The chalkboard shows the following derivations:

Top left: A graph of a function $y = g(x)$ with a secant line drawn through two points on the curve. The text "Secant Lines" is written next to the line.

Top right: The definition of the derivative using the limit of the difference quotient:

$$f'(x) = \lim_{h \rightarrow 0} \frac{f(x+h) - f(x)}{h}$$

Middle right: The derivative of $f(x) = x^2 + 2x$ calculated using the limit definition:

$$\begin{aligned} f(x) &= \lim_{h \rightarrow 0} \frac{(x+h)^2 + 2(x+h) - (x^2 + 2x)}{h} \\ &= \lim_{h \rightarrow 0} \frac{x^2 + 2xh + h^2 + 2x + 2h - x^2 - 2x}{h} \\ &= \lim_{h \rightarrow 0} \frac{2xh + h^2 + 2h}{h} \\ &= \lim_{h \rightarrow 0} (2x + h + 2) \end{aligned}$$

Bottom left: The expression for the difference quotient $g(x+h) - g(x)$ is written, with a horizontal line underneath it.

Bottom right: The final step of the derivation, showing the limit of the simplified difference quotient:

$$= \lim_{h \rightarrow 0} h(2x + h)$$

Prayer Before Class Starts

*We thank you for this new day, Lord.
Help us to embrace all that it may hold for us.
To hear the birdsong, and have new melodies in our hearts.
To see the sunrise and create beauty with our hands.
To touch the leaves that grow afresh,
And allow your love to touch our hearts.
To smell the fragrance of the flowers
And breathe in the wonder of your creation.
To dwell on the beauty of our world,
And study and fathom your miracles.
To enjoy the conversations we have and the lessons we go to,
May we drink in all the goodness you have for us.*
