

GURONG
PINOY

The logo features the word "GURONG" in a large, bold, blue font with a white outline and a slight 3D effect. Below it, the word "PINOY" is written in a similar bold font, but in white with a blue outline. Three yellow stars are integrated into the design: one is positioned above the "R" in "GURONG", and two are placed between the "G" and "U", and between the "O" and "N" of "GURONG". A yellow sunburst graphic is located at the top center, behind the star above the "R".

Professional Education

Final Coaching 1

1. Which theory places the most emphasis on social interaction in the development of language?

☐ a. Cognitivist

☒ b. Interactionist

☐ c. Constructivist

☐ d. Behaviorist

Vygotsky's Social Interactionist Theory

Social interaction plays a fundamental role in the development of cognition.

"Every function in the child's cultural development appears twice: first, on the social level, and later, on the individual level; first, between people (*interpsychological*) and then inside the child (*intrapsychological*).

2. The component of language that involves the rules of structure and speech sounds is called ____.

☒ a. phonology

☐ b. syntax

☐ c. semantics

☐ d. morphology

3. Who proposed that children are born with a language acquisition device?

☐ a. Bandura

☐ b. Vygotsky

☐ c. Piaget

☒ d. Chomsky

The Theory

- ▶ Chomsky's theory is based on the idea that all children are born with the innate ability to learn any human language.
- ▶ Based on Chomsky's theory all children have a LAD, otherwise known as a 'language acquisition device'. The LAD's job is to encode into a child's brain the major principles of language and grammatical structure of the language.

4. Adolescents gain ____ skills as the prefrontal cortex of their brain develops.

☐ a. motor and problem-solving

☒ b. reasoning and problem-solving

☐ c. exploratory and problem-solving

☐ d. motor and exploratory

FUNCTIONS

- The prefrontal cortex is used in abstract thinking, thought analysis, problem solving, emotion and complex thought.**
 - The prefrontal cortex's functions are often referred to as executive function. The executive function refers to the abilities to differentiate among conflicting thoughts, determine good and bad, future consequences of current activities, working toward a specific aim, predicted expectation based on actions, and social behavior.**
-

5. Why is physical development important for babies and toddlers?

☐ a. It is necessary for muscular growth and development

☒ b. It leads to improved motor skills, which allows them to explore the environment

☐ c. It is essential for their emotional development

☐ d. It includes visual development, which allows them to learn to read

6. Development is the process of ____ and ____ that humans go through over their lifetime.

☐ a. reasoning; growth

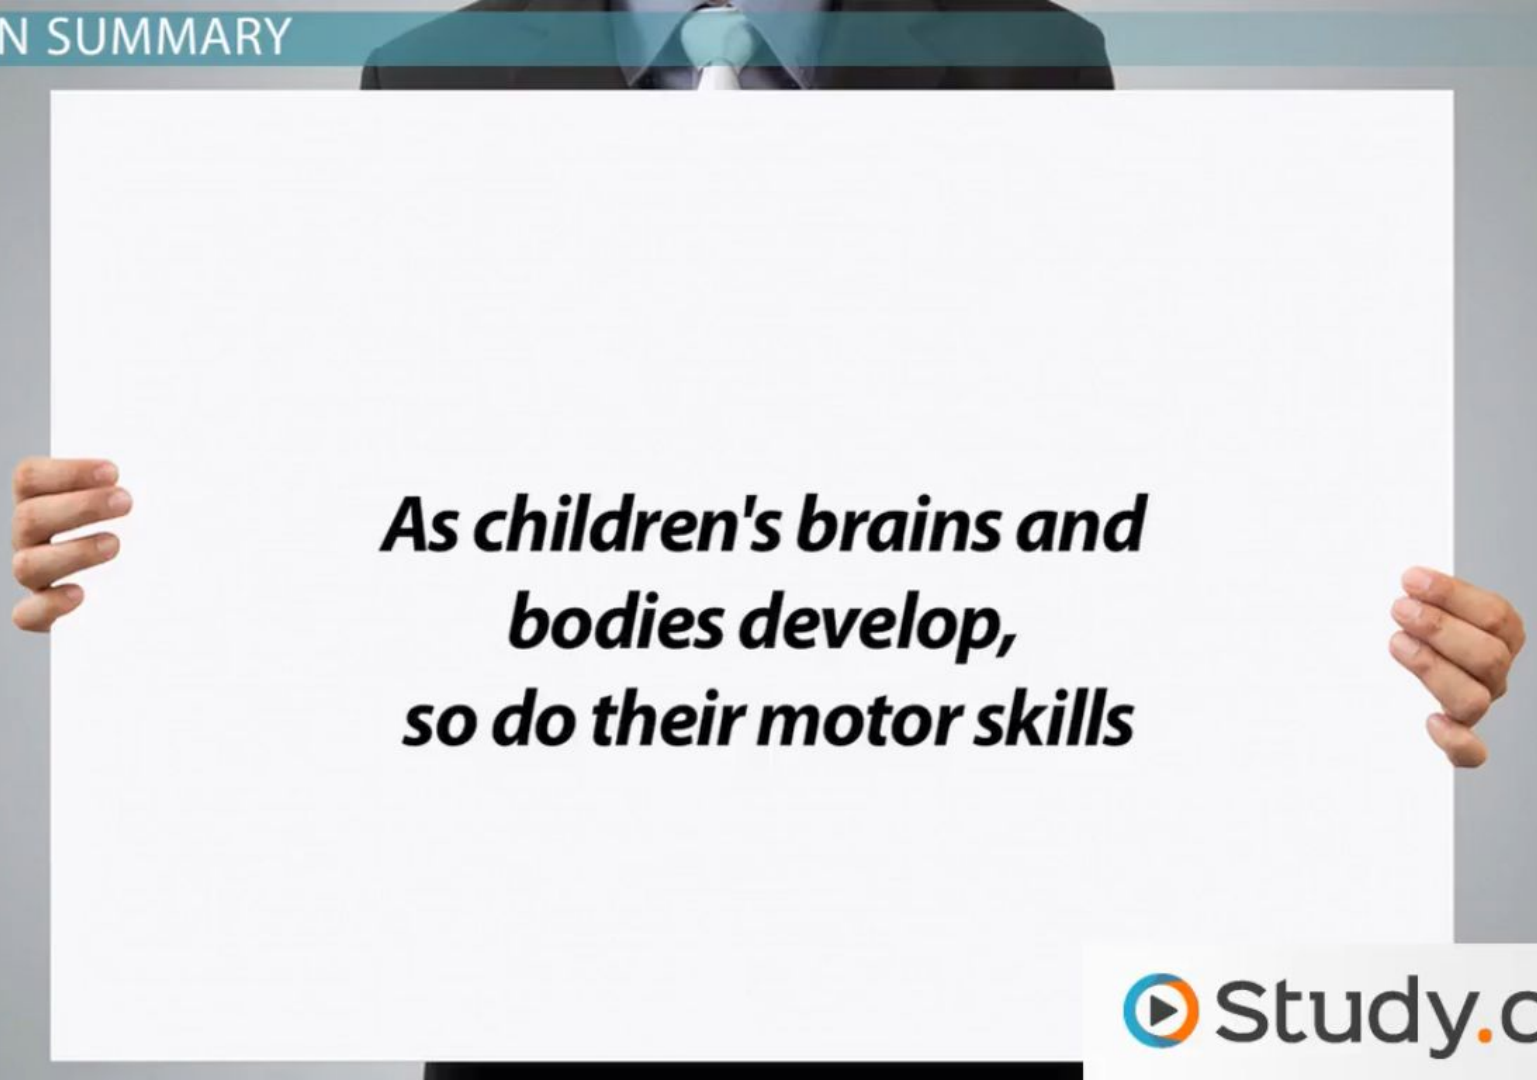

☐ b. growth; life

☐ c. reasoning; change

☒ d. growth; change

Human Development

***the way that people change and
grow across their life span***

A person wearing a dark suit, white shirt, and light blue tie is holding a large white rectangular sign. The sign is held by two hands, one on the left and one on the right. The background is a solid grey color.

***As children's brains and
bodies develop,
so do their motor skills***

***learning
maturation
growth***

Growth
the physical process of development

Maturation

***the physical, intellectual, or emotional
process of development***

7. The process of change that all humans experience is called:

☐ a. Growth

☐ b. Maturation

☐ c. Learning

☒ d. Development

8. Which of the following statement about growth is FALSE?

☒ a. Growth impacts the mind

☐ b. The body becomes physically larger as a result of growth

☐ c. Growth can be measured

☐ d. Genetics are a main factor of growth

9. As a young adult, Cara begins a career, learns new skills in the workplace and forms a healthy relationship. She is showing signs of:

☐ a. Development

☒ b. Maturation

☐ c. Learning

☐ d. Growth

10. At which stage of life do people generally start to show self-conscious tendencies?

- ☐ a. Infancy
- ☐ b. Adulthood
- ☒ c. Childhood
- ☐ d. Adolescence

11. ____ refers to the way the environment acts upon a person.

- ☒ a. Nurture
- ☐ b. Genetics
- ☐ c. Plasticity
- ☐ d. Nature

12. Which of the following refers to the way environment or behavior can affect a person's brain?

a. Plasticity

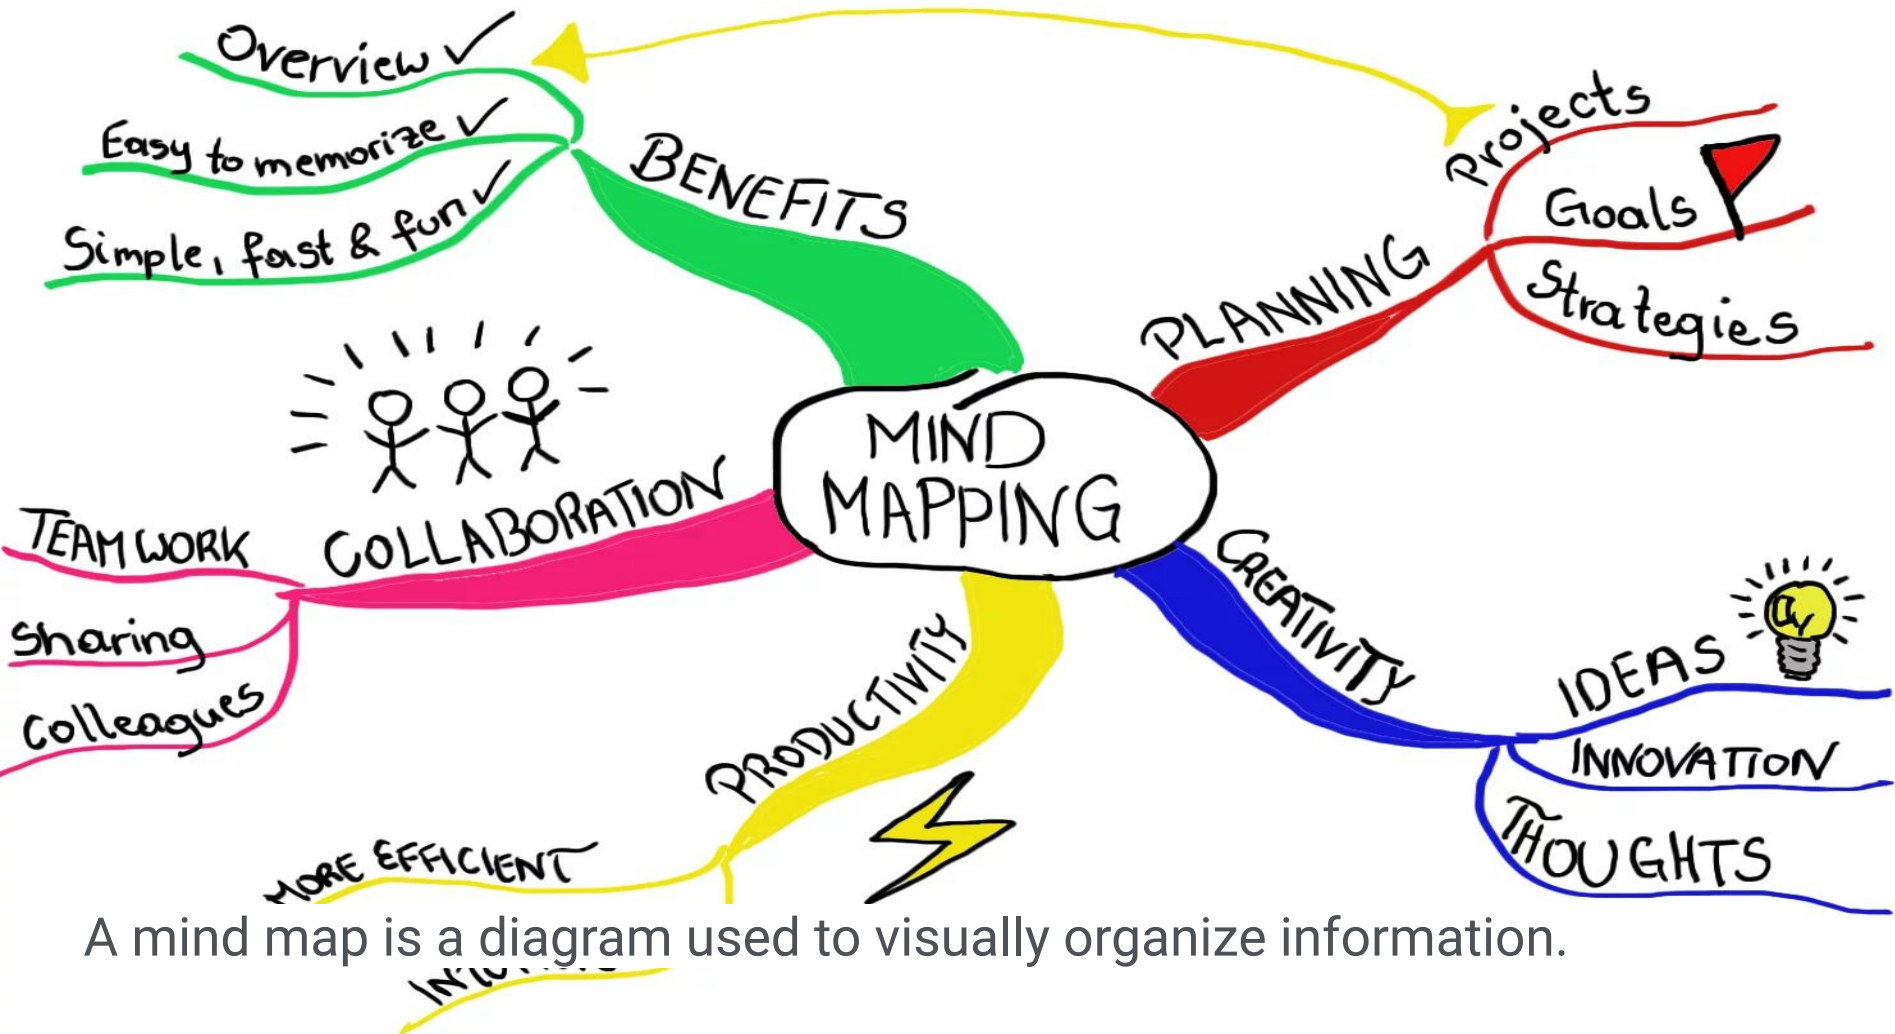

b. Mind mapping

c. Critical-thinking

d. Nature

13. Learning how to do multiplication is an example of ____.

- ☒ a. cognitive development ☐ b. social development
- ☐ c. developmental psychology ☐ d. emotional development

14. A conditioned response to a stimulus that is similar to the conditioned stimulus, but not exactly the same, is called ____.

- ☐ a. neutral stimulus
- ☒ b. stimulus generalization
- ☐ c. unconditioned stimulus
- ☐ d. spontaneous recovery

15. Your son doesn't like to clean his room. Every time you remind him to put away his things and make his bed, he complains until he gives in and tidies the room to stop you from whining. This is an example of ____ for your son.

- ☐ a. positive reinforcement
- ☒ b. negative reinforcement
- ☐ c. negative punishment
- ☐ d. positive punishment

Positive Reinforcement

Positive behavior followed by
positive consequences
(Manager praises the employee)

Negative Reinforcement

Positive behavior followed by
removal of negative
consequences (Manager stops
nagging the employee)

Punishment

Negative behavior followed by
negative consequences
(Manager demotes the employee)

Extinction

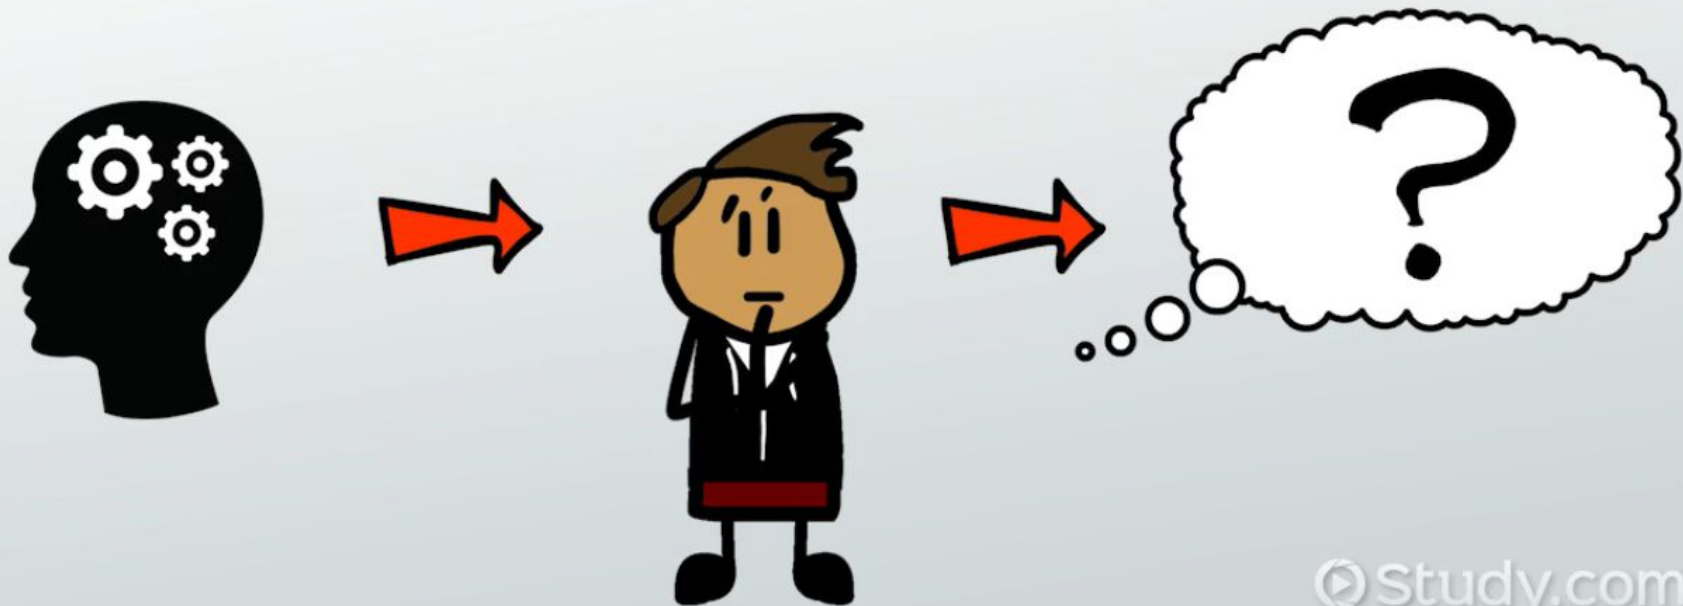

Negative behavior followed by
removal of positive
consequences (Manager
ignores the behavior)

16. Stella is a recovering addict and knows that she can't spend time with certain people or go certain places anymore because they make her want to use again. What self-regulation tactic is Stella using?

- ☒ a. Environmental structuring
- ☐ b. Self-consequating
- ☐ c. Standard setting
- ☐ d. Self-evaluating

self-regulation theory (SRT)

system of conscious personal management that helps us control what we think, say, and do

there are four components of self-regulation

1) standards - *level or quality of desirable behavior*

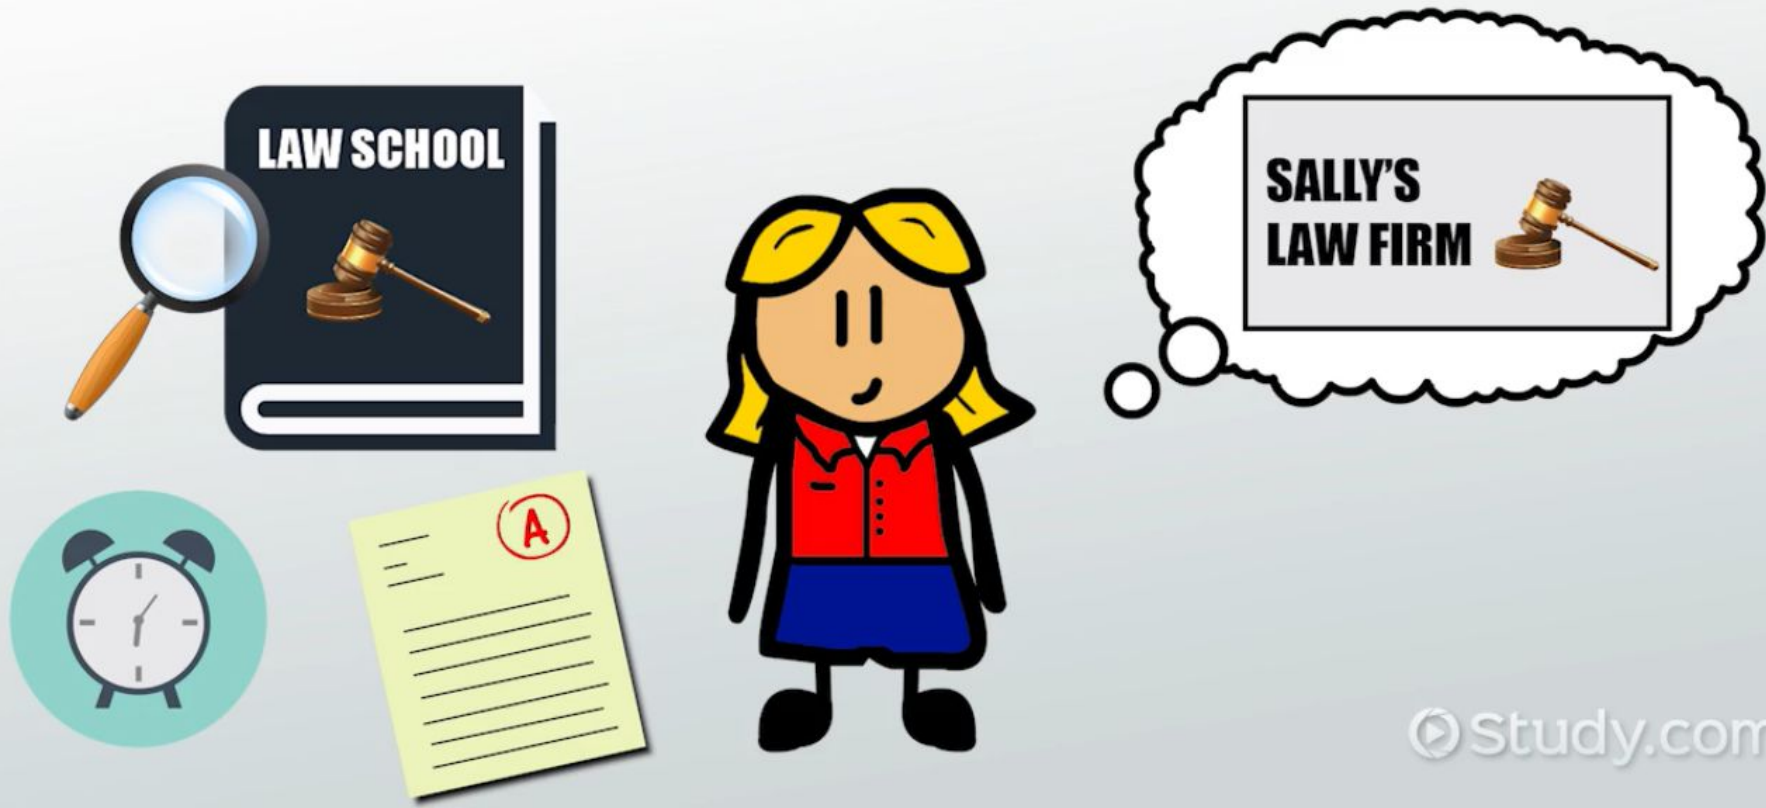

2) motivation - *enthusiasm to meet the standards*

3) monitoring - *thoughts or actions that precede breaking a standard; accountability tactics*

4) willpower - *internal strength to control urges that break standards*

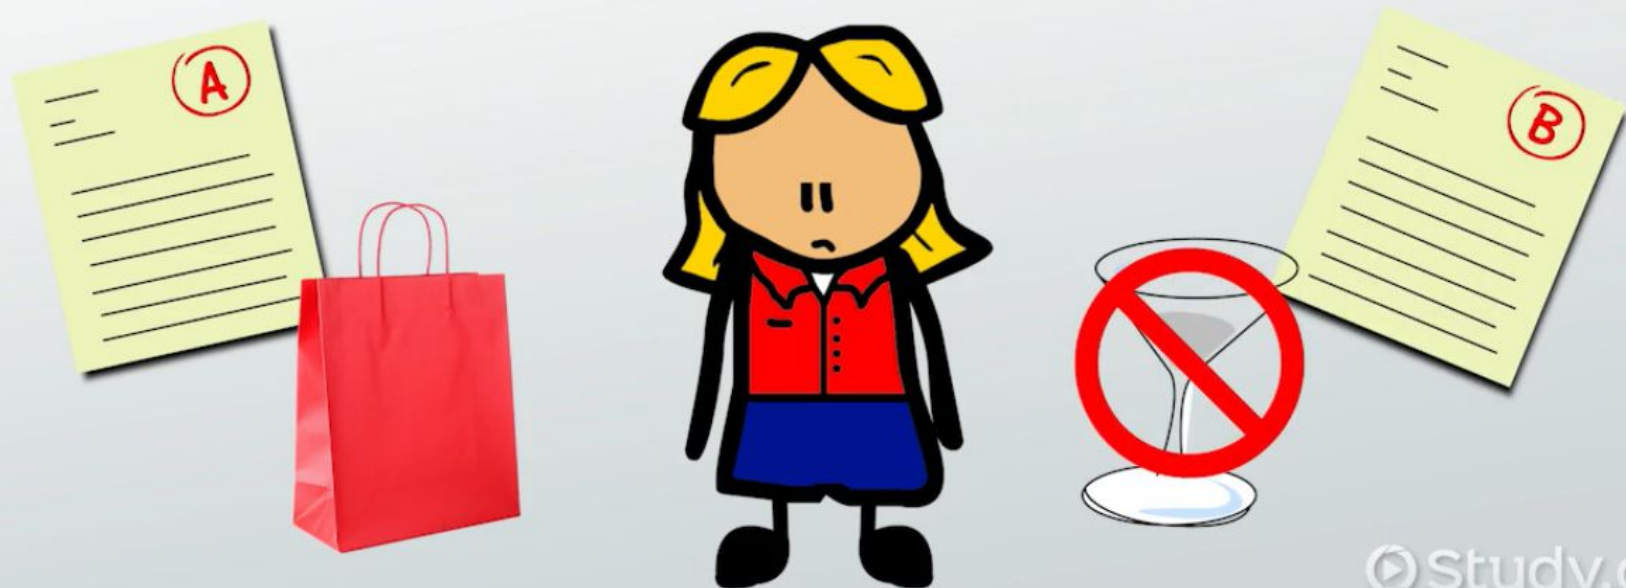

standard setting

goal in mind and has created a plan to achieve it

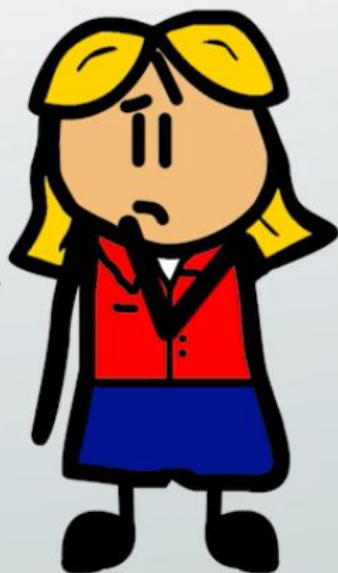

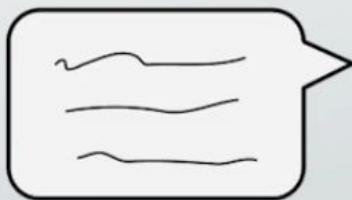

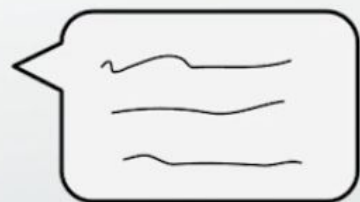

self-consequating

a reward if she achieves her goal, or a punishment if she does not

environmental structuring

selecting or arranging her physical environment to make sure she achieves her goal

17. Steven works in the sales department of his firm. He and his friend Dan always have a little friendly competition between them to keep them motivated. This month, they both are representing a new product and Steven really wants to out-sell Dan. To do this, he has set a specific goal of how many products he wants to sell and a plan of how many people he has to talk to per hour in order to achieve it. What tactic of self-regulation is Steven using?

☒ a. Standard setting

☐ b. Product placement

☐ c. Environmental structuring

☐ d. Self-consequating

18. Mario is really good at playing chess. When he learns how to read braille, his knowledge of chess neither helps nor hurts his ability to read braille. Which type of Transfer of Information has occurred?

☐ a. Negative transfer

☐ b. Positive transfer

☒ c. Zero transfer

☐ d. Low-road transfer

Transfer of Information

How skills or knowledge that students have learned about one topic affect their learning of skills or knowledge in another topic or area.

Transfer of Information

***Positive
Transfer***

***Negative
Transfer***

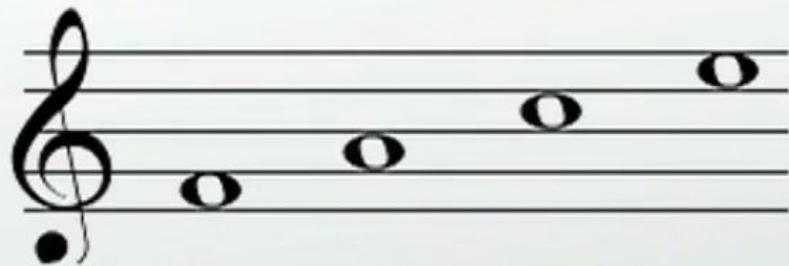

***Zero
Transfer***

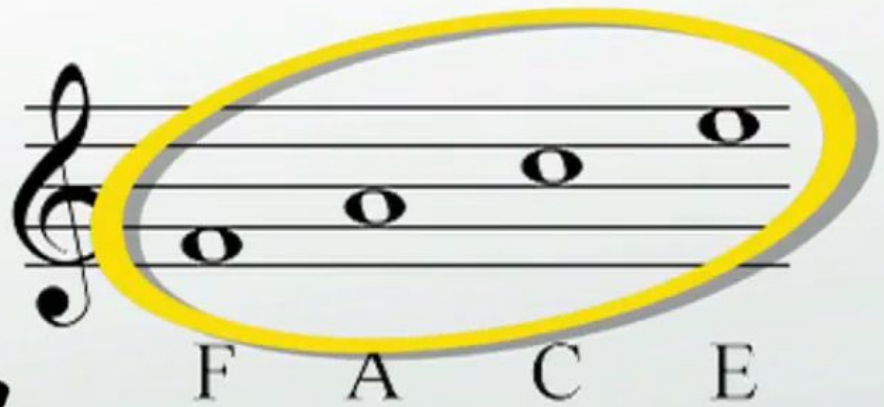

Positive Transfer

Knowledge or skills about a previous topic help a student learn a new skill or learn about a new topic.

POSITIVE, NEGATIVE, AND ZERO TRANSFER

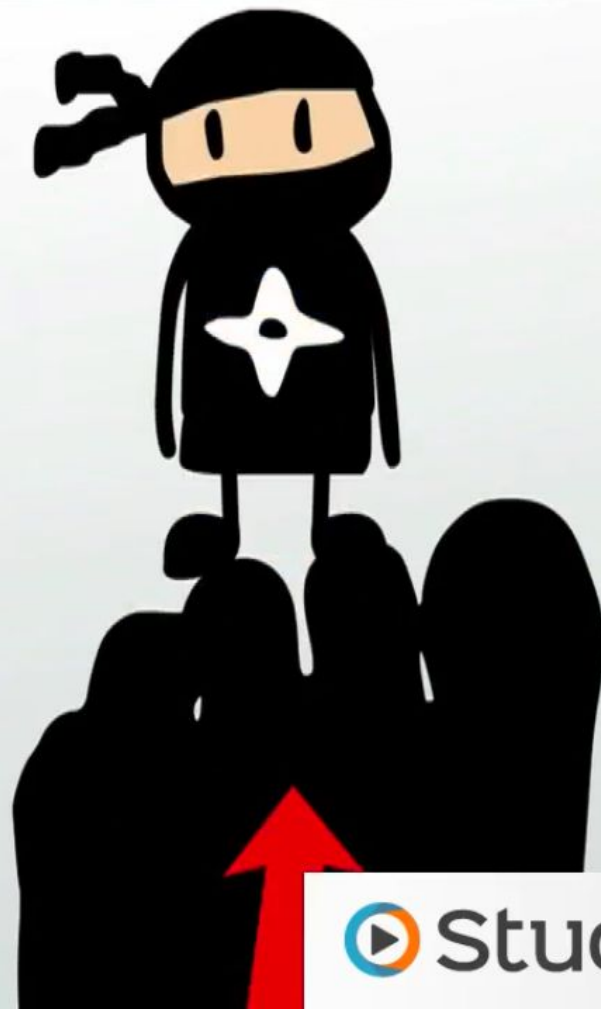

POSITIVE, NEGATIVE, AND ZERO TRANSFER

Negative Transfer

***Knowledge or skills about a previous topic
hurt a student or interfere with learning
about a new skill or topic***

Tae Kwon Do

American Kenpo

Transfer of Information

***The habits I already
formed caused me trouble
in doing the
second skill correctly.***

Zero Transfer

Previous skills or information have zero effect on learning new skills or information.

19. George learns Spanish, then he starts to learn French. He realizes that many words sound similar between the two languages, so knowing Spanish helps him to learn French. Which type of Transfer of Information has occurred?

☐ a. Negative transfer

☐ b. High-road transfer

☒ c. Positive transfer

☐ d. Zero transfer

20. The following are all examples of metacognitive strategies except

☐ a. Predicting outcomes

☒ b. Taking dictation while the teacher speaks

☐ c. Evaluating Work

☐ d. Critiquing

21. All of the following could be considered teaching metacognitive strategies except:

☐ a. Having students write down the steps to solving a math problem.

☐ b. Assigning a daily journal for students to reflect about the day's learning.

☒ c. Giving students a certain number of points for their performance in class that day.

☐ d. Asking students to edit each other's papers and then revise their own before turning them in.

22. Most accurately, metacognition can be defined as

☐ a. Getting good feedback from your peers

☐ b. The study of psychology

➔ ☒ c. Thinking about your thinking

☐ d. A strategy for writing a research paper

23. Which of the following best describes how we develop knowledge, from the perspective of a constructivist?

☐ a. We are primarily sponges that absorb what we are told by authority figures.

☐ b. We are born with most of our knowledge.

☒ c. We develop knowledge by engaging with others and continually learning as we go.

☐ d. Knowledge can only be gained by going to school.

24. The difference between the tasks that an individual can accomplish alone and the tasks that they can accomplish only with the assistance of a more advanced other represents the learner's ____.

☐ a. learning opportunity

☐ b. actual development level

☐ c. point of disequilibrium

☒ d. zone of proximal development

25. Tony is an MMA fighter and is trying to drop weight for his fight next week. He knows that he has 10 lbs. left to lose. To stay motivated, he's promised himself that if he makes weight and wins his fight, he will treat himself to a huge burger with fries and ice cream for dessert afterwards. What self-regulation tactic is Tony using?

☐ a. Environmental structuring

☐ b. Self-evaluating

☐ c. Standard setting

☒ d. Self-consequating

26. Self-efficacy is:

- ☐ a. the ability to recover from your mental health issues.
- ☒ b. the belief that you will be able to accomplish a specific task.
- ☐ c. the confidence that you are right.
- ☐ d. the belief that you can accomplish anything.

27. Vygotsky's theory emphasizes the importance of a more advanced individual who serves as a guide to provide ____ for the learner.

☐ a. development

☐ b. equilibrium

☐ c. motivation

☒ d. scaffolding

28. Which of the following examples represents a function of a school?

☐ a. Teaching students how to interact with others.

☐ b. Transmitting cultural norms and values.

☐ c. Transmitting knowledge and academic skills.

☒ d. All of these are true.

29. How do you define epigenesis?

☐ a. The process through which behavior and environment bring forth development

☒ b. The process through which genetics and environment bring forth development

☐ c. The process through which genetics and behavior bring forth development

☐ d. The process through which genetics and neural activity bring forth development

30. Why is physical development important for babies and toddlers?

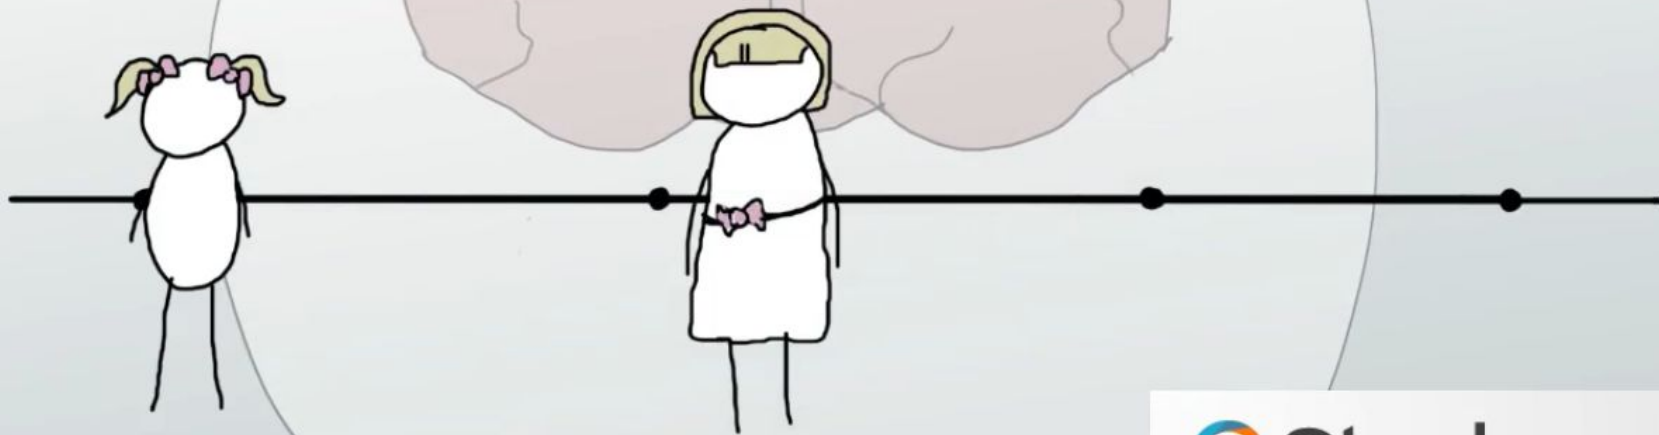

☐ a. It is essential for their emotional development

☐ b. It is necessary for muscular growth and development

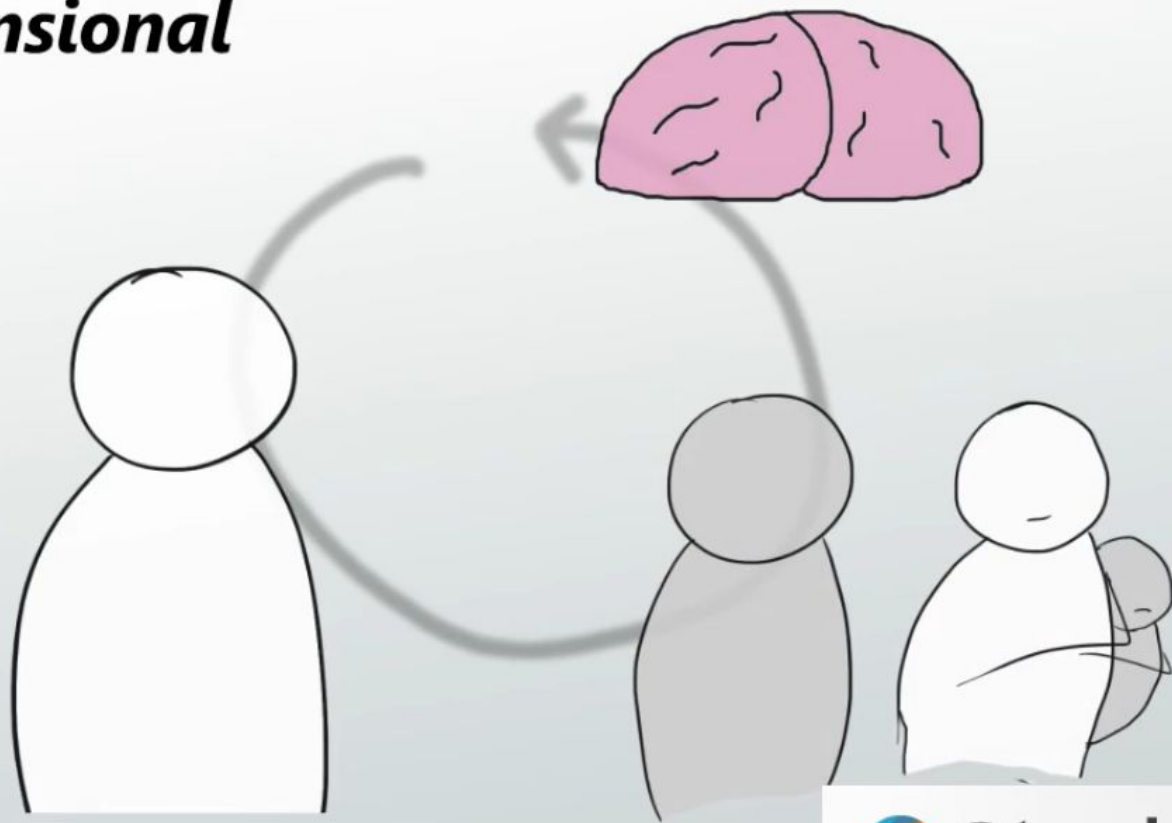

☒ c. It leads to improved motor skills, which allows them to explore the environment

☐ d. It includes visual development, which allows them to learn to read

Life Span Development

Multidimensional

Multidirectional

Plasticity

31. Development is the process of ____ and ____ that humans go through over their lifetime.

☐ a. growth; life

☐ b. reasoning; growth

☐ c. reasoning; change

☒ d. growth; change

32. As a young adult, Cara begins a career, learns new skills in the workplace and forms a healthy relationship. She is showing signs of:

- ☒ a. Maturation
- ☐ b. Learning
- ☐ c. Development
- ☐ d. Growth

33. The idea that people develop at all points during their lives is called:

- ☐ a. Multidirectionality
- ☐ b. Contextuality
- ☐ c. Multidimensionality
- ☒ d. Lifelong development

34. The fact that people develop emotionally, physically, and intellectually is called:

- ☒ a. Multidimensionality
- ☐ b. Plasticity
- ☐ c. Contextuality
- ☐ d. Lifelong development

35. Individuals commonly find mates while attending a college or university. This is an example of ____.

☐ a. a hidden curriculum in the school

☐ b. a manifest function of school

☐ c. a social function of school

☒ d. a latent function of school

Manifest Latent

Manifest Functions

***functions that people believe
are the obvious purposes of
school and education.***

Manifest Functions

- *academic curriculum*
 - *socialization*
- *transmission of cultural norms and values*

Latent Functions

functions that people are not aware of or don't think of straight away.

Latent Functions

- *hidden curriculum*
- *matchmaking*

36. What was the self-esteem movement?

- ☐ a. A period that resulted in children being raised with good self-esteem
- ☒ b. A time when children were rewarded for trying and given great amounts of false praise
- ☐ c. A time when everyone had very high self-esteem
- ☐ d. A period in the 1980s when everyone was doing a new dance called 'the self-esteem'

Self-Esteem

How you feel about who you are as a person

Confidence

Self-esteem is the key to success in life.

Nathaniel Branden
"The Psychology of Self-Esteem"

Self-esteem is the key to success in life.

Successful people have high self-esteem, and therefore, if you boost a person's self-esteem, you'll also boost his or her success.

Nathaniel Branden
"The Psychology of Self-Esteem"

Self-Esteem Movement

Parents, teachers, and psychologists focused on boosting children's self-esteem

THE SELF-ESTEEM MOVEMENT

*Good job! You're only
one number off!*

$$2 + 2 =$$

- Ch. 1 - 4
- Fight Prejudice

Word of the Day
Synecdoche

37. If a child is struggling at a task, how might his/her teacher aid the child?

☐ a. Give the child more one-on-one time

☐ b. Encourage the child's parents to work with them at home

☐ c. Provide positive reinforcement

☒ d. All answers are correct

38. What is the definition of self-esteem?

- ☒ a. One's confidence in their abilities and willingness to face and overcome obstacles
- ☐ b. The ability to complete a task
- ☐ c. Being given a trophy for participating
- ☐ d. Thinking that you are great at everything you do

39. All of these are likely characteristics of someone who is primarily a visual or spatial learner EXCEPT:

☐ a. they have a good sense of direction

☐ b. they prefer pictures or graphs

☐ c. they like the use of color to organize information

☒ d. they like reasoning and recognizing patterns

40. Owen is a very curious child. He likes to take apart his toys and then try to put them back together. He likes to play with his building blocks without looking at the building instructions that came with them. Which learning style is he exhibiting?

☐ a. Verbal Learner

☐ b. Logical Learner

☒ c. Physical Learner

☐ d. Solitary Learner

41. Prior knowledge refers to:

☐ a. Experiences we may have already had with a certain topic

☐ b. What we already know before we learn more about a topic

☐ c. The information we already have in our brains about a topic

➔ ☒ d. All of the answers are correct

42. Girls are more likely to show a greater interest in attending college. This gender difference is reflected in which grade level?

☐ a. Kindergarten - 2nd grade

☐ b. 3rd grade- 5th grade

☐ c. 6th grade - 8th grade

☒ d. 9th grade - 12th grade

43. Imagine you are bicycling in a race. Which of the following is the **BEST** example of an extrinsic motivation for this activity?

- ☐ a. Biking to enjoy the fresh air
- ☒ b. Crowds cheering when you get a trophy
- ☐ c. To increase your health through exercise
- ☐ d. Raising money for a charity you believe in

44. Which of the following needs creates the strongest drive to act immediately?

☐ a. The need to make friends

☐ b. The need for respect

☒ c. The need to eat

☐ d. The need of job security

45. What are the three steps Seligman found necessary to build self-esteem?

☐ a. Challenge, fail, try again

☐ b. Success, get a trophy, bask in glory

☒ c. Challenge, overcome, and mastery

☐ d. Try, fail, give up

Martin Seligman, the father of positive psychology, has argued that three qualities are necessary for children to build self-esteem. First, they need to engage in activities that are *challenging*. Second, through challenging themselves the child needs to learn to *overcome* the frustration that comes with not having instant gratification. Finally, after demonstrating persistence and overcoming the challenge, the child eventually succeeds and will eventually gain *mastery* of the task.

46. What is the prevalence rate for ASD?

- ☐ a. One in a million, with an equal likelihood of boys being diagnosed as girls
- ☐ b. One in 68, with more girls than boys diagnosed
- ☐ c. One in 68, with boys and girls having an equal likelihood of being diagnosed
- ☒ d. One in 68, with more boys than girls diagnosed

47. Which of the following is NOT one of the disabilities classified as an autism spectrum disorder (ASD)?

☐ a. Rett syndrome

☒ b. Cerebral palsy

☐ c. Pervasive developmental disorder (PDD-NOS)

☐ d. Childhood disintegrative disorder (CDD)

autism spectrum disorders (ASD)

*disabilities that generally impact
an individual's neurological development*

Autism Spectrum Disorders

An umbrella with a blue handle and a red inner lining. The canopy is composed of interlocking puzzle pieces in red, green, yellow, and blue. The title 'Autism Spectrum Disorders' is arched over the top of the umbrella.
