People-focused
Lead by authority	Lead by inspiration
Do things right	Do right things

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Skills demanded from leaders

- **Technical:** process or techniques
- **Human:** working effectively with people
- **Conceptual:** ability to think in terms of models, frameworks and relationships

Leadership Styles

- **Autocratic:** Decision making solely lies with *a person*
- **Consultative:** Decision making lies with a person *upon consultation from members*
- **Democratic:** *Members directly participate* in decision making through consensus
- **Laissez-faire:** *Members left alone* to establish their own work
- **Transformational:** Leaders who make positive change to the organization.
- **Situational:** Leaders who aligned his/her leadership styles based on the context/situation.
- **Servant:** Leaders who serve

Situational Leadership Model: Behavioral Styles

SUPPORTIVE BEHAVIOR ↑	Participating/ Supporting: <i>Experienced but not confident individuals</i>	Selling/ Directing: <i>Novice but enthusiastic individuals</i>
	Delegating: <i>Experienced and confident individuals</i>	Telling/ Coaching: <i>Capable but unmotivated individuals</i>
	DIRECTIVE BEHAVIOR →	

Servant Leadership

- Leading by serving
- “Servant first”

Transformational Leadership

- Leadership that causes change in individuals and social systems
- Not content with the status quo; sees the need to transform the way the organization

Sustaining Change in an Organization

1. Seek support of stakeholders
2. Get people involved early and often
3. Plan a communication campaign to “sell” the innovation
4. Ensure that the innovation is understood by all
5. Consider timing and phrasing

Revised School-Based Management Assessment Tools

Essence of School-Based Management (SBM)

- Decentralized management
- Devolution of power to schools

- School empowerment
- Principle of Subsidiarity “Nothing should be done by a larger, more complex organization which can be done by one that is smaller and simpler”

Philippine Accreditation System for Basic Education (PASBE) - DepEd Order No. 64, s. 2012

SBM-PASBE Operational Framework

Level	Description
I <i>Developing</i>	School is developing structures and mechanisms with acceptable level and extent of community participation and impact of learning
II <i>Maturing</i>	School is introducing and sustaining continuous improvement process, integrating wider community participation and significantly improve performance and learning outcomes
III <i>Advanced</i>	School is ensuring the production of intended outputs and meeting all standards of a system fully integrated in the local community

School Culture

- Beliefs, perceptions, relationships, attitudes and written and unwritten rules that shape and influence every aspect of how a school function

Elements of a Positive School Culture

- Collegiality: friendly school atmosphere; cooperation
- Experimentation: welcoming of mistakes as part of learning process
- High expectations
- Trust and confidence
- Tangible support
- Reaching out to the knowledge base
- Appreciation and recognition
- Caring, celebration, humor
- Involvement in decision making
- Protection of what is important
- Traditions: culture-based program on shared values, beliefs and behaviors
- Honest and open communications

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

PROFESSIONAL EDUCATION NOTES

A. The Teaching Profession (23)

THE PROFESSIONAL TEACHER

TEACHING is the noblest profession

Elements of Teaching Profession (ACLAT)

- A graduate of Bachelor's degree
- Continuing Professional Development (CPD)
- Long years of professional development
- Adhering to code of ethics for professional teachers
- Thesis

Elements of a Profession

- Professional Education
- Accreditation
- Licensing
- Continuing Professional Development
- Professional Societies (Highly encouraged only)
- Code of Ethics

Laws for the Professionalization of Teaching

Presidential Decree 1006

Ferdinand Marcos (1976)

- The professionalization of teachers, regulating their practice in the PH
- First legal basis of teaching
- **PBET** - Professional Board Examination for Teachers
- Registration to **Civil Service Commission**
- Creation of the **National Board for Teachers** (Secretary of Education, Chairman CSC, PRC Commissioner and the two private individuals)
- 70% passing rate
- Certificate awarded

RA 7836

Fidel V. Ramos (1994)

- PD 1006 changed into RA 7836
- Philippine Teachers Professionalization Act of 1994
- Regulation of Licensure Examination for Teachers (LET)
- Licensing from CSC to PRC
- Creation of the Board for Professional Teachers
- Revocation of license by the BPT
- 75% passing rate
- 10 units are required for methods of teaching
- No one shall engage in teaching unless otherwise licensed
 - **Licensing power**
 1. PRC
 2. Board for professional teachers

Ground for revocation of license

1. Immoral Act - heinous crime
2. Insanity
3. Fraud - activity to obtain licensed in illegal way
4. Negligence of duty

RA 9293

Gloria Macapagal-Arroyo (2004)

- Amendment of RA 7836
- 18 units required for methods of teaching
- **Inactive Licensed Teacher** - professional teachers who have not practiced their profession for the past 5 years shall take at least twelve (12) units of education courses/ refresher course, consisting at least 6 units of pedagogy and 6 units of content course
- **Special permit in Teaching** - granted by board for professional teachers
- **Provisions:**

1. Para-Teachers

Those teachers who failed LET with 70% - 74% general weighted average in LET

Para teachers upon issuance by the board of a two-year special permit, renewable for a non-extendible period of two (2) years.

Not extendible because DepEd wants QUALITY EDUCATION

Assigned to schools with shortage of teachers.

2. International recognition

Widely acknowledged expert in this field.

E.g. Manny Pacquiao will teach boxing or Lea Salonga will teach singing

Summary for Laws for Professionalization of Teaching

PD 1006	RA 7836	RA 9293
PBET	LET	BLEPT
CSC	PRC	PRC
National Board for Teachers	Board for Professional teachers	Board for Professional teachers
70%	75%	75%
Certificate	License	License
	10 units for methods of teaching	18 units for methods of teaching
	No license, no teaching policy	Provision • Inactive teachers • Special permit for (1) Para teachers and (2) International recognition

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

TEDP (Teacher Education Development Program)

Professional Road Map

- Spanish Period - Education Act of 1963 - establish one school in every pueblo
- Colegio de Santa Potenciana, 1589

RA 10912

Continuing Professional Development Act of 2014

- CPD is a mandatory requirement
- New trends and reform
- Renewal of professional license
 - **Validity of license** - 3 years; expiration on birthday
 - **For the first 3 years** - license can be renew without CPD units
- 15 credit units
 - Regardless of transition period - 45 units
 - During transition period - 15 units
- CPD units can be earned by attending development programs like online courses, seminars, and graduate studies.

Code of Ethics for Professional Teachers

- Schools are nurseries of the future citizens of the state
- You are not a campaign manager
- Academic freedom (RA 232)
- Leadership and initiative
- No to gambling, smoking, drunken
- **Perfect Teacher**
 - Intellectual leader in the community
 - Upholds quality Education
 - Ensure that teaching is the noblest profession
 - Continuing Education
 - Do not claim what is not yours
 - Submit justifiable criticisms to proper authorities
- Once a teacher, forever a learner
- Make an honest effort to understand and support the legitimate policies of the school and the administration
- Do not make false accusation or charges against superiors, especially under anonymity

- Favors and gifts should not be accepted
- Recommendation from tutorials other than what is authorized should not be accepted
- Love is patient, wait for the perfect timing
- No to corporal punishment and deductions from scholastic ratings
 - The right to engage, directly or indirectly in legitimate income generation
 - Commercial venture which involves furnish of textbooks and other school commodities is prohibited
 - Maintain a dignified personality worthy of emulation
 - Recognition of Almighty God as guide of own identity

Magna Carta for Public School Teachers (RA 4670)

- Teachers are required to render not more than 6 hours of actual classroom teaching a day
- Overtime pay = 25% of the basic pay
- Special hardship allowance equivalent to at least 25% of teacher's monthly salary
- Compulsory medical examination shall be provided free of charge for all teachers - medical treatment.
- Teachers are entitled to a study leave not exceeding one year **after seven years of service**
- Teachers granted to a study leave shall be entitled to at least 60% of their monthly salary
- Shall be compensated provided that they take the regulated study load and passes at least 75% of their course
- No compensation shall be due to the teacher after the first year of such study leave
- WHO APPLY: Teachers
- APPLY TO WHOM: DepEd
- VALIDITY of study leave: 1 year
- SPECIAL PERMIT granted by: Secretary of Education
- An indefinite sick leave of absence shall be granted to teachers when the nature of the illness demands a long treatment that will exceed one year at the least.

Periodic Merit Examination

- Oral and written examination
- Once in every five (5) years
- No examination fee
- WHO TAKE: DepEd Teachers
- Incentives
 - Diploma of Merit
 - Earn merit points for purposes of promotion in salary or to a higher position or grade level
 - Be placed in the priority list for government scholarship
- Failure to pass the merit examination
 - there is 2nd chance but for 3rd need a refresher course
 - No dismissal of position

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Personal Qualities of a Good Teacher

1. Intelligence
2. Emotional Stability
3. Optimistic
4. Fairness
5. Professionalism
6. Drive
7. Self-confidence
8. Cooperativeness
9. Buoyancy
10. Reliability

RA 10533

Enhanced Basic Education Act of 2013

K to 12 Curriculum

- **Kindergarten - RA 10157**
 - at least five (5) years old as prerequisite for grade 1
 - One (1) year of preparatory education
- **Elementary Education**
 - Second stage of compulsory basic education which is composed of six (6) years
 - the entrance age to this level is typically six (6) years old.
- For kinder and first three (3) years of elementary education - the instructional materials and assessment shall be in the regional or native language of the learners
- Graduates of science, math, statistics, engineering, music and other degree courses with shortages in qualified licensure examination for teachers (LET) applicants to teach in their specialized subject in the elementary and secondary education provided that they have to pass the LET within the five (5) years after their date of hiring.
- Graduates of technical-vocational courses to teach in their specialized subject in secondary education. These graduates possess the necessary certification issued by the TESDA.

Article XIV - 1987 Constitution

Section 2 - The state shall:

1. Free public education in elementary and high school levels
2. Compulsory elementary education

Singapore - average pay is 60,000 Singaporean dollar per year

Quality Teacher vs. Teacher Quality

- **Teacher Quality** - ultimate goal of teacher education program outcomes (CMO 74-82, s. 2017), PPST (D.O. 42, s. 2017) and CFT-SEA

Quality Teacher	Teacher Quality
Defined by their attributes and characteristics	Defined by the standards for the profession and validated by the student's learning outcomes

Given the prospect of ASEAN integration, teachers for potential employment apart from learning a new language

- **Reformation** - change something to make improvement
- **Reeducation** - study a new course
- **Reinstruction** - repeat instruction
- **Reorientation** - change of focus to be oriented to a new setting/ environment

Laws from Different Institution

President	Key Events	Laws
Cory Aquino	Highest allocation to Education Department	1987 Constitution
Fidel Ramos	CHED TESDA	RA 7722 RA 7796
Joseph Estrada	Philippine Commission on Educational Reform (PCER)	EO 46
Gloria Arroyo	DepEd	RA 9155
Benigno Aquino	K12 CPD	RA 10533 RA 10912
Rodrigo Duterte	Free tertiary education	RA 10931

Philippine Qualifications framework (PQF)

Educational Subsector	PQF Level	Qualifications
Technical Vocational Education and Training	I	NC I
	II	NC II
	III	NC III
	IV	NC IV
Higher Education	V	Diploma
	VI	Bachelor/ Baccalaureate degree
	VII	Post-Baccalaureate Program
	VIII	Doctoral and Post-doctoral Degree

Career Stages: A continuum

- **Beginning teachers** - Entry Level
- **Proficient teachers** - Independent self/ self-focus/ discovery learning
- **Highly proficient teachers** - highly accomplished teachers; mentorship (one-on-one)
- **Distinguished teachers** - highest career stage; leadership in education, motivational, exceptional capacity

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

PROFESSIONAL EDUCATION NOTES

A. The Teaching Profession (23)

FOUNDATIONS OF SPECIAL AND INCLUSIVE EDUCATION

Definition of Terms

- **Special Education**
learners with disability + side-by-side
- **Inclusive Education**
learners with disability + regulars
- **Learning Disability**
disorder (as per IDEA and NJCLD)

Levels of Disorder/Diseases

Impairment	Disability	Handicap
Organ level of disorder	Personal level of disorder	Societal level of disorder

Three Types of Inclusive Education

1. **Inclusion** – regular with different materials given.
2. **Mainstreaming** – regular with same materials at specific time frame
3. **Integration** – enrolled in regular classes/schools

Concepts on Equality, Equity, and People First Language

- **Equality** – same resources, different outcomes
- **Equity** – different resources, same outcomes
- **People First Language** – use to pay respect and empathy to the people with disabilities.

Models of Disability

- **Medical** – disability that originates from diseases
- **Social** – disability that originates from social conditions

History of Disability

1. **Extermination Period**
shorter life (abandoned and executed)
2. **Ridicule Period**
made fun of; mockery
3. **Asylum Period**
person with disability being cared by catholic churches.
4. **Beginning Period**
beginning of acceptance

Five Stages of Grief

Three Proponents of Special Education

1. **Pedro De Leon** – educated the deaf from noble class.
2. **Charles D E'Lepee** – institute for the deaf.
3. **Louis Braille** – tactile system of reading and writing for the blind.

Five Categories of K-12 Exceptional Learners

Categorizes into learners with disabilities or giftedness

Specific Cognitive/Academic Difficulties

Learning Disabilities

- **Dyslexia** – reading
- **Dysgraphia** – writing
- **Dyscalculia** – computations
- **Dyspraxia** – psychomotor

Attention-Deficit Hyperactivity Disorder

- Hyperactivity and Impulsivity
- Difficulty in focus

Vanderbilt ADHD Exam

- (1-9) **Predominantly Inattentive** Subtype
(score 2 or more)
- (10-18) **Predominantly Hyperactivity** Subtype
(score 2 or more)
- **ADHD-Combined Subtype**
(Both have 2 or more scores)

Speech and Communication Disorder

- **Slurred/Stuttering** – difficulty in spoken language
- **Dysarthria** – vocal cord injury, slurred speech
- **Aphasia** – brain injury, loss of speech
- **Mutism** – inborn loss of speech

Autism Spectrum Disorder

- wide range of symptoms and variation of autism.
- Inclination of repetitive orders
- Patterns and routines should not be altered.
- Normal Chromosomes – 23 pairs
- **Prader-Willi Syndrome**
deletion of the chromosome 15
- **Trisomy 21/Down Syndrome**
tripled chromosome 21

Mental Retardation

- Intellectual difficulty and sub-average and deficit intelligence

Intellectual Quotient Test

$IQ = (\text{mental age}) / (\text{physical age}) * 100$

1	Genius	140 and above
2	Very Superior	130 to 139
3	Superior	120 to 129

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

4	Above Average	110 to 119
5	Average	90 to 109
6	Below Average	80 to 89
7	Borderline of Mental Retardation	70-79
8	Mental Retardation	Below 70
	Mild (50-70)	Independent but may need support
	Moderate (35-49)	Need lifelong support in some areas
	Severe (20-34)	Need lifelong support in all areas
	Profound (below 20)	

Fragile X Syndrome

- is a genetic condition that causes a range of developmental problems including learning disabilities and cognitive impairment.

Developmental Delay

- refers to a child who has not gained the developmental skills expected of him or her, compared to others of the same age.
- Delays may occur in the areas of:
 - motor function
 - speech and language,
 - cognitive, play, and
 - social skills

Fetal Alcohol Syndrome

- is a condition in a child that results from alcohol exposure during the mother's pregnancy.

Epilepsy

- is a central nervous system (neurological) disorder in which brain activity becomes abnormal, causing seizures or periods of unusual behavior, sensations and sometimes loss of awareness.

Emotional/Conduct Disorder

- Depression
- Aggressiveness/Aggression
- Oppositional Defiant Disorder – little-to-no concerns for others.

Acute Stress Reaction

- occurs when a person experiences certain symptoms after a particularly stressful event.

Bipolar Disorder

- formerly called manic depression, is a mental health condition that causes extreme mood swings that include emotional highs (mania or hypomania) and lows (depression).

- Signs of Bipolar Disorder
 1. Decreased need for sleep. ...
 2. Racing thoughts and accelerated speech. ...
 3. Restlessness and agitation. ...
 4. Overconfidence. ...
 5. Impulsive and risky behavior. ...
 6. Hopelessness....
 7. Withdrawal from family and friends and lack of interest in activities. ...
 8. Change in appetite and sleep.

Conduct Disorder

- Conduct disorder refers to a group of behavioral and emotional problems characterized by a disregard for others.
- There are four basic types of behavior that characterize conduct disorder:
 - Physical aggression (such as cruelty toward animals, assault or rape).
 - Violating others' rights (such as theft or vandalism)
 - Lying or manipulation.
 - Delinquent behaviors (such as truancy or running away from home).

Eating Disorders

1. Anorexia Nervosa
2. Bulimia Nervosa
3. Pica
4. Purging disorder
5. Night eating syndrome (NES)

Physical Disabilities Abilities and Health Impairment

- limited energy and fatigue
- reduced mental alertness
- limited muscle control
- source of multiple disability

Cerebral palsy (CP)

- is a group of disorders that affect a person's ability to move and maintain balance and posture.
- Causes:
 - Gene mutations that result in genetic disorders or differences in brain development.
 - Maternal infections that affect the developing fetus.
 - Fetal stroke, a disruption of blood supply to the developing brain.
 - Bleeding into the brain in the womb or as a newborn.

Arthritis

- means inflammation or swelling of one or more joints.

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Spinal Cord Injury

- damage to any part of the spinal cord or nerves at the end of the spinal canal (cauda equina) — often causes permanent changes in strength, sensation and other body functions below the site of the injury.

Muscular Dystrophy

- Muscular dystrophies are a group of muscle diseases caused by mutations in a person's genes.

Sensory Impairment

Visual Impairment

- **Myopia** – nearsightedness
- **Hyperopia** – farsightedness
- **Presbyopia** – trouble reading in small prints
- **Astigmatism** – corneal damage
- **Tunnel Vision** – tube (peripheral vision is blurred)

Hearing Impairment

- **Deafness** – hearing loss is above 90 decibels
- **Hearing Impairment** – hearing loss is below 90 decibels

Giftedness

Classification of Giftedness (Betts and Neihart)

Successful	academically excellent but not creative
Challenging	extraordinarily creative but not academics
Undergrounds	deny talent to feel included
Drop-Outs	angry with school system
Double Labeled (2E)	gifted with disability
Autonomous	creative yet academically inclined
Other Classifications of Giftedness	
After the Facts	successful and valuable in other areas in life
IQ Definition	within the cutoff scores of above-average
Talent Definition	outstanding in specific performance
Creative Definition	superior in creative abilities

Legal Bases on Inclusive Education

- **RA 10533 (Enhanced Basic Education Act of 2013)**
Programs that could address learners with disability
- **DepEd Order 21, s. 2019**
core principle of K-12 (inclusivity)
- **Senate Bill 1292**
Free appropriate public education to SPED
- **EO 385**
Task force for PWD
- **RA 5250**
An Act Establishing A Ten-Year Training Program For Teachers Of Special And Exceptional Children In The

Philippines And Authorizing The Appropriation Of Funds Thereof.

- **RA. 7277**

The Magna Carta for Disabled Persons was enacted for the primary reason that persons with disabilities have the same rights as other people.

The seven types of disabilities mentioned in RA No. 7277

1. psychosocial disability
2. disability due to chronic illness
3. learning disability
4. mental disability,
5. visual disability,
6. orthopedic disability
7. communication disability.

- **RA 9442**

An Act Amending Republic Act No. 7277, Otherwise Known as the “Magna Carta For Disabled Persons, and For Other Purposes”.

provide persons with disability, the opportunity to participate fully into the mainstream of society by granting them at least twenty percent (20%) discount in all basic services.

- **RA 10754 IRR OF RA 10754**

An act expanding the benefits and privileges of persons with disability (pwd)

- **Presidential Decree 603**

“The Child and Youth Welfare Code”

- **Batas Pambansa 232**

“Education Act Of 1982”

- **Senate Bill No. 1414**

"Inclusive Education for Children and Youth with Special Needs Act"

Accommodation

same tasks as everyone else

Modification

changing some parts of the tasks

4 Domains of Community Instruction

1. **Domestic** – daily living
2. **Vocational** – work experience
3. **Recreational/Leisure** – activities/enjoyment
4. **Community** – community resources

Response to Intervention

1. **Tier I** – all students
2. **Tier II** – some students
3. **Tier III** – individual/one

Types of Pressure

1. **Economic Pressure** – money
2. **Conceptual Pressure** – education/concepts
3. **Moral and Ethical Pressure** – values

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Occupational Therapist

helping in accomplishing tasks

Physical Therapist

helping in improving the body

Types of Groupings

1. Cluster Groups

High Ability with regulars

2. Special Interest Clubs and Groups

meeting several hours per week

3. Play-based Learning

games

4. Task Analysis

multi-step sequence skills

5. Peer-Tutoring

high level (tutors); lower level (students)

6. Jigsawing

grouping to complete a task

7. Mentoring

Enrichment – advanced

Remedial – low performing

Curriculum-Based Measurement

Tracks student's development

- **Study-Test Technique**
pre- and post- test
- **Enrichment**
no advanced placement
- **Social Communication Questionnaire**
ADHD (40 items)

Universal Design for Learning

design usable for all people (general)

Universal Design for Learning

Design that caters for individual needs

***Multiple means** of RE-EN-ACT

1. Representation
2. Engagement
3. Action and Expression

Expanded Core Curriculum

Innovative Solutions

Facets of Expanded Core Curriculum

1. Using Assistive Technologies
2. Self-Awareness and Social Maturity
3. Physical Independence

Technology Application – tool that monitors student's progress

Tactile Books

1. **Experience Book** – based on the experience that the child had
2. **Object Book** – real materials and objects
3. **Routine Book** – everyday activity
4. **Theme Book** – topic/themes

Special Education

- The Council for Exceptional Children lists the following terms and definitions taken from the individuals with Disabilities Education Act.

Exceptional Students

- The term “exceptional” has often been used to describe unusual, unique, or outstanding qualities of people or objects.
- the term “exceptional” refers to students who learn and develop differently from most others or students who have:
 - exceptional learning styles
 - exceptional talents,
 - exceptional behaviors.
 - Exceptional students are those who fall outside of the normal range of development.

Learners With Special Educational Needs (LSEN)

- refers to learners who, for whatever reason, need additional help and support in their learning.

Persons with disabilities (PWDs)

- according to the UN Convention on the Rights of Persons With Disabilities, include those who have long-term physical, mental, intellectual or sensory impairments which in interaction with various barriers may hinder their full and effective participation in society on an equal basis.

Barriers to Healthcare

People with disability encounter a range of barriers when they attempt to access health care including:

- Attitudinal barriers
- Physical barriers
- Communication barriers
- Financial barriers

PWD ID

- is a valid identification card issued to persons with disabilities. This card serves as a proof for availing of the benefits and privileges for PWDs.

What is the Validity of the PWD Card?

- The PWD ID is valid for three years as stated in the National Council on Disability Affairs Administrative Order No. 001 series of 2021

PWD List of Disabilities in the Philippines

- The Department of Health (DOH) considers the following types of disabilities as eligible for a PWD ID:
 - Psychosocial disability –
 - Disability resulting from a chronic illness - Includes orthopedic disability due to cancer, blindness due to diabetes, and other disabilities due to a chronic disease
 - Learning disability
 - Visual disability
 - Orthopedic (Musculoskeletal) disability
 - Mental/Intellectual disability
 - Hearing disability
 - Speech impairment
 - Multiple disabilities

SPED Interventions

Shadow Teaching

- is when an educational paraprofessional, like a teaching aide or assistant, works directly with young students who have learning differences to improve their classroom experience.

Behavior Modification

- Praise
- Rewards
- Behavior Chart
- Redirection
- Engage
- Visuals
- Extinction

Direct Instruction

- What are the four steps of direct instruction?
- Direct Instruction guides us through intermediary stages to gently transition from teacher to student.
 - **Modeling** – The teacher does it all.
 - **Structured Practice** – The teacher does it, but with input from students.
 - **Guided Practice** – Students do it, with input from the teacher.
 - **Independent Practice** – Students do it.

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

PROFESSIONAL EDUCATION NOTES

B. The Teacher and the School Curriculum, Methods and Strategies for Teaching and Learning, Educational Technology for Teaching and Learning (45)

METHODS AND STRATEGIES OF TEACHING

Instructional Planning: Definition, Principle and Components

Instructional Planning

- The ability to visualize into the future creating, arranging, organizing and designing events in the mind that may occur in the classroom accurate time management and related instances teacher's ability to make decisions about the how and what of teaching.

Importance/ Function of Instructional Planning

- **Provides an overview of instruction**
 - presents a total picture of the lesson for the day or for the year
 - allows some degree of flexibility
- **Facilitates good management and instruction**
 - provides a classroom script to follow as lessons are conducted
 - shows a clear direction of lessons
- **Makes learning purposeful**
 - teacher's clear understanding of students' behavior will help increase students' opportunities for learning and reduce anxiety and uncertainty.
 - enables the teachers to engage in reflective thinking before making/writing a unit/lesson plan or even during teaching time
- **Provides for sequencing and pacing**
- **Economize time**
- **Makes learners' success more measurable which assists in reteaching**
- **Provides for a variety of instructional objectives**
- **Creates opportunity for higher level questioning**
- **Assists in ordering supplies**
- **Guides substitute teachers**

Variables in Instructional Planning (Brown, 1988)

- **Teacher-** attitudes, beliefs, teacher's content background
- **Students-** age, background knowledge, motivational level, interest
- **Content-** the type of content that influences the planning process, textbook being used
- **Learning Content-** subject matter guidelines
- **Material/ Resources-** activities and equipment/ tools for teaching are considered first in planning

- **Time-** considerable planning for time

Lesson Plan

- Sets forth the proposed program or instructional activities for each day
- A daily plan
- A step-by-step approach to learning
- **D.O. No. 70 s. 2012** - teachers with more than 2 years of teaching experience will be exempted from writing a detailed lesson plan

Components of Lesson Plan

1. **Objectives**
2. **Subject Matter**
3. **Learning activities**
 - review/ drills
 - motivation (intrinsic/extrinsic)
 - presentation of the lesson
 - generalization
 - application
4. **Evaluation**
5. **Assignment** (for enrichment, extension or remedial)

Instructional Objectives

- Specific and relates to singular subjects and grade levels which includes
 - a. Behavior – Do what?
 - b. Condition – Under what conditions?
 - c. Criteria – How well?

Aims

- General objectives of the Philippine Educational System; broad and value-laden statements about the intent of education (National/Societal Level)
- Answer the needs and demands of society especially children and youths
- Formulated by experts

Goals

- Statements that cut across subjects and grade levels
- Represent the entire school program by professional associations (Institutional)
- More definite than aims but still non-behavioral and therefore non-observable and non-measurable

Objective

- description of what is to eventually take place at the classroom level that are stated in:
 - Behavioral terms
 - State specific skills
 - Tasks
 - Content attitudes

Domains and Levels of Objectives

- Each domain reflects a particular set of beliefs and assumptions about how students learn and behave: cognitive, affective, and psychomotor domains.

Cognitive Domain

objectives that have their purpose to develop students' intellectual skills

Benjamin Bloom's Taxonomy

- Knowledge-** emphasis on remembering information
- Comprehension** – emphasis on understanding and organizing previously learned information
- Application-** emphasis on using information in pertinent situations
- Analysis** – emphasis on thinking critically about information by studying its parts
- Synthesis-** emphasis on original thinking about information by putting its parts into new whole.
- Evaluation-** emphasis on making judgments about information based on identified standards

Anderson's Taxonomy (Revised Bloom's Taxonomy)

- Remembering-** emphasis on remembering info.

- Understanding** – emphasis on understanding and organizing previously learned information
- Applying** - emphasis on using information in pertinent situations
- Analyzing** – emphasis on thinking critically about information by studying its parts
- Evaluating-** emphasis on making judgments about information based on identified standards
- Creating-** emphasis on original thinking about information by putting its parts into new whole.

Marzano and Kendall's Taxonomy

consists of three learning system (Cognitive, Metacognitive, and Self-System)

Cognitive Processes

- Retrieval
- Comprehension
- Analysis
- Knowledge Utilization

Metacognitive Process

- Metacognition

Self-System Process

- Self-System

SOLO Taxonomy

Affective Domain

deals with attitudes, values, interest and appreciation which ranges from simple awareness or perception of something to internalizing a phenomenon so that it becomes a part of one's lifestyle

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

- **Receiving** – emphasis on becoming aware of some communication or phenomenon from the environment
- **Responding** – emphasis on reacting to a communication or phenomenon through participation
- **Valuing** – emphasis on attaching worth to something from the environment evaluating beliefs in the form of acceptance, preference, and commitment
- **Organization** – organizing the values in relation to each other
- **Characterization** – acts in accordance with the accepted value and becomes part of personality.

Psychomotor Domain

objectives in this domain are especially appropriate of the objectives generally associated with motor and muscular-skill development.

Action	Definition	Verbs
Perception	• Senses cues that guide motor activity	Detect, hear, listen, observe, perceive, recognize, see, sense, smell, taste, view, watch
Set	• Is mentally, emotionally and physically ready to act	Achieve, assume, establish, place, position, sit, stand, station
Guided Response	• Imitates and practices skills, often in discrete steps	Copy, duplicate, imitate, manipulate, operate, practice, repeat, try
Mechanism	• Performs acts with increasing efficiency, confidence and proficiency	Complete, conduct, demonstrate, execute, improve efficiency, increase, make, pace, produce, show
Complete Overt Response	• Performs automatically	Act, advance, control, direct, excel, guide, maintain, manage, master, organize, perfect, perform, proceed
Adaptation	• Adapts skill sets to meet a problem situation	Adapt, reorganize, alter, revise, change
Organization	• Creates new patterns for specific situations	Design, originate, combine, compose, construct

Dave's Psychomotor Taxonomy

Harrow's Psychomotor Taxonomy

Harrow (1972)	
Reflex movements	• Reactions that are not learned, such as an involuntary reaction
Fundamental movements	• Basic movements such as walking, or grasping.
Perceptual abilities	• Response to stimuli such as visual and auditory.
Physical abilities (fitness)	• Stamina that must be developed for further development such as strength and agility.
Skilled movements	• Advanced learned movements as one would find in sports or acting
Non-discursive communication	• Use effective body language, such as gestures and facial expressions

General Principles & Methods of Teaching

- **Approach-** viewpoint toward teaching
- **Strategy-** general design of how the lesson will be delivered
- **Method-** procedure employed to accomplish the lesson objective/s
- **Technique-** style or art of carrying out the steps of a method

Principles Underlying Instruction

Principle of Context

learning depends largely on the setting materials in which the process goes on. This principle comes in different scales of application:

- textbook only
- textbook with a supplementary material
- non-academic and current materials (newspaper, clippings, articles, magazine)
- multi-sensory aids
- field experiences; personal, social and community understanding

Principle of Focus

instruction must be organized about a focus or direction. Scales of application Focus Established by:

- page assignment in textbook
- announced topic together with page or chapter references

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

- broad concept or a problem to be solved, or a skill to be acquired to carry on understanding

• Principle of Socialization

instruction depends upon the social setting in which it is done. Scales of application:

- Social patterns characterized by:
submission>contribution>cooperation

• Principle of Individualization

instruction must progress in terms of the learner's own purposes, aptitudes, abilities and experimental procedures. Scales of application Individualization through:

- differential performance in uniform tasks
- homogenous grouping
- control plan
- individual instruction
- large units with optional related activity
- individual undertakings stemming from and contributing to the joint undertaking of the group of learners

• Principle of Sequence

instruction depends on effective ordering of a series of learning tasks. Sequence is a movement:

- from meaningless emergence of meaning
- from immediate to remote
- from concrete to symbolic
- from crude to discriminating

Scales of application Sequence through:

- logical succession of blocks of content (lesson/courses)
- knitting learning/lesson/course together by introductions, previews, pretests, reviews
- organized in terms of readiness
- organized in terms of lines of emerging meanings

• Principle of Evaluation

learning is heightened by a valid and discriminating appraisal of all its aspects. Scales of application:

- evaluation of direct results only
- evaluation related to objectives and process
- evaluation on total learning process and results

	• makes use of expository strategies • aimed at mastery of knowledge and skills • teacher-oriented • direct transmission of information from teacher • teacher-controlled • highly structured • content-oriented • learner is passive • receives ready information from the teacher	• makes use of exploratory strategies • aimed at generating knowledge for experience • learner-centered • students search for information with teacher's supervision • learner-controlled • flexibly organized • experience-oriented • learner is active in search for information
--	---	---

Direct Instruction Methods

Deductive Teaching	• presents a rule/concept/generalization/ principle • illustrate these rule/concepts etc. with examples • <i>Anticipatory</i> – forecasts details found in the different students • <i>Explanatory</i> – connects facts with principles as interpreted by
Showing Method	• use for teaching concepts and skills • a teacher-centered strategy that uses teacher explanation and modeling combined with student practice and feedback to teach concepts and skills • widely applicable in different content areas • establishes interaction between teacher and students • helps students to learn procedural knowledge • promotes learning of declarative knowledge • focuses students' attention on specific content/skill • ensures mastery of skills
Expository Method/Lecture Method	• designed to keep students learn organized bodies of knowledge • a teacher-directed model designed to keep learners understand relationship in organized bodies of knowledge • attempts to help students understand not only the concepts but how they are related • based on David Ausubel's concept of meaningful verbal learning • helps learner link new with prior learning and relate the different parts of new learning to each other • designed to overcome the most important weakness of the lecture method by strongly emphasizing learners' involvement in the learning process • applicable in different subject areas • ensures clear understanding of information • allows student's participation

General Approach to Teaching

Approach	Direct Instruction	Indirect Instruction
Role	Teacher-Centered Dispenser of Knowledge Sage on the Stage/Ivory Tower	Learner-Centered Facilitator of Learning Guide on the Side
Strategies	Expository	Exploratory
Types of Methods	Deductive Development Demonstration Lecture	Inductive Discovery Laboratory Inquiry/Problem-Based

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Demonstration Method	• a show and tell method • teacher presents and talks about a process, a concept and shows the principles • learner observes and notes down events during teachers' performance
-----------------------------	---

Indirect Instruction Methods

Inductive Method	• It is a discovery learning strategy • Involves many observable cases or instances that can be compared by the learners • Students formed own conclusions/generalization when they are ready to do so • Used when the generalizations are important enough to justify the time spent to the lesson • Lesson progresses from observations to generalizations
Inquiry-Based Method	• Engages learners in critical thinking, analysis and problem solving • A systematic and disciplines method of solving and assessing results • Involves testing solution to see if they work and a step-step procedure to solve a problem systematically • Engages students in investigative work • Involves scientific ways of solving problems that include these steps: 1. <i>Defining problems</i> 2. <i>Formulation of hypotheses</i> 3. <i>Gathering data</i> 4. <i>Analyzing & interpreting data</i> 5. <i>Making conclusion</i> Forms of Inquiry 1. Guided Inquiry: Teacher provides data problems, questions to students 2. Open inquiry: Students give solutions/gather data and draw conclusions 3. Individualized Inquiry: Students work independently
Laboratory Method	• Hands-on experiences about materials or facts obtained from research investigation or experiences • Actual context of learners with the materials/variables • Used to develop skill in basic science process • A discovery experiences • Develop centered thinking skills • Involves all students in the manipulative skills • Role of teacher is mostly supervision of activity • Proper handling of tools, equipment, laboratory material (keeping/using/retrieval) • Opportunity to improvise tools and equipment • An activity that will remove a difficulty or flexibility through reasoning process

	• May be used; for solving a whole unit/subject as a problem or utilizing problem solving method in a unit of work • Involves scientific ways of searching information • Energizes students to participate activity to find the best solution to a problem • Develop higher order thinking skills (HOTS) • Enhances analytical, logical and create abilities • Involves these steps • ✓ Defining problems • ✓ Stating/explaining • ✓ Critical evaluation of hypothesis and solution • ✓ Verification of accepted hypotheses
Discovery Learning Method	• Teacher facilitates discovery • Learners participate actively in the learning process • Learning depends on own insights, reflections and experiences (discovery learning) • The two discovery teaching strategies are • ✓ Inductive discovery • ✓ Deductive discovery
Project Method	• A significant practical unit of activity of a problematic nature • Involves planning and carrying out of the planned activities • Students completes certain task in a natural manner • Involves the use of physical materials to complete the unit of experience • Develops sense of cooperation, responsibility to complete a task • Energizes students to evaluate own and other's works (projects) objectively based on developed criteria.

Other Indirect Models/Strategies of Teaching

Problem-Based Instruction (PBI)

The essence of PBI consists of presenting students with authentic/meaningful situation that can serve as spring boards for investigations and inquiry.

- **Interdisciplinary** focus on a particular subject but solutions require students to deliver into many subjects.
- **Authentic investigation** necessitates students to pursue investigation that seek real solution to real problems.
- **Production of artifacts** and exhibits requires students to construct products in the form of artifacts and exhibits that represents their solutions.

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Constructivist Models

- Popularized by Piaget and Vygotsky. A perspective of teaching and learning in which a learner constructs meaning from experience and interaction with others

Metacognitive Strategy

- Students are trained to become aware of and control their own learning through the metacognitive process.

Reflective Teaching

- Process that enables individual to continually learn from own experiences by considering alternative interpretations of experiences, actions, discussions, beliefs, using introspection and analysis

Cooperative Learning Strategies

Features:

- Heterogeneously grouped
- Interdependence among members
- Individual accountability
- Explicit teaching of collaborative skills

Variants:

Jigsaw

- a specific type of information gap activity that work best when used with the whole class. The class is first divided into groups of four to six learners who are then given some information on a particular aspect of the topic which they then become the experts in.

Student Teams Achievement Strategy (STAS)

- A type of group work activity in which students interact together to master a specific academic material

Some Essential Teaching Techniques

Discussion

- An attempt to get away from the traditional classroom procedure of question and answer and recitation style; it is also a tool for implementing the democratic process in teaching and learning transaction.
- To get the desired understanding through analysis and evaluation of facts by encouraging group thinking as learners/participants attempt to find solutions to a problem

Types of Discussion Procedures

Panel Forum

- A direct, conversational, interactional discussion among a small group of experts or well-informed lay persons.

Symposium Forum

- More formal than the panel discussion persons with special competence deliver uninterrupted speeches on different aspects of a problem, and these are followed by a forum period

Debate

- A discussion that occurs when people with different beliefs study the same problem and arrive at different conclusions;

Round Table Conference

- A small discussion group seated face to face around a table, without a larger audience; a small conference by another name and has the nature of an informal semi social gathering

Special Techniques to Ensure Active Participation in the Forum Period:

Role playing

- Spontaneous acting out of problems or situations
- Portray a situation more candidly

Case Study

- Another group centered procedure which presents specific situations or problems to stimulate discussion
- This technique implies extensive analysis and interpretation of a case selected to demonstrate a learning outcome

Buzz Session

- Is used when dealing with familiar topics that need group opinion, evaluating, planning or interaction
- Involves groups not exceeding six persons
- A leader and a secretary are chosen to lead the discussion and to record what have been discussed
- Each group is given the time to present the questions or outcomes of their discussion

Workshop

- Involves the use of group process in attacking and solving problems
- Persons with problems of common concern come together to attack and solve their problems cooperatively
- Makes use of a variety of means and devices in the solution of problems such as group meeting, individual conference, field trips, excursions and the use of resource persons and consultants
- Values gained from the workshop are both intellectual and social

Seminar

- Deliberately looks for the solution to the problems from the evidence based on reading, experiences and minds of the participants
- Attempts to develop a policy or solution that is better than what is in existence.

Art Of Questioning

What is Questioning? Key technique in teaching

Purposes of Questions

- Arouse interest and curiosity
- Review content already learned
- Stimulate learners to ask questions
- Promote thought and the understanding of ideas
- Change the mood/tempo, direction of the discussion
- Encourage reflection and self-evaluation
- Allow expressions of feelings

Types of Questions

- **According to thinking process involved:**
 - **Low-level Questions-** focused on facts, don't test level of understanding or problem-solving skills
 - **High-level Questions-** go beyond memory and factual information, more advance, stimulating and more challenging, involve abstraction and point of view.
- **According to type of answer required:**
 - **Convergent Questions-** tend to have one correct and best answer. Are used to drill learners on vocabulary, spelling and oral skills but not appropriate for eliciting thoughtful responses
 - **Divergent Questions-** open-ended and usually have many appropriate answers. Reasoning is supported by evidence and examples. Associated with high level thinking processes and encourage creative thinking and discovery learning.
- **According to the cognitive taxonomy**
 - **1st Level: Knowledge-** memorize, recall, label, specify, define, list, cite, etc
 - **2nd Level: Comprehension-** describe, discuss, explain, summarize translate, etc
 - **3rd Level: Application-** solve, employ, demonstrate, operate experiment, etc.
 - **4th Level: Analysis-** interpret, differentiate, compare invent, develop, generalize
 - **5th Level: Synthesis:** Invent, develop, generalize
 - **6th Level: Evaluation-** Criticize, judge, interpret
- **According to the questions used by teachers during open discussion**
 - **Eliciting Questions-** these are employed to: encourage an initial response; encourage more students to participate in the discussion; rekindle a discussion that is lagging or dying out
 - **Probing Question**—seek to: expand or extend ideas; justify ideas; clarify ideas
 - **Closure-seeking Questions-** used to: help students form conclusions, solutions or plans for investigating problems.

- **Referential questions** –are questions that seek to draw response from students which a teacher has no expected answer
- **Display Questions-** are questions in which a teacher expects a correct answer from the student

Guidelines in Asking Questions

- **Wait Time-** the interval between asking a question and the student response.
- **Prompting-** uses hints and techniques to assist students to come up with a response successfully
- **Redirection-** involves asking of a single question for which there are several answers; used in a high-level questioning.
- **Probing-** a qualitative technique used for the promotion of effective thought and critical thinking; provides the students a chance to support or defend a stand or point of view
- **Commenting and prompting-** used to increase achievement and motivation

Determining Appropriate Evaluation Instruments

The concept of evaluation

- aims basically to determine student mastery of what has been taught.
- is a two-part process:
- measuring pupils' individual performance
- judging about the adequacy of the—may use one of two major approaches in determining how well a pupil has performed:
 - **norm-referenced assessment**, where a pupils' performance is compared to the average performance of his/her classmates;
 - **criterion – referenced assessment**, where the rating is based on comparison of a students' performance with a pre-determined standard instrument used for evaluation may be:
- **informal evaluation** –depends on teacher's observations of a variety of pupil performances as they do learning tasks, complete projects, or interact with others; requires teachers to make judicious inferences about what learners can and cannot do; may use this question as a basic guide in selecting informal assessment techniques.
- **formal evaluation** – includes teacher-prepared tests and commercially-available standardized tests, such as rating scales, learning checklists, essay tests, true-false test, multiple-choice tests, completion tests, matching tests, etc.
 - may also be used to:
 - assess progress of individual learners
 - evaluate own performance of teacher

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

- refine instructional plans and/or provide instruction to clear up understandings of certain topics taught
- provide basis for instructional planning when the same content tested is taught again has a need for good record keeping to monitor the progress/development of learners over time

When to Use Some Test Types.

- **use informal evaluation tools** when looking for specific behaviors that learners are expected to demonstrate
- **use rating scales and checklist** when judgment about several levels of performance quality is needed
- **use essay tests** especially for upper grade levels when determining students to put together isolated process of information in a meaningful way
- **use true-false/multiple choice test** when covering a broad range of content
- **use matching test** if pupils' grasp of association is to be tested
- **use completion test** to sample only a cross-section of content and to eliminate guessing among pupils

Classroom Management

- Refers to the operation and control of classroom activities; involves the ability to maintain order and sustain pupil attention

Purposes of Classroom Management

- To minimize the occurrences of discipline problems
- To increase the proportion of classroom time devoted to constructive and productive activity.

3 Cs of Classroom Control

- **Content-** facilitate the delivery of instruction
- **Conduct-** promotion of orderly and safe learning environment
- **Context-** emphasis is on communication rather than physical elements associated with classroom setting.

Types of Control

- **Preventive Control-** aimed at minimizing the onset of anticipated discipline problems through planning
- **Supportive Control-** aimed at directing students' behavior before it becomes a full-blown problem
- **Corrective Control-** seeks discipline students' behavior before it becomes a full standard of good conduct

Nature and Dynamics of Approaches to Classroom Management

Facilitating Learning Environment

Active	Personal Meaning of Idea
Personal (Unique)	Good Differences
Recognize Mistakes	Tolerance Ambiguity
Evaluation	Openness to Self
Trust themselves	Respected

Seating Arrangement

Classroom Seating Arrangements

- **Horseshoe** – ideal seating arrangement
- **Circular** – brainstorming/small groups
- **Traditional** – large number of students/exams
- **Pods** – regular set-up

Five S of Classroom Management

Japanese	English	Filipino	Description
Seiri	Sort	Suriin	Sort all the materials; remove those who are not necessary in the workplace
Seiton	Set	Salansanin	Arrange the items in order
Seiso	Shine	Simutin	Make sure that all of the materials are clean
Seiketsu	Standardize	Siguruhin	Set rules/standards in maintaining the cleanliness and order of the classroom.
Shitsuke	Sustain	Sariling Kusa	Sustain/maintain the cleanliness and order of class by regularly doing the rules/chores assigned.

Approaches in Classroom Management

- **Assertive Approach** – teacher specify rules of behavior and consequences for disobeying then and to communicate these rules and consequences clearly.
- **Business Academic Approach** – emphasizes the organization and management of students as they engage in academic work.
- **Behavior Modification Approach** – rewards the good behavior to model it effectively in modifying behavior of the class to the degree that they capture and hold attention, and imitate it.
- **Group Managerial Approach** – it is more important to immediately respond to group student behavior that may be inappropriate or undesirable in order to prevent problems than having to deal with them after they emerge.
- **Group Guidance Approach** – based on changing/manipulating surface behavior of student on a group basis. Discipline and classroom control are facilitated through group atmosphere and enhance group rapport.
- **Acceptance Approach** – maintains that every individual needs to feel acceptance and belongingness. Student will strive to behave appropriately because they want to be accepted and to belong to the group.
- **Success Approach** – deals with the general psychological and social conditions instead of dealing with appropriate behavior and the consequences of such behavior. Teacher's job is to help students make good choices.

Types of Student Problem

- **Failure Syndrome** – usually says, I can't do it.
- **Perfectionist** – anxious of making mistakes
- **Under Achiever** – student do minimum to get by
- **Low Achiever** – student have difficulty even they are willing to work, problem is low potential.
- **Hostile Aggressive** – they are not easily control, they damage property
- **Passive Aggressive** – express opposition to teachers but indirectly
- **Defiant** – student resist authority and carry on a power struggle with teacher
- **Hyperactive** – show excessive and constant movement even when sitting.

Surface Behavior Management Skills

Jacob Kounin

- **Planned Ignoring** - Ignoring or failing to reinforce a behavior is one way to eliminate it. Prevents an undesirable behavior from being rewarded by adult

attention. Ignoring is often the first instinctive reaction of an adult faced with disruptive behavior.

- **Signal Interference** - A management technique that does not interrupt the ongoing activity; Using non-verbal cues or signals to communicate disapproval.
- **Proximity Control** - Proximity control provides protection, strength and identification to a child who needs support. The strategy is based on the gentle use of your authority by virtue of your physical presence.
- **Direct Appeal** - mostly teacher directed. With this tool, the teacher is imploring legitimate authority by telling the student he or she is boss and expects certain behavior.
- **Removal of Seductive Object** - Collect the object that is competing with the teacher.
- **Antiseptic Bouncing** - When a child's behavior indicates a build-up of stress or restlessness, it is a good idea to remove the child in such a way that attention is not focused on the negative behavior. This provides a distraction for the individual child, while preventing contagion in the group.
- **Hurdle Help** - Helping a child hurdle an obstacle or challenge which is beginning to cause frustration and anxiety. A timely comment, personal attention, or immediate instruction, at the onset of a problem, helps the child to follow the correct course of action

The Logical Consequences Model

Rudolf Dreikurs

- The student is responsible for his or her own behaviour. The student therefore faces the consequences for their behaviour.
- Dreikurs suggests that children make mistakes in their assumptions about what sorts of behavior. will achieve the goals they desire, and this leads to their misbehaviour
- There are four mistaken goals of misbehaviour:

4 Goals of Misbehavior

Goals (Child's Negative Approach)	What the Child is Actually Needing	How You Feel When Subjected to This Misbehavior	How Your Child May Act/Respond to Correction	Positive Ways to Respond
ATTENTION	Contact/Belonging Physical or emotional contact with other human beings.	"Would you knock it off!" Annoyed; Irritated	Will stop behavior but start again very soon.	Ignore behavior. Give FULL attention at other times. Act, don't talk.
POWER (Rebellion)	Power Be able to influence their envi- ronment (or at least feel a measure of control)	"You can't get away with that!" Provoked; Challenged	Will increase misbehavior or give in - only to fight another day.	Remove yourself from conflict. Don't fight or give in. Talk about it after a cooling off period.
REVENGE	Protection To protect himself from phys- ical harm or from threats to his self-esteem	"How could you do this to me?" Hurt; Angry	Will continue to hurt you or increase misbehavior.	Refuse to be hurt. (Avoid temptation to hurt back.) Withdraw from conflict. Show love.
INADEQUACY (Avoidance)	Withdrawal Ability to withdraw, re-group, center	"What can I do?" Despair; Pity	Will become passive- (helpless), refuse to try	Be patient. Find ways to encourage child. Build skills using baby steps

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Management Model (1970)

Jacob Kounin

Teacher behaviours and discipline (Classroom Management).

- **With-It-Ness** – eye at the back of the teacher. More aware of what is going on in class. Measured by teacher successfully asking student to desist.
- **Overlapping** - teacher can deal with an off-target task without interrupting what he is to doing.
- **Group alerting skill** Involve every student. Use questions to take students by surprise. Keep them occupied.
- **Smoothness and Motivation** - There are many different changes of activity in a school day; transition from one activity to another needs to be smooth.
 - Avoid-lesson slowdown or interruption - '**Jerky transitions.**'
 - **Stimulus-boundedness** - teacher's attention interrupted by extraneous stimulus
 - **Thrusts** - teacher interrupts students engaged in activities without warning or considering whether students are ready or not.
 - **Dangles** - teacher interrupts activity and then returns to it again.
 - **Truncations** - Teacher does not return to current activity after being interrupted.
 - **Flip-Flops** - teacher changes from activity A to B and back to A again as though she has changed her mind.
 - **Overdwelling** - teacher spends too much time on one aspect of lesson or some aspect of a student's behaviour - lesson slowdown occurs.
 - **Fragmentation** - Breaking down an activity so that students spend too much time waiting to work. e.g. calling one child up at a time to work out a problem on the board.

Principle of Communication

(Ginott, Teacher and Child)

- The teacher talks to the situation and not to the personality and character of the child
- The teacher shows the ability to describe what she/he saw, describe how he/she feels and describe what needs to be done.

Glasser' View: The importance of Teacher Involvement

(Schools Without Failure)

- Student misbehavior is the result of the student's failure to develop success identity
- Suggests that a teacher should:
 - Become personally involved with the student; accept the student but not the student misbehavior
 - Elicit description of the student's present behavior

- Assist student in making a value judgment about the problem behavior
- Help student plan a better course of action
- Guide student in making a commitment to the course of action he/she selected
- Reinforce the student as she follows the plan and keeps the commitment
- Accept no excuses if the student fails to follow through with her commitment
- Allow the student to suffer the natural and realistic consequences of misbehavior

Use of Logical Consequence

- LC express the reality of the social order; LC results from a violation of an accepted social rule (Punishment expresses the power of a personal authority)
- LC are logically related to them is behavior; the student sees the relationship between the misbehavior and its consequence
- LC involve no element of moral judgment; student's misbehavior is viewed as a mistake, not a sin
- LC is concerned with what will happen next; the focus is on the future (Punishment is in the past)
- LC are involved in a friendly manner (Punishment involves either open or concealed anger); the teacher should try to disengage himself from the consequence

Six properties of Classroom Management

(Schmuck)

- **Leadership** – creating a climate in which students perform leadership functions
- **Attraction** – refers to the friendship patterns in the classroom group
- **Norms** – shared expectations of how group members should think, feel and behave
- **Communication** – the vehicle through which the meaningful interaction of members takes place and through group processes in the classroom occur
- **Cohesiveness** – collective feeling that the class members have about in the classroom group
- **Facilitation and Maintenance** (Johnson and Bany)
 - **Facilitation** – refers to management behaviors that improve conditions within the classroom
 - **Maintenance** – management behaviors that restore or maintain effective condition

Techniques of Building Good Discipline:

- **Demonstration.** Students know exactly what is expected. In addition to having expected behavior explained to them, they see and hear it.
- **Attention.** Students focus their attention on what is being depicted or explained. The degree of attention

correlates with the characteristic of the model (teacher) and characteristics of students

- **Practice.** Students are given opportunities to practice the appropriate behavior.
- **Corrective feedback.** Students receive frequent, specific, and immediate behavior is suppressed and corrected.
- **Application.** Students are able to apply their learning in classroom activities (roleplaying, modeling activities) and other real-life situations

Strategies for Managing Students with Problems

- Accept students as they are, but build on and accentuate their positive qualities
- Be yourself. Students can recognize phoniness and take offense at such deceit.
- Be confident. Take charge of the situation, and don't give up in front of the students.
- Provide structure. Many of these students lack inner control and are restless and impulsive.
- Explain your rules and routines so students understand them. Be sure your explanations are brief; otherwise, you lose your effectiveness and you appear to be defensive of preaching
- Communicative positive expectations that you expect the students to learn and you require work.
- Rely on motivation, and not on your prowess to maintain order; an interesting lesson can keep the students on task
- Be a firm friend, but maintain psychological and physical distance so your students know that you are still the teacher
- Keep calm, and keep your students calm, especially when conditions become tense or upsetting. It may be necessary to delay action until after class when emotions have been reduced
- Size up the situation and be aware of undercurrents of behavior, since these students are sizing you up and are knowing manipulators of their environment
- Anticipate behavior, being able to judge what will happen if you or a student decide on a course of action may allow you to curtail many problems.

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

PROFESSIONAL EDUCATION NOTES

B. The Teacher and the School Curriculum, Methods and Strategies for Teaching and Learning, Educational Technology for Teaching and Learning (45)

BUILDING AND ENHANCING NEW LITERACIES ACROSS THE CURRICULUM

21st Century Education

1. Focus on a project-based curriculum
2. There is an innovation in education
3. Schools will go from 'buildings' to 'nerve centers'
4. Teachers from dispensers of knowledge to facilitators of learning.

Attributes of 21st Century Education

Integrated and Interdisciplinary	Technology and Multimedia
Global Classrooms	Creating to Constant Personal and Social Change and Lifelong Learning
Student-Centered	21 st Century Skills
Project-based and Research Driven	Relevant, Rigorous, and Real World

Characteristics of 21st Century Teachers

Multi-literate	Multi-specialist
Multi-skilled	Self-directed
Lifelong learner	Flexible
Creative problem solver	Critical Thinker
Has passion	High EQ

Technology Tools of 21st Century Education

Affinity Groups	Blogs
E-portfolio	Hypertext
Podcasts	Web 2.0
Myspace	Second Life
Semantic Web	Webkinz
Wiki	YouTube
Google	Prezi
Easybib	Social Media Platforms
Smartboards and Audience Response Systems	ReadWriteThink.org
WebQuest Page	Literacy Web

Approach to Integration

• Multidisciplinary Approach

the integration of the theme/concept but based on different subjects/fields separately.

• Interdisciplinary Approach

Interrelatedness of two or more fields/subjects; allow holistic understanding (can't be separated)

• Transdisciplinary Approach

Forming a new theme/field as it goes beyond the content.

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Methods of Curriculum Integration

- Project-Based Learning
- Service Learning
- Learning Centers/ Parallel Disciplines
- Theme-based
- Fusion

Types of New Literacies Across the Curriculum

Multicultural Literacy

- consists of the skills and ability to identify the creators of knowledge and interests to reveal the assumption of knowledge from diverse ethnic and cultural perspective.

Global Literacy

- aims to address issues of globalization, racism, diversity, and social justice.
- It requires awareness and action, consistent with a broad understanding of humanity, the planet, and the impact of human decision on both.

Dimensions of Global Education

- **Dimension 1:** Examine issues local, global, and cultural significance.
- **Dimension 2:** Understand and appreciate the perspective world views or others
- **Dimension 3:** Engage in Open, Appropriate, and Effective Interactions across Cultures
- **Dimension 4:** Take action for collective well-being and Sustainable Development

Social Literacy

- entails the development of social skills, knowledge, and positive human values toward desire and ability in human beings to act and react positively and responsibly in a wide range of complex social settings.

Types of Social Skills

- Effective Communication
- Conflict resolution
- Active listening
- Empathy
- Relationship management
- Respect
- Problem-solving skills
- Interpersonal skills

Media Literacy

- the ability to access, analyze, evaluate, and create media.
- The ability to identify different types of media from wide array of sources and understand the messages they bring.

Roles of Media Literacy

- Learn to think critically
- Become a smart consumer of products and information

- Recognize point of view
- Create media responsibly
- Identify the role of media in our culture

Media and Information Literacy

- a combination of knowledge, skills, and practices required to access, analyze, evaluate, and use information and knowledge in creative, legal, and ethical ways.

Dimension of Media and Information Literacy

1. Tool Literacy
2. Resource Literacy
3. Social-Structural Literacy
4. Research Literacy
5. Publishing Literacy
6. Emerging Technology Literacy
7. Critical Literacy

Integrating Media Literacy in the Curriculum

- Teach students to evaluate media.
- Show students where to find digital resources and databases.
- Compare/Contrast various media sources
- Discuss how media edits and alters
- Examine the truth in advertisement
- Have students create media

Financial Literacy

- is a core life skill in an increasingly complex world where people need to take charge of their own finance, budget, financial choices, managing risks, saving, credit, and financial transactions.

Financial Plan Steps:

- Calculating the net worth
- Determining the cash flow
- Considering the priorities

Spending Strategies:

1. Start by listing your goals
2. Divide your goals accordingly
3. Estimate the cost
4. Project future cost
5. Calculate how much you need to set aside
6. Prioritize your goals
7. Create a schedule for meeting your goals

Investment and Investing Aspects

1. How long will you invest the money? (Time Horizon)
2. How much money do you expect your investment to earn? (Expectation of Investment)
3. How much of your investment are you willing to lose in the short-term in order to earn more in the long term? (Risk Tolerance)

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

4. What types of investment interest you?
(Investment type)

Emergency Savings Fund

- To become financially independent
- To save on everything you buy
- To prepare for the future
- To get out of debt
- To respond to emergencies

Common Financial Scams

- Phishing
- Social media scams
- Phone scams
- Stolen Credit Card Numbers
- Identity Theft

Things to Avoid

- Never wire money to a stranger
- Don't give out financial information
- Never click on hyperlinks in emails
- Use difficult passwords
- Don't download software from pop-up windows

Digital Literacy

- is the set of competencies required for full participation in society that includes knowledge, skills, and behaviors involving the use of effective use of digital devices.
- **Cybersecurity** - is the practice of protecting systems, networks, and programs from digital attacks.
- **Cyber Citizenship** - is an old value that is now applies to a new medium, the Internet. It means being responsible when using the internet.

Eco-Literacy

- Considers ecological systems and awareness of how society operates within natural aspects as an educational imperative.

Practices

- Develop empathy for all forms of life
- Embrace sustainability for all forms of life
- Make the invisible visible
- Anticipate unintended consequences
- Understand how nature sustains life

Integrating Ecological Literacy into the Curriculum

- Place-Based Learning
- Project-Based Learning
- Socratic Inquiry
- Experiential Learning
- Interdisciplinary Learning

Arts and Creative Literacy

- It's the act of turning new and imaginative ideas into reality.

- **Creativity** - is the process of having original ideas that have value.

Seven Habits of Highly Creative People

1. Prepare the ground
2. Plant seeds for creativity
3. Live in the questions
4. Feed your brain
5. Experiment and explore
6. Replenish your creative stock
7. Liberate your creativity

- **Eye-Hand Coordination** - Coordinated control of eye movement with hand movement and the processing of visual input to guide reaching and grasping along with the use of hands to guide the eyes.

Visual Literacy

- Refers to interpreting and creating visual images

Verbal Creativity

- Fluency
- Flexibility
- Originality
- Elaboration

- **Aesthetics** - Aesthetic or Esthetics is the philosophical study of beauty and taste.

Approaches:

- It is the study of aesthetic concepts
- It is the study of mind, emotions, attitudes, etc.
- It is the study of the aesthetic object

Integrating Arts and Creativity Literacy

- Physical environment
- Emotional environment
- Project-based Learning
- Teach Creative thinking skills
- Alternative assessments
- Scheduling
- Student Centered and Personalized Learning
- Incorporate arts
- Integration of technologies
- Preparing the body and brain for creativity

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

PROFESSIONAL EDUCATION NOTES

B. The Teacher and the School Curriculum, Methods and Strategies for Teaching and Learning, Educational Technology for Teaching and Learning (45)

THE TEACHER AND THE SCHOOL CURRICULUM

Curriculum

Sum total of all teaching-learning processes, experiences and resources.

General Axioms as a Guide in Curriculum Development (Oliva, 2003)

1. Curriculum is dynamic
2. Curriculum is a product of its time
3. Curriculum changes can coexist and oftentimes overlap with newer curriculum changes
4. Curriculum change depends on the implementers of the curriculum
5. Curriculum development is a cooperative group activity
6. Curriculum development is a decision-making process made from choice or alternatives
7. Curriculum development is an ongoing process
8. Curriculum design is based on careful plan
9. Curriculum development is more effective when it follows a systematic process
10. Curriculum starts from where the curriculum is. An existing design is a good starting point for any teacher who plans to enhance and enrich a curriculum

Types of Curricula (WASH LTER)

1. **Written Curriculum** – curriculum that is written. (e.g. lesson plan)
2. **Assessed Curriculum** – anything that are used in assessing the learning of the learners.
3. **Supported Curriculum** – anything that supports the delivery of the content.
4. **Hidden Curriculum** – anything that are not planed in the teaching and learning process
5. **Learned Curriculum** – refers to what do the students learn.
6. **Taught Curriculum** – refers to what is being taught by the teacher.
7. **Enriched Curriculum** – the add-ons in the curriculum that enables to enrich the teaching-learning process.
8. **Recommended Curriculum** – refers to what is being recommended by experts.

Roles of Teacher as Curricularist (KIWIPIE)

1. **Knower** – ability to learn (forever a learner)
2. **Initiator** – initiates linkages and activities
3. **Writer** – writes different written curricula
4. **Innovator** – creates something outside the box

5. **Planner** – ones who plan/schedule the learning activities
6. **Implementer** – implements curriculum in classroom
7. **Evaluator** – evaluates the effectiveness and quality of curriculum

Levels of Curriculum

Societal	<i>Public Stakeholders (Legislators)</i>	Farthest from the learner Identify goals to be studied
Institutional	<i>Educators and School Leaders</i>	Modify/Change the curriculum
Instructional	<i>Classroom Teachers</i>	Styles and strategies Implementer of the curriculum
Experiential	<i>Learners</i>	Process and products Experiences of the curriculum

Recommended Curriculum: Educational Level

1. Basic Education
2. Technical-Vocational Education
3. Tertiary Education

The Sabre-Tooth Curriculum

Harold Benjamin

Curriculum

- tradition of organized knowledge taught in schools
- At the heart of teaching profession
- Every teacher is guided by some sort of curriculum

Points of View of Curriculum

Traditional		Progressive
Direct Teaching	<i>Method of Teaching</i>	Indirect Teaching
Sage on the Stage	<i>Approach</i>	Guide on the side
Expository	<i>Strategy</i>	Exploratory

Traditional Proponents of Curriculum

Robert M. Hutchins	→ “Permanent studies” → Rules of grammar, reading, rhetoric, logic and mathematics for basic education are emphasized → 3Rs (Reading, Writing and Arithmetic)
Arthur Bestor	→ Essentialist (basic and fundamental disciplines) → Mission of the school = intellectual training (grammar, literature and writing) → Mathematics, science, history and foreign language
Joseph Schwab	→ Sole source is discipline (mathematics, social studies, English and many more)
Philip Phenix	→ Consist entirely of knowledge which comes from various discipline → (mix of disciplines)

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Progressive Proponents of Curriculum

John Dewey	→ Education is experiencing → Reflective thinking - unifies curricular elements that are tested by application
Hollin Caswell and Kenn Campbell	→ all experiences children have under the guidance of teachers → set of well-organized experience
Othaniel Smith, William Stanley and Harlan Shore	→ sequence of potential experiences, set up in schools for the purpose of disciplining children and youth in group ways of thinking and acting
Collin Marsh and George Willis	→ all the experiences in the classroom which are planned and enacted by the teacher and also learned by the students

Curriculum Design Proponents

1. End-Means/Objective Centered Approach

Proponent: Ralph Tyler (Father of Educational Evaluation and Assessment and Proponent of Portfolio Assessment)

Deductive in Nature
Top-Down Design
Administrator's Application
Tyler's Cycle 1. <i>Objective</i> – the purpose 2. <i>Selection of Learning Experience</i> – learning experience 3. <i>Organization of Learning Experience</i> – organization of educational experience 4. <i>Evaluation</i> – attainment of the goals

2. Inverted Model/Grassroots Approach

Proponent: Hilda Taba

Inductive in Nature
Bottom-Up Design
Teacher's Application
Grassroot Approach 1. Diagnosis of Learner's Need 2. Objective Formulation 3. Selection of Content 4. Organization of Content 5. Selection of Learning Experience 6. Organization of Learning Experience 7. Evaluation

3. Saylor, Alexander, and Lewis Model

Proponent: Saylor, Alexander, and Lewis

The development of curriculum is affected by external forces.
1. Goals, Objectives and Domain 2. Curriculum Design 3. Curriculum Learning Implementation 4. Evaluation

Three Approaches to School Curriculum

Curriculum as Content

Subject Matter/Discipline

Presenting the content

Topical	Knowledge and Experience
Concept	Understanding and relatedness of the topic
Thematic	Combination of Concepts
Modular	Complete instruction

Criteria in the Selection of Content

Significance	content should contribute to ideas, concepts, principles and generalizations that should attain the overall purpose of the curriculum
Validity	authenticity of the subject matter
Utility	usefulness of the content in the curriculum
Learnability	complexity of the content should be within the range of experiences of the learners
Feasibility	can the subject content be learned within the time allowed, resources available, expertise of the teachers and the nature of the learners?
Interest	driving force for the students to learn better

Guide in the Selection of the Content in the Curriculum

1. Commonly used in daily life
2. Appropriate to the maturity levels and abilities of the learners
3. Valuable in meeting the needs and competencies of the future career
4. Related to other subject fields or discipline for implementation and integration
5. Important in the transfer of learning to other disciplines

Elements of Curriculum Development

Balance	Fairness and Distribution
Articulation	Alignment and Development Alignment of Levels and elements
Scope	Range and Coverage
Integration	Interconnectedness Ability to Blend horizontal relationship (e.g. Math – Science) or vertical integration; bringing together concepts, skills and values of different subjects and present to learner with unified picture of knowledge.
Continuity	Flow Vertical Repetition (Spiral Progression)
Sequence	Order and Arrangement

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Curriculum as a Process

Process and Instruction

- provides curriculum on how to teach the content
- Intersection of the content and process = Pedagogical Content knowledge (PCK)

Guiding Principles:

1. Curriculum process in the form of teaching methods or strategies are means to achieve the end
2. Effectiveness will depend on the desired learning outcomes, the learners, support material and the teacher
3. Stimulate learner's desire to develop cognitive, affective, psychomotor domains in each individual
4. Learning and teaching styles should be considered
5. Every method should result to learning outcomes
6. Flexibility in the use of the process or methods should be considered
7. Teaching and learning are important processes in the implementation of curriculum

Technological, Pedagogical, and Content Knowledge

Technological Knowledge	proper use of technology
Content Knowledge	mastery of the content
Pedagogical Knowledge	art of teaching
Pedagogical Content Knowledge	art of teaching and mastery of knowledge
Technological Content Knowledge	mastery of the content and appropriate use of technology
Technological Pedagogical Content Knowledge	art of teaching and use of appropriate technology

Curriculum as Product

- Intended learning outcomes or desired products
- Knowledge, skills and values

Phases of Curriculum Development Process (POIEMC)

1	Planning	Advanced arrangement of ILO A process that involves: 1. situation analysis, 2. goal setting and need identification, 3. budget determination, and 4. decision-making regarding implementation and evaluation details
2	Organizing	Designing and sequencing the contents Involves the "form" design, pattern, or simply the arrangement of elements of curriculum used; based on one dominant source of curriculum content. Includes: 1. selection of content/subject matter/competencies/learning activities, grade placement, time allotment, and 2. sequence of content/activities

3	Implementation	Curriculum in action
4	Evaluation	Judgement and Assessment of the ILOs
5	Monitoring	Curriculum to be retained, modified, and/or improved
6	Change	Revisions of Curriculum

Components of Curriculum Designs

1. Intended Learning Outcomes
2. Subject Matter
3. Teaching and Learning Methods
4. Assessment Method

Foundations of Curriculum

Psychological Foundation

Naturalism	Nature of the child Natural resources Imitation
Behaviorism	Shape by the environment Controls behavior Stimulus and response; reinforcement
Cognitivism	Mental Processes Learning is dynamic
Phenomenological	Humanistic and wholeness

Ivan Pavlov (1849 - 1936)	○ Father of classical conditioning theory ○ S-R theory = foundation of learning practice called indoctrination ○ Key to early learning = train them what you want them to become
Edward Thorndike (1874 - 1949)	○ connectionism theory
Robert Gagne	○ Hierarchical Learning theory ○ Learning follows a hierarchy
Jean Piaget (1896 - 1980)	○ Cognitive development theory - has stages from birth to maturity; 1. Sensorimotor stage (0 - 2) 2. Preoperational (2 - 7) 3. Concrete operation stage (7 - 11) 4. Formal operation (11 - onwards)
Lev Vygotsky (1896 - 1934)	○ Socio-cultural development theory ○ Zone of proximal development ○ Scaffolding
Howard Gardner	○ Multiple Intelligences ○ Humans have several different ways of processing information and these ways are relatively independent of one another
Daniel Goleman	○ Emotion Intelligence theory - five aspects: ○ self-awareness ○ self-regulation ○ motivation ○ empathy ○ social skills ○ emotion contains the power to affect action

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Gestalt	- Gestalt psychology/ Gestalt theory - Learning is explained in terms of “wholeness” of the problem - the whole of anything is greater than its parts
Abraham Maslow (1902 - 1970)	- Hierarchy of needs./ Motivational theory - five levels: - Physiological - Safety - love/belonging - esteem - self-actualization
Carl Rogers (1902 - 1987)	- Client-centered therapy/ Rogerian psychotherapy - Non-directive and Therapeutic learning - fostering personality growth by helping individuals gain insight into and acceptance of their feelings, values, and behaviour.
John Dewey (1859 - 1952)	- Instrumentalism - ideas are seen to exist primarily as instruments for the solution of problems encountered in the environment "Learning by Doing" - schools and civil society - major topic that needs attention and reconstruction
Alvin Toffler	“Third Wave Society” “Future Shock” – book - knowledge should prepare students for the future - knowledge and technology for future studies and social change.

Perennialism	Perpetual and classic Humanities, and history Everchanging St. Thomas Aquinas/Robert Hutchins
Idealism	Plato Values and Perfection Heroes Contribution Learning is what is good in the mind Soul and spirit
Realism	Aristotle Science and facts Tangible and observable To see is to believe
Pragmatism	Change is constant Practical Specialist Charles Deivse

Historical Foundation

Pre-Colonial Period	Survival and Basic Needs
Spanish	Christianity and Religious Oriented
American	Public Education
Commonwealth	Nationalism
Japanese	Love of Labor (Vocational)
3rd Republic	Patriotism
New Society	Professionalization of Teachers Prioritization of Science and Technology
5th Republic	High Quality Education and Human Rights

Philosophical Foundation

Pragmatism	Practical approach Change is constant Trial and error
Existentialism	Choice and Freedom with responsibility
Axiology	Moral/ethics
Realism	Truth can be tested and proven To see is to believe
Logical/Rationalism	HOTS According to sound reason Science-based
Metaphysics	Beyond physics Study of ultimate reality
Epistemology	Theory of Knowledge
Idealism	Ideal, good to spirit perfection.

Educational Foundation

Progressivism	Learning by doing Hitting while the iron's hot Learner centered Modern approach Experience is the best teacher Montesorri, Waldorf, Dewey
Reconstructionism	Rebuilding culture/society ROTC, CAT Learning through Society
Essentialism	Basic Needs 3Rs and Fundamentals William Bagley
Existentialism	Freedom and Choice with responsibility Student-centered Progressive and self Jean Paul Sartre

Types of Curriculum Design

Subject-Centered Curriculum

Emphasis on well-organized subject by lecture; on improving teaching of subject matter and on uniformity of exposures; on teaching facts and knowledge for future use;

Broadfield	Broadening and integration or fusion of several subjects on longer time blocks; may integrate through: a) principles or themes; b) historical integration of subject It combines two or more related subjects into a single broad field of study like Language Arts.
Fuse	similar to correlated subjects but the individual identity of each subject is lost.
Correlated	Comes from a core, correlated curriculum that links separate subject design in order to reduce fragmentation, isolation or compartmentalization, that is, subjects in two or more areas are related in content and time but the subject identities remain
Discipline/Separate	It focuses only on academic discipline (or organized subject matter area) which is referred to specific knowledge learned through a method which the scholars use to study a specific content of their fields; teachers should teach how the scholars in the discipline will convey the particular knowledge. It is often use in the college in which discipline becomes the degree program

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Subject	It stresses so much the content that it forgets about students' natural tendencies, interests and experiences. The oldest and so far the most familiar design for teachers, parents and other laymen; easy to deliver since complementary books are written and support instructional materials are commercially available
Process	Learning how to design
Spiral	A spiral concept of the curriculum provides for both horizontal (widening of knowledge) and vertical (deepening of knowledge) aspects of the curriculum design simultaneously. It recognizes that students are not ready to learn certain concepts until they reach the required level of development and maturity and have the necessary experiences

Learner-Centered Design

Emphasis on all-around growth of learners; on meaningful immediate use of learning; on understanding and improving through active, dynamic process; on parts flow together as whole, with continuous fusion and merging

Activity-Based	Based on child's needs but there is no advance planning ; may necessitate special subjects for specialized interests; use of problem-solving method; cooperative planning
Child-Centeredness	It is anchored on the needs and interests of the child ; the learner is not considered as a passive individual but as one who engages with his/her environment ;
Experience-Based	Experiences of the learners become the starting point of the curriculum ; the school environment is left open and free since the interests and needs of learners cannot be pre-planned; learners are made to choose from various activities that the teacher provides
Process-Oriented	Focuses on personal attributes and skills of individual learner in ever-widening circles of self, others, and society; emphasizes development of skills and traits that will serve the learner for life
Humanistic	The development of self is the ultimate objective of learning; it stresses the whole person and the integration of thinking, feeling, and doing;

Problem-Based

Emphasizes problem-solving processes and skills on human and social relations more than content –acquisition

Life-Situations Design (Social Process and Life Functions-Focused)	Uses the past and present experiences of the learners as a means to analyze the basic areas of living; the pressing immediate problems of the society and the students' existing concerns are utilized
---	--

Core (social function)	Focuses on the set of learning experiences that are felt to be essential for all students that includes common needs, problems, concerns; centers on general education and the problems are based on common human activities
-------------------------------	--

Categories of Curriculum Change/Improvement

- **Substitution** – something is change
- **Alteration** – something is added/minor changes
- **Restructuring** – something is organizing
- **Perturbation** – there is an urgent/unplanned sudden change.
- **Value Orientation** – change in VMGO

Curriculum Mapping

1. Learning Outcomes
2. Learning Process (Curriculum Map)
3. Assessment Process
4. Assessment Result
5. Action Plan for Change

Curriculum Reforms

1. **NESC** – New Elementary School Curriculum
2. **NSEC** – New Secondary Education Curriculum
3. **RBEC 2002** – Revised Basic Education Curriculum of 2002
4. **UBD** – Understanding by Design
5. **K-12** (Bro. Armin Luistro)

RA 10533 Enhanced Basic Education Act of 2013

- K-12 Curriculum
- K-12 is compulsory (5y/o)

Aims

- Globally competitive
- Enhance education
- Lifelong learning experience and employment

Salient Features

- Strengthening ECE
- Relevant Curriculum (Contextualization and Enhancement)
- Mother Tongue Language
- Gearing for the Future (SHS)
- 21st Century Skills

Kindergarten Education Act

RA 10157

- Compulsory MTB and Kindergarten for 5 y/o
- Aquino III

Mother Tongue Based- Multi-lingual Education

- *D.O. 74, s. 2009* – MTB as medium of instruction
- Effective use of two or more language

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Trifocalization

- DepEd
- TESDA
- CHED

Most Essential Learning Competencies (MELCs)

- 60% reduction of MELCs
- 14171 to 5689

Learning Delivery Modes

- Conventional (FTF)
- Distance Learning
- Blended/Flexible Learning
- Experiential Learning
- Homeschooling

Alternative Learning System (ALS)

- Alternative Education
- Continuing Education Program – accreditation and equivalency test

MADRASAH Curriculum

D.O. 41 s 2017

- Madarus – Classroom; Asatidz – Teachers
- **ALIVE** – Arabic Language and Islamic Values Education.

21st Century Teacher

- **Multiliterate** – know how to understand
- **Multispecialist** – familiar with different disciplines
- **Multiskilled** – know how to use different skills
- **Self-directed**
- **Lifelong Learner**
- **Flexible**
- **Creative Problem Solver**
- **Critical Thinking** – suspend judgement
- **Has Passion**
- **High EQ**

Frameworks

1. **Multidisciplinary** – as undivided
2. **Interdisciplinary** – relative/connections
3. **Transdisciplinary** – beyond content

Methods of Curriculum Interdisciplinary

1. Project-Based Learning
2. Service Learning (OJT)
3. Theme-Based – linked contents
4. Fusion – merge

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

PROFESSIONAL EDUCATION NOTES

B. The Teacher and the School Curriculum, Methods and Strategies for Teaching and Learning, Educational Technology for Teaching and Learning (45)

TECHNOLOGY FOR TEACHING AND LEARNING

Definition of Terms

1. **Technology**
planned and systematic method of science (inventions and applications)
2. **ICT (Information and Communications Technology)**
process information
3. **Technology Integration**
application of technology
4. **Educational Technology**
broadest concept of technology in the whole education system.
5. **Educational Media**
instructional materials
6. **Audio-Visual**
materials that can be heard and seen (hearing and sight)

Educational Technology

1. **Digital Literacy**
Ability to use ICT and internet
Digital Natives – born with technology (Gen Alpha)
Digital Citizens – digitally literate (teachers and others)
2. **Digital Learning**
Type of learning that is accompanied by technology
3. **Digital Tools**
Applications and gadgets
4. **Multimedia**
Variety of media format

ICT in Teaching and Learning

Teachers

1. Provide enormous support to the teachers
2. Modernized the teaching-learning environment
3. Opens new fields in education researches
4. Support for teachers as facilitators of learning

Learners

1. Support learners on how to learn on their own
2. Enhance learner's communication skills through social interactions
3. Enhances global awareness and digital citizenship
4. Transform passive to interactive classroom

Current Trends in Assessment in Learning

1. **Computer-Assisted Assessment (CAA)**
Assessment delivered through computer
(immediate and frequent result)

2. **E-Portfolio**
Digital compilation of learning records of students
3. **Digital Rubrics**
Digital assessment tools
4. **Survey Tools**
Collects feedbacks online (PollDaddy)
5. **WikiSpace**
Tracks contribution of each member

Technology Integration Model

1. **Determine Relative Technology**
Identify teaching problems.
Decide technology-based assessment tools that will solve the problem.
2. **Objective and Assessment**
Decide learning outcomes and appropriate assessment that will adhere learning outcomes
3. **Integration Strategies**
Decide the learning activities
Identify Technology-based tools
4. **Instructional Environment**
Preparation of Instructional Materials
5. **Evaluation and Devise Integration Strategies**
Improving strategy and technology-based tools

Issues on Information and Communications Technology

1. Freedom of Expression and Censorship
2. Privacy and Security
3. Surveillance and Data Retention
4. E-pollutants from E-waste

Digital Citizenship and Literacy

9 Elements of Digital Citizenship

Digital Access	Equitable distribution
Digital Commerce	Selling and buying goods and service. Anything related to market and money flows
Digital Communication	Understanding different digital technology mediums
Digital Etiquette	Encouraging responsible use of different online platforms
Digital Literacy	Understanding many forms of technologies.
Digital Health and Welfare	Wellness, health monitoring using technology
Digital Laws	Conforming to online policies
Digital Rights and Responsibilities	Function of an online user
Digital Security and Privacy	Online precautions to promote safety

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Information and Media Literacy

1. **Media Literacy**
Ability to critically read and process contents
2. **Information Literacy**
Locating information and interpreting/evaluating validity of information
3. **Netiquette**
Manner in using the internet

Types of Information

1. **Misinformation**
False but they believe that it is true
2. **Disinformation**
they know that it is false but they still share it
3. **Malinformation**
True information but it is used to inflict harm.

Communication and Collaboration - Able to participate in digital networks.

Coordination – help the teachers and learners find resource material

Social Networking Sites

1. Facebook
2. Twitter (x)
3. LinkedIn
4. Instagram
5. Tumbler

Identity Management – ensure safety and security in managing online identity

ICT Policies

Roadmap/course of action
DICT (2016)

DICT Programs

1. eQuality Program
2. eSkwela
3. iSchool WebBoard

R.A. 8893: Intellectual Property Act

1. **Copyright**
Legal right given to the owner of original work or intellectual property
2. **Plagiarism**
(Moral)
Without citing the original author/source
3. **Copyright Infringement**
(Ethical/Legal)
Using works without permission from the original author/creator

D.O. 35 s. 2016: Learning Action Cell (LAC)

- Seminar for Teacher
- Importance of ICT Integration to the teaching-learning
- 21st century and ICT integration in instruction and assessment.

Theories and Principles in Educational Technology

Dale's Cone of Experience

Proponent: Edgar Dale (*Father of Modern Educational Media*)

Level of Concreteness or Abstractness.

Verbal Symbols	10%	Read	Passive Learning
Visual Symbols			
Audio Recordings	20%	Hear	
Still Pictures	30%	See	
Motion Pictures	50%	Hear and See	
Exhibits			
Field Trips	70%	Say and Write	Active Learning
Demonstration			
Dramatization	90%	Do	
Contrived Experience			
Direct Experience			

Examples of Learning Experience

1. Direct Purposeful Experience

Direct Experience – first-hand experience of the learning

Realia – real object

2. Contrived Experience

Contrived Experience – copy of realia

Replica – same size as the object/realia.

Model – it can be smaller or bigger

Mock-Up – can be detached/attached

Simulation – copy of event

3. Dramatized Experience

Dramatized Experience – act out experience

Role Play – acting-out events (act-it-out situations)

Pantomime – use of body gestures

Tableau – best picture of a real event

Puppet show – acting using puppets

4. Demonstration Experience

Demonstration Experience -performing a specific task

Performance-Based Task – performing the task

5. **Field Trip**

Bringing the learners to the materials

6. **Exhibits**

Bringing the students to the material or vice versa but exclusive for your eyes only.

7. **Motion Pictures**

Audio-Visuals that can be heard and seen by the learners

8. **Audio Recordings/Still Pictures**

Audio that can be heard by the learners or Pictures only that can be seen by the learners

9. **Visual Symbols**

Graphic Organizers that can be read

10. **Verbal Symbols**

Oral and written symbols

Three-Tiered Model of Learning

Proponent: Jerome Bruner (Father of Instructional Materials)

Originated the idea of concreteness and abstractness

1. **Enactive** - action-based
2. **Iconic** – images and sounds
3. **Symbolic** – mental representation (language)

Models in Planning Instruction

1. **ADDIE Model**

Analysis	Analysis of the Intended Learning Outcomes Seq. of Analysis: ILO-Learners-IMs
Design	Planning Phase
Development	Production Phase
Implementation	Instruction in action
Evaluation	assessment

2. **ASSURE Model**

1	A nalyze the learners
2	S elect Objectives
3	S elect Materials
4	U tilization
5	R equire Learner's Participation
6	E valuation

Gibb's Reflective Cycle

1. **Description** – happenings
2. **Feelings** – thinking and feelings
3. **Evaluation** – good and bad experience
4. **Analysis** – sense can you make
5. **Conclusion** – could have done differently
6. **Action Plan** – approach similar situation in future

Technology Integration Matrix

1. **Entry** – teacher uses technology to deliver content
2. **Adoption** – teacher demonstrates/directs the learners on how to use technology tools
3. **Adaptation** – learners can select/modify the technology tools
4. **Infusion** – consistent use of technology tools
5. **Transformational** – learners use HOTS for innovation

		Levels of Technology Integration into the Curriculum				
		Entry	Adoption	Adaptation	Infusion	Transformation
Characteristics of the Learning Environment	Active	Information passively received	Conventional, procedural use of tools	Conventional independent use of tools; some student choice and exploration	Choice of tools and regular, self-directed use	Extensive and unconventional use of tools
	Collaborative	Individual student use of tools	Collaborative use of tools in conventional ways	Collaborative use of tools; some student choice and exploration	Choice of tools and regular use for collaboration	Collaboration with peers and outside resources in ways not possible without technology
	Constructive	Information delivered to students	Guided, conventional use for building knowledge	Independent use for building knowledge; some student choice and exploration	Choice and regular use for building knowledge	Extensive and unconventional use of technology tools to build knowledge
	Authentic	Use unrelated to the world outside of the instructional setting	Guided use in activities with some meaningful context	Independent use in activities connected to students' lives; some student choice and exploration	Choice of tools and regular use in meaningful activities	Innovative use for higher order learning activities in a local or global context
	Goal-Directed	Directions given, step-by-step task monitoring	Conventional and procedural use of tools to plan or monitor	Purposeful use of tools to plan and monitor; some student choice and exploration	Flexible and seamless use of tools to plan and monitor	Extensive and higher order use of tools to plan and monitor

SAMR Model

Enhancement

1. **Substitution** – technology acts as closest substitute with no functional improvement (traditional)
2. **Augmentation** – same with substitution but with functional improvement

Transformational

- Modification** – technology allows for significant task redesign
- Redefinition** – allows the creation of new task previously inconceivable

Technological, Pedagogical, and Content Knowledge (TPaCK)

Technological Knowledge	proper use of technology
Content Knowledge	mastery of the content
Pedagogical Knowledge	art of teaching
Pedagogical Content Knowledge	art of teaching and mastery of knowledge
Technological Content Knowledge	mastery of the content and appropriate use of technology
Technological Pedagogical Content Knowledge	art of teaching and use of appropriate technology

TPaCK Constructs	Definition	Example
TK	Knowledge about how to use ICT hardware and software and associated peripherals	Knowledge about how to use Web 2.0 tools (e.g., Wiki, Blogs, Facebook)
PK	Knowledge about the students' learning, instructional methods, different educational theories, and learning assessment to teach a subject matter without references towards content	Knowledge about how to use problem-based learning (PBL) in teaching
CK	Knowledge of the subject matter without consideration about teaching the subject matter	Knowledge about Science or Mathematics subjects
PCK	Knowledge of representing content knowledge and adopting pedagogical strategies to make the specific content/topic more understandable for the learners	Knowledge of using analogies to teach electricity (see Shulman, 1986)
TPK	Knowledge of the existence and specifications of various technologies to enable teaching approaches without reference towards subject matter	The notion of Webquest, KBC, using ICT as cognitive tools, computer-supported collaborative learning
TCK	Knowledge about how to use technology to represent/research and create the content in different ways without consideration about teaching	Knowledge about online dictionary, SPSS, subject specific ICT tools e.g. Geometer's Sketchpad, topic specific simulation
TPaCK	Knowledge of using various technologies to teach and/or represent and/or facilitate knowledge creation of specific subject content	Knowledge about how to use Wiki as an communication tool to enhance collaborative learning in social science

Technology-Enhanced Lessons

1. Traditional/Conventional Tools

- Writing Board
- Diorama
- Nature Table (parts of plants)
- Flip Chart
- Zigzag Board
- Board/Wall Display

Guidelines in Selecting Conventional Tools

- Unity** – coherence of structure, theme, and design
- Simplicity** – easy to use
- Legibility**
- Consistency**
- Quality**

2. Digital/Non-Conventional Tools

✓ Mobile Phones and QR Codes	✓ E-Portfolio
✓ Infographics	✓ Public Domain Photos
✓ Smartboards	✓ Online Comics Maker
✓ E-Books	✓ Web Conferencing Apps
✓ Online Bulletin Boards	

Terms Related to Internet

- Internet** – net/cyberspace/information superhighway
- WWW** – worldwide web (web/W3) websites in the world
- URL** – uniform resource locator
- Browser** – use to browse in the internet

Learning Modalities

Face-to-Face Driver

Physically present teaching and learning

Distance Education

Online and Modular Approach

- Synchronous – real time
- Asynchronous – different time (flexible and self-paced)

Flexible Learning (Hybrid Learning)

- Rotation**
Discussion – lecture room
Performance – practical
- Flipped Classroom**
Content – online
Performance – ftf
- Flex Model**
Full ftf
Online – mentoring
- Online Lab**
Online in School and being supervised by the teacher through online too.

Learning Management System

- Develop online learning materials
- Store and track information
- Participate in online classes

Massive Open Online Courses

- Massive – it can accommodate big number of people
- Open – it can open the data through online
- It has syllabus and assessment tools.

PROFESSIONAL EDUCATION NOTES

C. The Child and Adolescent Learner and Learning Principles (30)

FACILITATING LEARNER-CENTERED TEACHING AND LEARNING

Metacognition (John Flavell, 1970)

- Learning how to learn
- Thinking about thinking
- Regulate cognitive process
- High-Order Thinking Skill

14 Learner-Centered Teaching and Learning Principles

Proponent: American Psychological Association

- This deals holistically with learners in the context of real-world learning situations.
- The 14 principles are divided into those referring to
 - Cognitive and metacognitive,
 - motivational and affective,
 - developmental and social; and
 - individual difference factors

Cognitive and Metacognitive Factors

1. Nature of Learning Process

The learning of complex subject matter is most effective when it is an *intentional process* of constructing meaning from information and experience.

2. Goal of the Learning Process

The successful learner, over time with support and instructional guidance, can *create meaningful, coherent representations of knowledge*; goal-directed.

3. Construction of Knowledge

The successful learner can *link new information with existing knowledge* in meaningful ways

4. Strategic Thinking

The successful learner can create *and use a repertoire of thinking and reasoning strategies* to achieve complex learning goals.

5. Metacognition

Higher order strategies for *selecting and monitoring mental operations* facilitate creative and critical thinking.

6. Control of Learning

Learning is influenced by environmental factors, including culture, technology, and instructional practices.

Motivational and Affective Factors

7. Motivational and Emotional Influence in Learning

What and how much learning is influenced by the learner's motivation. Motivation to learn, in turn, is influenced by the individual's emotional states, beliefs, interests and goals, and habit of thinking.

8. Intrinsic Motivation

The learner's creativity, higher order thinking, and natural curiosity all contribute to motivation to learn. Intrinsic motivation is *stimulated by tasks of optimal novelty and difficulty, relevant to personal interests, and providing for personal choice and control*

9. Effects of Motivation on Efforts

Acquisition of complex knowledge and skills requires extended learner effort and guided practice. *Without learners' motivation to learn, the willingness to exert this effort is unlikely without coercion.*

Developmental and Social Factors

10. Developmental Influence on Learning

As individuals develop, there are different opportunities and constraints for learning. *Learning is most effective when differential development* within and across physical, intellectual, emotional, and social domains is taken into account.

11. Social Influence on Learning

Learning is influenced by social interactions, interpersonal relations, and communication with others.

Individual Differences Factors

12. Individual Differences on Learning

Learners have different strategies, approaches, and capabilities for learning that are a function of prior experience and heredity.

13. Learning and Diversity

Learning is most effective when differences in learners' linguistic, cultural, and social backgrounds are taken into account.

14. Standards and Assessment

Setting appropriately high and challenging standards and assessing the learner as well as learning progress – including diagnostic, process and outcome assessment – *are integral parts of the learning process.*

Individual Differences (James Drever)

- Variation in holistic aspects of an individual from the group/others.
- Unique characteristics and traits

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Diversity

- Differences in people
- Race, beliefs, age, ethnicity, gender, ability, sexual orientation, socio-economic background, and political conviction.

Gender	Sexual Orientation
Social Construct	Attracted with (Self-Identity)

Race	Ethnicity
Narrow and Similar in Physical Traits Biological	Broad and Cultural Expression Place of Origin

Brain and its Parts

- The most complex part of the human body. This three-pound organ is the seat of intelligence, interpreter of the senses, initiator of body movement, and controller of behavior.
- **Pruning:** extra neurons are eliminated (not essential) to increase the efficiency of neurotransmitters (*degradation*)
- **Plasticity:** change in response to external stimuli by reorganizing its structures, functions, and connections (*flexibility*)

Structures of the Brain

Three Structures of the Brain	
	Hindbrain
	• includes the upper part of the spinal cord, the brain stem, and a wrinkled ball of tissue called the cerebellum. • The hindbrain controls the body's vital functions such as respiration and heart rate.
	Midbrain
	• The uppermost part of the brainstem • controls some reflex actions and is part of the circuit involved in the control of eye movements and other voluntary movements
	Forebrain
	• is the largest and most highly developed part of the human brain: it consists primarily of the cerebrum and the structures hidden beneath it ("The Inner Brain").

Cerebrum, Cerebellum, and Medulla Oblongata

Main Parts of the Brain	
	Cerebrum
	• fills up most of your skull. It is involved in remembering, problem solving, thinking, and feeling. It also controls movement.
	Cerebellum
	• sits at the back of your head, under the cerebrum. It

controls coordination and balance.

Medulla Oblongata (Brain Stem)

- sits beneath your cerebrum in front of your cerebellum. It connects the brain to the spinal cord and controls automatic functions such as breathing, digestion, heart rate and blood pressure.

Cerebral Cortex

- Coating the surface of the cerebrum and the cerebellum
- Vital layer of tissue the thickness of a stack of two or three dimes. From the Latin word for bark.
- Most of the actual information processing in the brain takes place in the cerebral cortex.
- The cortex is gray because nerves in this area lack the insulation that makes most other parts of the brain appear to be white.

Geography of Thoughts

	Frontal Lobe
	• The two frontal lobes lie directly behind the forehead. • Prospective memory a type of memory that involves remembering the plans made, from a simple daily plan to future lifelong plans
	Motor Cortex
	• In the back portion of each frontal lobe • Helps plan, control, and execute voluntary movement, like moving your arm or kicking a ball.
	Parietal Lobe
	• two sections behind the frontal lobes called • When you enjoy a good meal—the taste, smell, and texture of the food—the parietal lobes also support reading and arithmetic.
	Somatosensory Complex
	• The forward parts of these lobes, just behind the motor areas. • These areas receive information on temperature, taste, touch, and movement from the rest of the body
	Occipital Lobe
	• two areas at the back of the brain are at work. • process images from the eyes and link that information with images stored in memory. <i>Damage to the occipital lobes can cause blindness.</i>

	Temporal Lobe - lie in front of the visual areas and nest under the parietal and frontal lobes. - Whether you appreciate symphonies or rock music, your brain responds through the activity of these lobes. - At the top of each temporal lobe is an area responsible for receiving information from the ears. - The underside of each temporal lobe plays a crucial role in forming and retrieving memories, including those associated with music. - Other parts of this lobe integrate memories and sensations of taste, sound, sight, and touch.
--	---

Theory of Multiple Intelligence

Proponent: Howard Gardner (1983, Frames of the Mind)

- This theory suggests that traditional psychometric views of intelligence are too limited. Gardner first outlined his theory in his 1983 book *Frames of Mind: The Theory of Multiple Intelligences*, where he suggested that all people have different kinds of "intelligences."

Nine Multiple Intelligence

Verbal-Linguistic Intelligence

- Well-developed verbal skills and sensitivity to the sounds, meanings and rhythms of words.
- Skills:** Listening, speaking, writing, teaching.
- Careers:** Poet, journalist, writer, teacher, lawyer, politician, translator.

Mathematical-Logical Intelligence

- Ability to think conceptually and abstractly, and capacity to discern logical or numerical patterns.
- Skills:** Problem solving (logical & math), performing experiments
- Careers:** Scientists, engineers, accountants, mathematicians

Musical Intelligence

- Ability to produce and appreciate rhythm, pitch and timber
- Skills:** Singing, playing instruments, composing music
- Careers:** Musician, disc jockey, singer, composer

Visual-Spatial Intelligence

- Capacity to think in images and pictures, to visualize accurately and abstractly.
- Skills:** puzzle building, painting, constructing, fixing, designing objects
- Careers:** Sculptor, artist, inventor, architect, mechanic, engineer

Bodily-Kinesthetic Intelligence

- Ability to control one's body movements and to handle objects skillfully
- Skills:** Dancing, sports, hands on experiments, acting
- Careers:** Athlete, PE teacher, dancer, actor, firefighter

Interpersonal Intelligence

- Capacity to detect and respond appropriately to the moods, motivations and desires of others
- Skills:** Seeing from other perspectives, empathy, counseling, co-operating
- Careers:** Counselor, salesperson, politician, business person, minister

Intrapersonal Intelligence

- Capacity to be self-aware and in tune with inner feelings, values, beliefs and thinking processes.
- Skills:** Recognize one's S/W, reflective, aware of inner feelings
- Careers:** Researchers, theorists, philosophers

Naturalist Intelligence

- Ability to recognize and categorize plants, animals and other objects in nature
- Skills:** Recognize one's connection to nature, apply science theory to life
- Careers:** Scientist, naturalist, landscape architect

Existential Intelligence

- Sensitivity and capacity to tackle deep questions about human existence, such as the meaning of life, why do we die, and how did we get here.
- Skills:** Reflective and deep thinking, design abstract theories
- Careers:** Scientist, philosopher, theologian.

Learning Theories

Behaviorism

- "Behaviorism is only concerned with **observable stimulus-response behaviors**, as they can be studied in a systematic and observable manner."

Behaviorist Principle inside the Classroom

- Use a system of rewards to encourage certain behaviors or learning.
- When learning factual material provides immediate provides immediate and frequent feedback for complex and difficult concept.
- Provide practice, drill and review activities to enhance mastery of facts.
- Break down complex task into smaller and manageable sub skills.
- Sequence material to enhance understanding.
- Model the behavior students are to imitate and repeat demonstrations when necessary.

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

- Reinforce when students demonstrate the modeled behavior
- State the learning outcomes desired for the benefit of both teacher and students
- Establish a contract with a student on the work to be done and what rewards will be given.

Behaviorism (Conditioning)

Proponent: John Broadus Watson (Father of Behaviorism)

- **Little Albert Experiment** – understanding fear, love, prejudice, and phobias.
- Observing how controlled environment changes behavior.

Classical Conditioning

Proponent: Ivan Pavlov

- It is also known as Pavlovian or respondent conditioning is learning through association. In simple terms, two stimuli are linked together to produce a new learned response in a person or animal.

Concepts in Classical Conditioning

- **Stimulus Generalization:** same response to similar stimuli
- **Extinction:** decrease/disappearance or weakening of the conditioned response
- **Excitation:** novel stimulus to trigger response
- **Discrimination:** differentiate similar stimuli
- **Spontaneous Recovery:** reappearance of the conditioned response after a period of extinction/rest period.

Operant/Instrumental Conditioning

Proponent: Burrhus Frederick Skinner

- is a method of learning normally attributed to B.F. Skinner, where the consequences of a response determine the probability of it being repeated.

Concepts in Operant Conditioning

- **Reinforcement:** anything that strengthen positive behavior.
- **Punishment:** anything that weakens the undesirable behavior
- **Shaping:** reinforcing successive steps to reach a desired behavior.
- **Chaining:** reinforcing a series of behavior to get reward. Development a sequence of responses and reinforcing each response with an opportunity to perform the next response.
- **Extinction:** no longer reinforced
- **Primary Reinforcers:** helps the organism to survive
- **Secondary Reinforcers:** stimulus that reinforce after being associated to primary reinforcer.

Reinforcement and Punishment

- **Positive Reinforcement:** something is added to strengthen the behavior
- **Negative Reinforcement:** something is removed to strengthen the behavior
- **Positive Punishment:** something is added to decrease behavior
- **Negative Punishment:** something is removed to decrease the behavior

Schedule for Reinforcement

INTERVAL SCHEDULES		RATIO SCHEDULES	
Schedule	Examples	Schedule	Examples
Fixed-Interval Schedule An exact amount of time passes between each reinforcement.	• Studying for a weekly quiz • Getting your paycheck every two weeks	Fixed-Ratio Schedule Reinforcement occurs after a fixed number of responses.	• Getting one free meal after the purchase of ten • Losing your driver's license after five violations
Variable-Interval Schedule A varying amount of time passes between each reinforcement.	• Checking e-mail • Winning a video game	Variable-Ratio Schedule Reinforcement occurs after a varying number of responses.	• Playing the lottery • The number of shots to score a goal in a soccer game

Partial reinforcement schedules can be based on time (interval) or response rate (ratio).

Connectionism Theory

Proponent: Edward Lee Thorndike

- is built on the foundation that learning is the result of associations forming between stimuli and responses. These associations or “habits” become strengthened or weakened by the nature and frequency of the stimulus-response pairings.

Primary Laws of Learning

- Law of Readiness
- Law of Exercise
- Law of Effects

Secondary Laws of Learning

- Law of Primacy
- Law of Recency
- Law of Intensity
- Law of Multiple Responses
- Law of Ste Attitude

Aristotle's Associationism

Proponent: Aristotle

- **Law of Contiguity** – close to each other (remember the most)
- **Law of Frequency** – the more you exercise it, the more you remember it.
- **Law of Similarity** – two things similar tend to trigger the thought of others.
- **Law of Contrast** – recalling something will also trigger its opposite.

Purposive Behaviourism/Sign Learning Theory

Proponent: Edward C. Tolman

- Tolman (1932) proposed five types of learning:
 - (1) approach learning;
 - (2) escape learning;
 - (3) avoidance learning;
 - (4) choice-point learning; and
 - (5) latent learning.
- Learning is a Cognitive Process.**
 - Learning involves forming beliefs and obtaining knowledge about the environment and then revealing that knowledge through purposeful and goal-directed behavior.

Key Concepts in Purposeful Behaviourism

- Latent Learning** - kind of learning that remains or stays with the individual until needed. It is learning that is not outwardly manifested at once.
- Intervening variables** – are variables that are not readily seen but serve as determinants of behavior. Tolman believed that learning is mediated or is influenced by expectations, perceptions, representations, needs and other internal or environmental variables.
- Reinforcement is not Essential** because learning is purposive and goal-directed.

Principles of Sign Learning Theory

1. Learning is always purposive and goal-directed.
2. Learning often involves the use of environmental factors to achieve a goal (e.g., means-ends-analysis)
3. Organisms will select the shortest or easiest path to achieve a goal.

Social Learning Theory

Proponent: Albert Bandura

Social Learning Theory

- Learn through observation (simulation)
- Modelling and imitating
- Vicarious Experience (experience that comes from the model of behavior being observed by the learner)

Cognitive Perspective

- deals with the study of human thought processes called mental events. It is focused on what is going on inside the

mind of an individual when he or she is learning or thinking.

Cognitivist Principle inside the Classroom

- Gain the students' attention
- Bring mind relevant prior learning
- Point out important information
- Present information in an organized manner
- Show students how to categorize (chunk) related information
- Provide opportunities for students to elaborate on new information
- Show students how to use coding when memorizing lists
- Provide for repetition of learning.

Gestalt Insightful Learning Psychology

Proponents: Wolfgang Kohler, Kurt Koffka, Mark Wertheimer

- The whole is more than the sum of its part.
- encourage the brain to view not just the whole, but also the parts that make up that whole. The whole and the sum of its parts are two entirely different things, and learning can be achieved if learners are able to cognitively process how parts can make up this whole.

The Main Principles of the Gestalt Theory

- Teachers should encourage their students to discover the relationship of the elements that make up a problem
- Incongruities, gaps, or disturbances are essential stimuli in the learning process
- Educational instruction should be based on the Laws of Organization

Gestalt Principles

- Law of Similarity** – objects are grouped because they share similar traits/characteristics.
- Law of Proximity** – objects are grouped together because they are close to each other.
- Law of Continuity** – objects are perceived to be single uninterrupted entity if there are intersection between the elements.

- **Law of Closure** – objects/elements are grouped together if they are perceived as part of an entity.
- **Law of Symmetry/Common Region** – objects are symmetrical if they are formed around the center.
- **Law of Pragnanz/Good Figure** - elements should be organized into simplistic figures, based on their symmetry, smoothness and regularity

Types of Stimuli Processing

- **Bottom-Up** – from small/specific elements create a larger unit. (Inductive)
- **Top-Down** – large unit to recognize specific/small elements. (Deductive)

Information-Processing Theory

Proponents: George Miller and Richard Shiffrin

- suggests that our cognitive abilities are based on the interaction of sensory memory, short-term memory, and long-term memory. These components work together to help us encode, store, and retrieve information efficiently.

- **Encoding:** takes in the memory in the brain
- **Storage:** store the memory
- **Retrieval:** recall the memory
- **Regression:** cognitive abilities return to the earlier developmental stage.
- **Learning Plateau:** brain reach the peak of learning and stop processing learning.
- **Developmental Crisis:** transitional period with personal challenges.

Types of Memory

1. **Sensory memory:** This initial stage briefly holds and filters external stimuli. With a limited capacity and short duration, sensory memory is responsible for selective processing, allowing us to focus on relevant information and disregard irrelevant stimuli.
2. **Short-term memory (STM):** Information from sensory memory is transferred to STM, where it is temporarily stored and manipulated. The central executive, a key component in cognitive theory, oversees STM's operations, managing cognitive resources and controlling attention. STM has a limited capacity (7 ± 2 items, as suggested by George Miller) and a short duration (around 20-30 seconds).
3. **Long-term memory (LTM):** Important information from STM is encoded and transferred to LTM, where it can be stored indefinitely. LTM, with its unlimited capacity, serves as long-term storage for information throughout lifetime.

Types of Attention

Attention: perceiving information

- **Cocktail Party Effect** – focus on what a person wants to hear while filtering others (selective hearing and attention)
- **Stroop Effect** – delay in reaction due to mismatch in stimuli

Three Kinds of Long-Term Memory

- **Episodic Memory:** recall memories of time and place. Storage place for personal experience.
- **Semantic Memory:** recall memories about general knowledge/meaning and information.
- **Procedural Memory:** recalling memories of knowing how.

Hierarchy of Learning/Nine Events/Levels of Instruction

Proponent: Robert Gagne

Conditions of Learning

- This theory stipulates that there are several different types or levels of learning. The significance of these classifications is that each different type requires different types of instruction.

Five Major Categories of Learning:

- verbal information
- intellectual skills
- cognitive strategies
- motor skills
- attitudes.

Principles of Conditions of Learning

- Different instruction is required for different learning outcomes.
- Events of learning operate on the learner in ways that constitute the conditions of learning.

- The specific operations that constitute instructional events are different for each different type of learning outcome.
- Learning hierarchies define what intellectual skills are to be learned and a sequence of instruction.

Nine Levels of Instruction

9. Gaining attention (**reception**)
3. Informing learners of the objective (**expectancy**)
4. Stimulating recall of prior learning (**retrieval**)
5. Presenting the stimulus (**selective perception**)
6. Providing learning guidance (**semantic encoding**)
7. Eliciting performance (**responding**)
8. Providing feedback (**reinforcement**)
9. Assessing performance (**retrieval**)
10. Enhancing retention and transfer (**generalization**)

Meaningful Reception/Learning Theory

Proponent: David Ausubel

- Meaningful learning occurs when new experiences are related to what a learner already knows.
- May occur through:
 1. **Reception** -the learner actively associates the substances of new chains concepts and so forth with relevant components of previous learning
 2. **Rote learning** - technique based on repetition. The idea is that one will be able to quickly recall the meaning of the material the more one repeats it.
 3. **Discovery learning** refers to various instructional design models that engages students in learning through discovery

4 Processes of Meaningful Learning

- **Derivative Subsumption:** new material/relationship can be derived from the existing ideas. (to add, modify, enrich)
- **Correlative Subsumption:** new material is an extension of what is already known.

- **Superordinate Learning:** the ability to give numerous example of the concept that is not known unless being taught.
- **Combinatorial Learning:** a process of gaining idea from another idea which is not higher or lower than others but at the same level (horizontal)

Instructional mechanism proposed by Ausubel is the use of advance organizers which help to link new learning material with existing related ideas.

1. **Expository organizer:** describe new content
2. **Comparative Organizer:** compare and discriminates
3. **Narrative:** tell story

Constructivism

- is a perspective of learning that gives importance to individual knowledge, belief and skills. Learning takes place by absorbing information and experiencing the world around him/her.

Constructivist Principle inside the Classroom

- Students' autonomy and initiative are accepted and encouraged
- Higher-level thinking is encouraged
- Students are engaged in dialogue with the teacher and with each other
- Students are engaged in experience that challenge hypotheses and encourage discussion

Spiral Curriculum and Three-Tiered Model of Learning

Proponent: Jerome Seymour Bruner

- coined Scaffolding and Father of Instructional Material: Originated the idea of concreteness and abstractness
- proposes that learners construct their own knowledge and do this by organizing and categorizing information using a coding system.
- **Instrumental Conceptualism:** Implies the idea is that students are more likely to remember concepts they discover on their own

4. **Enactive** - action-based
5. **Iconic** – images and sounds
6. **Symbolic** – mental representation (language)

Spiral Curriculum

- learning is spread out over time rather than being concentrated in shorter periods. In a spiral curriculum, material is revisited repeatedly over months and across grades.

- Creativity** - It is ability to pursue endless possibilities of thinking and imagination.
- Practical Intelligence** refers to the ability to relate the learning or knowledge to the real world.

WICS model

- is a possible common basis for identifying gifted individuals (Sternberg, 2003c).
- WICS is an acronym standing for;
 - Wisdom
 - Intelligence,
 - Creativity
 - Synthesized.
- According to this model, wisdom, intelligence, and creativity are essential for the gifted leaders of the future

Social Constructivism/Socio-Cultural Learning Theory

Proponent: Lev Vygotsky

- Scaffolding - competent assistance or support

Zone of Potential Development	The zone where the child/learner can't do/learn on their own
Zone of Proximal Development	The gap between zone of Potential and Actual Development
	The zone where the child/learner can do/learn with assistance Scaffolding – assisting the learner to learn based on their ZPD Level More Knowledgeable Other – the one who assist the child in learning
Zone of Actual Development	The zone where the child/learner can do/learn on their own

Theory of Successful Intelligence

Proponent: Robert Sternberg

- Sternberg (1997) also stated that to be a successful intelligent person, one must combine and balance the three abilities: Analytical, Creativity, and Practicality.

Three Abilities of Successful Intelligence

- Analytical Intelligence** involves analyzation (from the word itself), evaluation, judgment or comparison and contrast.

Creative Thinking

Proponent: Dr. E. Paul Torrance (Father of Creativity)

- Torrance invented the “Torrance Tests for Creative Thinking

Components of Creativity

- Fluency** – the ability to generate quantities of ideas
- Flexibility** – the ability to create different categories of ideas, and to perceive an idea from different points of view
- Originality** – the ability to generate new, different, and unique ideas that others are not likely to generate.
- Elaboration** – the ability to expand on an idea by embellishing it with details or the ability to create an intricate plan.

Problem-Solving Skills

- Problem-solving skills help you determine the source of a problem and find an effective solution.
- In order to be effective at problem solving you are likely to need some other key skills, which include:
 - Creativity**. Problems are usually solved either intuitively or systematically.
 - Intuition** is used when no new knowledge is needed - you know enough to be able to make a quick decision and solve the problem, or you use common sense or experience to solve the problem complex problems or problems that you have not experienced before will likely require a more systematic and logical approach to solve.
 - Researching Skills.
 - Team Working.
 - Emotional intelligence
 - Risk Management.
 - Decision Making.

Motivation

- Ability refers to what an individual can do or is able to do and motivation (or lack of it) refers to what a person wants to do.

The 5 Primary Motivation Factors

- Fear
- Peer Pressure
- Pride
- Recognition
- Money

Types of Motivation

- Extrinsic Motivation** – learners' reason to work or study lies primarily outside themselves.
- Intrinsic Motivation** – learners' reason for learning resides primarily inside or upon them.

Needs

- Physiological deficiency that creates a condition of disequilibrium in the body.

Human Motivation Theory (Need Theory)

Proponent: David McClelland

- allows you to identify people's motivating drivers.
- He identified three motivators that he believed we all have:
 - a need for **achievement**
 - a need for **affiliation**,
 - a need for **power**.

Drive-Reduction Theory

Proponent: Clark Hull

- Drive is a condition of arousal or tension that motivates behavior.
- Drives most typically have been considered to involve physiological survival needs: hunger, thirst, sleep, pain, sex.
- A drive results from the activation of a need.
- any behaviour that reduces the drives will be repeated by humans and animals. This is because the reduction of the drive serves as a positive reinforcement (i.e. a reward) for the behaviour that caused such drive reduction.

Self Determination and Motivation Theory

Proponent: Edward Deci

- We have the capacity to take risks or challenges that can enrich our lives and develop ourselves more.
- Sense of Self-Determination Variables
 - Choices
 - Threats and deadlines
 - Controlling statements
 - Extrinsic rewards
 - Surveillance and evaluation

Expectancies and Values Theory

Proponent: John W. Atkinson

- Variables that affect Motivation:
 - Expectancy** – People must believe that they can accomplish a task; that is, they should have an expectancy about what they want to achieve.
 - Value** – People should likewise place an importance or value in what they are doing.

Attribution Theory

Proponent: Bernard Weiner

- Attributions pertain to people's various explanations for success and failure – their beliefs about what causes attributions.
- Dimensions underlying people's attributions. People can explain events in many different ways.

Hierarchy of Needs

Proponent: Abraham Maslow

Theory of Academic Self-Worth

Convington

Covington's Theory of Academic Self-Worth

According to Covington's theory, academic motivation can be broken down into motives to try for success and motives to avoid failure. Covington identifies four types of students:

According to Covington, effort is a double-edged sword. If a student must put in a lot of effort to achieve success that comes easier to others, the student is at risk for losing motivation due to the conclusion that he/she is low in ability. On the other edge of the sword, not putting forth the effort is a self-worth-preservation strategy because any failure following low effort is not attributable to low ability.

Covington, M.V. (1992). Making the grade: A self-worth perspective on motivation and school reform. New York: Cambridge University Press.

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

PROFESSIONAL EDUCATION NOTES

C. The Child and Adolescent Learner and Learning Principles (30)

THE CHILD AND ADOLESCENT LEARNER AND LEARNING PRINCIPLES

Definition of Terms

Childhood	refers to the time from childhood until it reaches adulthood Infancy to <i>Puberty</i> * (*transition/maturation period not a stage of life)
Adolescence	Refers to the period of transition from childhood to adulthood. Puberty to Maturity
Child Development	Study of processes and change of stability from conception to adolescence.
Development	Increase in complexity in function, skills, progression in predictable manner (Qualities)
Growth	Quantifiable change in body dimensions
Maturation	Change that comes with age (internal ripening)
Learning	Change in behavior that comes from experience

Human Development

Process of growth and change that takes place between birth to maturity

- Cognitive Process
- Socio-emotional Process
- Biological Process

Approaches to Human Development

1. Traditional Approach

- Extensive change from birth to adolescence
- Little-to-no change in adulthood
- Decline in late old age

2. Life Span Approach

- There is a continuous change from birth to all age.
- It is lifelong
- Plastic (ability to change and be molded)
- Multidimensional (all facets)
- Gradual
- Multidirectional (gain and loss)
- Learning shaped by culture

Major Principles of Human Development

1. Learners are considered as **human being**
 - a. *Hereditary (Nature)*
 - b. *Environment (Nurture)*
2. Development is **unique** to every individual
3. No two living individuals are exactly the same in

- a. *DNA*
- b. *Nipples*
- c. *Eye Retina*
- d. *Taste Buds*
- e. *Fingerprints*

4. Development is **relatively order**
 - a. *Proximodistal* – center to outward
 - b. *Cephalocaudal* – head to toe
5. Children grow in **same pattern**
 - a. *Very Rapid Growth (first 7 years)*
 - b. *Slowly in the middle (early-to-late childhood)*
 - c. *Rapid again (puberty)*
6. Learners respond differently to academic stimuli
7. Almost all human behavior is **learned rather than inherited**.

Stages in Life Span (R. Havighurst)

1. Prenatal (Conception to Birth)

Germinal (Zygote) - First 2 weeks

Fertilization
Blastocyst- zygote division
Implementation to uterus (10 days)

Embryonic (Embryo) – 2-8 weeks

Cell differentiation interphase
Developing of the life-supporting system.
Appearance of organs

Fetal (Fetus) – 2-9 months

3rd Months – genitals
4th Months – reflexes
5th Months – fingernails, toenails, skin
6th Months – eyes, reflexes, irregular movements
7th Months – complete organs, 16 inches, 3 pounds.
8th Months – 4 pounds.

2. Infancy (Birth to 2years old)

Emotional attachment begins
Language development
Reflexes (Safety)
Development of upper limbs before the lower limbs
Social referencing

3. Toddler (2-3 years old)

Crawl and stand

4. Early Childhood (3-5 years old)

Preschool stage – school readiness
Initial Socialization Preference
Toy and Play Stage
Questioning Stage
Extremely Active (short attention span)
Balancing Activities

- o **Fine Motor Skills** – small muscles
- o **Gross Motor Skills** – big muscles

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

5. Middle and Late Childhood (6-12 years old)

School age
Age of conformity
Learning to get along with agemates
Learning appropriate sex roles
Developing fundamental skills in learning
Developing acceptable attitude/values
Psychosocial skills

6. Adolescence (13-18 years old)

Puberty (Testosterone, Estrogen)
Rapid Physical Changes
Growth spurts start earlier in girls
Logical and abstract thinker
Identity

7. Young Adulthood (19-29 years old)

Career Development
Personal and Economic Growth
Intimate Relationship
Starting a Family

8. Middle Adulthood (30-60 years old)

Parenting styles
Reaching and maintaining career satisfaction
Expanding personal and social involvement and responsibility.

9. Late Adulthood (60 years and above)

Decline
Adjusting to decreasing health and strength
Life review
Retirement

The Brain

- Largest and Complex
 - 50 million neurons at birth (this were developed before birth)
 - Age 10: Half of the braincells connection
 - Adult Brain – 1300-1400 g
 - Newborn Brain: 25% of the weight of adult brain
1. **Myelination** (Begins during prenatal to birth)
Forming of myelin sheath to allow new impulses to move.
 2. **Plasticity**
Ability of the brain to reorganize itself by forming new connections or rewiring.

Child and Adolescent Developmental Theories

1. Psychoanalytic Theory

Proponent: Sigmund Freud (Father of Modern Psychology)

Id	Pleasure Principle Instinct Immediate Gratification
Ego	Reality Principle Deciding Agent
Superego	Moral Principle Conscience

2. Psychosexual Development Theory

Proponent: Sigmund Freud (Father of Modern Psychology)

Instinctual Drive	Sex drive of a person that satisfies the pleasure need
Erogenous Zone	Satisfaction/Pleasure Area of a person
Fixation	Failure to satisfy the needs of a particular psychosexual stage

Stages of Psychosexual Development

Oral Stage (0-2)	Gratification of mouth Erogenous Zone: Mouth <i>Fixation: Thumbsucking and oral sex</i>
Anal Stage (2-3)	Gratification of anal Toilet training Erogenous Zone: Anal <i>Fixation: messy, and obsessive cleaning</i>
Phallic Stage (3-6)	Gratification of genitals Erogenous Zone: Genitals <i>Oedipus Complex</i> – son competing father cause of mother <i>Electra Complex</i> – daughter competing mother cause of father
Latency Stage (6-12)	Erogenous Zone: None School Age <i>Same-sex Attraction</i>
Genital Stage (12-beyond)	Gratification of genitals Erogenous Zone: Genitals <i>Opposite-Sex Attraction</i>

3. Cognitive Development Theory

Proponent: Jean Piaget

Cognitive Processes

Schema	Prior knowledge/experience of a person. Accumulation of the knowledge to something new
Assimilation	Adding of new information but with same schema
Accommodation	Adding new information but it changes the previous schema
Equilibrium	Balance in cognitive processes

Stages of Cognitive Development

Sensorimotor Stage (0-2)	Differentiate self from objects Mental representation Mental combination Object permanence Development of the senses (Sight-first)
------------------------------------	--

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Pre-Operational Stage (2-7)	1. <i>Symbolic Functioning</i> – giving functions to a concrete object 2. <i>Centration</i> – focus on a certain aspect only 3. <i>Intuitive Thoughts</i> – asking lots of questions as the start of primitive reasoning 4. <i>Transductive Reasoning</i> – illogical 5. <i>Animism</i> – inanimate object has given life 6. <i>Artificialism</i> – imagination 7. <i>Egocentrism</i> – self-centered
Concrete Operational Stage (7-12)	1. <i>Logical</i> – systematic 2. <i>Conservation</i> – objects will remain the same despite difference in form. 3. <i>Reversibility</i> – things can go back to its original form 4. <i>Seriation</i> – arrange the things in terms of sizes, shapes, and etc. 5. <i>Classification</i> – classifying things based on their origin and characteristics 6. <i>Decentering</i> – opposite of the egocentrism. Differentiate characteristics of an object 7. <i>Elimination of Egocentrism</i>
Formal Operational Stage (12-beyond)	1. Logical and Abstract Reasoning 2. Formulation of Hypothesis 3. Conclusion and Judgement

5. Moral Development Theory

Proponent: Lawrence Kohlberg

Stages of Moral Development

Level	Stage	Characteristics
Pre-Conventional	Obedience and Punishment	Avoid Punishment
	Mutual Benefits	Rewards and Favors
Conventional	Social Approval	Gain social approval Good boy and good girl period
	Law and Order	Conform and uphold the rules and law
Post Conventional	Social Contract	Common Good
	Universal Ethical Principles	Follow own moral guidelines

6. Socio-Cultural Development Theory

Proponent: Lev Vygotsky

4. Psychosocial Development Theory

Proponent: Erik Erickson

- Incorporating social and self
- Psychosocial crises of the child development
- Personalities of a person and compared to a rose bud

Stage	Syntonic <i>Maladaptation</i>	Virtue <i>Balance</i>	Dystonic <i>Malignancy</i>
Infancy 0-18 months	Trust <i>Sensory Maladjustment</i>	Hope	Mistrust <i>Withdrawal</i>
Toddler 18mos-3 y/o	Autonomy <i>Impulsiveness</i>	Will Power	Shame and Doubt <i>Compulsiveness</i>
Pre-School 3-6	Initiative <i>Ruthlessness</i>	Courage <i>Consequence</i>	Guilt <i>Inhibition</i>
Elementary 6-12	Industry <i>Narrow Virtuosity</i>	Competence <i>Success</i>	Inferiority <i>Inertia</i>
Adolescence 12-18	Identity <i>Fanaticism</i>	Fidelity <i>Knowing Self</i>	Role Confusion <i>Repudiation</i>
Early Adult 18-24	Intimacy <i>Promiscuity</i>	Love	Isolation <i>Exclusion</i>
Middle Adult 24-55	Generativity <i>Overextension</i>	Care	Stagnation <i>Rejection</i>
Late Adult 55-above	Integrity <i>Presumptuous</i>	Wisdom	Despair <i>Disdain</i>

Zone of Potential Development	The zone where the child/learner can't do/learn on their own
Zone of Proximal Development	The gap between zone of Potential and Actual Development
	The zone where the child/learner can do/learn with assistance Scaffolding – assisting the learner to learn based on their ZPD Level More Knowledgeable Other – the one who assist the child in learning
Zone of Actual Development	The zone where the child/learner can do/learn on their own

7. Ecological Development Theory

Proponent: Urie Bronfenbrenner

Systems of Ecological Development

1	Microsystem	One's direct and immediate environment/relationship
2	Mesosystem	Interactions of one's mesosystems
3	Exosystem	Nothing to do with the child but affects him/her
4	Macrosystem	Culture and society that the child belongs
5	Chronosystem	Making life adjustments and something to do with time

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

8. Stages of Language Acquisition

Proponent: Robert Sternberg

1	Pre-Linguistic Period 0-6mos	Cooing (vowels)
2	Babbling 6-8mos	With consonants (babble)
3	One-Word Utterances	Holophrase
4	Two-Word Utterances	Combination
5	Telegraphic Speech	More complex but incomplete
6	Basic Adult Sentence 5-above	Complex and complete

9. Language Acquisition Devices

Proponent: Noam Chomsky

- Child is innate to learn language
- they have the capacity to learn, acquire, and produce language
- Toddlers learn language very fast
- Nativist Theory of Language – innate and intrinsic facility to learn language

10. Attachment Theory

Proponent: John Bowlby

Stages of Attachment Development

1	Pre-Attachment Period Birth-6mos	No attachment
2	Indiscriminate 6-9mos	Preference to primary and secondary caregivers
3	Discriminate 8-10mos	Strong attachment to one specific caregiver
4	Multiple 10mos-above	Growing bonds with other caregivers

11. Emotional Quotient

Proponent: Daniel Goleman

1	Self-Awareness	Aware of strengths and weaknesses
2	Self-Regulation	Maintain and Limit the Feelings
3	Motivation	Internal processes that direct a person
4	Empathy	Putting yourself into one's shoe
5	Social Skills	Highest EQ that value people

12. Stages of Play

Proponent: Mildred Parten Newhall

Play

- Important vehicle in developing:
 - Self-regulation
 - Promoting language
 - Cognition
 - Social Competence
- Usually during preschool stage

1	Unoccupied	Direct attention to anything interesting. <i>Beginning of play</i> <i>(Infants making random movements with no specific purpose)</i>
2	Solitary Play	Playing Alone <i>Children starts to play on their own without noticing other children.</i>
3	Onlooker Play	Watch others playing but doesn't play with them <i>The child is watching them to play wherein he/she can ask questions about the play</i>
4	Parallel Play	Play with other side-by-side but doesn't interact with each other <i>The child is playing beside other children but doesn't play with each other</i>
5	Associative Play	They are playing with each other but with no task assignment. <i>The child starts to associate themselves with others to play with same goals but no rules set.</i>
6	Social/Cooperative Play	They are playing with each other with agreed rules and roles <i>The child shares toys and ideas and play with established rules and roles.</i>

13. Parenting Styles

Proponent: Diana Baumrind

Parenting Style	Demand	Support	Characteristics
Authoritative	High	High	Child-centered Child is active Relationship is reciprocated
Permissive	Low	High	Child-centered Low in control Relationship is indulgent/spoiled
Authoritarian	High	Low	Parent-Centered Child is passive Relationship is controlling
Detached/Uninvolved	Low	Low	Uninvolved and relationship is rejecting

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

PROFESSIONAL EDUCATION NOTES

D. Assessment of Learning (22)

ASSESSMENT IN LEARNING

Classroom Assessment

Assessment made inside the classroom in order to gather data about the learning of the student.

- Identify the Learner's Need
- Gather Data/Information
- Organize
- Assessment.

Types of Data

Qualitative Data

are data that pertains to the quality. Perceptions, narratives and descriptions are example.

Quantitative Data

are data that pertains to quantity. Measurement and other things that can be represented through numbers.

- **Discrete** – countable
- **Continuous** – measurable

Levels of Measurement

- **Nominal** are data that can be *categorized*
- **Ordinal** are data that can be *categorized and rank*
- **Interval** are data that can be *categorized, rank, and evenly spaced*.
- **Ratio** are data that can be *categorized, rank, evenly spaced and has true meaning of zero*.

Basic Concepts in Assessment in Learning

Test	Tool and gather data.
Measurement	Scoring and quantifying data
Assessment	Process of gathering data Interpreting/organizing the data
Evaluation	Evaluation and judgement.

Measurement

1. **Objective** – traditional (pen and paper)
2. **Subjective**
Scoring Rubrics – standard tool for scoring
 - **Holistic** – whole/general
 - **Analytic** – specific/detailed

Parts of the Lesson Plan

1. **Objective**
2. **Subject Matter**
3. **Learning Experience**
4. **Evaluation**
5. **Assignment**

Traditional vs. Progressive

Traditional	Progressive
Students are <u>Passive</u>	Students are <u>Active</u>
Sage on the Stage	Guide by the Side
	OBE (CHED 46 s. 2021) -call for quality and accountability education (what students can do after teaching)

Outcome-Based Teaching and Learning

- Presence of the **Constructive Alignment**
- **CA** – Alignment of the Teaching and Learning Activities to the Learning Outcomes.

Types of Outcomes

1. **Immediate Outcomes** – on the spot/impromptu outcomes. (lesson objectives/outcomes)
2. **Deferred Outcomes** – lifelong outcomes (program and institutional outcomes)

Levels of Outcomes

Institutional Outcomes

- broad outcomes formulated by the administration of an institution (President, Dean) (e.g. VMGO)

Program Outcomes

- outcomes that are made by the department heads/dean of the program (BSEd Math Program Outcomes)

Course Outcomes

- outcomes that are made by the professor/instructors of a specific course/s under a program (Trigonometry Course Outcomes)

Intended Learning Outcomes

- outcomes made by the professor/instructor in a specific topic/lesson under a course.

Four Principles of Outcomes-Based Education (OBE) Spady

1. **Clarity of Focus**
2. **High Expectations**
3. **Expanded Opportunities**
4. **Designing Down**

Phases/Purpose of Assessment

Assessment FOR Learning

Before and During Instruction (**Recorded but not Graded**)

Types of Assessment for Learning

- **Placement** – placement to specific learning groups
- **Diagnostic** – entry-level, preparedness.

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

- **Formative** – progress of the child (quiz – common formative)

Assessment AS Learning

- Self-Assessment
- Metacognition

Assessment OF Learning

- After Instruction (**Recorded and Graded**)

Types of Assessment of Learning

- **Summative Assessment**
- **Chapter Test**
- **Quarterly Assessment**

Modes of Assessment

Traditional Assessment

- Pen and Paper Assessment
- Types of Traditional Assessment
 - Select-Response Type
 - Constructive-Response Type

Alternative Assessment

- Assessment aside from pen-and-paper tests.
- Types of Alternative Assessment
 - **Performance** – product and performance
 - **Portfolio** – systematic collection of learning experience.

Authentic Assessment

- Real-life problem
- Performance-based Assessment

Process	Product
Procedures	Result

GRASPS Model of Authentic Assessment

Model/Framework that will guide teachers to develop effective and quality authentic assessments.

1. **G**oals
2. **R**oles
3. **A**udience
4. **S**ituation
5. **P**roduct
6. **S**tandards

7 Types of Selecting Performance Assessment

1. Generalizability – assessment is intended for all
2. Authenticity – real
3. Multiple Foci – Hollistic
4. Teachability – teacher can teach
5. Feasibility – doable
6. Scorability
7. Fairness

Other Types of Assessment

Contextualized Assessment

- Assessment related to authentic assessment
- Focused in applying and functioning of knowledge.

Decontextualized Assessment

- Assessment related to traditional assessment.
- Focused in declarative and procedural knowledge.

Portfolio Assessment

- Organized and Systematic compilation of all learning experience of a student.
- Content, learning, equity
- Grading of Portfolio: Scoring Rubrics

Hardcopy

- **Showcase Portfolio** – best outputs
- **Developmental** – cognitive and psychomotor processes. All phases of processes. (chronological)
- **Process** – chronological processes included in portfolio with reflection.
- **Evaluation** – student's learning
- **Documentation** – progress in creative manner.

Softcopy

- E-portfolio

Tools for Portfolio

1. Rating Scale
2. Scoring Rubrics
3. Likert Scale

Types of Traditional Assessment

Select-Response Test Type

A type of test that has binary or multiple options. There are different types of select-response test types.

True or False

Dichotomous test type. Test with two options (true or false)

Multiple Choice

- Types of Multiple Choice
 - 1. Stem Option/Direct – direct
 - 2. Incomplete – many blanks (over-mutilated)
 - 3. Negative Stems – overlooked
 - 4. Best Answer
 - 5. Group Options (I, II, III, IV)
 - 6. Contained Options
 - 7. Stimulus Material-Stem Options

Matching Type/Association Test

- **Perfect** – response to one premise
- **Imperfect** – response to one-to-many premises

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Constructed-Response Test

A type of test that has no binary or multiple options.

Essay Test Type

- Restricted – with limits
- Extended – without limits

Characteristics of a Test

Validity

- measures what it intends to measure (Accuracy)

Face Validity

- Appearance and External Attributes of a Test

Content Validity

- Alignment of the Test Items to the Objectives (TOS)
(increase validity: representative sample)

Construct Validity

- existence of measure/concepts/theories that are intended to measure by the test.

Convergent Validity

- correlation of the similar test construct

Divergent Validity

- correlation of the different construct.

Criterion Validity

- alignment of the test to the standards.

Concurrent Validity

- it predicts the score within the current/short period of time

Predictive Validity

- it predicts the score within long period of time.

Reliability

- consistency of the test (precision) (Increase Reliability: Increase number of items)

Test-Retest Method

- repetition of the same test in different time frame.

Parallel/Equivalent Form

- two different yet equal test is administered.

Split-Half

- the test is divided into two halves.

Kuder-Richardson

- correlate results.

Practicality

- familiar with method: efficient and time-bounded.

Fairness

- free from bias

Types of Tests

Administration	• Personal • Group
Mode	• Written • Oral • Performance
Scoring	• Objective • Subjective
Sort of Responses being Emphasized	• Power • Speed
Test Construction	• Standardized/Expert Made • Self/Teacher Made
Mode of Interpretation	• Norm-Referenced • Criterion-Referenced
Other types of Assessment	• <u>Personal</u> – emotional and social adjustments • <u>Intelligence</u> – IQ • <u>Aptitude</u> – potential for success • <u>Achievement</u> – mastery • <u>Sociometrics</u> – likes/dislikes • <u>Career</u> - occupational

Measurement for Affective Domain

Quantitative

- Semantic Differential Scale: Two contradicting options (Bipolar/Opposite)
- Likert Scale
- Checklist

Qualitative

- Teacher's Observation
 - Formal – consented
 - Informal – not consented

ITEM ANALYSIS

Item Discrimination Index

- Positive Discrimination – Retain/Revise
- Negative Discrimination – Reject

<0.01	Worst	Reject
0.00-0.20	Poor	Reject
0.21-0.29	Average	Revise
0.30-0.39	Good	Revise
>0.39	Excellent	Retain

Item Difficulty Index

0.0-0.20	Very Difficult	Reject
0.21-0.40	Difficult	Revise
0.41-0.60	Moderate	Retain
0.61-0.80	Easy	Revise
0.81-1.00	Very Easy	Reject

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Normal Curve

Correlation

- is a statistical measure that expresses the extent to which two variables are linearly related (meaning they change together at a constant rate).

Measures of Shapes

- Platykurtic** - Flat
- Mesokurtic** - Balanced
- Leptokurtic** - Narrow

Skewness (Symmetry of Central Tendencies)

Skewness	Interpretation	Central Tendencies
Positive/Right	Test is Difficult	Mean > Median > Mode
Balanced	Average	Mean = Median = Mode
Negative/Left	Test is Easy	Mean < Median < Mode

K-12 Assessment Guidelines

- DepEd no. 8 s. 2015: Policy Guidelines on Grading Systems
- 5 years old (Kindergarten) – On or before Oct. 31/Aug 31.

Grading Components (1-12)

- Written Work
- Performance Task
- Quarterly Assessment
- Kindergarten – no numerical grades (checklist, anecdotal, portfolio)

Grading System (Grade 1 to Grade 10)

	Language/AP/ESP	Mathematics and Science	MAPEH/EPP
Written Work	30	40	20
Performance Task	50	40	60
Quarterly Assessment	20	20	20

Grade Descriptors

Grade	Descriptor
90 and above	Outstanding
85-89	Very Satisfactory
80-84	Satisfactory
75-79	Fairly Satisfactory
Below 75	Did not meet expectation

Feedback

(See the Subject's Final Grade of the Student)

- Grade 1-10**
 - Promote – all subject passed
 - Remedial – 1 or 2 failed
 - Retain – 3 or more failed
- SHS**
 - Regardless of number of failing grades
 - Retake
 - Remedial

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

PROFESSIONAL EDUCATION NOTES

E. Field Study and Teaching Internship (30)

DOCUMENTATION OF FIELD STUDY 1 AND 2, TEACHING INTERNSHIP, AND ACTION RESEARCH

- **Field Study 1:** Observation of the Teaching and Learning Process.
- **Field Study 2:** Participation and Teaching Assistantship
- **Teaching Internship:** Practice Teaching under Supervision

Philippine Professional Standards for Teachers (PPST)

DepEd Order 42, series 2017

Domain 1: Content Knowledge and Pedagogy

- Mastery of Content Knowledge
- Research-Based Instruction
- Use ICT
- Literacy and Numeracy
- Creative and Critical Thinking
- Language/Communication Strategies – pedagogy

Domain 2: Learning Environment

- Safe and conducive
- Physical
- Psychological/Socio-Emotional

Domain 3: Diversity of Learner

- Accept and develop all learners

Domain 4: Curriculum and Planning

- Plan and Objective
- Collaboration of teachers
- Make resources

Domain 5: Assessment and Reporting

- Make and implement assessment, and evaluate students.
- Feedback – use for improvement

Domain 6: Community Linkages and Professional Engagement

- Needs of the community

Domain 7: Personal Growth and Professional Development

- Philosophies and Dignity
- Colleagues
- Goals and reflection

Experiential Learning Approach: O-A-R Approach

1. **Observe** – notice
2. **Analyze** – examine closely
3. **Reflect** – aware and critical

DO 3 s. 2007

1. **Pre-Service Teacher**
student enrolled in Education Program
2. **Resource Teacher**
Resource Facilitator (from university)
3. **Cooperating Teacher**
assigned teacher to the PST.

DO 3 s. 2007 vs. JCDDMO 1 s. 2021

DO 3 s. 2007	JCDDMO 1 s. 2021
Practice Teaching	Teaching Internship
Student Teacher	Practice Teacher
Mentoring	Coaching and Mentoring

Field Study 1: Observation of the Teaching and Learning Process.

Principal Elements of Teaching and Learning

1. **Teacher**
 - Facilitator of Learning
 - Guide by the side NOT Sage on the stage
 - Curriculum Implementer and Prime Mover
2. **Learner**
 - Key Participant
 - Primary Factor in designing curriculum
 - Multiple Intelligences/Learning Styles
3. **Conducive Learning Environment**
 - Physical Environment
 - Psychological Atmosphere

Principles in Determining Learning Activities

1. **P** – learning is **Personal Meaning and Discovery**.
 - Idea on Real-life Application
 - Personal Meaning
2. **A** – Learning is an **Active Process**
 - Participation
 - **Dale's Cone of Learning** (Framework that shows the level of concreteness or abstractness of a learning activity)

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

3. C – Learning should specify **Clear and High Outcomes.**

- Objectives
- Intended Learning Outcomes
- Affective should not be excluded in the ILO (at least 2 or 3)

4. Co – Learning should promote **Cooperation and Collaboration**

- Teamwork and Groupworks
- Competition – opposite of collaboration

Dale's Cone of Learning Experience

Visual Symbols	10%	Read	Passive Learning
Verbal Symbols	20%	Hear	
Still Pictures	30%	See

Classroom Management

Established system of managing the class

- Classroom routines
- At the start of the school year
- Ensures order (dos and don'ts)
- Management Styles
 - Proactive* – before (prevention)
 - Reactive* – after (response)

Instructional Planning

1. Lesson Planning

blueprint and guide of teachers in teaching and learning

- Multifaceted and ongoing
- Guide for daily learning activities
- Detailed Lesson Plan – practice teachers (students)
- Daily Lesson Plan – less than a year of experience.

2. Motivation

activities given before the learning experience.

- Unruly/uninterested – unfreezers and energizers (ice breakers)
- Numeracy – number literacy
- Literacy – reading media and technology

Assessment

<i>Authentic</i>	<i>Traditional</i>
Real-life problem	Pen-and-paper test
Assessment drives curriculum	Curriculum Drives Assessment
Rubrics – scoring authentic assessment	Multiple Choice – common traditional assessment
Performing a Task	Selecting Response

Student's Portfolio

- Compilation of evidence
- Collection of Learning Artifacts
- “good filing system”
- Tracks student's achievement

Phases of Assessment

Assessment FOR Learning

- Before and during instruction
- Formative assessment (D and Q)
- Diagnostics – assess where the student are at
- Quiz (During) – most common formative assessment

Assessment OF Learning

- After instruction
- Summative assessment

Assessment AS Learning

- Self-Assessment
- Metacognition/Metacognitive

Field Study 2:

Participation and Teaching Assistantship

Nagel's PPPF

- Prepare yourself
- Prepare your students
- Present
- Follow up

Research

Scientific way of finding answer and testing hypothesis

IRSCAR Method

- Identify the Problem
- Review of Literatures
- Specify a research problem
- Collect data
- Analyze and Interpret Data
- Report and Evaluate Research

Characteristics of Research

- Feasible** – can be done/doable
- Interesting** – of your interest
- Novel** – new
- Ethical-Moral Principles**
 - Voluntary Participation
 - Informed Consent
 - Risk of Harm
 - Anonymity
 - Confidentiality
- Relevance** – current (potential to advance)

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

Types of Research

Qualitative vs. Quantitative

<i>Qualitative</i>	<i>Quantitative</i>
Quality – words	Quantity – numbers
Subjective	Hypothesis
Inductive	Deductive

Specific: evidences/examples

General: conclusions

Types of Quantitative Researches

- Descriptive** – describe
- Correlation** – relationships and differences
- Cross-Sectional** – (compare different levels of population) same as correlational
- Experimental and Quasi** – variables (cause and effects in variables)
 - Independent Variables – causes
 - Dependent Variables – effects
 - Controlled Variables – doesn't receive interventions

Types of Qualitative Researches

- Case Study** – specific group/population
- Ethnography** – cultural group
 - Study a particular setting – Naturalistic Observation.

Action Research

- Practical, practice
- Deal with practical application of the researches.
- Current (Evidenced-based)
- Utilize for all and collaborative in nature
- Least of being AR: Theories
- Challenge of AR: Consistency and Reliability

Types of Action Research

Individual Action Research

- single classroom issue is observed

Collaborative Action Research

- common problem (2 or more classroom)

School-wide Action Research

- school-based problems

District-wide/Division-wide Action Research

- district issues and organizational structures

Varieties of Action Researches

- Diagnostic Action Research**
existing problems and it gives intervention
- Participating Action Research**
it gives recommendations
- Empirical Action Research**
it gives conclusions
- Experimental Action Research**
it gives two sets of variables

Action Research	Formal Research
<i>Practical</i> <i>Less theories</i>	<i>Formal</i> <i>More theories</i>

Action Research Paradigm

From PAOR, 2007	To OPAR, 2014
1. Plan	1. Observe
2. Act	2. Plan
3. Observe	3. Act
4. Reflect	4. Reflect

Research Proposal vs. Research Report

<i>Proposal</i>	<i>Report</i>
Before Research	After Research
Plan	Results
Both in Third Person Point of View	

Teaching Internship

Teaching Internship – stepping stone/capstone. Basic Education Schools in one semester under cooperating school.

Hierarchy of Teaching Internship Management

- College Supervisor (Dean or Course Coordinator)
- Cooperating Principals
- Subject Area Coordinator
- Cooperating Teacher
- Practice Teacher

Experiential Learning Phases

Orientation

- Dos and Don'ts
- Building Harmonious relationship

Observation and Building Relationship

- Familiarization
- Immersed in the class

On-site Tasks

- Assisting and checking

Final Demonstration and Accomplishing

- Final demo – planned
- Exit forms – dignity and accountability
- Narrative reports – all learning experiences

Evaluation of Teaching Internship

- For continuous improvement

School Forms

SF1	Master list of Class Enrolled	Class Adviser
SF2	Daily Attendance	Class Adviser
SF3	Book Issued and Borrowed by learners	Class Adviser
SF4	Summary of SF2 List of enrollment count, dropouts	School Head
SF5	List of promoted by class	Class Adviser

PROFESSIONAL EDUCATION NOTES

March 2024 Board Licensure Examination for Professional Teachers

SF6	List of promoted by grade level	School Head
SF7	List of personnel with basic profile and teaching load assignment	School Head
SF8	Learner's Health Record	MAPEH Teacher/Class Adviser
SF9	Learner's Progress Card (Form 138)	Class Adviser
SF10	Learner's Permanent Record (Form 137)	Class Adviser

Community Linkages – stakeholders

Write a Letter

if it only concern to one learner only. (consecutive absents, etc)

Call for a Conference/Meeting

if it concerns most (2 or more) of the students (cutting classes, etc)

IPDP

Individual Personal and Professional Development Plan

RA 10912 (CPD Act of 2016)

Proponent: Trillanes

Signed: Aquino III

- 45 CPD units for renewal of license
- 15 CPD units for renewal of license (Transitional every three years)

Professional Development

1. Graduate Studies
2. Short-Term Courses
3. Seminars and Webinars
4. Professional Organization
5. LAC Sessions
6. Speaking Engagement
7. Reading and Writing Books
8. Research

Blessings

William James	Father of Functionalism
Wilhelm Wundt	Father of Experimental Psychology
Alfred Binet	Father of IQ Test
Lewis Terman	Father of Modern IQ Test
Maria Montessori	Natural/Naturalistic
Pestalozzi	Learning by hand, heart, and head
John Locke	Teacher-Centered Tabula Rasa (Blank Slate)
John Dewey	Father of Progressivism Learning by Doing Learner Centered
Froebel	Kindergarten (Garden)
Comenius	Father of Modern Education
Vygotsky	Zone of Proximal Development Scaffolding – MKO Difference – between High and Low
Ethnocentrism	One's culture is superior
Xenocentrism	One's culture is inferior
Cultural Relativism	All cultures are equal and need to be respected and understand.
Lifelong learning	Once a teacher, forever a <u>learner</u>
Teacher	– Best IM
