5 PILLAR'S OF EDUCATION

UNESCO'S Education for Sustainable Development Initiative (2012) presented a conceptual framework for ongoing, lifelong learning . This model organizes learning into the following **five pillars**:

1. Learning to Know – the development of skills and knowledge needed to function in this world e.g. formal acquisition of literacy, numeracy, critical thinking and general knowledge.
2. Learning to DO – the acquisition of applied skills linked to professional success.
3. Learning to Live Together – the development of social skills and values such as respect and concern for others, and the appreciation of cultural diversity.
4. Learning to BE – the learning that contributes to a person's mind, body, and spirit. Skills include creativity and personal discovery, acquired through reading, the Internet, and activities such as sports and arts.
5. Learning to Transform Oneself and Society – when individuals and groups gain knowledge, develop skills, and acquire new values as a result of learning, they are equipped with tools and mindsets for creating lasting change in organizations, communities, and societies.

THE CHANGING GLOBAL LANDSCAPE FOR 21ST CENTURY LEARNERS

"If we are to select and prepare the new generation of teachers equipped with the knowledge, skills and values to help their culturally different and socially advantaged students to learn, and to become socially responsible citizens, significant changes are needed."

- Delor's Report

The New Learning Environment

- Learner-centered
- New spaces and borderless
- Enhanced opportunity for creativity and innovations, and
- Use of ICT

The New Learning Contents

With the new learning environment and the explosion of knowledge, content or subject matter of learning has been modified. From a specific discipline or subject area, subject matter of learning has the following characteristics:

- Integrated/interdisciplinary;
- Demand-driven
- Emphasis on learning tools on how to retrieve knowledge; and
- Balance of scientific, technological, cultural, global, local concepts

The New Processes of Learning

With the advancement in the study of the mind and cognition, various processes of learning evolved with human intervention of teachers and peers as well as non-human intervention of artificial intelligence (AI) of robots. With these advancements, different processes of learning and the methods to facilitate these have evolved. These include the idea of multiple ways of learning which can be mediated by the following:

- Face-to-face when learners and teachers are confined in the same learning space at the same time with the teacher facilitating learning.
- Distance learning-when teaching learning is mediated by traditional(modules in print) or modern technology (on-line or off-line) without the physical presence of the teacher in a virtual class. It can be synchronous or asynchronous.
- Blended modalities. When teaching and learning is facilitated through face-to face or distance learning which enable to the teachers and learners to have both physical presence and physical absence in the teaching-learning process
- Experiential and lifelong-when learners are immersed into the real-life situation, such that learning becomes more authentic and meaningful.

The New Types of Learners

- The new breed of learners does not have age boundaries. Learners maybe are in an informal, formal or informal setting.
- a confident person who thinks independently and critically and who communicates effectively;
- self-directed and who questions, reflects and takes responsibility for his/her own learning;
- a concerned citizen, informed about the world and local affairs, has a strong sense of civic responsibilities and participates actively in improving the lives of others;
- a member of the new generation: pop-culture, different ways of thinking, responding.

GLOBAL EDUCATION AND GLOCAL TEACHER

Global education has been best described by two definitions:

Global Education

UNESCO defines global education as a goal to develop countries worldwide and is aimed at educating all people in accordance with world standards.

Another definition is that global education is a curriculum that is international in scope which prepares today's youth around the world to function in one world environment under teachers who are intellectually, professionally and humanistically prepared.

Glocal Education

is about the diversity understanding the difference and teaching the different cultural groups in their own context to achieve the goals of global education as presented by the United Nations.

Glocal Teachers

is a global teacher who is competent and armed with enough skills, appropriate attitude and universal values to teach learners at home or abroad but is equipped with both time tested as well as modern technologies in education in any time and any place in the world.

Is someone who thinks and acts both locally and globally with worldwide perspectives, but is teaching in the communities, localities, towns, provinces and regions where he or she is situated.
