

I. Parts of Speech

NOUNS

A **noun** names something – persons, places, things, events, phenomena, emotions, etc.

Kinds of Nouns

1. **Proper nouns** – names of specific persons, things or places
2. **Common nouns** – refer to any one of a class of persons, places or things
3. **Count nouns** – nouns that can be counted and quantified using numbers
4. **Non-count nouns** – nouns that cannot be counted and quantified using measurements
mass nouns, abstract nouns, events, occasions and phenomena
5. **Collective nouns** – nouns that name a group of persons or things
6. **Compound nouns** – nouns that are made up of two words acting as a single unit
Compound nouns may be written as separate words, hyphenated words, or combined words.

PRONOUNS

Pronouns are words that stand for nouns.

Kinds of Pronouns

1. **Personal pronouns** – these are pronouns that refer to the person speaking, the person spoken to, or the persons/or things/spoken about.

PERSONAL PRONOUNS		
	SINGULAR	PLURAL
FIRST PERSON	I (Subjective) ME (Objective)	WE (Subjective) US (Objective)
SECOND PERSON	YOU	YOU
THIRD PERSON	SHE, HE, HER, HIM, IT	THEY (Subjective) THEM (Objective)

2. **Possessive pronouns** – these are pronouns that show possession

POSSESSIVE ADJECTIVES	POSSESSIVE PRONOUNS
MY	MINE
OUR	OURS
YOUR	YOURS
THEIR	THEIRS
HIS	HIS
HER	HERS
ITS	

Examples:

Possessive Adjective: This is my book ("my" qualifies the word "book")

Possessive Pronoun: This book is mine. ("mine" represents the owner of the book)

3. Reflexive and Intensive Pronouns

	SINGULAR	PLURAL
FIRST PERSON	MYSELF	OURSELVES
SECOND PERSON	YOURSELF	YOURSELVES
THIRD PERSON	HIMSELF HERSELF ITSELF ONESELF	THEMSELVES

Examples:

REFLEXIVE The pronoun refers to the subject	INTENSIVE The pronoun shows emphasis
A. I see myself in his actions. B. Did you teach yourself? C. He cut the paper himself. D. They were shocked about themselves	A. I, myself is the culprit. B. You, yourself teach. C. He, himself cut the paper. D. They themselves were shocked.

4. Indefinite Pronouns – do not refer to specific noun

SINGULAR	PLURAL	BOTH SINGULAR AND PLURAL
ANY EVERYONE ANYBODY NO ONE EVERYBODY ANYONE	BOTH SEVERAL FEW MANY	NONE ALL SOME

5. Interrogative Pronouns - used in asking questions

INTERROGATIVE PRONOUNS		
WHO	HOW	TO WHOM
WHAT	WHOM	TO WHAT
WHICH	WHOSE	TO WHICH
WHY	WHEN	WHERE

6. Demonstrative Pronouns - used in pointing nouns

DEMONSTRATIVE PRONOUNS		
SINGULAR	THIS	THAT
PLURAL	THESE	THOSE

ADJECTIVES

An adjective qualifies and tells something about a NOUN or PRONOUN.

It answers the questions:

What kind?

Which one?

How many?

How much?

a. Comparison of Adjectives

BASE	COMPARATIVE	SUPERLATIVE
BIG	BIGGER	BIGGEST
USEFUL	MORE USEFUL	MOST USEFUL
ACTIVE	LESS ACTIVE	LEAST ACTIVE
BAD	WORSE	WORST

b. Order of Adjectives

determiner	observation	Descriptive Adjectives				origin	material	qualifier	noun
		size	shape	age	color				
An	Expensive				Red	European		sports	Car
An	Extra-ordinary						Silver		Necklace
Six			Long-stemmed		White	American			Daisies
Her	Shiny	Short			Black				Hair
My		Big		Old		German			Dog
Those		Long					Ceramic	Jewelry	Boxes
That	Smooth	Big	round				Gold		Locket
Few		Tiny				African			Insects
Some	Erotic					Indian			Films

VERBS

Often times, verbs are defined as action words. But in reality, verbs are far more than that. Verbs also link ideas in a sentence, help other verbs, and state conditions. We can classify verbs into (1) verbs of actions, (2) be verbs, (3) helping verbs, (4) emphatic verbs, and of course (4) modals.

Action Verbs

These are verbs that express action. Majority of verbs are of this nature and that's why most of the time, learners of the language tend to generalize verbs as action words. Words like run, walk, talk, sing, dance, etc. are common examples of action verbs. We can further classify actions verbs into two more sub classifications – Regular and Irregular verbs.

Regular verbs

An action verb is considered regular if its past form is derived by adding the inflections **d** or **ed**. Let us take the word walk for an example; the past form of walk is walked.

BASE FORM	PAST FORM
Watch	Watched
Bake	Baked
Pick	Picked
Save	Saved

Irregular verbs

An action verb is considered irregular if its past form is derived **not** by adding **d** or **ed** but through a change in spelling, or through retention.

BASE FORM	PAST FORM
Pay	Paid
Put	Put
Say	Said
Write	Wrote

Linking Verbs

Linking Verbs as Copula

The copula is defined by Celce Murcia as the link between nonverbal predicates (nouns, adjectives, and some adverbials). The copula also carries the tense and would determine the subject and verb agreement.

Example:

She is beautiful. – **She** is a pronoun and **beautiful** is an adjective.

She is beautiful. – **She** is singular that is why we used is.

Linking Verb as Auxiliary

Linking verbs in this nature links a nonverbal and either a conjunction or a verb in the progressive form.

Example:

She is dancing. – She is a pronoun and dancing is a verb in the progressive form.

He was dancing all afternoon. – He is a pronoun and dancing is in progres-sive form.

Linking Verbs as Perception Copulas

These are verbs that express no action, but at the same time, not the conventional (is, are, was, were) linking verbs. They are called perception copulas because they are perceived through the senses (mental or sensory).

Examples:

Appear	Seem	Feel	Look
Smell	Sound	Taste	

TIP: To know if a verb is a perception copula, try removing the verb and substitute a linking verb. If it is still grammatical, then the original verb is a perception copula.

Examples:

She seems happy. – Change **seems** to **is**

She is happy. – Still grammatical

Linking Verbs as State Copulas

State copulas are verbs that are not locomotive. They are more of a condition than an action.

Examples:

Lie	Remain
Rest	Stand

Linking Verbs as Change of State Copulas

These linking verbs do not express instant locomotion or movement. Mostly these verbs express changes from one state to another.

Examples:

Become	Come	Fall
Get	Go	Grow
Turn		

Auxiliary Verbs

These are also called helping verbs because they always appear with another verb in a sentence (main verb). Linking verbs such as is, was, are, were, are considered auxiliary verbs if they appear together with a verb in progressive form (as discussed on number 2b). Other helping verbs are has, have and had. The verb **has** is used for singular subjects in the present tense. The verb **have** is used for plural subjects in the present tense, and **had** is used for both

singular and plural subjects in the past tense has, have and had, are also considered Auxiliary verbs if they appear in a sentence with another verb (main verb) in the past participial form.

Examples:

She has taken a bath already. – the verb **has** functions as an auxiliary
They have it. – the verb **have** acts as the main verb

Emphatic Verbs

Emphatic verbs are used to give certain emphasis. These verbs are do, does and did. DO is used for plural subjects in the present tense. DOES is used for singular subjects in the present tense, and DID for both plural and singular in the past tense. The verbs DO, DOES and DID can also be used as main verbs. They are only considered emphatic verbs if they appear in a sentence with another verb in its base form.

Examples:

She did not drink her milk. – DID is used as an emphatic verb
She did it– DID is used as the main verb

Modal

According to Celce Murcia, a grammar expert, modals are helping verbs that are used to give a proposition, a degree of probability, to express one's attitude, and to perform various social functions such as expressing politeness or indirectness when making requests, giving advice, or granting permission. It is always coupled with a verb on its base form.

- a. Stating Ability
I can do anything.
- b. Expressing Regret
I should have loved you.
- c. Giving Warning
You might be in danger.
- d. Expressing Admission with Reservation
I might be wrong, but I know what I did.
- e. Expressing Obligation
You must do this.

ADVERBS

Adverbs modify verbs, adjectives or another adverb.

- 1. Adverb of Manner
This answers the question "how".

Example:

He did the job poorly.
Question: How did he do the job?
Answer: Poorly

- 2. Adverb of Time
This answers the question when the action happened.

Example:

He will go there tomorrow.

Question: When will he go there?

Answer: Tomorrow

3. Adverb of Frequency

This answers the question "how often".

Example:

She is there every week.

Question: How frequent is she there?

Answer: Every week**PREPOSITION**

A preposition links words within a sentence. It also states how two separate things are related. A preposition may indicate a location, direction, possession or cause.

Common Prepositions:

In front of	About	At	In	Beneath
In regard to	Above	After	Near	During
Inside	Across	Around	Down	By
In spite of	Against	Before	Despite	By means of
Into	Among	Behind	From	Amid

CONJUNCTION

If prepositions link words within a sentence, conjunctions relate or join words into single unit.

1. Coordinating Conjunctions – Connect words or group of words.

Examples: but, and, for, nor, or, so, yet**TIP:** Coordinating conjunctions connect words in the same grammatical structures.

2. Correlative Conjunctions – Connect words under the same grammatical structure, but they always appear in pairs.

Examples: either...or, neither...nor

3. Subordinating Conjunctions – Connects two complete ideas to make one dependent to the other.

Examples: inasmuch as, whenever, unless**INTERJECTION**

These are words that express strong feelings or emotions. They might function as an independent sentence with the speaker as the subject.

Examples: ouch, aha, alas, oh, hurray

Grammatical Challenges

A. Subject and Verb Agreement

1. Collective Nouns

These nouns could either take a singular or plural verb depending on how they are used in a sentence. If a collective noun is perceived as one entity, then it would take a singular verb. On the other hand if a collective noun is perceived as individuals in the group, it would take a plural verb.

Examples: Our debate team has won the competition.
Our debate team have won all their battles.

2. Nouns ending in – s and – ics.

Nouns ending in s and ics are always paired with verbs in the singular form.

Examples: Mathematics is my favorite subject.
Measles is a dangerous disease.

3. Nouns in set of twos

Nouns of this nature take a singular verb if the word "pair" is present. If not, they take a plural verb.

Examples: A pair of scissors is on the table.
The scissors are on the table.

4. "A number" and "The number"

Sentences beginning with the phrase "a number" always take a plural verb, while sentences that begin with "the number" take a singular verb.

Examples: A number of students have been expelled.
The number of students being expelled is rising.

5. Fraction and Percent

Nouns in percent and in fraction take a singular verb if it paired with a non count noun and vice versa.

Examples: 50% of the earth's water is still safe for drinking.
One thirds of the students were expelled.

6. Compound Nouns

Compound subjects joined by a conjunction take plural verbs.

Example: Paul and Robin are brothers.

7. Neither...nor and Either...or

The verb must agree with the closest noun.

Example: Neither John nor his brothers are going to America.

8. As well and Together with

The verb must agree with the first noun (subject).

Example: The president together with his advisers is leaving tomorrow.

B. Tenses

1. **Present Tense**
Verbs in the present tense express habitual or factual actions.
Examples: She sings.
 The sun shines.
2. **Past Tense**
Verbs in the past tense express actions that happened in the past.
Example: She sang yesterday.
3. **Future Tense**
Verbs in the future tense express actions that will happen in the future.
Example: She will sing.
4. **Present Progressive Tense**
Verbs in the present progressive tense, express actions that are happening at the moment.
Example: She is singing.
5. **Past Progressive Tense**
This expresses a continuing action that started and ended in the past.
Example: She was singing all afternoon yesterday.
6. **Future Progressive Tense**
This expresses a continuing action that will happen in the future.
Example: She will be singing in the competition.
7. **Present Perfect Tense**
This expresses an action that started in the past, but still happening at present or just recently ended.
Example: I have sung a song.
8. **Past Perfect Tense**
This expresses two past actions, one happened before the other.
Example: She had sung before she danced.
9. **Future Perfect Tense**
This expresses two future actions, one will happen before the other.
Example: She will have sung before she dances.
10. **Present Perfect Progressive**
This expresses an action that started in the past and still happening at present
Example: She has been singing since this morning.
11. **Past Perfect Progressive**
This expresses two past actions, wherein the first one is interrupted by the second past action or the first past action ended before the second one transpired.
Example: She had been singing before the bomb exploded.

**12. Future Perfect Progressive**

This expresses two future actions, wherein the first future action will be interrupted by the second future action.

Example: She will have been singing before the bomb explodes.

Summary:

Present:	I dance.
Past:	I danced.
Future:	I will dance.
Present Progressive:	I am dancing.
Past Progressive:	I was dancing all afternoon yesterday.
Future Progressive:	I <u>will be</u> dancing next week.
Present Perfect:	I have danced.
Past Perfect:	I had danced before I sang.
Future Perfect:	I will have danced before I sing.
Present Perfect Progressive:	I have been dancing since then.
Past Perfect Progressive:	I had been dancing when the bomb exploded.
Future Perfect Progressive:	I will have been dancing when the party ends.

C. Faulty Modifiers

1. Dangling Modifier – absence of the word being modified.

Example: Inside the store, shoes must be worn.

Who must wear shoes?

Costumers must wear shoes inside the store.

2. Misplaced Modifier – the modifier modifies the wrong word.

Example: Turning green, I watched the lights.

I watched the lights turning green.

LINGUISTICS**DEFINITIONS OF LANGUAGE**

STRUCTURALISTS	COGNITIVISTS TRANSFORMATIONALISTS	FUNCTIONALISTS	BEHAVIORISTS	INTERACTIONALISTS
• System • Arbitrary • Means of Communication • Primarily Vocal	• Mental Phenomenon • Innate • LAD	• To express • To persuade • To give/ask information • To make someone do something	• Imitation • Repetition • Reinforcement	• Interaction • Socialization

OTHER DEFINITIONS

PSYCHOLINGUISTS – language is learned through schema

SOCIOLINGUISTICS – language performs a social function

WEBSTER – language is the expression and communication of emotions or ideas between human beings by means of speech and hearing that is systematized and confirmed by usage among a *given people* over a *period of time*.

THE SOUNDS OF ENGLISH**A. VOWEL SOUNDS**

	FRONT	CENTRAL	BACK
HIGH	/i/ /I/		/u/ /U/
MID	/E/ /e/	/ʌ/ - accented schwa/ /ə/ - unaccented schwa/ /ɜ/ - accented er schwa sound /ə/ unaccented er schwa sound	/O/ /T/
LOW	/ae/		/Q/ /a/

Vowel sounds can also be classified as SPREAD, ROUND OR NEUTRAL.

SPREAD

/i/ beat, heat, leak, key, meet, seat, amoeba, Caesar, Phoenix

/I/ bit, hit, lick, kit, grill, captain, pin, marriage

/e/ abate, hate, lake, Kate, mate, cape, grate

/E/ bet, bread, let, set, any, jeopardy

/ae/ bat, hat, lack, sat, man, anger, sack, hamburger

NEUTRAL

/Y/ about, towel, solution, America, unaccented schwa

/ʌ/ mother, judge, cup, much, accented schwa

ROUND

/u/ boot, balloon, soon, cocoon, pool

/U/ pull, book, could, would, push, cook

/o/ boat, coat, hope, phone, own

/T/ bought, caught, hawk, pawn, jaw, law, saw

/a/ dark, father, arm, sergeant, psalm

**B. CONSONANT SOUNDS**

NASALS	PLOSIVES	FRICATIVES	AFFRICATES	LATERAL AND GLIDES
m, n, ng	b, d, g, p, t, k	v, f, s, z, sh, th (voiced and voiceless)	dz, ch	w, l, r, j, h

LITERATURE**A. Literary Genres**

Poetry	Prose
Follows a specific rhyme scheme and certain measurements. Examples: Sonnet Song Ballad Epic	Told or written in a natural way No Specific rhyme scheme Examples: Essay Short Story Novel

B. Figurative Language

1. Synecdoche – An association of some important part with the whole it represents.
Example: The face who launched a thousand ships.
2. Simile – An indirect association.
Example: She is like a flower.
3. Personification – Giving humanly attributes to an inanimate object (animal, idea, etc.).
Example: The sun is looking down on me.
4. Oxymoron – A self contrasting statement.
Example: Loud silence
5. Metonymy – An association wherein the name of something is substituted by something that represents it.
Example: Toothpaste is sometimes called Colgate.
6. Metaphor – A direct comparison.
Example: You are the sunshine of my life.
7. Irony – The contrast between what was expected and what actually happened.
Example: No smoking sign during a cigarette break.
8. Hyperbole – An exaggeration.
Example: Cry me a river.
9. Euphemism – Creating a positive connotation out of something negative.
Example: Loved child (illegitimate child)

10. Ellipsis – omission of words in a sentence.
Example: She walked away and so the world turns...
11. Asyndeton – Not putting any connectors (conjunctions or prepositions).
Example: No retreat, no surrender.
12. Apostrophe – A direct address to an abstract things or a person who passed away.
Example: Love, please come and take me!

C. Famous Literary Personalities

1. Geoffrey Chaucer – Canterbury Tales
2. Dante Alighieri – The Divine Comedy
3. Victor Hugo – Hunchback of Notre Dame / Les Miserables
4. Herman Hesse – Siddhartha
5. Charles Dickens – Tale of Two Cities
6. Emily Bronte – Wuthering Heights
7. Virginia Woolf – Mrs. Dalloway
8. D.H. Lawrence – Sons and Lovers
9. Isabel Allende – House of the Spirits
10. Gabriel Garcia Marquez – One Hundred Years of Solitude
11. Oscar Wilde – The Picture of Dorian Gray
12. William Shakespeare – Romeo and Juliet
13. Frank Mc Court – Angela's Ashes
14. Toni Morrison – Sula
15. Edith Wharton – The Age of Innocence
16. Robert Frost – The Road not Taken
17. Jane Austen – Emma
18. Jose Rizal – Noli Me Tangere
19. Chinua Achebe – Things Fall Apart
20. Fyodor Dostoyevsky – Crime and Punishment
21. Rudyard Kipling – The Jungle Book
22. H.G. Wells – War of the Worlds
23. William Golding – Lord of the Flies
24. John Steinbeck – The Pearl
25. George Orwell – Animal Farm
26. Edgar Allan Poe – Annabel Lee
27. Homer – Illiad and the Oddesey
28. Plato – The Republic
29. Pearl S. Buck – Satan Never Sleeps
30. Amy Tan – Joy Luck Club

C. Famous Literary Personalities

1. Geoffrey Chaucer – Canterbury Tales
2. Dante Alighieri – The Divine Comedy
3. Victor Hugo – Hunchback of Notre Dame / Les Miserables
4. Herman Hesse – Siddhartha
5. Charles Dickens – Tale of Two Cities
6. Emily Bronte – Wuthering Heights
7. Virginia Woolf – Mrs. Dalloway
8. D.H. Lawrence – Sons and Lovers
9. Isabel Allende – House of the Spirits
10. Gabriel Garcia Marquez – One Hundred Years of Solitude
11. Oscar Wilde – The Picture of Dorian Gray
12. William Shakespeare – Romeo and Juliet
13. Frank McCourt – Angela's Ashes
14. Toni Morrison – Sula
15. Edith Wharton – The Age of Innocence
16. Robert Frost – The Road not Taken
17. Jane Austen – Emma
18. Jose Rizal – Noli Me Tangere
19. Chinua Achebe – Things Fall Apart
20. Fyodor Dostoyevsky – Crime and Punishment
21. Rudyard Kipling – The Jungle Book
22. H.G. Wells – War of the Worlds
23. William Golding – Lord of the Flies
24. John Steinbeck – The Pearl
25. George Orwell – Animal Farm
26. Edgar Allan Poe – Annabel Lee
27. Homer – Iliad and the Odyssey
28. Plato – The Republic
29. Pearl S. Buck – Satan Never Sleeps
30. Amy Tan – Joy Luck Club

Stages in Reading Development by Jean Chall

- **Stage 0. Prereading:** The learner gains familiarity with the language and its sounds. A person in this stage becomes aware of sound similarities between words, learns to predict the next part in a familiar story, and may start to recognize a few familiar written words. Chall's Stage 0 is considered comparable to what is often called "reading readiness". Typically developing readers achieve this stage about the age of 6.
- **Stage 1. Initial reading stage, or decoding stage:** The learner becomes aware of the relationship between sounds and letters and begins applying the knowledge to text. This demonstrates the reader has achieved understanding of the critical concept of the alphabetic principle and is learning sound-symbol correspondences, the alphabetic code. Typically developing readers usually reach this stage by the age of 6 or 7.
- **Stage 2. Confirmation:** This stage involves confirming the knowledge acquired in the previous two stages and gaining fluency in those skills. Decoding skills continue to improve, and they begin to develop speed in addition to accuracy in word recognition. At this point, the reader should be able to give attention both to meaning and to the print, using them interactively to build their skills and fluency. This stage is critical for the beginning reader. If the developing reader stops making progress during this stage, the individual remains, in Chall's words, "glued to the print". Typically developing readers usually reach this stage around the age of 8.
- **Stage 3. Reading to learn:** At this stage, the motivation for reading changes. The reader has enough reading skill to begin to read text in order to gain information. Readers' vocabulary development accelerates at this point resulting from increased exposure to the written word. Typically developing children usually achieve this stage in 4th grade, around the age of 9.
- **Stage 4. Multiple viewpoints:** The reader at this stage begins to be able to analyze what they read, understand different points of view, and react critically to what they read. Typical readers are developing this skill set during the high school years, around ages 14 to 19.
- **Stage 5. Construction and judgment:** At this stage, readers have learned to read selectively and form their own opinions about what they read; they construct their knowledge from that of others. This highest level of reading development is not usually reached until college age, or later, and may in fact be achieved only by those who have an intellectual inclination.

List of Reading-Related Terms

Affix — An attachment to the end or beginning of base or root word. A generic term that describes prefixes and suffixes.

Age equivalent scores — In a norm-referenced assessment, individual student's scores are reported relative to those of the norming population. This can be done in a variety of ways, but one way is to report the average age of people who received the same score as the individual child. Thus, an individual child's score is described as being the same as students that are younger, the same age, or older than that student (e.g. a 9 year old student may receive the same score that an average 13 year old student does, suggesting that this student is quite advanced). See also grade equivalent scores.

Alliteration — The repetition of initial phoneme either across syllables or across words. For example, "Happy hippos hop on Harry." See onset

Allomorph — An alternative manifestation of a morpheme (a set of meaningful linguistic units). Allomorphs vary in shape or pronunciation according to their conditions of use, but not as to meaning. In English, the negative prefix in has several allomorphs, such as INcapable, ILlogical, IMprobable, IRreverent.

Allophone — A phonetic variant of a phoneme in a particular language. For example, [p] and [pH] are allophones of the phoneme /p/; [t] and [tH] are allophones of the phoneme /t/.

Alphabetic principle — Understanding that spoken words are decomposed into phonemes, and that the letters in written words represent the phonemes in spoken words when spoken words are represented in text.

Assessment — Using data to determine abilities and knowledge about a particular topic. A distinction should be drawn between a test, which is just a tool used in assessment, and assessment.

Balanced literacy — An approach to reading instruction that strikes a compromise between Phonics approaches and Whole Language approaches — ideally, the most effective strategies are drawn from the two approaches and synthesized together.

Basal reader — A kind of book that is used to teach reading. It is based on an approach in which words are used as a whole. The words are used over and over in each succeeding lesson. New words are added regularly.

Blending — Combining parts of a spoken word into a whole representation of the word. For example, /p/ /oo/ // can be blended together to form the word POOL.

Ciphering — See deciphering

English

Clitic — A language element with wordlike status or form that resembles a word. A clitic usually cannot be used on its own as a word in a construction. Clitics are usually phonologically bound to a preceding word or a following word.

Cloze — This is a method of assessment wherein a word is eliminated from a passage, and the child's task is to use the context of the passage to fill in the blank with an appropriate word. Different cloze tasks focus on different skills; a cloze assessment can be used to test reading comprehension, language comprehension, vocabulary, syntax and semantics. When the child is given options (multiple choice) from which to select the appropriate word for each blank, the assessment is typically described as a "modified cloze task".

Content word — A word which has lexical meaning such as a noun or a verb (as opposed to a function word).

Contentive — See content word

Criterion-referenced assessment — This is a type of assessment in which a child's score is compared against a predetermined criterion score to determine if the child is performing acceptably or unacceptably. Rather than comparing the child's performance against the performance of her peers (as would be the case with a norm-referenced assessment), the criterion or "acceptable score" is set by the author of the assessment. Each child's score, then, is either above or below the criterion score.

Deciphering — Using knowledge about graphophonemic relationships to sound-out regular words. Some argue this is accomplished through a process known as "reading by analogy".

Decodable texts — Texts which do not contain irregular words. Also, these texts are usually designed to reinforce certain "rules" that have previously been taught in phonics lessons.

Decoding — Using knowledge of the conventions of spelling-sound relationships and knowledge about pronunciation of irregular words to derive a pronunciation of written words.

Deep orthography — A writing system that does not have consistent or one-to-one correspondence between the phonemes in speech and the written code. English is an example of a deep orthography — no phoneme is consistently represented by the same letter in all words, and only one letter (the letter v) consistently corresponds to a specific phoneme. Examples of shallow orthographies would include Spanish and Finnish.

Derivational affixation — The process of adding affixes to roots or bases in order to vary function or modify meaning. Derivational affixation transforms a stem or word from one part of speech to another (from one word class to another). For example, the verb HIT can be modified with the affix -ER to become the noun HITTER. BRIGHT, plus -LY changes from an adjective into an adverb.

Digraph — A group of two successive letters whose phonetic value is a single sound. For example, EA in BREAD, CH in CHAT, or NG in SING.

Diphthong — A gliding monosyllabic speech sound that starts at or near the articulatory position for one vowel and moves to or toward the position of another. For example, oy in TOY or ou in OUT.

Duet reading — An activity where a skilled reader sits next to a learner and the two read a text simultaneously.

Elision — The omission of a part of a spoken word — to be more efficient, people sometimes say "IDANO" instead of "I do not know," or a person may say "N" instead of "AND" (as in "bread 'n' butter").

Expository text — Text written to explain and convey information about a specific topic. Contrast with narrative text.

Extrinsic phonics — Phonics taught as a supplemental learning aid rather than as an integral part of the program of reading instruction, often in separate workbooks during special time periods.

Fluent reading — Fast, smooth, effortless and automatic reading of text (can be silent reading or not) with attention focused on the meaning of the text.

Function word — A word which does not have lexical meaning, which primarily serves to express a grammatical relationship (e.g. AND, OF, OR, THE).

Functor — See function word

Grade equivalent scores — In a norm-referenced assessment, individual student's scores are reported relative to those of the norming population. This can be done in a variety of ways, but one way is to report the average grade of students who received the same score as the individual child. Thus, an individual child's score is described as being the same as students that are in higher, the same, or lower grades than that student (e.g. a student in 2nd grade may earn the same score that an average fourth grade student does, suggesting that this student is quite advanced). See also age equivalent scores.

Grapheme — A unit (a letter or letters) of a writing system that represents one phoneme; a single symbol that has one phonemic correspondent within any particular word.

Graphophonemic — Refers to the sound relationship between the orthography (symbols) and phonology (sounds) of a language.

Graphophonic — See graphophonemic

Homograph — See homonym

Homonym — A word which is spelled and pronounced identically to another word, but which has a different meaning. For example, a swimming POOL versus a POOL table.

Homophone — A word which is spelled differently from another word, but which is pronounced identically. For example, HOARSE versus HORSE; or TWO versus, TO, versus, TOO.

Ideograph — A graphic symbol that represents an idea instead of a spoken word, a single morpheme, or a lexical item. In a phonetic system, the symbol represents the sounds that form its name. Sometimes children's writing contains ideographs, but there is no known writing system that is composed entirely of ideographs. See logograph.

Idiom — A phrase, construction, or expression that is understood in a given language. This expression has a meaning that differs from typical syntactic patterns or that differs from the literal meaning of its parts taken together. Some examples of idiomatic expressions would include, "to kick the bucket" means "to die" or "to throw in the towel" means "to give up" or "to stop".

Inductive phonics — See synthetic phonics

Intrinsic phonics — Phonics taught implicitly in the context of authentic reading activities.

Language comprehension — This term should refer to understanding language in any of its forms, but in the vernacular, it has come to be synonymous with listening comprehension. When people use the term "language comprehension" they are typically not referring to sign language, written language, semaphore or smoke signals. Typically, the term is reserved for describing spoken language.

Latent — Something which is present but invisible, or inactive but capable of becoming active or visible, so a child may have latent knowledge of a concept, meaning the child understands the concept, but has not had an opportunity to demonstrate that understanding.

Lexical — Refers to the words or the vocabulary of a language as distinguished from its grammar and construction.

Lexicon — Often called the "mental dictionary", the lexicon is a representation of all knowledge a person has about individual words.

Listening comprehension — Understanding speech. Listening comprehension, as with reading comprehension, can be described in "levels" — lower levels of listening comprehension would include understanding only the facts explicitly stated in a spoken passage that has very simple syntax and uncomplicated vocabulary. Advanced levels of listening comprehension would include implicit understanding and drawing inferences from spoken passages that feature more complicated syntax and more advanced vocabulary. See also Language Comprehension.

Logograph — A writing system wherein each spoken word in the language is represented by a unique symbol. Chinese is an example of a logographic writing system.

Look-say — An approach to reading instruction that emphasized memorization of whole words. Graded word lists were used to teach children to memorize words as wholes, and every year, children added to their repertoire of "familiar" words.

Matthew Effect — Borrowed from a line in the Bible's Book of Matthew — the rich get richer and the poor get poorer. In reading, this describes the difference between good readers and poor readers — while good readers gain new skills very rapidly, and quickly move from "learning to read" to "reading to learn" poor readers become increasingly frustrated with the act of reading, and try to avoid reading when possible. The gap is relatively narrow when the children are young, but rapidly widens as children grow older.

Metalinguistic — Language and terminology used to describe language and the component parts of language.

Metaphor — A figure of speech in which a word or phrase is used in place of a more literal description. For example, rather than saying somebody is happy, one might say that person is "on cloud nine" or "walking on air".

Morpheme — The smallest meaningful unit of speech. A morpheme can be a free form (as in PIN) or a bound form (-S in PINS), that contains no smaller meaningful parts. The morpheme is a sub-component of vocabulary; many words only have one morpheme, but some, such as compound words or words with affixes, have more than one.

Morphology — An examination of the morphemic structure of words; an appreciation of the fact that words with common roots share common meanings, and that affixes change words in predictable and consistent ways.

Narrative text — Text which conveys a story or which relates events or dialog. Contrast with expository text.

Nonword — A string of letters which cannot be pronounced and which has no meaning. For example, MCVRI or HEGZT. Contrast with pseudoword.

Norm-referenced assessment — This is a type of assessment that allows an individual child's score to be compared against the scores of other children who have previously taken the same assessment. With a norm-referenced assessment, the child's raw score can be converted into a comparative score such as a percentile rank or a stanine. Contrast with criterion-referenced assessment.

Nuclear syllable — A syllable that carries maximum prominence, usually due to being stressed. For example, in the word ADDICT either AD is the nuclear syllable (if it is a noun) or DICT is the nuclear syllable (if it is a verb).

Onomatopoeia — The formation of a word by imitating the natural sound associated with the object or action. For example, the "crack" of the bat, or the "twang" of the guitar strings.

English

Onset — The part of the syllable that precedes the vowel of a syllable. In the case of multi-syllabic words, each syllable has an onset. For example; the onset of the word PILL is /p/. Contrast with rime.

Orthography — A complete writing system for a language or languages. Orthographies include the representation of word boundaries, stops and pauses in speech, and tonal inflections. See deep orthography.

Overdifferentiation — The practice of representing a single phoneme, syllable, or morpheme with two or more symbols in a writing system. For example, the sound /k/ can be represented by C, CH or K. Also called under representation; contrast with under differentiation.

Particle — A short part of speech used to express a syntactic or semantic relationship. A particle can also be a prefix or derivational suffix.

Phone — Any single speech sound considered as a physical event without regard to its place in the language structure. A smaller unit of speech than the phoneme.

Phoneme — The vocal gestures from which words are constructed in a language; the smallest unit of speech that serves to distinguish one utterance from another (e.g. PAT and FAT are distinguished by the initial phoneme).

Phoneme awareness — A subset of phonological awareness; the knowledge that spoken words consist of a sequence of individual sounds, and the understanding that phonemes are rearranged and substituted to create new words. There are a finite set of phonemes which are arranged and rearranged to create an infinite set of spoken words.

Phonemic ideal — An orthography which represents each phoneme with a unique grapheme or letter. See deep orthography.

Phonetic writing — A system that uses a unique symbol to represent each phone (sound) of the language or dialect, such as the International Phonetic Alphabet (IPA).

Phonics — An approach to reading instruction that emphasizes letter-sound relationships and generalized principles that describe spelling-sound relationships in a language (e.g. vowels in CVCs are short). See also extrinsic phonics, intrinsic phonics, and synthetic phonics.

Phonograms — A succession of letters that represent the same phonological unit in different words, such as IGHT in FLIGHT, MIGHT and TIGHT.

Phonological awareness — The understanding that speech is composed of sub-parts — sentences are comprised of words, words are comprised of syllables, syllables are comprised of onsets and rimes, and can be further broken down to phonemes (phonological awareness at this level is usually described as phoneme awareness).

Polyphone — A word which is spelled the same as another word, but which sounds different when pronounced. For example, you can WIND a watch, and the WIND blows hard.

Pseudohomophone — A pseudoword, which when pronounced, sounds like a real, familiar word. For example, the pseudohomophone BRANE sounds like the real word BRAIN.

Pseudoword — A pronounceable string of letters which has no meaning; also called invented words, nonsense words, or made-up words. For example, MIVIT, HEASE, and MIVE are all pronounceable, but don't mean anything.

Rhyme — Sharing identical or at least similar medial and final phonemes in the final syllable. Because English has a writing system with a deep orthography, words can rhyme without sharing similar orthography (e.g. SUITE and MEET).

Rime — The part of a syllable (not a word) which consists of its vowel and any consonant sounds that come after it. Contrast with onset.

Segmentation — Breaking down a spoken word into word parts by inserting a pause between each part. Words can be segmented at the word level (in the case of compound words), at the syllable level, at the onset-rime level, and at the phoneme level.

Semantics — The study of the development and changes of the meanings of speech forms. Semantics is also a study of the process by which meaning is derived from symbols, signs, text, and other meaning-bearing forms.

Sight word — A word in a reading lesson containing parts that have not yet been taught, but that is highly predictable from the context of the story or which the child has memorized.

Social promotion — Promoting a child to the next grade in order to keep the child with his or her peers and social group.

Struggling reader — Any student of any age who has not mastered the skills required to fluently read and comprehend text which is written at a level that one could reasonably expect a student of that age to read.

Suprasegmental — A vocal effect that extends over more than one sound segment in an utterance, such as pitch, stress or juncture pattern.

Syllable family — The group of syllables formed by a consonant plus all of the vowels in a language.

Syllable shape — An abstract combination of consonants and vowels (V, CV, VC, CCV, or CVC).

Syntax — The conventions and rules for assembling words into meaningful sentences; syntax varies across languages.

Synthetic phonics — A part-to-whole phonics approach to reading instruction in which the student learns the sounds represented by letters and letter combinations, blends these sounds to pronounce words, and finally identifies which phonic generalizations apply (a.k.a. inductive phonics).

Trigraph — A three-letter sequence representing a single consonant, vowel or diphthong, such as EAU in BEAU.

Underdifferentiation — The representation of two or more phonemes, syllables, or morphemes with a single symbol. For example, the symbol S is used to represent /s/ /z/ and /sh/.

Underrepresentation — See overdifferentiation.

Untaught residue — Material which has not previously been taught but is used in a primer lesson anyway to make the lesson more effective.

Verbal Efficiency Theory — The Verbal Efficiency Theory is attributed to Perfetti & Lesgold (1979). It states that mere word recognition accuracy is not, in itself, sufficient to enable fluent reading comprehension. Instead, word-coding skills must be increased to a high level of efficiency and automaticity in order for the reader to be able to devote attention to meaning and comprehension.

Whole Language — An approach to reading instruction that de-emphasizes letter-sound relationships and emphasizes recognition of words as wholes.

Word bank — A storage place for learners to keep written words that they have learned so that they can refer to them as needed. They can go to the word bank as they are writing or editing to find out how to spell a word.

Word calling — Decoding words without comprehending their meaning. Occurs for one of two reasons — either the words are outside the listening (spoken) vocabulary of the child, or the decoding process is so slow, laborious, and capacity-demanding that the child is unable to pay attention to word meaning.

Word families — A collection of words that share common orthographic rimes, such as HIKE, BIKE, LIKE, etc.

Word parts — The letters, syllables, diacritics, and parts of syllables such as consonant clusters and vowel clusters.

Direction: Choose the best answer from the choices given.

1. It surely takes a lifetime for Edgar Allan Poe to forget his lost love, but he _____ hard to move on amidst tremendous loneliness and despair.

- A. has been trying
- B. has tried
- C. had tried
- D. had been trying

Answer: A. Options C and D are not acceptable answers primarily because the helping verb HAD is used exclusively in the PAST PERFECT TENSE (this tense requires two past actions in a sentence, and the given sentence has only one). Since that we only have options A and B to choose from, we must examine the sentence and determine if it is either in the PRESENT PERFECT TENSE or PRESENT PERFECT PROGRESSIVE TENSE.

The PRESENT PERFECT TENSE connotes an action that started somewhere in the past and then continued up until the present time. It has two possible outcomes—(1) the action may still be happening or (2) it just ended recently. We must also keep in mind that even though there is a possibility that the action is still happening at present time, it is certain that it would end soon.

The PRESENT PERFECT PROGRESSIVE TENSE on the other hand is somewhat similar with the PRESENT PERFECT TENSE in terms of the origin of the action, but different in terms of the outcome. In this particular tense, the action started somewhere in the past and then it continued up until the present time (just like PRESENT PERFECT TENSE), and is certain to continue in the future.

As we examine the given sentence, the most appropriate answer is option A (PRESENT PERFECT PROGRESSIVE TENSE) because Edgar Allan Poe started moving on/forgetting about his lost love, but as the sentence puts it, it would take a "lifetime"—it means his efforts in moving on would most likely continue in the future.

2. What can be the most appropriate follow-up sentence to the given statement below?
"I have been teaching for 34 years."

- A. So it is now time to quit
- B. And I can't imagine doing anything else
- C. And I want this to end right now
- D. And my children are now teachers, too

Answer: B. The given sentence is in the PRESENT PERFECT PROGRESSIVE TENSE and it only means that the action that started in the past will still continue to happen in the future. Therefore the best follow-up sentence is option B.

3. Emily Bronte _____ her last novel when she died.

- A. has written
- B. had been writing
- C. had written
- D. has been writing

Answer: B. The given sentence has two past actions—meaning it could either be in the PAST PERFECT TENSE or PAST PERFECT PROGRESSIVE TENSE. That is why we can immediately remove options A and D from our choices.

The sentence given is in the PAST PERFECT PROGRESSIVE because the first past action is still happening when the second past action transpired and so the answer is option B.

4. Which among the sentences below followed the correct order of adjectives?

- A. She drives an expensive black Japanese sports car.
- B. She drives a black Japanese expensive sports car.
- C. She drives a black expensive Japanese sports car.
- D. She drives an expensive Japanese black sports car.

Answer: A. In sentences with multiple adjectives, this order of adjectives must be followed:

DETERMINER: a, an, the, some

OBSERVATION: cheap, expensive, mediocre, shabby, smooth

DESCRIPTIVE ADJECTIVES

SIZE: short, big, humungous, wide, long, small

SHAPE: round, circular, cylindrical, rectangular

AGE: young and old

COLOR: blue, red, white, yellow

ORIGIN: Japanese, European, Asian, Indian

MATERIAL: wood, ceramic, metal

NOUN QUALIFIER: sports in "sports car", tool in "tool box"

5. Only 85% of the total number of applicants _____ able to pass the entrance test last year.

- A. are
- B. was
- C. is
- D. were

Answer: D. Nouns in percent and in fraction take plural verbs if paired with COUNT NOUNS, and singular verbs if paired with NON-COUNT NOUNS.

6. Neither Emily Bronte nor her sisters _____ their real names in their writing career.

- A. use
- B. uses
- C. using
- D. has used

Answer: A. In sentences with "neither...nor" and "either...or" the verb must agree with the closest noun.

7. The man looks _____.

- A. strange
- B. strangely
- C. stranger
- D. has strange

Answer: A. This question measures our knowledge about ADJECTIVES, ADVERBS, and VERBS OF SENSES. As we all know an adjective modifies either a noun or a pronoun, while an adverb modifies a verb, an adjective, or another adverb. An adjective usually appears before the word it modifies. On the contrary an adverb usually appears after the word it modifies. Having mentioned these details, one may

think that the answer is "strangely" because the blank appears after the word "looks" which also happens to be a verb. But we must not forget that the verb LOOKS is one of the VERBS OF SENSES, and these verbs can either be a LINKING VERB or an ACTION VERB depending on the subject and the presence of an object. If the subject is capable of movement, and if there is an object, then the VERB OF SENSE functions as an ACTION VERB and in turn requires an ADVERB. On the other hand, if the subject is stationary and if there is no object, then the VERB OF SENSE functions as a LINKING VERB and in turn requires an ADJECTIVE just like in the given sentence above.

8. A number of whale species _____ now extinct because of illegal hunting and alarming change in sea water temperature.

A. **are**
B. is
C. were
D. was

Answer: A. Sentences beginning with the phrase "a number" always take a plural verb, while sentences that begin with "the number" take a singular verb.

9. The problems that I encountered were _____ for me to handle.

A. so much
B. **too much**
C. very much
D. too more

Answer: B. The answer is "too much" because the word "too" must match the word "for". On the other hand the word "so" must be followed by a "that-clause".

Example: You are too fast for me to catch.
You are so fast that I failed to catch you.

10. In Benjamin Franklin's "Poor Richard's Almanac" it was said that: "early to bed, _____ makes a man healthy."

A. early rising
B. rising early
C. **early to rise**
D. waking up early

Answer: C. This question measures our knowledge in parallelism. The answer is "early to rise" because it is the most parallel to the first statement "early to bed".

11. Which among these words has the voiceless /th/ sound?

A. These
B. Mother
C. **Think**
D. There

Answer: C. The vibrations in the voice box determine if a particular sound is voiced or voiceless. If there are vibrations it means it is a voiced sound, and it is voiceless if otherwise.

12. Which word must have the primary stress in the sentence below if we want to emphasize possession?

"That is my bag."

A. that
B. is
C. **my**
D. bag

Answer: C. To emphasize possession, the stress must be placed on the POSSESSIVE ADJECTIVE "my".

13. What pitch level must be used in starting a sentence?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: B. Below is the matrix of pitch levels according to traditional grammar rules:

PITCH 1:	To end a sentence
PITCH 2:	To start a sentence
PITCH 3:	To emphasize or to stress
PITCH 4:	To signify extreme emotions

14. Which among the words below has the /sh/ sound?

- A. Vision
- B. Leisure
- C. Sure
- D. Salient

Answer: C. VISION and LEISURE both have /zh/ sound while SALIENT has the /s/ sound. Therefore SURE is the answer.

15. Your father isn't working anymore, _____?

- A. is he
- B. isn't he
- C. has he
- D. hasn't he

Answer: A. This particular item concerns "tag questions". If the base sentence is NEGATIVE, the tag must be POSITIVE and vice versa.

16. This pertains to the pauses or rests in speech.

- A. Pitch
- B. Juncture
- C. Stress
- D. Intonation

Answer: B. All of the options given above are SUPRASEGMENTALS or the meaning carriers in speech. Pitch refers to the highness or lowness of sounds; Stress refers to the different emphasis on words; Intonation refers to the rising and falling of sounds; and juncture refers to the rests or pauses.

17. I would not leave you come hell or high water. Based on the given sentence, we can surmise that:

- A. the speaker won't leave the person no matter what
- B. the speaker warns the person of a forthcoming disaster
- C. the speaker wants the person to give up
- D. the speaker want the person to continue fighting

Answer: A. The answer is statement A. The underlined phrase connotes that the speaker will stay with the person till the end.

18. Her nervousness keeps her on her toes. The underlined phrase means:

- A. she is always alert and cautious
- B. she is always ready to fight
- C. she is always confident
- D. she is always on the go

Answer: A. When a person is said to be on his/her toes, it means that he/she constantly monitors his/her actions, and so the answer is the first statement.

19. Emily Dickinson was ostracized by her peers primarily because of her eccentric principles. The underlined word means:

- A. Criticized
- B. Condemned
- C. Excluded
- D. Praised

Answer: C. Ostracize means being excluded from a particular group, or being treated by others in an unfriendly manner.

20. The death of Ninoy Aquino prompted the conglomeration of people from different walks of life. The words below are synonyms of the underlined word except:

- A. Gathering
- B. Assembly
- C. Accumulation
- D. Diffusion

Answer: D. Conglomeration means gathering together of many different things. Options A, B, and C are all synonymous to the underlined word that is why the answer is "Diffusion"

21. For a non-believer, the noise heard during the street procession would seem cacophonous. The underlined word means:

- A. Loud and unpleasant
- B. Loud and yet pleasant
- C. Soft and yet unpleasant
- D. Soft and pleasant

Answer: A. The word cacophonous means a mixture of sounds that are loud and unpleasant. This question can also be answered using context clues. The words NON-BELIEVER and NOISE greatly help in determining the correct answer.

22. Which among the sounds below is a voiceless sound?

- A. /dz/
- B. /g/
- C. /z/
- D. /sh/

Answer: D. The vibrations in the voice box determine if a particular sound is voiced or voiceless. If there are vibrations it means it is a voiced sound, and it is voiceless if otherwise.

23. Which among the words below does not belong?

- A. Conceal
- B. Screen
- C. Reveal
- D. Obscure

Answer: C. Options A, B, and D are all synonyms of the word "hide" while the word "reveal" is its antonym.

24. A paragraph is believed to have coherence if:

- A. the sentences are all about the topic sentence
- B. the sentences are smoothly connected with each other through transitional devices
- C. the sentences are correctly written in terms of grammar rules
- D. the sentences are independent

Answer: B. Coherence is achieved if all of the developer sentences are logically joined together by transitional or cohesive devices.

25. Aside from being a renowned writer, Carl Sanburg is also believed to have the gift of gab. The underlined word means:

- A. The ability to speak clearly
- B. The ability to speak persuasively
- C. The ability to speak honestly
- D. The ability to speak accurately

Answer: B. The gift of gab means being able to speak with confidence and in turn being able to convince a group of people to do a particular course of action.

26. Which among the sounds below does not belong?

- A. /p/
- B. /f/
- C. /s/
- D. /v/

Answer: A. The sounds /f/, /s/, and /v/ are all members of the FRICATIVES family of consonant sounds, while the sound /p/ is a plosive.

27. As a historian, Herodotus never missed any salient point in his creation "The Hiostories". The words below are synonyms of the underlined word except:

- A. Leading
- B. Relevant
- C. Significant
- D. Minor

Answer: D. The word salient means most important or most prominent.

28. Which among the sounds below does not belong?

- A. /m/
- B. /w/
- C. /b/
- D. /n/

Answer: D. Options A, B, and C are all bilabial sounds—meaning the most active parts of the speech mechanism are our lips (upper and lower), while /n/ is an alveolar sound, it means that the tongue is touching the alveolar ridge or the gum ridge.

SONNET 18

Shall I compare thee to a summer's day
Thou art more lovely and more temperate
Rough winds do shake the darling buds of May
And summer's least hath all too short a date

29. The sonnet above is an example of a:

- A. **Shakespearean sonnet**
- B. Petrarchan sonnet
- C. Jacobean sonnet
- D. Italian sonnet

Answer: A. Sonnet 18 is a Shakespearean sonnet because it was written by William Shakespeare. A Shakespearean sonnet has 14 iambic pentameter lines, and this means that each line must have ten syllables. Petrarchan sonnet is the same with Italian sonnet while Jacobean pertains to the works of Ben Jonson.

30. What is the rhyme scheme of the first quatrain of the given sonnet?

- A. **ABAB**
- B. ABBA
- C. AABA
- D. AABB

Answer: A. The rhyme scheme pertains to the sound of the last word per line. Shakespearean sonnets have the rhyme scheme ABABCDCDEFEFGG.

31. This is a collection of stories told by the pilgrims while on their way to the chapel of Canterbury.

- A. **The Canterbury Tales**
- B. The Canterbury Collection
- C. The Canterbury Files
- D. The Canterbury Saga

Answer: A. Geoffrey Chaucer wrote the Canterbury Tales to attack the old English Society. This is one of the most important literary texts produced in the medieval times. The Canterbury Tales is a Frame Story, which means "a story within a story".

32. "One thousand hands made the pyramids of Egypt." What figure of speech was used in the given statement?

- A. **Synecdoche**
- B. Metonymy
- C. Onomatopoeia
- D. Metaphor

Answer: A. Metaphor is direct comparison, while onomatopoeia concerns sounds. Therefore we would only choose between options A and B. Metonymy is being used if instead of mentioning the word itself, one would mention a representation (Colgate for toothpaste), while Synecdoche is being used if instead of mentioning the word, one mentions a significant part of it (the face who launched a thousand ships).

**And I shall be telling this with a sigh
Somewhere ages and ages hence
Two roads in the woods and I
I took the one less travelled by
And that has made all the difference**

33. The lines above are taken from what particular poem?

- A. **The Road not Taken**
- B. Stopping by the Woods on a Snowy Evening
- C. Fire and Ice
- D. The Raven

Answer: A

34. Who is the author behind the lines given above?

- A. Oscar Wilde
- B. Rudyard Kipling
- C. **Robert Frost**
- D. Walt Whitman

Answer: C

35. This is the first accepted masterpiece in Philippine Literature in English.

- A. **Dead Stars**
- B. Small Key
- C. My Father Goes to Court
- D. Desire

Answer: A. Paz Marquez Benitez wrote Dead Stars which is about a love triangle that involves Alfredo, Esperanza, and Julia. This is considered to be the first accepted masterpiece in Philippine literature in English.

36. If Salvador Lopez advocates Proletariat literature, who adheres to the concept of "art for art's sake"

- A. **Jose Garcia Villa**
- B. F. Sionil Jose
- C. Nick Joaquin
- D. Amador Daguio

Answer: A. Jose Garcia Villa strongly believes that literature must primarily serve its aesthetic sense far more than anything else.

37. Which does not characterize our country's primitive literature?

- A. Mainly in oral tradition
- B. Some were written in not so sturdy materials such as leaves and wood
- C. Recognizes the existence of a supreme being
- D. **Has continued to flourish in the colonial times**

Answer: D. The Spaniards destroyed records of our primitive literature because they believe that those things are pagan.

38. Which does not describe the Ilustrados?

- A. Filipinos who were able to study abroad
- B. **Filipino painters in Spain**
- C. Filipinos who ask for change in the society
- D. Filipinos who left the country for good

Answer: B. The Ilustrados or the "enlightened ones" are Filipinos who were able to study abroad and realized that the Philippines is not as progressive as other nations specifically in Europe.

39. This period is considered as the Golden Age of the Filipino Language.

- A. **Japanese Regime**
- B. American Regime
- C. Spanish Regime
- D. Marcos Regime

Answer: A. During the Japanese occupation, the Japanese encouraged the Filipinos to use the vernacular language and this constituted to the flourishing of Tagalog and other regional dialects.

40. This is Nick Joaquin's masterpiece that talks about the pagan "tadtarin"/"tatarin" ritual.

- A. May Day Eve
- B. Woman with Two Navels
- C. **Summer Solstice**
- D. Ermita

Answer: C. Summer Solstice is Nick Joaquin's short story that tackles about the inequalities faced by women in the society during those times.

41. They are considered as the first teachers in the Philippines who taught English in a formal classroom setting.

- A. American Soldiers
- B. **The Thomasites**
- C. The Thomasians
- D. The Sophists

Answer: B. The Thomasites are American teachers who arrived in the Philippines in the early 1900s on board the US Ship Thomas. They are the first set of teachers who taught English in a formal setting. They also founded the first American School now known as the Philippine Normal University.

42. Who wrote the short story "The Wedding Dance" which is about the ill-fated love of Awiyao and Lumnay?

- A. **Amador Daguio**
- B. Manuel Arguilla
- C. Estrella Alfon
- D. Paz Latorena

Answer: A

43. If a student has familiarity with the sounds of the language, he/she is said to have:

- A. Graphophonemic skills
- B. **Phonemic awareness**
- C. Vocabulary
- D. Fluency

Answer: B

44. If the student can relate the words in a sentence with each other to create a significant idea, he/she is said to have:

- A. Phonemic awareness
- B. Vocabulary
- C. Fluency
- D. **Comprehension**

Answer: D

English

Rationalization for numbers 43 and 44:

PHONEMIC AWARENESS: the ability of the students to recognize the sounds of the language

PHONICS: the ability of the students to relate sounds to written symbols

FLUENCY: the ability of students to combine sounds to form significant utterances

VOCABULARY: the ability of students to put meaning into words

COMPREHENSION: the ability of students to relate words in a sentence and come up with significant realizations

45. "The wind kisses my cheeks." What figure of speech is used in the given statement?

- A. **Personification**
- B. Metaphor
- C. Simile
- D. Onomatopoeia

Answer: A. When a humanly attribute is given to an inanimate object, it is considered to be a Personification.

For poetry never says;
It unsays. To say
Is to confine, contain,
To unsay is to explore the
Vaguely all-hovering
Presence of the unseen,
Deliberately left-out

46. What can be inferred from the lines of the given poem?

- A. **that a poem must not reveal itself to its readers easily**
- B. that a poem must have no words
- C. that a poem must be detailed
- D. that a poem must have deep words

Answer: A

47. Which statement is not a correct inference from the lines of the given poem?

- A. that the beauty of the poem relies on the transformation of the familiar to the unfamiliar
- B. that a poem must not give everything to the readers
- C. **that a poem must be transparent—the meaning of it must be clearly drawn out**
- D. that a poem must be read intelligently—one must look into metaphors and symbolisms used

Answer: C

48. The editor found the news story not so entertaining. He found it full of :

- A. adjectives
- B. verbs
- C. **pronouns**
- D. adverbs

Answer: C. Because it is considered as a "function" word-meaning it is dependent on the "content words present in the sentence. In English content words are the following: nouns, verbs, adjectives, and adverbs; while function words are the following: prepositions, conjunctions, articles, and pronouns.

49. "On the street of this position of God's world I feel neighbor to a rat, so brother of a worm; Forever chasing rainbows at muddy margins." This line on Quemada's poem is saying that:

- A. Life is fruitful
- B. Life is not worth living
- C. Life is empty and meaningless
- D. **Life is full of challenges**

Answer: D. One can easily infer that the answer is letter D primarily because one can visualize that the persona is facing difficulties in life.

50. "The whale has no famous author and whaling no famous chronicles." Based on this line from the novel, Moby Dick is treated as :

- A. Whaling is not truly structure.
- B. **Whales are ordinary creatures.**
- C. Whale is a wild mammal that haunts mariners.
- D. Whaling is an old hobby.

Answer: B. The phrases "no famous author" and "no famous chronicles" would indicate that the answer is letter B.

51. Venus is an exemplification of feminine pulchritude. Pulchritude means:

- A. Plain
- B. **Beauty**
- C. Ugliness
- D. Homeliness

Answer: B. Using context clues, one can easily infer that the answer is B "beauty" because "Venus" is the Roman goddess of beauty.

52. After 7 depressing years, Mitch finally quit the job. She _____ along with her superior for a long time before she finally decided to look for a new position.

- A. didn't get
- B. isn't getting
- C. hasn't been getting
- D. **hadn't been getting**

Answer: D. The sentence with missing parts is in the past perfect progressive tense since that there are two past actions where the first action was still happening when the second transpired. Therefore, the auxiliary verb must be "had" plus "been" and the -ing form of the verb.

53. Five years of intensive language study are required for second language learners. Chun-Li _____ English for three years, but she will need more training to be more proficient.

English

- A. has studied
- B. will have been studying
- C. **has been studying**
- D. will be studying

Answer: C. The second sentence is in the present perfect progressive tense because the action started somewhere in the past, still happening at present and will continue to happen in the future. The auxiliary verb must be "has" plus "been" and the -ing form of the verb.

54. The laborers are so happy that _____ now reaping the fruit of _____ efforts.

- A. **they're-their**
- B. they're-there
- C. there-their
- D. their-their

Answer: A. "They" is a personal pronoun, "Their" is a possessive pronoun, while "They're" is a combination of "they" and "are".

55. This seatwork is difficult for Paul and _____.

- A. Myself
- B. I
- C. **Me**
- D. Himself

Answer: C. Tough choice would be between B and C. the answer is C "me" because "I" must only be used if you are the subject of the sentence or if you are the doer of the action, while "me" is used if you are the object of the sentence or if you are the receiver of the action.

56. The candy cane smells _____.

- A. **Sweet**
- B. Sweetly
- C. Sweeter
- D. More sweet

Answer: A. "smells" is a verb of senses—meaning it could either function as an action or linking verb. It is functioning as an action verb if the subject is capable of movement and if there is a direct object. It functions as a linking verb if the subject is not capable of movement. Since that "candy" cannot move, the verb "smells" functions as a linking verb. The sentence pattern therefore is S-LV-PA (Subject, Linking Verb, Predicative Adjective) and so, the answer is "sweet".

57. A comma indicates:

- A. Pause
- B. **Slight pause**
- C. longer pause
- D. no pause

Answer: B. There are three types of juncture, a comma or "single slash" means slight pause; a period or "double slashes" means longer pause; end of the paragraph or "triple slashes" means longest pause.
