

GURONG
PINOY

The logo features the word "GURONG" in a large, bold, blue font with a white outline and a slight 3D effect. Below it, the word "PINOY" is written in a similar bold font, but in white with a blue outline. Three yellow stars are integrated into the design: one is positioned above the "R" in "GURONG", and two are placed between the "U" and "R", and between the "O" and "N" of "GURONG". A yellow sunburst graphic is located behind the top of the "R" in "GURONG".

Professional Education

Final Coaching 3

1. Which of the following is NOT a purpose of assessment?

☐ a. Mechanism for review

☐ b. Motivator

☒ c. To create stress and anxiety

☐ d. Feedback

2. Informal assessments should be used when ____.

☐ a. The teacher wants to determine if students have met course objectives

 b. The teacher wants to make observations of students' social interactions with other children

☐ c. The teacher has provided advanced notice to the students to study

☐ d. The students should demonstrate their performance in a given area

3. Which of the following is an example of a performance-based assessment?

☐ a. Use of a scantron answer sheet in chemistry class

☐ b. Written book report in English class

☒ c. Oral presentation in history class

☐ d. A True/False exam in history class

4. Which of the following situations is most appropriate for a performance-based assessment?

☐ a. A science teacher wants to assess his students' ability to identify chemicals by identifying their position on the periodic table and writing a paper describing the findings.

☐ b. A math teacher wants to assess her students' ability to multiply equations on a quiz.

 c. An art teacher wants to assess her students' ability to differentiate between still-life and portraits by creating a charcoal drawing of each.

☐ d. A music teacher wants to assess his students' knowledge of treble and bass clef using a written test.

5. An assessment used to evaluate the effectiveness of instruction at the end of a specific course is referred to as a _____ assessment.

☐ a. formative

☒ b. summative

☐ c. scholastic aptitude

☐ d. general aptitude

6. Mrs. Gregg uses an assessment to evaluate children's knowledge and abilities formed in pre-school and in the home. She is using a ____ assessment.

☐ a. specific aptitude

☐ b. scholastic aptitude

☒ c. school readiness

☐ d. formative

7. An assessment that uses the same or similar questions and is evaluated using the same criteria for all test-takers is referred to as a ____ assessment.

a. standardized

b. summative

c. proctored

d. formative

8. A student complains that only 10 questions on a 100-question test were taken from the material assigned to study for the test. The student is questioning the test's ____.

a. standardization

b. reliability

c. validity

d. usability

9. A school principal wants to know the cost and length of time needed to administer an exam. This refers to the ____ of the exam.

☐ a. validity

b. practicality

☐ c. standardization

d. reliability

10. A parent is confused by her child's score on two exams testing knowledge of musical terminology. On the first test, the child scored a 90. On the second test, the score was 30. What aspect of the test is the parent questioning?

☐ a. Usability

☐ b. Validity

☐ c. Standardization

☒ d. Reliability

11. A ____ is an attribute (such as self-esteem, motivation and language proficiency) that is inferred from consistent behavior.

a. construct

b. personality

c. soft skill

d. pattern

12. Which of the following validity coefficients would indicate a highly predictive assessment?

☐ a. -0.21

☐ b. 0.21

☒ c. 0.80

☐ d. -0.80

Validity

the extent to which an assessment accurately measures what it is intended to measure

Content Validity

*the extent to which an assessment
represents all facets of tasks
within the domain being assessed*

Predictive Validity

the extent to which a score on an assessment predicts future performance

Construct

*internal trait that cannot be directly observed
but must be inferred from consistent
behavior observed in people*

Construct Validity

the extent to which an assessment accurately measures the construct (or unobservable educational or psychological trait)

$\geq 0.60 = \text{Highly Valid}$

12. Which of the following validity coefficients would indicate a highly predictive assessment?

☐ a. -0.21

☐ b. 0.21

☒ c. 0.80

☐ d. -0.80

13. A school wants to determine if an assessment has reliability over time. They administer the same assessment at the beginning of a school year and at the end. The school is assessing ____ reliability.

a. test-retest

b. internal-consistency

c. inter-rater

d. parallel-form

Reliability

the extent to which an assessment yields consistent information about the knowledge, skills, or abilities being assessed

Inter-rater Reliability

Inter-rater Reliability

Test-Retest Reliability

Test-Retest Reliability

Today

Science
EXAM

***Next
Week***

Parallel-Forms Reliability

Parallel-Forms Reliability

Internal Consistency Reliability

Internal Consistency Reliability

14. Three raters compared their individual scores in order to assess ____ reliability.

☐ a. parallel-form

☐ b. internal-consistency

☐ c. test-retest

☒ d. inter-rater

15. Mr. Hunt has been emphasizing the use of performance-based assessments in his science class. What type of performance assessment is he most likely to use to grade his students on their knowledge of the principles of gravity?

a. Experiment which involves dropping different objects to assess the rate of descent.

b. Asking the students to state the principles of gravity.

c. True or false questions about the principles of gravity.

d. Multiple-choice test about the principles of gravity.

16. What type of performance assessment allows the teacher to determine what the students are capable of for long periods of time?

☐ a. Static performance assessment

☒ b. Extended performance assessment

☐ c. Group performance assessment

☐ d. Dynamic performance assessment

Performance Assessments

Demonstrate their knowledge and skills in a non-written fashion.

Restricted Performance

Short in duration.

1

Particular exercise.

Extended Performance

Determine what the students are capable of for long periods of time.

Creating an outline
Assigning roles

Writing script
Creating props

Static Assessments

Focus on students' existing abilities and knowledge.

Dynamic Assessments

Systematically examine how a student's knowledge or reasoning may change.

17. Mr. Yaki gives his students a test where scores can range from 0 to 10. The scores result in a normal distribution. Given this information, what was probably the most common score on the test?

- ☐ a. 10
- ☒ b. 5
- ☐ c. 2
- ☐ d. 8

18. When the shape of distribution has a large rounded peak tapering away at each end, it is called a ____.

a. standard distribution

b. scatterplot

c. bell curve

d. skewed distribution

19. A group of ten students take a test and they all get an F. What type of distribution would result considering the full possible range on the test was anywhere from an F to an A?

a. A skewed distribution

b. A mean distribution

c. A normal distribution

d. A median distribution

20. Scores that indicate the level of knowledge or skills a student possesses in a specific area are referred to as ____.

a. criterion-referenced

b. raw

c. norm-referenced

d. valuable

21. A raw score represents the ____.

a. number of items on an assessment answered correctly

b. number of items on an assessment answered incorrectly

c. percent of items on an assessment answered incorrectly

d. percent of items on an assessment answered correctly

22. A percentile rank of 60 indicates that ____.

☐ a. a student has gotten 60% of the test items correct

☐ b. a student has scored worse than 60% of his or her peers

☒ c. a student has scored better than 60% of his or her peers

☐ d. a student has gotten 60% of the test items incorrect

23. Study the examples below, and choose which one is the most appropriate for use of the mode, instead of the mean or median.

☐ a. Test scores that range between 20-100

☒ b. Comparing ice cream flavors to see which one is the most popular

☐ c. Number of times middle-aged women have been in a car accident

☐ d. Number of cars speeding on a highway

24. What is the best reason to use a median summary score instead of a mean summary score?

a. There are outliers in the data.

b. The data are categorical instead of numerical.

c. The data were not obtained ethically.

d. There are questions about the validity of the data.

25. The first time Joe complimented his grandmother, she smiled and gave him a hug, a consequence he enjoyed. He learned that every time he is nice to his grandmother, she rewards him in a similar way. Now, he's more likely to be nice every time he sees his grandmother, due to this anticipated reward. What kind of learning did Joe use in this example?

☐ a. Classical Conditioning

☐ b. Cognitive

☐ c. Observational

☒ d. Operant Conditioning

26. Megumi is currently in finals week, and she has to study for six different subjects in school. Her favorite subject is English, and her least favorite subject is psychology. In order to motivate herself to study psychology, she tells herself that after studying psychology, she'll be able to skip right to English. Megumi is motivating herself using what concept from psychology?

☐ a. Piaget's Stages of Cognitive Development

☐ b. Gardner's theory of Multiple Intelligences

☐ c. Maslow's Hierarchy of Needs

☒ d. The Premack Principle

Motivational Psychology

***... based on the idea that many people
engage in behaviors because
we expect a reward for those behaviors***

EXTRINSIC AND INTRINSIC MOTIVATION

EXTRINSIC AND INTRINSIC MOTIVATION

***... studying the internal motivation
for particular behaviors***

David Premack

THE RESEARCH OF DAVID PREMACK

Higher Probability

The Premack Principle

... preferred behaviors, or behaviors with a higher level of intrinsic reinforcement, can be used as rewards, or reinforcements, for less preferred behaviors.

27. Which of these is NOT a step in the shaping process?

☐ a. Reinforcing any response that resembles the terminal behavior.

☐ b. Reinforcing a response that closely approximates the terminal behavior.

☒ c. Punishing behavior that deviates from the terminal behavior.

☐ d. Stopping the reinforcement of previously reinforced responses.

shaping

the process of reinforcing successively closer and closer approximations to a desired terminal behavior

A light blue pigeon with a yellow eye is shown in profile, facing left. The pigeon is the background for the text.

program

series of discriminative stimuli and reinforcements for subtle changes in response

1. Reinforce any response that in some way resembles the terminal behavior.

2. Reinforce the response that closely approximates the terminal behavior (no longer reinforcing the previous reinforced response).

3. Reinforce the response that resembles the terminal behavior even more closely.

4. Continue reinforcing closer and closer approximations to the terminal behavior.

5. Reinforce only the terminal behavior.

28. Which of the following assumptions is a characteristic of social constructivism?

☐ a. Individuals create meaning through interactions with others.

☐ b. Reality is invented jointly by members of society.

☐ c. Knowledge is constructed through human activity.

☒ d. All the answers are correct.

29. How can a mediated learning experience help a child advance his/her level of cognitive development?

☐ a. During a mediated learning experience, the interaction with a peer helps a child make sense of a phenomenon or event.

b. During a mediated learning experience, the interaction with an adult helps a child make sense of a phenomenon or event.

☐ c. During a mediated learning experience, a child can make sense of a phenomenon or event through experimentation.

☐ d. During a mediated learning experience, a child learns independently without the intervention of an adult.

30. The actions that cause harm toward others are known as ____ transgressions, while the actions that violate a culture's social norms are known as ____ transgressions.

☐ a. conventional; moral

b. moral; conventional

☐ c. moral; cultural

d. conventional; cultural

Prosocial Behavior

Prosocial behavior is defined as behavior directed toward promoting the well-being of another.

Prosocial Behavior

Morality

Morality is defined as one's general standards and beliefs about right and wrong.

Moral Transgressions

Moral transgressions are actions that cause harm or infringe on the needs and rights of others.

Conventional Transgressions

***Conventional transgressions
are actions that violate a
culture's general expectations
regarding socially
appropriate behavior.***

31. A child who shares her lunch snack with a classmate she wants to make friends with is in ____ of moral development.

☐ a. the second conventional stage (stage four)

b. the first conventional stage (stage three)

☐ c. the first post-conventional stage (stage five)

d. the first pre-conventional stage (stage one)

pre-conventional

first stage

second stage

conventional

CONVENTIONAL LEVEL

stage four

Kohlberg

***post-
conventional***

stage six

32. Alice and her friend used up all the paint in the art room. When the instructor confronted them, Alice didn't say a word and let her friend take the blame. Which stage of moral development in Gilligan's Ethics of Care theory was Alice demonstrating?

☐ a. Conventional

☒ b. Pre-conventional

☐ c. Extended morality

☐ d. Post-conventional

33. Lamar is a university student and is confident in his ability to make sound moral judgments. Which of the following perspectives would Gilligan expect Lamar to use?

☐ a. Male-dominant morality

☐ b. Egocentric-based morality

☐ c. Care-based morality

☒ d. Justice-based morality

Stages of Moral Development

Lawrence Kohlberg

Carol Gilligan

Stages of Moral Development

Lawrence Kohlberg

Carol Gilligan

"Women and men may have differing paths to moral development."

Stages of the Ethics of Care

Care-based Morality ***Justice-based Morality***

Care-based Morality

- ***Emphasis on interconnectedness and universality***
- ***Acting justly means avoiding violence and helping those in need***
- ***More common in girls because of their connections to their mothers***
- ***Because girls remain connected to their mothers, they are less inclined to worry about issues of fairness***

Justice-based Morality

- ***Views the world as being composed of autonomous individuals who interact with one another***
- ***Acting justly means avoiding inequality***
- ***Thought to be more common in boys because of their need to differentiate between themselves and their mothers***

Carol Gilligan's Ethics of Care Theory

Stage

Preconventional

I ♥ ME

TO I ♥ YOU

Conventional

I ♥ You more than Me

Postconventional

I ♥ Myself & YOU

34. Jessica often allows her friends to copy her science homework. She's fully aware she could be punished, but she wants her friends to do well in class. Jessica appears to be at what stage of moral development according to Gilligan's Ethics of Care theory?

☐ a. Post-conventional

☐ b. Pre-conventional

☐ c. Extended morality

☒ d. Conventional

35. The client-centered therapy, developed by Carl Rogers is defined as ____.

☐ a. a counseling approach that requires the client to make a draft of the treatment plan

 b. a counseling approach that requires the client to take an active role in his or her treatment

☐ c. a counseling approach where the therapist will try a new theory on the client

☐ d. a counseling approach where the therapist is in charge of all the aspects of the treatment

36. During a therapy session, Dr. Garcia listens to the client carefully and then summarizes the thoughts and feelings of the client and repeats them back to her. What technique is Dr. Garcia using to show the client that he has been listening carefully?

☐ a. Projection

☒ b. Reflection

☐ c. Deflection

☐ d. Self-actualization

client-centered therapy

focuses on developing a strong therapeutic relationship rather than specific therapeutic techniques

self-actualization

the tendency of all human beings to move forward, grow, and reach their full potential

WHAT IS CLIENT-CENTERED THERAPY LIKE?

genuineness
congruence

Study.com

3:30

WHAT IS CLIENT-CENTERED THERAPY LIKE?

unconditional positive regard

the therapist accepts clients for who they are without evaluation

Study.com

4:09

WHAT IS CLIENT-CENTERED THERAPY LIKE?

empathy

the ability to understand what the client is feeling in the here-and-now

Study.com

4:51

WHAT IS CLIENT-CENTERED THERAPY LIKE?

reflection

summarizing what a client has just said

37. Client-centered therapy is also known as ____.

☐ a. person-centered therapy

☐ b. non-directive therapy

☐ c. Rogerian therapy

☒ d. All of the answers are correct.

38. Which equation below is the correct one to calculate IQ scores?

☐ a. (Fluid intelligence/Crystallized intelligence) X 7.50

☐ b. (Mental age/Chronological age) X 50

☒ c. (Mental age/Chronological age) X 100

☐ d. (Chronological age/Mental age) X 50

39. 'The ability to solve new problems, use logic in new situations, and identify patterns' is the definition of which basic type of intelligence?

☐ a. Interpersonal

b. Fluid

☐ c. Crystallized

d. Spatial

Raymond Cattell

1963

Fluid Intelligence

***The ability to solve new problems,
use logic in new situations, and identify patterns***

Crystallized Intelligence

The ability to use learned knowledge and experience

40. Which of the tasks below makes the most use of crystallized intelligence as opposed to fluid intelligence?

☐ a. Learning the street names in a new city

☐ b. Applying literary theory to a first-edition novel, just printed

☐ c. Identifying clues at a crime scene and putting them together

☒ d. Memorizing the state capitals in the USA

41. A politician who excels at remembering names, fostering cooperation and inspiring those around him exhibits ____.

☐ a. intrapersonal intelligence

☒ b. interpersonal intelligence

☐ c. linguistic intelligence

☐ d. logical intelligence

42. A person with a heightened self-awareness has a high level of ____.

☐ a. bodily intelligence

☐ b. naturalistic intelligence

☐ c. interpersonal intelligence

☒ d. intrapersonal intelligence

43. A master chess player employs ____.

a. logical intelligence

b. intrapersonal intelligence

c. visual intelligence

d. interpersonal intelligence

44. A person who learns mathematics better when they physically work through a problem themselves instead of listening to a lecture utilizes ____.

☐ a. linguistic intelligence

b. kinesthetic intelligence

☐ c. interpersonal intelligence

d. naturalistic intelligence

45. Sasha gets a low grade on her math homework. Normally, her parents would take away her allowance and explain why math is important. However, on this occasion, they listen when Sasha explains that she was distracted because she was ill, so they decide not to punish her. What kind of parenting style is this?

☐ a. Mixed modeling

b. Authoritative

☐ c. Neglecting

d. Indulgent

46. When Samir accidentally breaks a glass plate while washing dishes, his parents immediately scream that he's a bad kid and beat him. Which behaviors is Samir likely to exhibit in school as a result of his parents' authoritarian parenting style?

☐ a. Aggressiveness, selfishness, and impulsiveness

☐ b. Independence but with low trust levels

☐ c. Trust, compliance, and friendliness toward strangers

☒ d. Low self-esteem and an inability to conceptualize what is morally right or wrong

47. According to educational psychologists, which parenting style is considered to be ideal -- most often resulting in children with high self-esteem, good social skills, and success at school?

☐ a. Authoritarian

☐ b. Indulgent

☐ c. Neglecting

☒ d. Authoritative

48. Jonah is supposed to play video games for only 15 minutes per day, but one day, he plays for 30 minutes. His parents do nothing and allow him to play as long as he wants with no punishment, and instead, they praise him for getting to level 10 in the game. What parenting style are Jonah's parents using?

☐ a. Mixed modeling

b. Indulgent

☐ c. Neglecting

d. Authoritative

49. Anita gets all Ds and Fs on her report card. Her parents don't seem to care and tend to avoid spending time with her. They give Anita neither positive nor negative attention. What kind of parenting style is this?

☐ a. Mixed modeling

☐ b. Authoritative

☐ c. Authoritarian

☒ d. Neglecting

50. 'The ability to use learned knowledge and experience' is the definition of which basic type of intelligence?

a. Spatial

b. Interpersonal

c. Crystallized

d. Fluid

GURONG
