

GURONG
PINOY

The logo features the word "GURONG" in a large, bold, blue font with a white outline and a slight 3D effect. Below it, the word "PINOY" is written in a similar bold font, but in white with a blue outline. Three yellow stars are positioned above the text: one centered above "GURONG" and two flanking the word "PINOY". A yellow sunburst graphic is located at the top center, behind the first star.

Final Coaching

Professional Education 2

1. Madeline always feels like she is never included in group activities or social events. She has become depressed and lonely. According to Maslow, which category of needs has not been fulfilled?

a. Social (love/belonging) needs

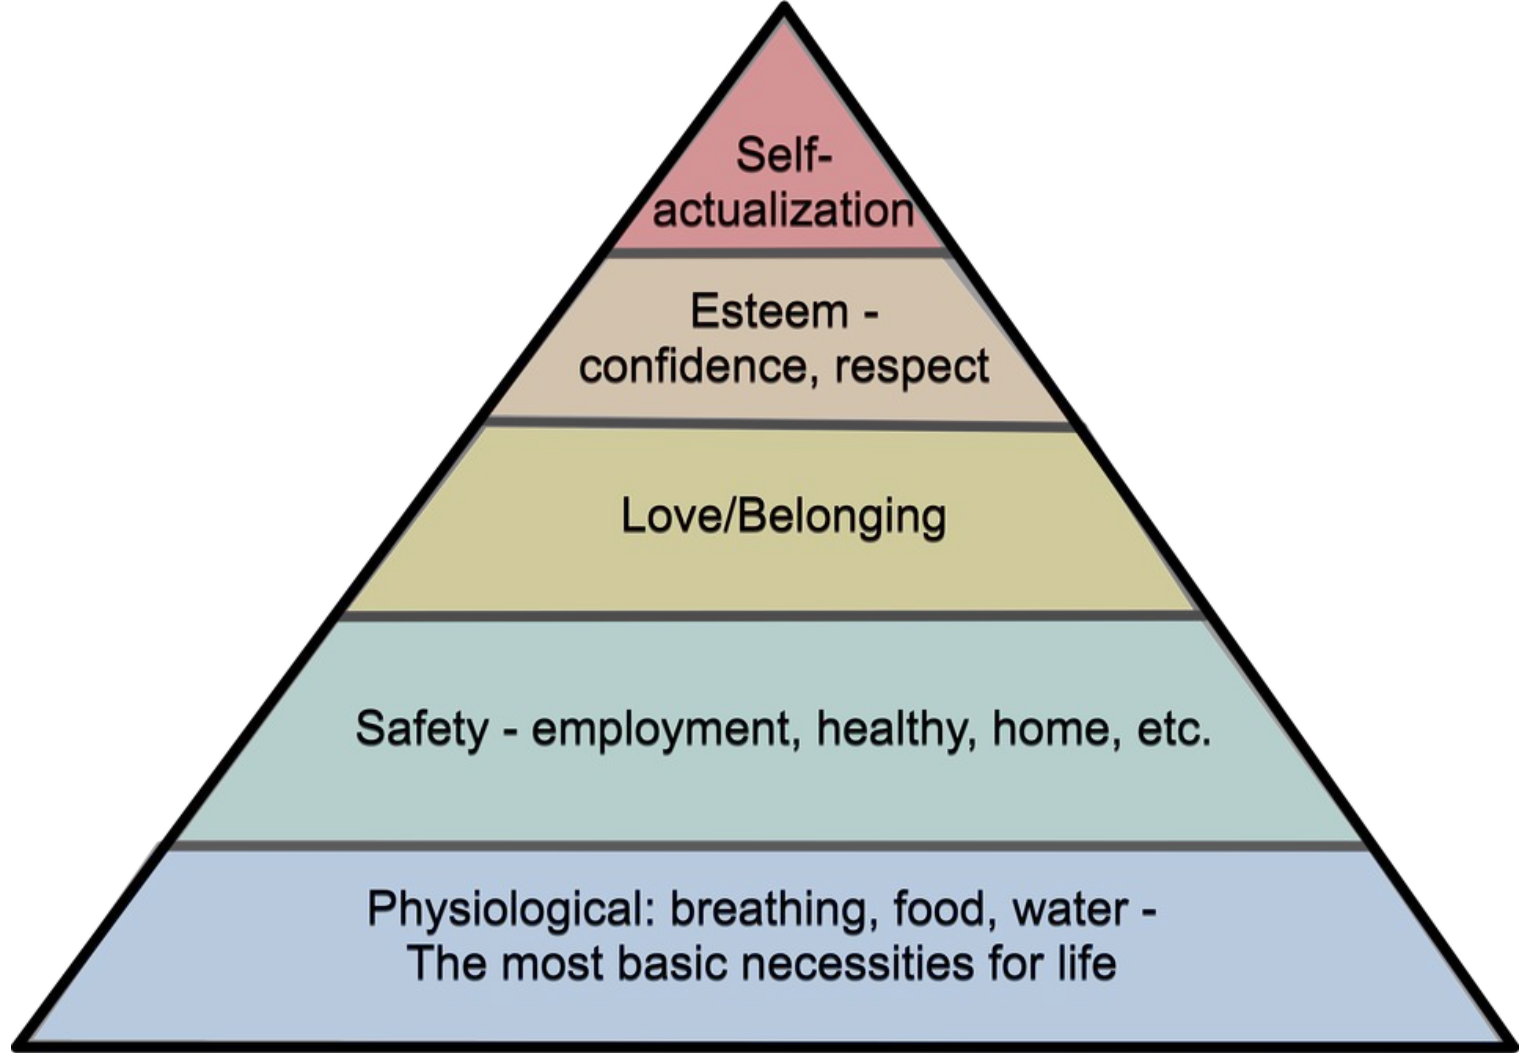

b. Physiological needs

c. Safety needs

d. Self-actualization needs

2. Which of the following would NOT address safety needs in the classroom?

☐ a. Hall monitors

☐ b. Limits/rules

☒ c. Colorfully decorated classroom

☐ d. Structure and daily routines

3. What is the first and most important need highlighted in Maslow's Hierarchy of Needs?

☐ a. Safety needs

☐ b. Social (love/belonging) needs

☐ c. Esteem needs

☒ d. Physiological needs

4. The order of Maslow's Hierarchy of Needs, from bottom to top is:

☐ a. Physiological, Safety, Esteem, Social, Self-Actualization

☐ b. Safety, Esteem, Social, Self-Actualization, Physiological

☐ c. Self-Actualization, Esteem, Social, Safety, Physiological

☒ d. Physiological, Safety, Social, Esteem, Self-Actualization

5. How could a teacher use the human tendency to strive for positive things as a teaching technique?

☐ a. By banning the use of cell phones during class time

☐ b. By making a wall chart to record each time a student failed to hand in homework on time with a zero star

☐ c. By giving out candy at random intervals during class time

☒ d. By making a wall chart to record each time a student handed in homework on time with a

6. Which of the following is NOT an example of an outward sign of learning?

☐ a. A student who is paying attention

b. A student who is staring at the floor

☐ c. A student nodding her head

d. A student whose eyes light up

7. According to Skinner, learning entails the student ____.

☐ a. guessing the right answer

b. modifying his or her behavior

☐ c. understanding a topic

☐ d. in-depth asking the right questions

8. Which of the following statements is part of Thorndike's Law of Effect?

☐ a. Behaviors followed by reinforcements or punishments are equally likely to occur again in the future.

☐ b. Behaviors caused by intrinsic motivation are more likely to lead to reinforcement.

 c. Behaviors followed by reinforcements are more likely to occur again in the future.

☐ d. Behaviors followed by punishments are more likely to occur again in the future.

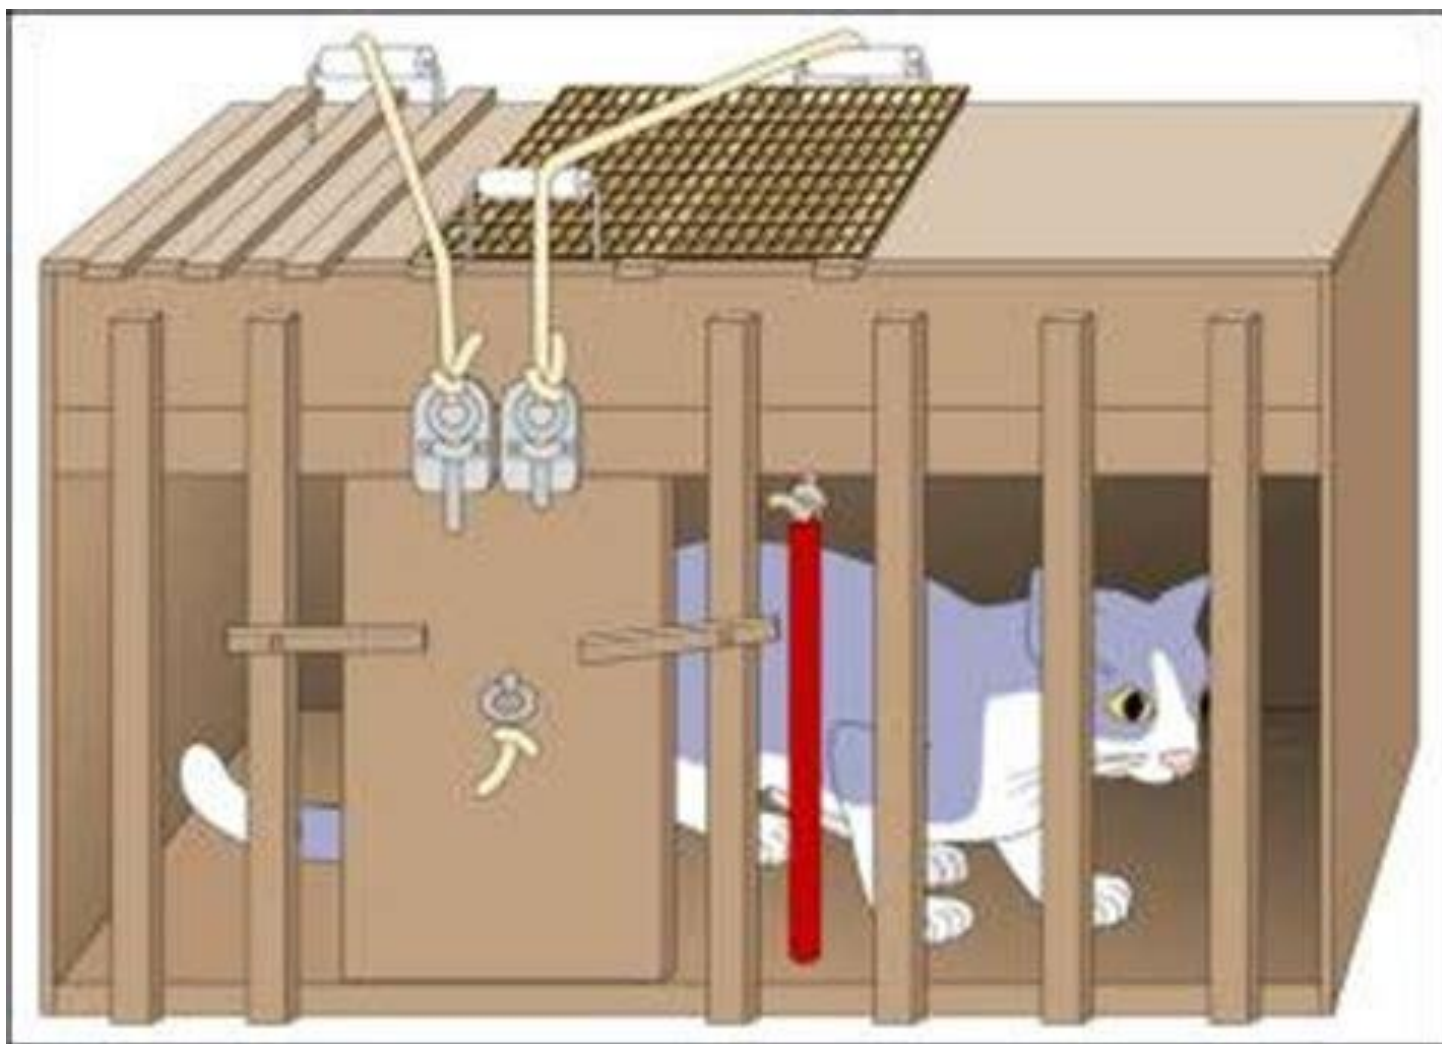

9. Thorndike is best known for the experiments in which he ____.

☐ a. used cats in cages to study the effect of reinforcement and punishment on development

☐ b. used dogs in puzzle boxes to study the effect of reinforcement and punishment on development

☒ c. used cats in puzzle boxes to study the effect of reinforcement and punishment on behavior

☐ d. used dogs in cages to study the effect of reinforcement and punishment on behavior

10. Soheil tries a new study strategy to prepare for an important test, then gets an A on that test. According to Thorndike's Law of Effect, how is Soheil most likely to react?

a. Soheil will probably use that study strategy the next time he prepares for a test.

b. Soheil will probably attribute his good grade to external factors, such as luck.

c. Soheil will probably believe his teacher is simply rewarding effort, not his mastery of the subject.

d. Soheil will be less likely to use that study strategy the next time he prepares for a test.

11. Which of the following typical classroom experiences might be based on the principles in Thorndike's Law of Effect?

☐ a. Letting children have occasional breaks such as recess, to avoid fatigue or boredom.

☐ b. Sending home newsletters, so parents are informed about their children's classrooms.

☒ c. Giving students gold stars for good behavior, to increase how often they show these behaviors.

☐ d. Having teachers meet regularly with their school principal, to ensure common communication.

12. Watson is best known for taking his theory of behaviorism and applying it to which population?

a. Adolescents

b. Children

c. Senior adults

d. Adults

13. Watson was one of the early American psychologists to break with popular notions that our unconscious mind was behind most of our behavior. What was his viewpoint?

☐ a. People should be studied in groups to form a context for behavior

☐ b. Only subjective mental states could explain behavior

☐ c. Motives could be determined by talking to a person

☒ d. Only observable, measurable behavior was valid

14. On the first day of school, Lester tells his math teacher, "I'm going to get an A in your class because I'm very good at math!" Based on this comment, and according to the expectancy-value theory, Lester is ____ in ____ for math.

a. high; expectancy

b. high; value

c. low; expectancy

d. low; value

Expectancy Value Theory

Explain and predict an individual's attitude toward objects and actions.

Expectancy

Can I do this task?

Value

Do I want to do this task?

Expectancy Value Theory

Belief

Value

Expectations

Motive to approach success

Low

High

Motive to avoid failure

Low

Failure
Acceptors

Success-Oriented
Students

Need for
achievement
by Covington
and Roberts

High

Failure
Avoiders

Overstrivers

The second popular model: Eccles and Wigfield

Social Cognitive Perspective

Social World

Cognitive Processes

Motivational Beliefs

MODELS OF EVT

Social World

1. Cultural Milieu
2. Socializers' Behaviors
3. Past Performance and Events

Cognitive Processes

Perceptions of Social Environment

Interpretations and Attributions for Past Events

Motivational Beliefs

Goals

Task-Specific Self-Concept

Perceptions of Task Difficulty

Achievement Behavior

Task Value

Expectancy

Choice
Persistence
Quality of effort
Cognitive engagement
Actual Performance

15. When asked why people act the way they do, Jerry explains that people only behave the way they do because they expect a reward or punishment for their behavior. Jerry is a believer in which theory of motivation?

☐ a. Expectancy-value

☐ b. Learning

☐ c. Intrinsic

☒ d. Classical

16. Maya likes to read aloud in class because she enjoys reading nonfiction books. Maya has ____ motivation for reading.

a. intrinsic

b. expectancy

c. extrinsic

d. learning

17. Lisa likes to read aloud in class because she likes when people say, "Wow! You're a great reader!". Lisa has ____ motivation for reading.

☐ a. intrinsic

☐ b. expectancy

☒ c. extrinsic

☐ d. learning

18. Who was the psychologist associated with developing the theory of cognitive dissonance?

☐ a. Carl Jung

☐ b. Sigmund Freud

☒ c. Leon Festinger

☐ d. Erik Erikson

Cognitive Dissonance

***A feeling of discomfort when our beliefs
and actions don't line up***

COGNITIVE DISSONANCE

*Liars are
bad people...*

But I just lied.

THREE STEPS

Cognitive dissonance can be divided up into three general steps:

- 1. Inconsistency in actions and beliefs.*
- 2. Recognition of inconsistency causes dissonance.*
- 3. Change something to resolve the dissonance.*

CHANGE

CHANGE

CHANGE

THREE RESOLUTIONS

There are three ways to resolve the cognitive dissonance:

- 1. Change your beliefs***
- 2. Change your actions***

The Four Major Jungian Archetypes

the anima/animus

true self

sex and life instincts

the shadow

the self

unified unconsciousness and consciousness of an individual, represented as a circle, square, or mandala

how we present ourselves to the world, "mask"

the persona

19. While Andrew is not always happy about the amount of chemistry homework he has each week, he understands that it is an important subject to master if he wants to pursue a degree in medicine. Andrew's motivation is an example of ____.

☐ a. external regulation

☐ b. integration

☐ c. amotivation

☒ d. identification

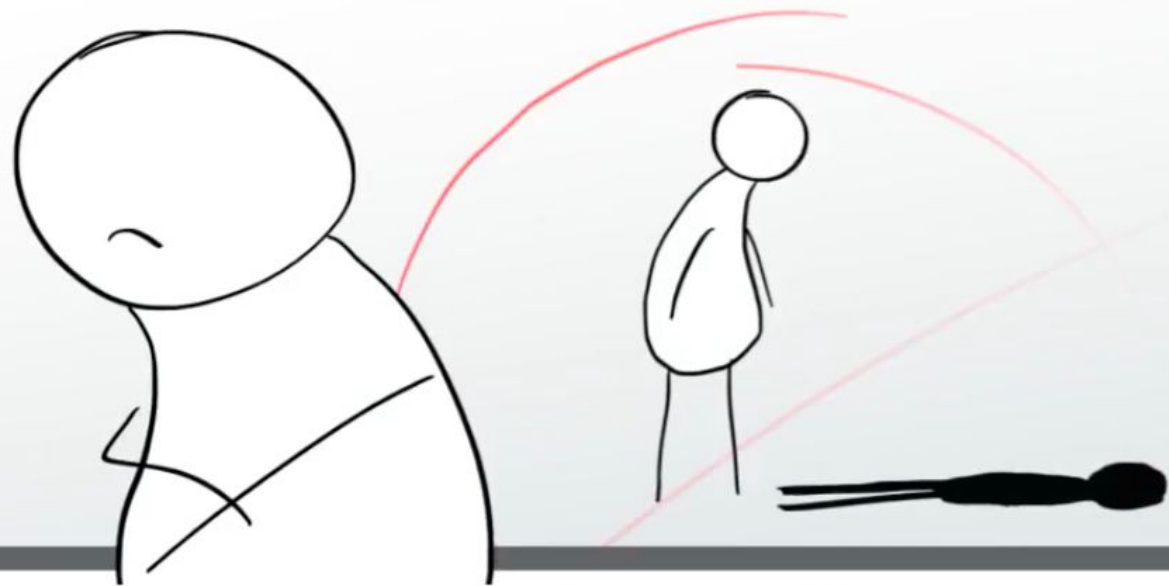

External Regulation

when we take some action in order to satisfy an external demand or to receive some reward

TYPES OF EXTRINSIC MOTIVATION

Introjected Regulation

*doing something in order to maintain self-esteem
or pride or to avoid guilt or anxiety*

TYPES OF EXTRINSIC MOTIVATION

Identification

recognizing the importance of a behavior and accepting it as one of your personal values

TYPES OF EXTRINSIC MOTIVATION

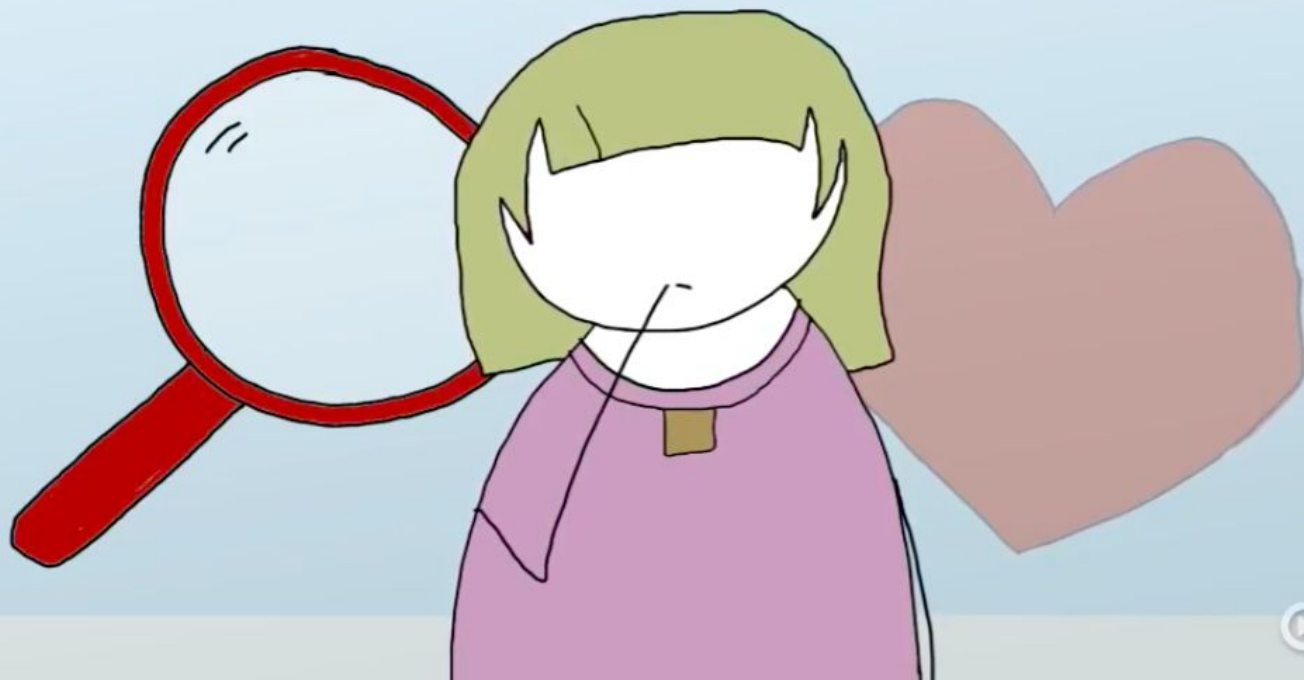

Bienvenidos a Barcelona!

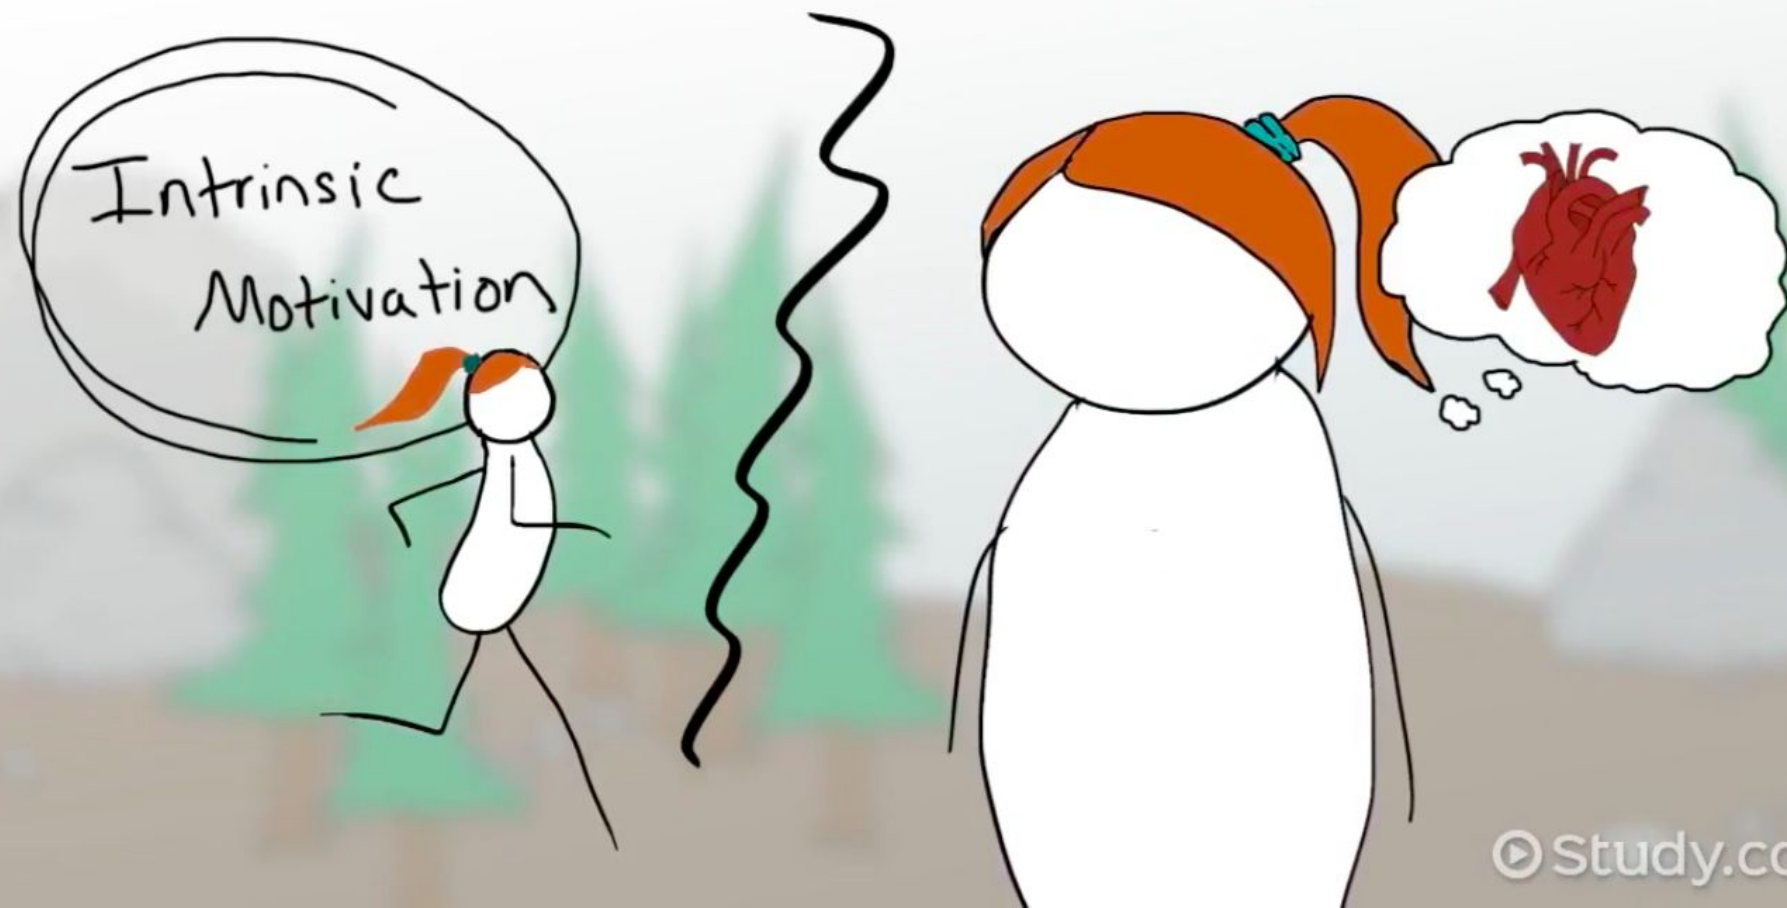

Integrated Regulation

part of your self-examinations, values, and needs

TYPES OF EXTRINSIC MOTIVATION

20. Which of the following people is considered intrinsically motivated?

- ☐ a. A man who creates artwork for money
- ☐ c. A guy who runs errands in exchange for free pizza

- ☐ b. A student who completes all her homework so she doesn't get in trouble
- ☒ d. A woman who paints because it's relaxing

21. Scolding a child for bad behavior is a type of:

- ☐ a. Negative reinforcement
- ☐ b. Negative punishment
- ☐ c. Positive reinforcement
- ☒ d. Positive punishment

Operant Conditioning

Reinforcers *(or rewards)* and **Punishments**

*are used to shape the behavior
of animals, including humans*

EXAMPLES OF PUNISHMENT

Positive Punishment

Negative Punishment

Positive Punishment

adds something

Negative Punishment

takes something away

22. Which of these is an example of negative punishment?

☐ a. Making a child do chores for not doing his or her homework

☐ b. Spanking a child

☒ c. Taking away a teenager's video games for being late for curfew

☐ d. Giving a child a piece of candy to make it stop crying

23. In B.F. Skinner's experiment with rats in the Skinner box, food was used as:

- ☐ a. Negative reinforcement
- ☐ b. Positive punishment
-  ☒ c. Positive reinforcement
- ☐ d. Negative punishment

24. What are the two main tools used in operant conditioning?

a. Positive reinforcement and punishment

b. Social reinforcement and asocial reinforcement

c. Primary reinforcement and secondary reinforcement

d. Intrinsic reinforcement and extrinsic reinforcement

25. In Mrs. Smith's class, several students are talking and goofing off. What should Mrs. Smith do if she wants to use positive reinforcement to change their behavior?

☐ a. Send a note home to their parents

☐ b. Take a sticker off of the good behavior chart for each student

☐ c. Verbally reprimand them

☒ d. Loudly praise a student who is following the rules

26. Which of the following is NOT an example of positive reinforcement?

☐ a. Placing a sticker on a good behavior chart

☐ b. Giving the student verbal praise

 c. Taking away something distracting from a student

☐ d. Giving a student a prize from the prize box

27. Habib's mother tells him that he should learn how to code because there are a lot of high paying jobs out there in coding. While Habib agrees with his mother that coding can lead to a high paying job, he doesn't think he'll be very good at it. Habib is ____ in value and ____ in expectancy for the skill of coding.

☐ a. high; high

☐ b. low; high

☐ c. low; low

☒ d. high; low

28. Who created the framework of the Theory of Attribution?

- ☐ a. Edward Titchener
- ☒ b. Bernard Weiner
- ☐ c. Abraham Maslow
- ☐ d. Sigmund Freud

*how people interpret
success and failure*

Bernard Weiner

***luck,
effort,
task difficulty,
and abilities***

Bernard Weiner

***internal or external
stable or unstable
controllable or
uncontrollable***

Bernard Weiner

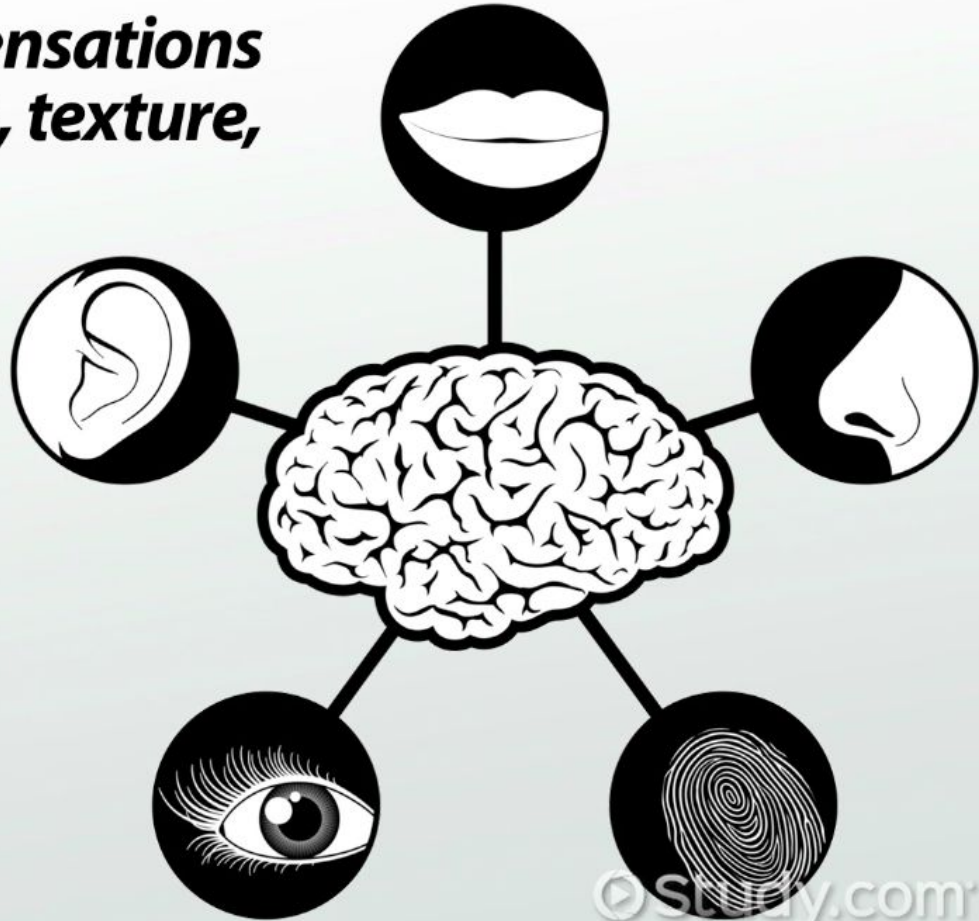

Edward Bradford Titchener

structuralism

*all thoughts can be broken
down to basic elements*

***put together memories of sensations
from your past (color, shape, texture,
smell, and taste)***

29. Why should teachers use intrinsic motivational tools?

a. They create interest, investment, and the desire to learn class material.

b. They help students compete with each other.

c, They make students' parents satisfied with class time.

d. They increase teachers' salaries.

30. What psychosocial crisis results in either a feeling of confidence or inadequacy?

a. Autonomy vs. shame and doubt

b. Identity vs. role confusion

c. Trust vs. mistrust

d. Intimacy vs. isolation

31. What is a learning environment?

a. the physical, psychological and instructional atmosphere in a classroom

b. how the classroom looks

c. the place students do homework

d. a way to describe the universal classroom

32. Before learning about differentiated instruction, students were asked to guess the meaning of the term. The teacher received these four responses. Analyze these responses and indicate which one best aligns with the concept of differentiated instruction.

☒ a. Differentiating instruction means you provide students with different options for demonstrating what they have learned.

☐ b. Differentiating instruction means you develop a different lesson for each student to allow them to demonstrate what they have learned.

☐ c. Differentiating instruction means you give all students different amounts and different kinds of work most every day.

☐ d. Differentiating instruction means you assign more work at the same level to high-achieving students.

33. Ms. Greenberg realizes that one of her students has been misbehaving in class to get the attention from her. Ms. Greenberg decides to simply ignore the behavior until the student stops associating the behavior with the reward her attention. Which technique is used in this example?

a. Extinction

b. Time Out

c. Satiation

d. Corporal Punishment

34. What are the roles of the teacher and students in a 21st century classroom?

a. Teachers are facilitators; learning is student centered and led

b. Teachers are disciplinarians; students get yelled at

c. Teachers are the center of learning; students passive

d. Teachers assign grades; students complete worksheets

35. Which of the following is NOT something that's likely to engage students in the digital generation?

a. Taking turns reading aloud from a textbook

b. Using computer software to create a class presentation

c. Watching an educational movie

d. Playing a tablet-based spelling game

36. The digital generation refers to which one of the following?

a. Students who are connected to the world through their digital devices

b. Generations of digital devices, ranging from televisions to smartphones

c. Anyone born after the introduction of digital technology

d. Students who can only learn through the use of digital devices

37. If you were trying decide which flight to take on a vacation, you would be engaging which area of the brain?

☐ a. Temporal lobe

☐ b. Amygdala

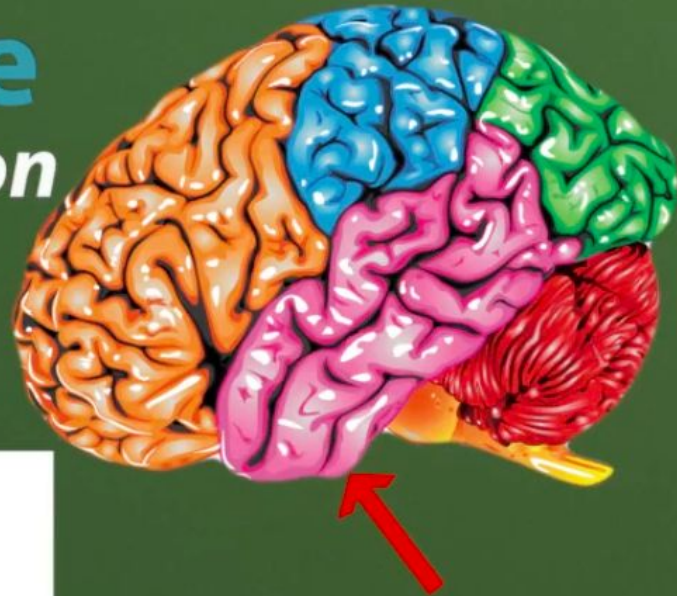

☒ c. Frontal lobe

☐ d. Parietal lobe

frontal lobe
*helps you speak,
coordinate your
movements and is
also involved when
you plan*

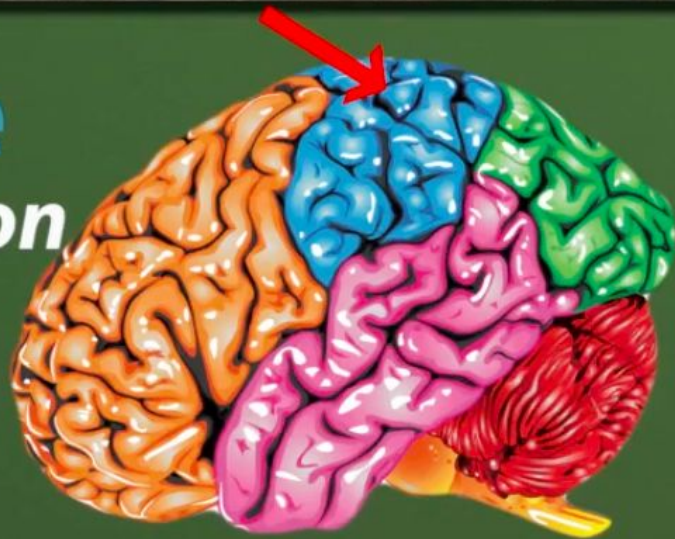

temporal lobe
*processes information
about what
you hear*

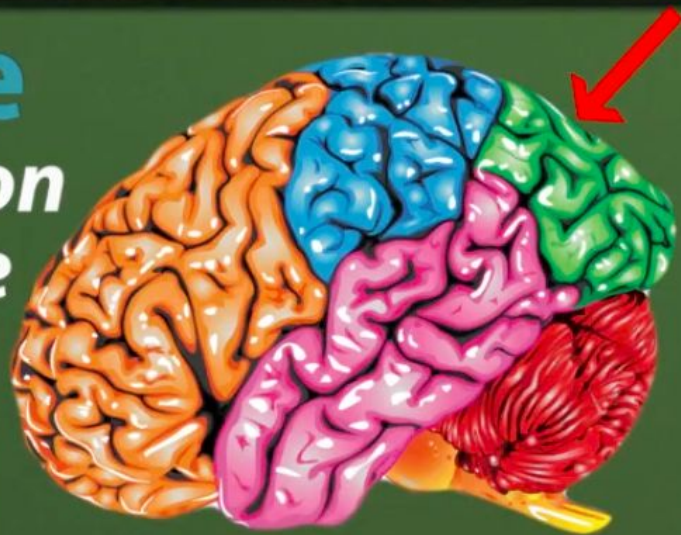

parietal lobe

*processes information
about what
you touch*

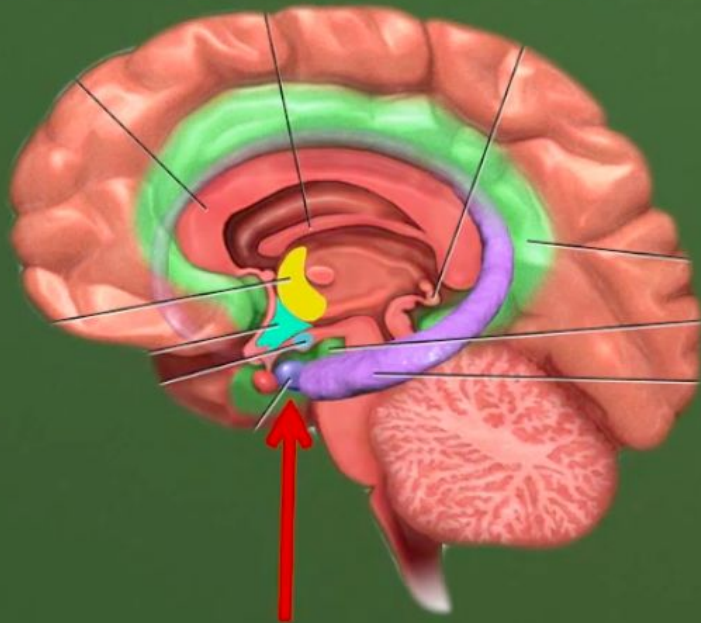

occipital lobe
*processes information
about what you see*

amygdala

*responsible for
your feelings of
fear and anger*

38. What type of technology-based tool allows the teacher to communicate with parents and students, post learning content, and assess learning?

☐ a. Online Stopwatch

☒ b. Learning management system

☐ c. Student response system

☐ d. Gradebook App

39. Mark is taking a high-stakes university exam and is sitting next to the smartest student in the class. Mark can clearly see his classmate's responses but refrains from copying the answers. Which of the following is affecting Mark's behavior?

☐ a. Ego

☐ b. Instinct

☐ c. Id

☒ d. Superego

40. Which of the following is an example of systems theory?

☐ a. A boy is ignored and left alone much of his childhood, greatly affecting how he feels about his self-image.

☐ b. A person's thought processes impact how she views the world around her.

☒ c. A young girl's interaction with her family, community, school and church all have impact on her development and growth.

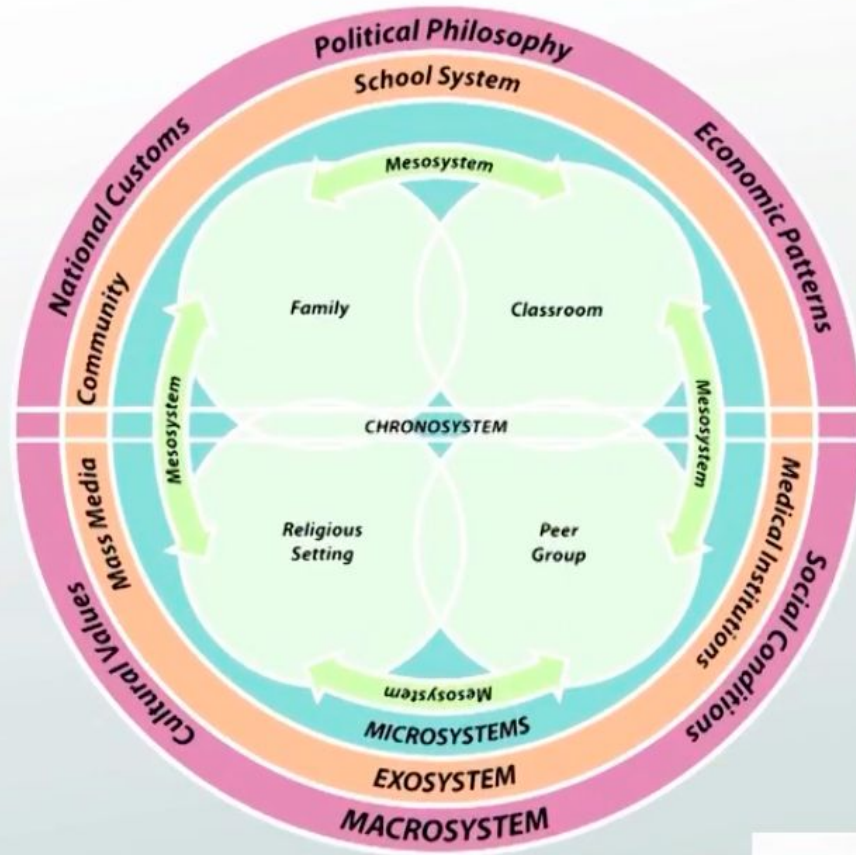

☐ d. A family that eats dinner together every night enjoys a positive, happy relationship.

Ecological Systems Theory

Urie Bronfenbrenner

WHAT IS ECOLOGICAL SYSTEMS THEORY?

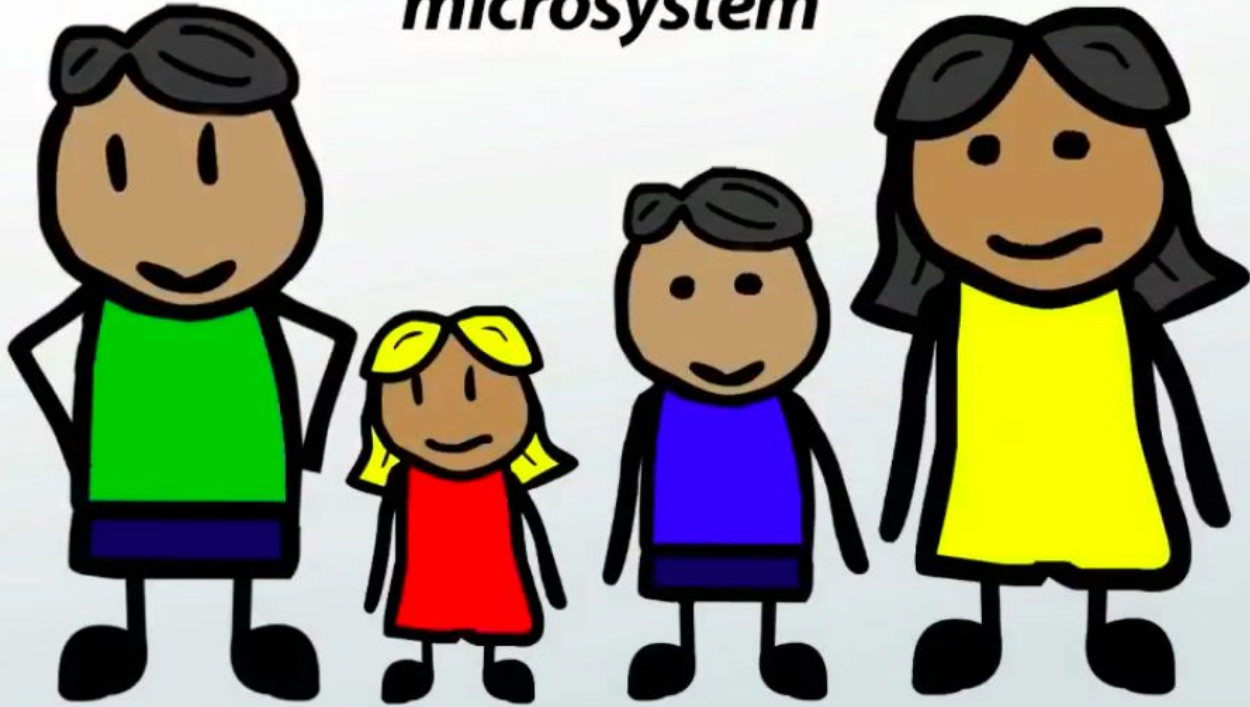

Microsystem

the system closest to the person and the one in which they have direct contact

microsystem

microsystem

Mesosystem

the interactions between the different parts of a person's microsystem

MESOSYSTEM

Exosystem

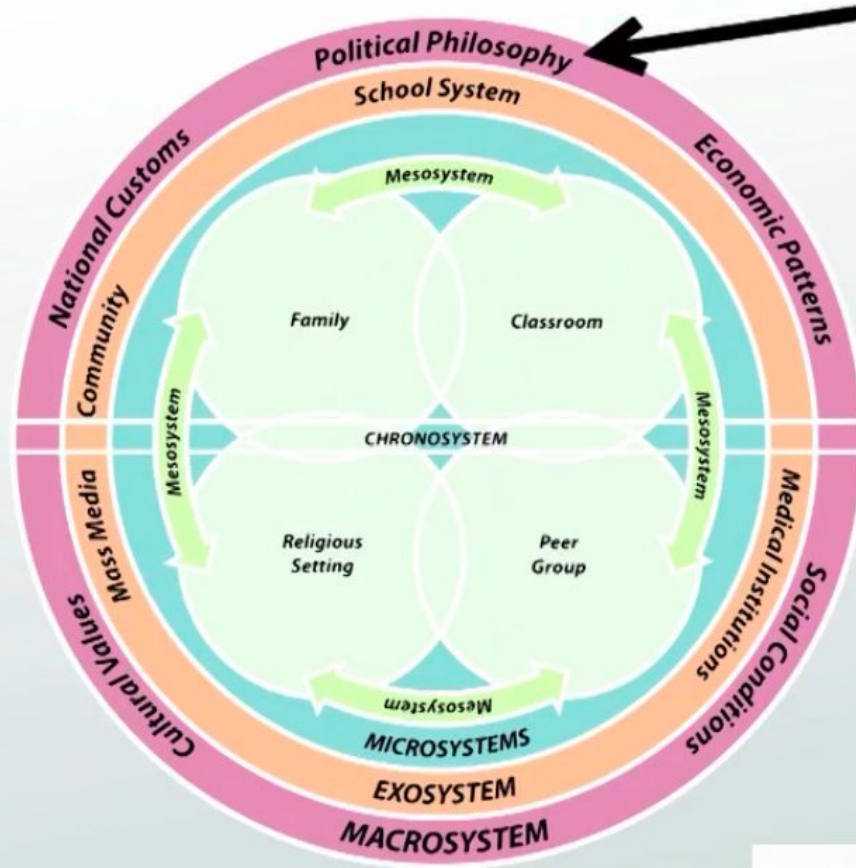

a setting that does not involve the person as an active participant, but still affects them

Macrosystem

the cultural environment in which the person lives and all other systems that affect them

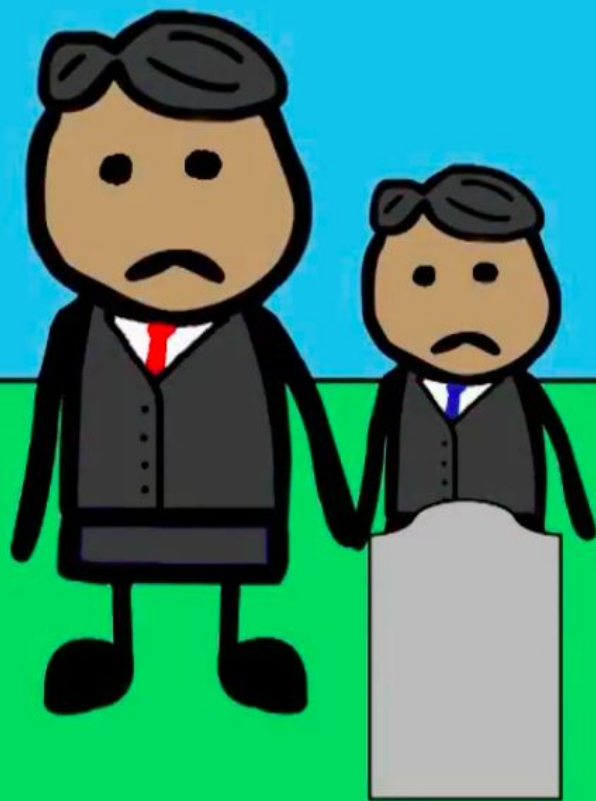

MACROSYSTEM

Chronosystem

***the dimension of time in relation
to a person's development***

41. How do the theories of Freud and Erikson differ in reference to adult development?

☐ a. Freud believed development continued into adulthood, while Erikson's theory of development ends at age 18.

☐ c. Freud believed people couldn't control their biological urges in adulthood, while Erikson thought they could.

 b. Freud's theory of development ends at age 18, while Erikson believed development continued into adulthood.

☐ d. Erikson felt that adults emphasized contributing to society, while Freud believed adults emphasized intimate relationships.

Sigmund Freud Psychosexual Theory

- ***development occurs in stages***
- ***recognizes unconscious***
- ***driven by biological forces***
- ***early experiences outweigh experiences later in life***

Erik Erikson Psychosocial Theory

- ***development occurs in stages***
- ***recognizes unconscious***
- ***driven by social forces***
- ***both early and late life experiences are important***

42. Erikson's developmental stage of industry vs. inferiority can be compared to which of Freud's psychosexual stages?

☐ a. Phallic

☒ b. Latency

☐ c. Oral

☐ d. Anal

43. Bandura's reciprocal causation model focuses on continuous interaction between the following three factors:

☐ a. cognition, behavior, reward

☐ b. learning, behavior, environment

☐ c. behavior, reward, punishment

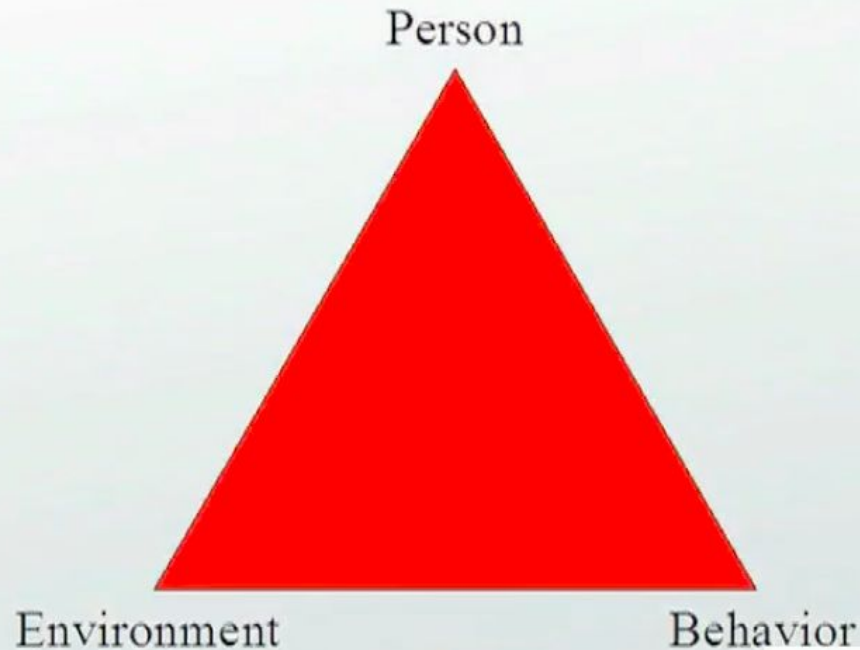

☒ d. behavior, environment, person

Bandura's theory stresses:

***Observational learning,
imitation, and modeling***

***Continuous interaction between behaviors,
personal factors, and the environment.***

Reciprocal Causation Model

44. Jose is in a casino. He sees his friends Amy and Sandra win money at a nearby slot machine. Amy and Sandra cheer and clap. Jose wants to feel the same excitement, so he sits down at a slot machine and begins to gamble. This is an example of ____.

a. vicarious reinforcement

b. environmental interaction

c. positive behavior

d. performance phobia

Vicarious

***Arouse emotional reactions
in the observer.***

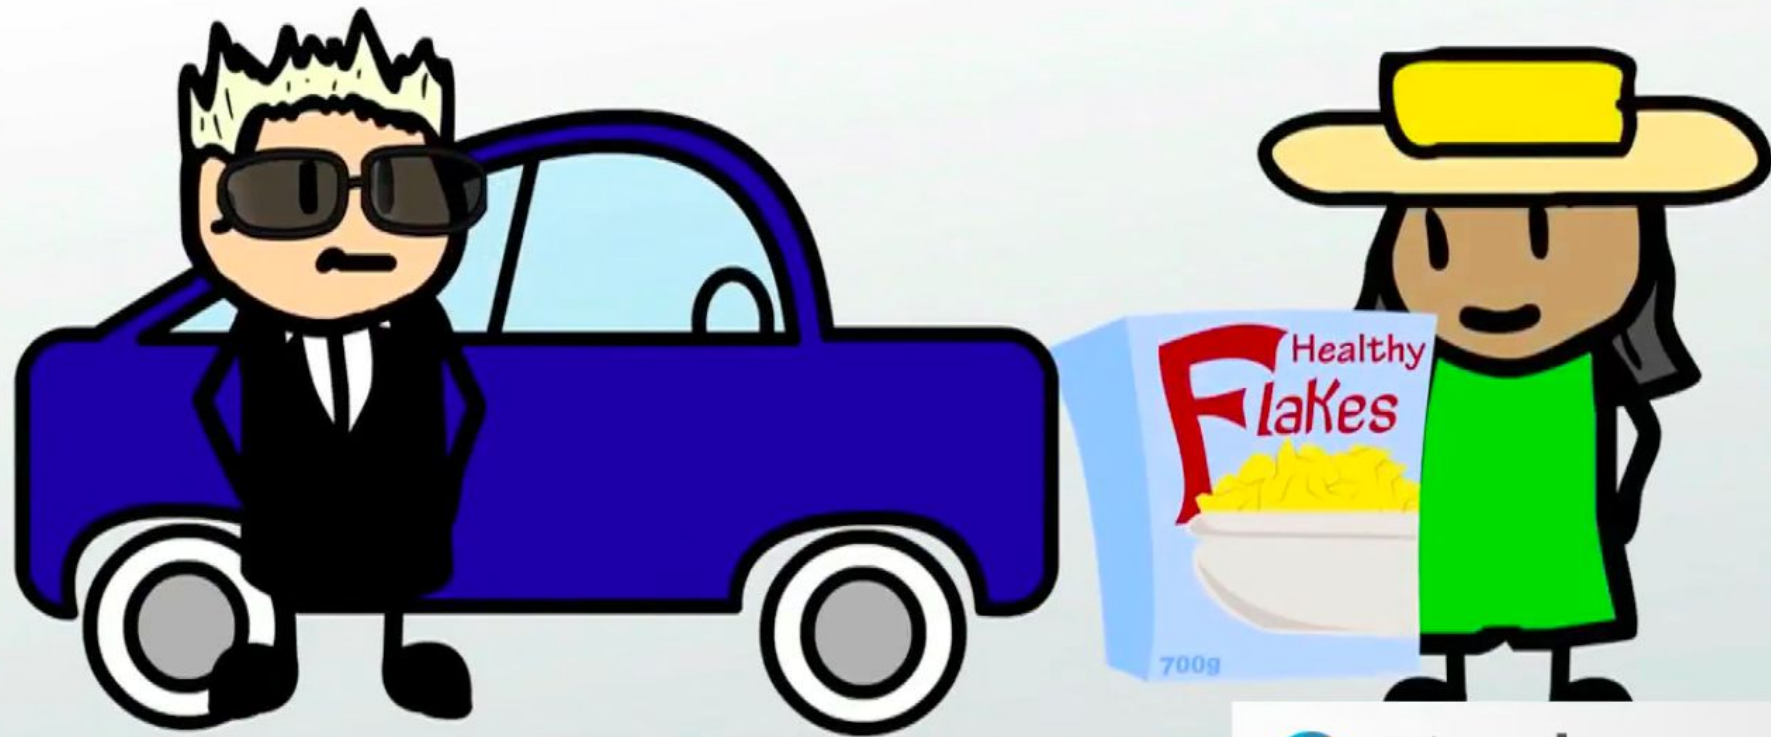

THE ROLE OF CONSEQUENCES IN LEARNING FROM MODELS

Two components of Vicarious Reinforcement

- 1. The behavior of a model produces reinforcement for a particular behavior.***
- 2. Positive emotional reactions are aroused in the observer.***

THE ROLE OF CONSEQUENCES IN LEARNING FROM MODELS

45. The process of incorporating new information into existing knowledge is known as ____, whereas the process of adjusting our schemas to fit new information and events is known as ____.

☐ a. organization;
assimilation

☒ b. assimilation;
accommodation

☐ c. accommodation;
assimilation

☐ d. schema,
accommodation

46. The level that includes the interactions between the different microsystems in a person's life is the ____.

a. mesosystem

b. macrosystem

c. chronosystem

d. exosystem

47. Knowing that someone grew up before TVs existed is an example of understanding someone based on their ____.

a. chronosystem

b. mesosystem

c. macrosystem

d. exosystem

48. Which of the following statements would Uri Bronfenbrenner agree with?

☐ a. A person's parents are the only things that influence their development.

☒ b. A person's development is affected by everything in the surrounding environment.

☐ c. A parent's workplace is part of a child's macrosystem.

☐ d. The economy and political system are part of a child's microsystem.

49. According to Gilbert Gottlieb, the development of an organism is dependent on ____.

a. the interaction of biological and environmental forces

b. environmental forces alone

c. the interaction between neural activity and the placenta

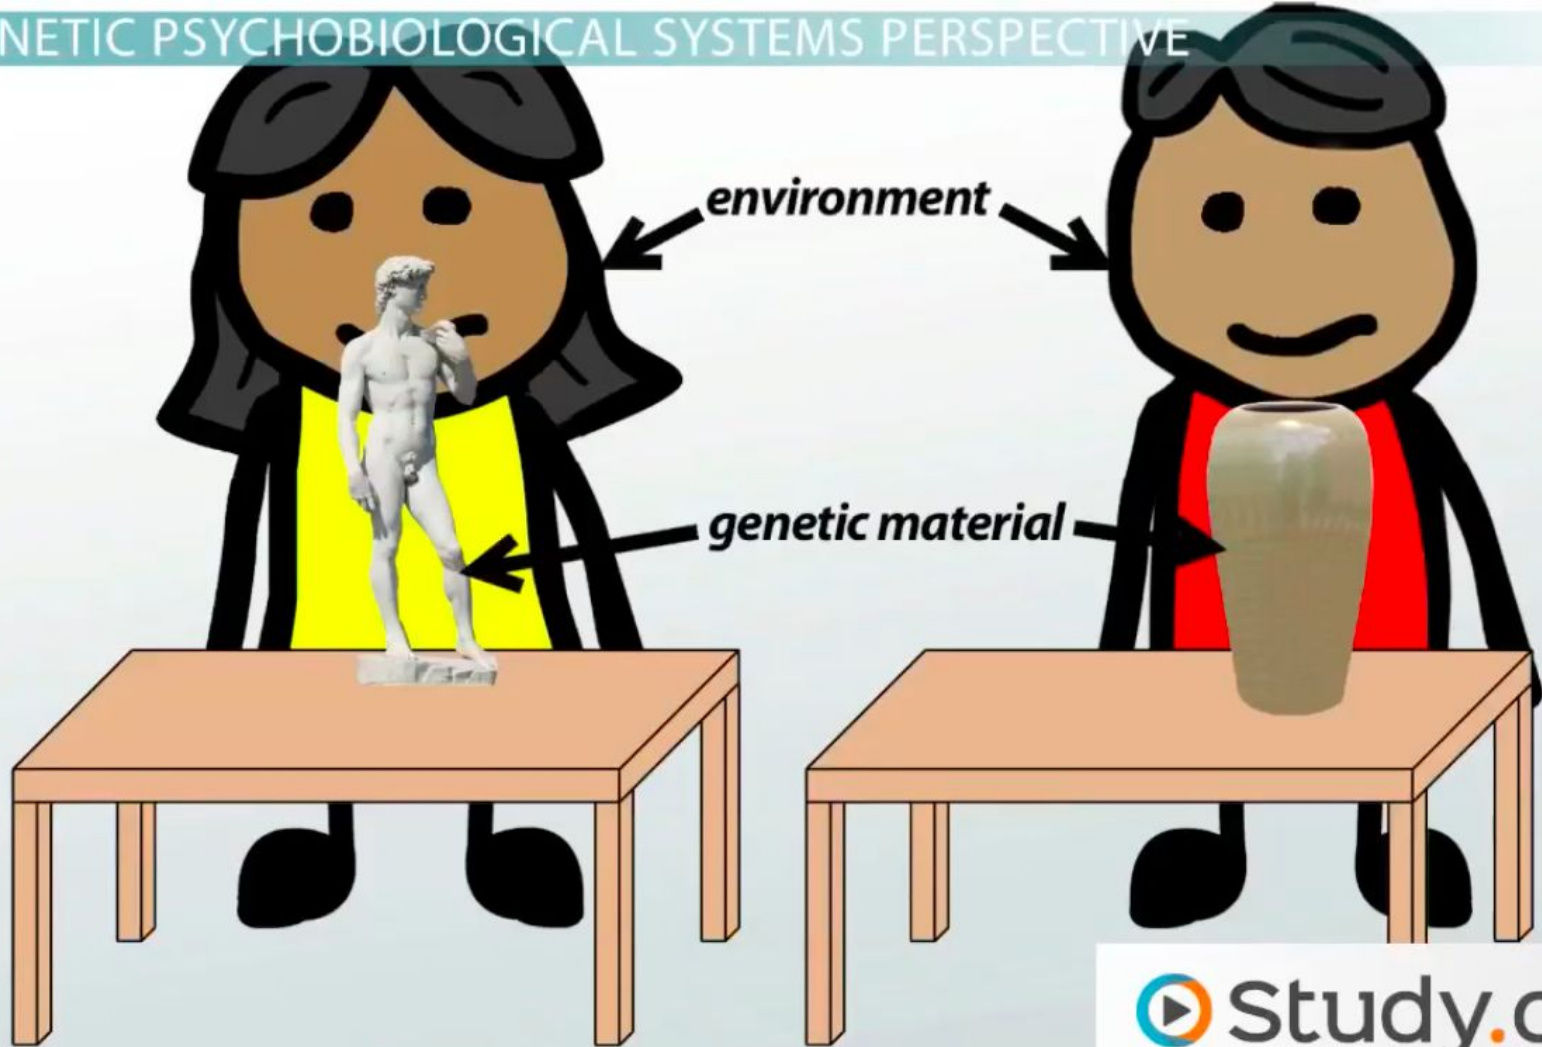

d. neurological forces alone

Epigenetic Psychobiological Systems Perspective

views development as a product of interaction between biological and environmental forces.

It includes both the genetic origins of behavior and the direct influence of the environment on the expression of these genes

EPIGENETIC PSYCHOBIOLOGICAL SYSTEMS PERSPECTIVE

Gilbert Gottlieb

Probabilistic Epigenesis

Probabilistic Epigenesis

the view that the development of an organism is dependent on the bidirectional influences of interacting biological and environmental forces that form a larger system

50. How do you define epigenesis?

☐ a. The process through which genetics and neural activity bring forth development

☐ b. The process through which behavior and environment bring forth development

☒ c. The process through which genetics and environment bring forth development

☐ d. The process through which genetics and behavior bring forth development

GURONG
PINOY

The logo features the word "GURONG" in a large, bold, blue font with a white outline and a slight 3D effect. Below it, the word "PINOY" is written in a similar bold font, but in white with a blue outline. Three yellow five-pointed stars are positioned: one above the "R" in "GURONG", and two others, one above the "I" and one above the "O" in "PINOY". A yellow sunburst graphic with multiple rays is located at the top center, behind the first star.
