ACKNOWLEDGEMENT

Special thanks to the many people who in one way or another has contributed to the fulfillment of this endeavor- *my being a teacher through shared knowledge.*

My teachers!

... they must have shown me great example of this noble profession and vacation. I was forced into nursing but evolved to become a teacher, and pursued further studies and became a doctor of education. From my teachers in basic education to my professors in the graduate schools, and my future teachers.

The hundreds of authors of my references

... whose works served as my substance from which I derived my form

My students, reviewees, trainees, and other incidental students and mentee

... who forced me into becoming a teacher

My CBRC Family

... who facilitated my growth as a teacher, as well as my CEB group of companies which provided me a classroom larger than life, especially to Bong, Nancy, Lando, Jonathan, Bhum, Dang and Algie!

My parent, siblings and relatives

... who guided me through my maturation and education

My beloved family, my wife, Lyne who gave me four lovely kids: Lyca, Lambert, Lyza and Lyra

... for having served as my reason for being and becoming
... for making my life complete and my journey worth beyond a lifetime
... for my immortal source of complete happiness

THE ULTIMATE PSYCHOLOGY OF TEST SUCCESS

. . . The **BALITA** Formula

Bring Out the Best in YOU

You are the greatest resource! During the exam proper, you only have yourself moving towards the end-in-mind – passing the LET! While Divine help is surely to come to those who seek for it and while other people have helped you get through this far, the end of the battle is the test to your sole determination and preparedness to emerge victorious. This means you have to be so sure that you really have brought out the BEST in you. To do this, acknowledge that you have all the potentials to get to the peak of success. You have to unleash the power within and it has to come from you, believing that you can and you will do it!

Here are few simple instructions to get to the road of success:

- Place your hand over your chest, close to your heart
- Close your eyes and take some few deep breaths
- Say this slowly to yourself, “I will make it to this exam...I will bring out the BEST in me...The power to succeed in this exam is within me...the greatest power will help me through this.”

Ask yourself about the “BIG WHY?”!

Why should you pass this test? This is an important answer that will continue to guide you through the preparation process. It may be hard but there is a way to make everything easy, including this draining review process. You have to enjoy it!!! Think about what you are getting from the review process also offers the best opportunity for you to become the best TEACHER you could be. The “BIG WHY?” could also come as a source of inspiration, a continuous fuel that will keep the fire of desire to succeed in you burning.

Listen to your body and soul!

Your body has needs and is communicated to you in different ways. It needs your attention too. Assessing and evaluating how your body performs to reaching your goals is inevitable part of your success. Never force yourself too hard and too much more than what you actually need and what you can actually do. If you are sleepy, go and take a rest or a nap. If you're hungry, find something to eat. In other words, listen to what your body is asking you. After giving into what it wants, then it will be easier for it to give you what you want in return. This is not a “depersonalizing” experience, but rather a practical optimization of efforts and time. What's the use of pushing yourself to continue studying when all you want is to eat or sleep? Enjoy the review process! This is going to be a nagging reminder.

If your body enjoys what it is going through, the soul could be free finding its way to what it is envisioned to be. Don't punish yourself in the process of learning and growing!

Individualize your learning!

We are unique, in every way you can think of. This applies to learn. We do have different learning styles. Remember that you are already an **ADULT**. Find sense in what you are learning. Don't just memorize everything. Internalize every theory and concept. Find meanings and relationships. Many things slip our conscious mind because it is pushed to the unconscious trash bin that we cannot easily access. That is simply because our adult tendencies want the functional value of what we are learning after all. Find your best mood, place, time, space, company, accessory (like music and light), and environment. Don't ever forget **YOU** are the boss here!

Trust that you have what it takes to be successful!

Let us accept that no one is ever perfect, but we are complete enough to get through our tasks. Just like you, **YOU** have what it takes to be a successful examinee. You only have to compete with yourself and you have to make sure that you don't compete with your greatest asset (that may be your potentially greatest liability too). No one has to fail for you to pass. Never use others as your benchmark or success indicators. Do not compare yourself with others. Doing so sacrifices and aggrieves your confidence.

Act now!

The mind is a wonderful domain. It offers all the best in life and your imagination has to offer. But it should be complemented by a decisive action to translate dreams and mindsets into tangible and measureable indicators and results. The key here is **ACTION**! Options are a thousand, choices are a lot, but the action you take is the choice that you make. And the choice that you make defines what you will reap. It could either break you or make you. Just don't forget that **HE** has given us freewill and reason to choose well.

- Languages came from the Austronesian or Malayo-Polynesian language.
- *"I found in this language (Tagalog) four qualities of the four greatest languages of the world – Hebrew, Greek, Latin, and Spanish. It has the mysticism and difficulties of the Hebrew; the distinctive terms of the Greek...; the fullness and elegance of Latin; and the civility and courtesy of Spanish."*
(Chirino, P. Relacion de las Islas Filipinas, p.52)

II. SPANISH PERIOD

Europe's interest to 'new lands'

Marco Polo, a Venetian traveler, who reached China and even became a government official during Yuan dynasty. In his stay, he was able to write 'The Travels of Marco Polo', which sparked the European interest to see the wealth of Asia.	New technologies – Caravel (sailing vessel) • compass (used for directions) • astrolabe (used to determine distance from equator)
Fall of Constantinople – Asia Minor (Turkey) was an important route for trade between Europe and Asia. In 1453, Turkish Muslims conquered this area and imposed high taxes for anyone who wants to get to the other side.	<i>Portugal</i> – spearheaded maritime discovery of new lands <i>Treaty of Tordesillas</i> – authored by Pope Alexander VI to settle conflicts on new lands discovered by explorers. <i>Age of Discovery and Exploration</i> – Period of history wherein European countries secure colonies overseas for themselves

Ferdinand Magellan's Expedition

Quick Facts - has 250-270 men

- five ships: *Trinidad* (main ship), *San Antonio*, *Concepcion*, *Santiago* (smallest ship), *Victoria* (only one to return to Spain)
- Marianas Islands are called *Ladrones* or 'land of the thieves'.

- Homonhon – place where Magellan first landed
- Enrique – Malay slave who interpreted the languages for Magellan
- Limasawa – where the first mass was held
- Antonio Pigafetta – recorded the travels

Results

- proved that the world is round, or oblate spheroid
- surfaced a need to have an International Date Line
- first global circumnavigation
- proved existence of Pacific Ocean

Other Spanish expeditions

Loaisa (1525)

- Goal: Make Moluccas a colony of Spain.
- Results: Loaisa died in Pacific. Del Cano died later during voyage. Andres de Urdaneta returned with only a ship (*Santa Maria de la Victoria*) left, out of seven.

Cabot (1526)

- Goal: Establish trade between Spain and East.
- Results: Instead, he went to Rio de Plata, which is rumored to be a wealthier piece of land.

Saavedra (1527)

- Goals: Find survivors from Magellan's voyage; find out what happened to Loaisa's and Cabot's.
- Results: Was able to rescue survivors from Magellan's and Loaisa's expedition. Saavedra died during voyage. His crew was captured by Portugal.

Villalobos (1542)

- Goal: Establish a permanent Spanish port in the Philippines.
- Results: Villalobos gave the name Las Islas Filipinas to the Philippines. He and his crew were captured by Portugal. Villalobos died in prison because of fever.

Legazpi (1564)

- Goal: Still establish a permanent Spanish port in the Philippines.
- Results:
 1. Had blood compact with Sikatuna and Sigala (Bohol)
 2. Ciudad del Santisimo Nombre de Jesus – first Spanish town established in the country; now known as Cebu City.
 3. Urdaneta Passage – Urdaneta, Legazpi's chief pilot, discovered a route via the Pacific to Navidad, Mexico. This sea lane is later to be used in the Manila-Acapulco galleon trade.
 5. June 3, 1571 – Legazpi became first governor-general of the country.
 6. June 24, 1571 – Manila became the capital city of the Spanish East Indies, and the second city to be established by Spain.

 - a. Peninsulares – Spanish who was born in Spain and lived in the Philippines
 - b. Insulares – Spanish who was born and lived in the Philippines, called as the ‘original’ Filipinos
 - c. Mestizos – mix of both Spanish and indio; They were regarded inferior people by both Spanish and Filipinos.
 - d. Indio – native Filipinos
 - e. Chinese merchants

Reactions and uprisings of Filipinos to the Spaniards

First Filipinos to revolt were Lapu-Lapu of Mactan (1521), and Dagami of Cebu (1567).

Leader	Place	Reason
Lakan Dula	Manila	Resisted Spanish-imposed taxes
Magat Salamat	Manila	Tried to get rid of Spaniards
Magalat	Cagayan	Resisted Spanish-imposed taxes
Bankaw	Leyte	Wanted to revert back to former beliefs
Tamblot	Bohol	Wanted to revert back to former beliefs
Juan Ponce Sumuroy	Samar	Resisted order of Gov. Fajardo to send Samarnons to Cavite to construct ships
Francisco Maniago	Pampanga	Unjust and delayed compensation
Andres Malong	Pangasinan	Abuse of Spanish officials
Tapar	Panay	Wanted to revert back to former beliefs
Francisco Dagohoy	Bohol	Fr. Gaspar Morales refused to give his brother a Christian burial.
Diego and Gabriela Silang	Vigan, Ilocos Sur	Resisted Spanish-imposed taxes
Palaris	Pangasinan	Resisted Spanish-imposed taxes
Apolinario dela Cruz	Quezon	Spanish friars didn't recognize his Cofradia de San Jose.

Reasons for the failure of revolts:

1. Lack of and weak weaponry – Their captors have guns and cannon while our ancestors only have spears and bolos.
2. Lack of strategy and some Filipinos worked for and with the Spanish for benefits.
3. Lack of an excellent leader
4. Geographical setting – Early Filipinos were conditioned to live separately from each other, making uprisings small-scale and easy to repress. This caused a communication gap.
5. No lingua franca – There was not even a national language for the early Filipinos to unite and to have a discourse to each other smoothly.

Rise of nationalism

1. Philippines opened to world commerce – Mail services, banking facilities, and newspapers begin to surface and to spread. The Suez Canal was opened, making the time traveled from Europe to Asia much shorter.
2. The rise of a middle class or ilustrado preceded a development in agriculture and in entrepreneurship.
3. European liberalism came to the Philippines:
 - a. John Locke – In his *Two Treatises on Government* (1689), if a king did not exercise justly his powers and powers, his subjects had the right to throw him out of position.
 - b. Jean Jacques Rosseau – In his *The Social Contract* (1762), if a government doesn't satisfy the needs of its people, then the people can alter the government to the type of government they deemed to be rightly established.
 - This was when the Age of Enlightenment and French Revolution happened in Europe.
4. Racial discrimination – “The Spaniards will always be a Spaniard, and the indio will always be an indio... The monkey will always be a monkey, however you dress him with shirt and trousers, and will always be a monkey and not human.” – Fr. Miguel Lucio y Bustamante, *Si Tandang Basio Macunat* (Manila, 1885).
5. Secularization Movement – Secularization, a transfer of ministries established by the regular clergy to the seculars, became a political and separatist movement; this paved the way for the Filipinization of the church. The Spanish never trusted the Filipino friars to head their own ministries.
6. Carlos Maria dela Torre's administration – He worked for changing the punishment of flogging Filipino prisoners to a month in jail, proclaimed freedom of speech, and even attending a meeting of a rebel leader, Casimiro Camerino.
7. Cavite Mutiny – Gov-Gen. Rafael de Izquierdo, who followed after dela Torre, abolished his predecessor's changes. Sgt. Lamadrid led this conquest and eventually killed the governor-general. The uprising was blamed to three priests.

8. Execution of GomBurZa – Francisco Zaldúa witnessed against the three martyrs - Jose Burgos, Mariano Gomez, Jacinto Zamora. Their execution was the Spaniard's answer to the secularization protest. Filipinos did not receive this very well.

Propaganda Movement

Objectives of the propagandists:

1. Exercise equality for both Spanish and Filipinos.
2. Recognize freedom of speech, press, and association
3. Annex Philippines as a province of Spain.
4. Provide representation of the Philippines to the Spanish Court.
5. Allow secularization.

He became the second editor of La Solidaridad.

Died: July 4, 1896; Barcelona, Spain; died of tuberculosis; only 45 y/o

Failure of Reform Movement

1. Philippines is preoccupied in dealing with its own internal problems.
2. There was a lack of and difficulty in collecting monetary contributions.
3. Propagandists were having issues with other propagandists.

La Liga Filipina

- Civic organization created by Rizal in Tondo, Manila

Objectives:

1. To uphold unity and cooperation amongst its members
 2. To develop the agriculture, commerce, and education sectors
 3. To administer reforms within the government and the society
- La Liga didn't last long as the organization was perceived as a threat by the Spaniards; Rizal was captured and exiled to Dapitan, Zamboanga. This marked the end of the propaganda movement.

- Czar Nicholas II

First World War

- Balkan Peninsula is also known as the powder keg (can cause continuous conflicts) of Europe
- Triple Alliance – a secret agreement between Germany, Austria-Hungary, and Italy
- Triple Entente – the understanding linking the Russian Empire, France, and the United Kingdom
- Franz Ferdinand was shot by Gavrilo Princip, a Serb
- Bolsheviks – founded by Vladimir Lenin, the minority group of the Russian Social Democratic Labour Party
- Mensheviks – the minority group of the Russian Social Democratic Labour Party
- Big Three – the Soviet Union, the United States, and the United Kingdom, or their leaders Joseph Stalin, Franklin Roosevelt and Winston Churchill
- League of Nations – an intergovernmental organization founded on 10 January 1920 as a result of the Paris Peace Conference that ended the First World War

Second World War

- Kellogg-Briand Pact – a 1928 international agreement in which signatory states promised not to use war to resolve disputes
- Axis Powers – Adolf Hitler (Germany), Benito Mussolini (Italy), and Emperor Hirohito (Japan)
- Allied Powers – Franklin Roosevelt (the United States), Winston Churchill (Great Britain), and Joseph Stalin (the Soviet Union)
- appeasement – a diplomatic policy of making concessions to an aggressive power in order to avoid conflict
- Holocaust – murder of six million Jews by the Nazi regime
 - Nuremberg Trials – a series of military tribunals held by the Allied forces under international law and the laws of war after World War II
- United Nations – a replacement for the ineffective League of Nations

Cold War

- Iron Curtain - symbolizes the efforts by the Soviet Union to block itself and its satellite states from open contact with the West and non-Soviet-controlled areas; Bamboo Curtain - the People's Republic of China, and the capitalist and non-Communist states of the region
- Truman Doctrine – an American foreign policy created to counter Soviet geopolitical expansion during the Cold War
- Berlin Wall – a guarded concrete barrier that physically and ideologically divided Berlin
- Mikhail Gorbachev - the last leader of the Soviet Union; made efforts to democratize his country's political system and decentralize its economy
 - glasnost – used by Mikhail Gorbachev as a political slogan for increased openness and transparency in government institutions and activities in the Soviet Union
 - perestroika – a political movement for reformation within the Communist Party of the Soviet Union
- Strategic Arms Limitation Treaty Agreement – were two rounds of bilateral conferences and corresponding international treaties involving the United States and the Soviet Union — the Cold War superpowers — on the issue of arms control

ECONOMICS

Foundation of Economics

Economics came from the Greek word *oekonomia* – “management of the household”

Classical Economists:

John Stuart Mill – stated supply and demand as a relationship rather than just two quantities

Jeremy Bentham – developed the concept of utilitarianism, which is the greatest good for the greatest number

Jean-Baptiste Say – wrote *A Treatise on Political Economy*

David Ricardo – known for his law of comparative advantage

Adam Smith – wrote the book, *An Inquiry into the Nature and Causes of the Wealth of Nations*, (considered to be the first modern work of economics)

Thomas Malthus – wrote the *Theory on Population* which states that the human population will surpass the limit where the world’s resources can sustain human life.

Neoclassical Economists:

Alfred Marshall – wrote *Principles of Economics* (1890) and compiled the concepts of supply and demand, marginal utility, and costs of production

John Maynard Keynes – wrote the book *The General Theory of Employment, Interest, and Money* and this became the basis of the field of macroeconomics

Divisions of economics

Microeconomics – studies the behavior of single entities, such as the household, the business form, and the resource owner

Macroeconomics – studies the overall performance of the economy

- focuses on the flow of goods and services (and its allocation) from the producers to the consumers

- focuses on the nature of economic growth and its indicators, such as the overall flow of goods and services, and national income

Fundamental Concepts in Economics			
Production – the use of economic resources to create goods and services	Distribution – the manner of distribution of total output and income among individuals	Consumption – the spending by individuals on goods and services	Scarcity – the economic problem between having unlimited human wants and needs, but only having limited resources

Philippine Economy from past to contemporary periods	
Pre-Spanish	Spanish
> subsistence economy - non-monetary economy which relies on natural resources to provide for basic needs	> encomienda – lands are given to those who are proven to be loyal to the Spanish crown
American	Japanese
> Philippines constantly supply USA with agricultural and forest products but was forced to import a great number of manufactured items from the USA.	> Greater East Asia Co-Prosperity Sphere – economic and political banner which gained little support from the Filipinos
Manuel Roxas – rehabilitation of Philippines; continuation of free trade with America	Elpidio Quirino – postwar reconstruction; increase in economic aid
Ramon Magsaysay – Agricultural Tenancy Act – breaking down of large estates, provision of greater protection of tenants	Carlos Garcia – Filipino First Policy – heavily favors Filipino businessmen over foreign investors

Diosdado Macapagal – Five-Year Socio-Economic Integrated Development Program – talks of free and private enterprise; objectives: restoration of economic stability, reduction in number of poor Filipinos, establishment of a dynamic basis of future growth	Ferdinand Marcos – one of the founding fathers of the Association of Southeast Asian Nations in 1967; created spending program on public works and infrastructure, and for self-sufficiency in rice - in his second term, the country was in a pool of huge debt
Corazon Aquino – faced a severe economic depression in 1984 to 1985; pursued the policy of privatization	Fidel V. Ramos – economic revitalization plan: government deregulation, increase in private investment, and maintenance of peace talks with guerillas
Joseph Estrada – proposal of amendments to the constitution concerning protectionist provisions to attract foreign investments	Gloria Macapagal Arroyo – boasts of impressive growth rate, especially that of 2004 where it grew by 6.1%; credited for a light blow in the country after the global recession in 2009

Employment – the persons in the labor force who are at work or with a job

Unemployment – persons in the labor force who are: without work, currently available for work, or seeking or not seeking work

Capital goods – or physical resources; the man-made resources used as productive inputs for production of goods/services

Scarcity and Shortage	
Shortage – results from a high demand and less supply of a certain commodity	Three fundamental and interdependent economic problems: 1. What to produce (and how much)? 2. How shall the goods be produced? 3. For whom shall the goods be produced? 61
Opportunity cost – a benefit that a person could have received, but decided to give it up, to take another benefit	

Economic system - system of production, resource allocation, and distribution of goods and services within a society or a given geographic area	
Types: traditional, command, market, mixed	Alternative types: capitalism, socialism, welfare states
1. Traditional – current practices were passed down from generation to generation; doesn't allow change; basically a subsistence economy	1. Capitalism – characterized by private ownership of capital goods; there exists competition in a free market
2. Command – a highly dictatorial system; doesn't give the consumers a freedom of choice; means of production are owned by the government	2. Socialism – characterized by collective or government ownership and administration of the means of production and distribution of goods
3. Market – system is coordinated through a connection of market and prices; depends on the prices which are dictated by demand and supply	3. Welfare States – The government overrules market forces to protect its people, and to provide for them means to have at least a minimum standard of living
4. Mixed – results from the reality that a market exists in a pure, single form; there is a little bit of this and that	

Needs – a requisite that must be met for one's survival	Want – a desire for something that one can live without
Maslow's Hierarchy of Needs – human needs are depicted as hierarchical levels such that needs at the bottom should be satisfied first before s/he can go to achieve a higher level of need	Alderfer's ERG Theory – groups the five needs from Maslow's into three; a flexible theory such that it allows different needs can be pursued simultaneously

1. Physiological needs	1. Existence needs – composed of Maslow’s first two levels
2. Safety and security needs	2. Relatedness needs – composed of the third and fourth levels
3. Love and belongingness needs	3. Growth needs – composed of the fourth and fifth levels
4. Esteem needs	
5. Self-actualization	

Consumption – the use of goods and/or services for a consumer to be directly satisfied

Utility – term used for satisfaction

Total utility – the overall utility derived from consuming certain units of a good

Marginal utility – the additional utility derived from consuming an additional unit of the good

Law of Diminishing Marginal Utility – states that as additional units of a good are consumed, the additional utility derived from each additional unit tends to diminish

Production – the use of economic resources to create goods and services that is to be used to satisfy man’s wants

Input – the resources used to produce goods and services

Output – the product created as a result of the combination of inputs in the production process

Four factors of production – also known as economic resources

1. Land – all natural resources; payment for the use of land is called rent
2. Labor – the human effort used in production; payment for the use of labor is called wage
3. Capital – the man-made factors used in a production; payment for the use of capital is called interest
4. Entrepreneurship – the skill in-charge of combining and handling all other economic resources to be of best use; payment for the use of entrepreneurship is called profit

Production function – the functional relationship between output and the factors of land, labor, and capital

Production capacity – the given amount of land, labor, and capital resources that a company can use at a given time

Total Product – the overall production of several units of a given input

Marginal Product – the additional output produced by an additional unit of the input

Average Product – the average contribution per unit of input

Law of Diminishing Returns – is in reference to the diminishing values of the Marginal Product

Productivity – the ratio of output to input; measures how much each unit of input can produce and how well it is utilized

Returns to Scale – the comparison between the increase in the units of output with the increase in the units of the input

Foundation of Economics

Demand – the willingness of the consumer to buy a commodity at a given price

Law of Demand – there is an inverse relationship between the price of a good and the demand for that good

Ceteris paribus – “all other things remaining constant”

Non-price determinants of demand:

- | | |
|---|----------------------------|
| 1. Income | 4. Price of a related good |
| 2. Taste | 5. Population |
| 3. Expectations on future prices and income | |

Supply – the amount of a commodity available for sale

Law of Supply – there is a direct relationship between the price of a good and the supply for that good

Non price determinants of supply:

1. Number of sellers
2. Improved technology
3. Cost of production

Equilibrium – the state of balance; attained when there is a point where demand is equal to the supply

Shortage – when the demand exceeds supply

Surplus – when the supply exceeds demand

Floor price – the minimum price at which sellers can offer their goods for sale
 – the seller cannot sell output at a price that is lower than the floor price
 – for the benefit of the seller/producer

Ceiling price – the maximum price at which sellers can offer their goods for sale
 – the seller cannot sell output at a price that is higher than the ceiling price
 – for the benefit of the buyer/consumer

Elasticity of demand

1. Price elasticity of demand – the degree of responsiveness of quantity demanded for a good to a change in the price of the good itself

Two measures of price elasticity o.d.:

- a. Point elasticity – the degree of elasticity on a single point on the demand curve
- b. Arc elasticity – the elasticity from one point to another point on the demand curve

% change (Ä) in demand > % Ä in price = coefficient of price elasticity is greater than 1; demand is elastic (or responsive to price changes)

% Ä in demand < % Ä in price = coefficient of p.e. is lesser than 1; demand is inelastic

% Ä in demand = % Ä in price = coefficient of p.e. is equal to 1; demand is unitary elastic

An elastic demand means that the goods are non-essential, for example, chocolates.

An inelastic demand means that the goods are essential, for example, rice.

2. Income elasticity of demand - the degree of responsiveness of quantity demanded for a good to a change in the income of the people demanding the good

Normal goods – As income increases, the demand for the normal good increases. Examples: clothes, fastfood meals

- has a positive sign to indicate the positive relationship between income and demand for the normal good

Inferior goods – As income increases, the demand for the inferior good decreases. Examples: ukay-ukay clothes, dried fish

- has a negative sign to indicate the negative relationship between income and demand for the inferior good

3. Cross Elasticity of demand - the degree of responsiveness of quantity demanded of a good when a change in price takes place in another good

Market structures – the interconnected attributes of a market

Perfect competition – the ideal form but difficult to attain

Characteristics:

- | | |
|-------------------------------------|---|
| 1. Plurality of buyers and sellers; | 3. Perfect mobility of resources; |
| 2. Homogeneity of goods; | 4. Perfect knowledge of market conditions |

Demand curve: straight horizontal line; demand is perfectly elastic; seller can sell any number of output at that given price

Imperfect competition

1. Monopoly – where a single firm is the only supplier of a good/service and there are no close substitutes
 - has complete control of the market and of the price of his / her good or service
 - most extreme case of imperfect competition
2. Monopolistic competition – where a relatively large number of sellers offer relatively close substitutes of each other
 - works under the concept of product differentiation – the creation of variations of a product
 - Competition does not focus only on price but also on quality, advertising, and sales promotion.

Advantage: Consumers have a wide range of products to choose from.

3. Monopsony – where the good/service is sought only by one buyer, where he/she dictates his/her terms to its sellers.
4. Oligopoly – where a small number of firms sell either homogenous or differentiated products
 - Firms, of about two to 15, tend to have an interdependence among themselves.
 - can be exposed to having output restriction and internal inefficiency

Macroeconomics

Employment	–	the use of economics in the production of goods and services
Flow	–	the income earned over a particular period
Stock	–	the income earned at a given point in time
Raw materials	–	the unprocessed goods
Intermediate goods	–	the semi-processed goods, which are not ready yet to be consumed
Final goods	–	the goods ready for direct consumption

Inflow – can raise the level of economic activity within the flow

Outflow – can lower the level of economic activity within the flow

Examples of outflows:

1. Savings – the portion of income that is set aside, not for consumption yet
2. Taxes – the portion of income that is given to the government; cannot be used until the latter makes something out of it
3. Imports – the purchases made from foreign production; the portion of income goes to another country

Gross Domestic Product – the measurement for the productive activities in the economy within the country.

GDP = Gawa Dito sa Pilipinas

Gross National Product – the measurement for all final products produced by the resources of the economy

GNP = Gawa Ng Pilipino

1. Expenditure Approach – computing the GNP by classifying the final goods according to their end use

Components:

- a. Consumption (C) – the spending of households
 - b. Government spending (G) – spending for the non-capital goods to maintain the operations of the national and local government units
 - c. Investment (I) – spending for the capital goods for use in consumption
 - d. Net Exports – Exports minus Imports
2. Income Approach – computing the GNP by the total incomes earned by households in a nation in a year

Current GNP – GNP expressed in current market prices

Real GNP – GNP expressed in a year in the past for comparison of GNP values between the year of reference and current year

Per Capita GNP – GNP per member of the total population

Inflation

the phenomenon where there is a continuing increase in prices

Who gains in inflation?

1. Flexible income earners,
2. Speculators (or hoarders),
3. Debtors

Who loses in inflation?

1. Fixed income earners,
2. Pensioners,
3. Creditors

Types of inflation

1. Demand Pull Inflation – This is when excessive demand pushes the prices of goods/services upward.
2. Cost Push Inflation – This is when increasing costs in producing goods are carried onto the prices of those goods themselves.
3. Structural Inflation – This is when the changes in the structure of the economy affects the prices of goods.

Other concepts

1. Deflation – the general decline in prices; caused by a reduction in the supply of money or in spending

No member of the House of Representatives shall serve for more than three consecutive terms.

Regular election of the Senators and the Members of the House of Representatives shall be held on the second Monday of May.

The Congress, by a vote of two-thirds of both Houses in joint session assembled, voting separately, shall have the sole power to declare the existence of a state of war.

In times of war or other national emergency, the Congress may, by law, authorize the President, for a limited period and subject to such restrictions as it may prescribe, to exercise powers necessary and proper to carry out a declared national policy.

Every bill passed by the Congress shall embrace only one subject which shall be expressed in the title thereof.

No bill passed by either House shall become a law unless it has passed three readings on separate days, and printed copies thereof in its final form have been distributed to its Members three days before its passage, except when the President certifies to the necessity of its immediate enactment to meet a public calamity or emergency

Every bill passed by the Congress shall, before it becomes a law, be presented to the President.

- If he approves the same, he shall sign it.
- Otherwise, he shall veto it and return the same with his objections to the House where it originated, which shall enter the objections at large in its Journal and proceed to reconsider it.
- If, after such reconsideration, two-thirds of all the Members of such House shall agree to pass the bill, it shall be sent, together with the objections, to the other House by which it shall likewise be reconsidered, and if approved by two-thirds of all the Members of that House, it shall become a law. In all such cases, the votes of each House shall be determined by yeas or nays, and the names of the Members voting for or against shall be entered in its Journal. The President shall communicate his veto of any bill to the House where it originated within thirty days after the date of receipt thereof; otherwise, it shall become a law as if he had signed it.

ARTICLE VII: Executive Department

The executive power shall be vested in the President of the Philippines.

The President shall be the Commander-in-Chief of all armed forces of the Philippines... In case of invasion or rebellion, when the public safety requires it, he may, for a period not exceeding sixty days, suspend the privilege of the writ of habeas corpus or place the Philippines or any part thereof under martial law. Within forty-eight hours from the proclamation of martial law or the suspension of the privilege of the writ of habeas corpus, the President shall submit a report in person or in writing to the Congress. The Congress, voting jointly, by a vote of at least a majority of all its Members in regular or special session, may revoke such proclamation or suspension, which revocation shall not be set aside by the President. Upon the initiative of the President, the Congress may, in the same manner, extend such proclamation or suspension for a period to be determined by the Congress, if the invasion or rebellion shall persist and public safety requires it.

The Supreme Court may review, in an appropriate proceeding filed by any citizen, the sufficiency of the factual basis of the proclamation of martial law or the suspension of the privilege of the writ or the extension thereof, and must promulgate its decision thereon within thirty days from its filing.

A state of martial law does not suspend the operation of the Constitution, nor supplant the functioning of the civil courts or legislative assemblies, nor authorize the conferment of jurisdiction on military courts and agencies over civilians where civil courts are able to function, nor automatically suspend the privilege of the writ.

The suspension of the privilege of the writ shall apply only to persons judicially charged for rebellion or offenses inherent in or directly connected with the invasion.

Except in cases of impeachment, or as otherwise provided in this Constitution, the President may grant reprieves, commutations and pardons, and remit fines and forfeitures, after conviction by final judgment. He shall also have the power to grant amnesty with the concurrence of a majority of all the Members of the Congress.

No treaty or international agreement shall be valid and effective unless concurred in by at least two-thirds of all the Members of the Senate.

ARTICLE VIII: Judicial Department

The judicial power shall be vested in one Supreme Court and in such lower courts...

Judicial power includes the duty of the courts of justice to settle actual controversies involving rights which are legally demandable and enforceable, and to determine whether or not there has been a grave abuse of discretion amounting to lack or excess of jurisdiction on the part of any branch or instrumentality of the Government.

The Supreme Court shall be composed of a Chief Justice and fourteen Associate Justices.

All cases involving the constitutionality of a treaty, international or executive agreement, or law, which shall be heard by the Supreme Court en banc, and all other cases which under the Rules of Court are required to be heard en banc, including those involving the constitutionality, application, or operation of presidential decrees, proclamations, orders, instructions, ordinances, and other regulations, shall be decided with the concurrence of a majority of the Members who actually took part in the deliberations on the issues in the case and voted thereon.

No person shall be appointed Member of the Supreme Court or any lower collegiate court unless he is a natural-born citizen of the Philippines. A Member of the Supreme Court must be at least forty years of age, and must have been for fifteen years or more a judge of a lower court or engaged in the practice of law in the Philippines.

SOCIOLOGY & ANTHROPOLOGY

Sociology – is the study of association, group, society, and social interaction, and focuses on social organization, social institutions, and social problems.

Pioneers of sociology	Herbert Spencer	August Comte	Karl Marx
	coined the concept 'survival of the fittest'	coined the word 'sociology'	believes that capitalism is favored by the upper class (bourgeoisie), and is the root of misery of the lower class (proletariats)
	believes that societies undergo	Father of sociology	
	advocated Social Darwinism	advocated 'positivism', the use of empirical investigation to understand society and its patterns	believes that history is dictated by economic determination
	Max Weber	George Hegel	Emile Durkheim
	advocated 'verstehen', which is the emphatic understanding of people's thoughts	For societies to have stability, there should be a balance of social regulation and personal freedom.	History is a formula of thesis (an idea) + antithesis (a challenge to the idea) = synthesis (a new idea that later will be a thesis).
	Charles Cooley	Erving Goffman	Robert Merton
	advocated "lookingglass self", the ability to visualize oneself through the eyes of other people	advocated dramaturgy, which means social interactions are to be taken in the perspective of a theatrical performance	believes that social patterns yield to social functions: a. Manifest function the seen and b. Latent function the unseen and unexpected functions-

General theoretical paradigms	Evolutionary Theory	Structural Functionalism	Social Conflict Theory	Symbolic Interactionism
	explains how human societies come to exist, grow, and develop	views a society as a complex system which achieves solidarity and stability when its parts work together	views a society as a platform of inequality that, in turn, creates conflict and change	states that a society is a shared reality, that resulted from the daily interactions of individuals; these interactions make people find meaning in symbols
	Simple primitive societies eventually evolve into complex modern ones.	states that every individual is guided by social structures, and his/her social functions are for the normal operations of the society	In this theory, some people are benefitted; some are deprived.	supported by Goffman, Cooley
	looks for patterns of change	supported by Comte, Durkheim, Merton	supported by Marx	
	supported by Spencer			

Sociological imagination – a quality of mind to look at our own experiences in terms of what is going on in the world	Sociological perspective – a distinctive point of view making use the social world to guide our thinking and actions	Sociological inquiry – the scientific investigation of the repetitive patterns in human behavior
---	--	--

Methods, techniques, and tools in sociological inquiry

1. Experiment
Exposes subjects to a specially designed situation for the sociologist to record their reactions
Most effective tool for a cause and effect relationship
2. Survey
Best tool for gathering information from a large number of people
Usage of random samples and pre-tested questions ensures high reliability and validity.
3. Case Study
Examines a particular subject in depth over a long period of time
Also known as scientific biography, case history or diary of development
4. Field observation
Researchers have firsthand experiences as they immerse in the community.
In non-participant observation, researcher comes as a third party.
5. Structured/directive interview
Questions are asked in a planned, phased manner to provide systematic and comparable data.
6. Unstructured/nondirective interview

Culture – refers to the customary ways in which social groups organize their ways of thinking, feeling, and behaving and these are passed on from one generation to another

Components of Culture

1. Norms – the guidelines which serve as the expectations for people to do in relation with one another; the shared, standard rules to specify what is right and wrong; there are three kinds of norms: folkways, mores, and laws
 - I. Folkways – the habitual ways of doing something without giving much thought; do not have particular moral and ethical significance
 - II. Mores – the vital norms to a society; the society’s code of ethics and moral standards; there are two kinds: duty and taboo
 - A. Positive mores/duty
the behavior that must be done because it is good
“thou shall behavior”
 - B. Negative mores/taboo
the behavior that must not be done because it is bad
“thou shall not behavior”
 - C. Laws – the formalized norms enacted by people with legitimate authority; have formal sanctions
2. Non-material culture (ideas, beliefs, values)

Ideas – man’s conception of his physical, social, and cultural world

Beliefs – man’s conviction about a certain idea; man’s perception of reality

Values – abstract concepts of what’s important; what guides a person’s way of life
3. Material culture – the concrete and tangible objects created and used by man to satisfy his varied needs and wants

4. Symbols – an object, gesture, sound, color, or design that represents something other than itself; an arrival of mutually shared meaning

Theories on population growth and decline

1. Malthusian theory
Thomas Malthus, in his *An Essay on the Principle of Population* theorized that the increase in population is uncontrollable and that it would reach, then exceed the level at which the planet could sustain each individual's needs
Population increases geometrically (2, 4, 8, 16...) while food supply increases arithmetically (2, 3, 4, 5...).

2. Demographic transition theory

Societies go through five stages of population dynamics:

- a. Stage 1 – birth and death rates are high and stable
- b. Stage 2 – birth rate remains high; death rate declines due to improvement of medicine and health services; infant mortality rate declines
- c. Stage 3 – death rate is low; birth rate diminishes due to expansion of women's education and access to contraception
- d. Stage 4 – birth and death rates are low
- e. Stage 5 – only recently added; predicted both more- and less- fertile societies

Marriage – the systematized and institutionalized purpose of continuing a family, and of begetting and rearing children

Patterns of family organization

a. Based on internal organization

1. Nuclear family – composed of a husband and a wife and their children in a union recognized by other members of the society
