Prayer Before Class Starts

*We thank you for this new day, Lord.
Help us to embrace all that it may hold for us.
To hear the birdsong, and have new melodies in our hearts.
To see the sunrise and create beauty with our hands.
To touch the leaves that grow afresh,
And allow your love to touch our hearts.
To smell the fragrance of the flowers
And breathe in the wonder of your creation.
To dwell on the beauty of our world,
And study and fathom your miracles.
To enjoy the conversations we have and the lessons we go to,
May we drink in all the goodness you have for us.*

Q. What is the least common multiple of 12 and 60?

answer choices

☐ a. 140

☐ c. 360

☐ b. 340

☒ d. 120

Q. The vermiform appendix is part of the large intestine but has no digestive function, thus, it is _____.

answer choices

- ☐ a. Embryonic structure
- ☒ b. Analogous organ
- ☐ c. Heterogeneous organ
- ☐ d. Vestigial structure

Vestigial organs are the organs that have no apparent function and are the residual parts from the past ancestors.

Embryonic structures are the anatomical parts that make up an organism in the early stages of development.

Analogous structures are similar structures that evolved independently in two living organisms to serve the same purpose.

Homologous structures are organs or skeletal elements of animals and organisms that, by virtue of their similarity, suggest their connection to a common ancestor. These structures do not have to look exactly the same or have the same function.
