

Gurong Pinoy International
Preboard Examination (Professional Education)

1. Which one of the following categories in the taxonomy indicates the highest level of learning?

- a. **Synthesis**
- b. Application
- c. Comprehension
- d. Analysis

2. Teacher Joanne makes her preschoolers touch, rub, and manipulate natural and artificial object in learning, such as a leaf, petals, wooden blocks, etc. What kind of learning experience is given importance in this case?

- a. Anatomic
- b. **Tactile**
- c. Kinesthetic
- d. Chimera

3. History teacher Ted made efforts to make connections between new information of the EDSA peaceful revolution with past lessons on the Philippines Hispanic revolution. How is this effort of teacher Ted known in the cognitivist learning theory?

- a. **Elaboration**
- b. Modification
- c. Differentiation
- d. Integration

4. In the scientific process, what thinking skill is referred in the process of mentally analyzing and evaluating data on evidences?

- a. Creative thinking
- b. **Critical Thinking**
- c. Interpretative thinking
- d. Constructive thinking

5. To what domain does the pre-school lesson objective "To color the fruits correctly" apply?

- a. Affective
- b. **Cognitive**
- c. Psychomotor
- d. Behavioral

6. If teacher Cora sees honesty as a timeless virtue for yesterday/today/tomorrow, what principle does she value?

- a. Pragmatism
- b. **Perennialism**
- c. Existentialism
- d. Conceptualism

7. There are values in the home environment that should form part of the school environment during early childhood development. Which of the following has greatest significance to carrying over from the home to the school?

- a. **Respect**
- b. Caring
- c. Hygiene
- d. Discipline

8. Which of the following can be classified as a terminal learning outcome?
- a. Dichotomy between aquatic and land animals
 - b. Planned change for animal's protection
 - c. Understanding the frog's life cycle
 - d. Sense of scientific attitudes**
9. According to Piaget's theory on cognitive development, children in the pre-operational stage are egocentric in thinking. One should therefore understand why a three-year old _____
- I. Assumes that other people see, hear and feel exactly the same as he does
 - II. Is unable to see a situation from another person point of view.
 - III. Expects everyone to pay attention to him.
- a. I and II b. II only **c. I, II and III** d. I only
10. Among the following contemporary theories of learning, which explore situations confined to certain people, place or events?
- a. Constructivism
 - b. Social cognition
 - c. Case-based reasoning**
 - d. Ecological physiology
11. Of the following forms of communication, which is the most personal and not so broad as to threaten human intimacy?
- a. Facebook
 - b. Face to face communication**
 - c. E-mailing
 - d. Letter correspondence
12. Jocelyn is already in college. What reading activities should she be guided on following the stages/period of continuity/ progression in development reading?
- a. Expanding reading ability
 - b. Beginning
 - c. Refinement in the use of reading materials**
 - d. Reading readiness
13. Which of the following is NOT a factor in early child development?
- a. Decorum of the child
 - b. Language spoken by the child
 - c. Early stimulation of the child
 - d. Age of the child**

- a. Give more independent study
 - b. Make students work collaborately**
 - c. Make students reflect on how they learn
 - d. Make student feel good about themselves
15. Teacher Jean asked her students to bring small plants in pots, and then organize and mark them according to categories. e.g. flowering, ornamental, herbal, etc. What skill was desired in this activity?
- a. Discovery activity
 - b. Processing activity
 - c. Investigative activity
 - d. Classifying activity**

16. Which of the following can be a more effective strategy to advance higher esteem for the teaching profession and its rightful share of available talents?
- a. Adequate remuneration and other means of job satisfaction**
 - b. Removal of entry examination for aspirants
 - c. Quota system for the teaching profession
 - d. Use of advertising and promotions
17. Which should be used as standards for interpreting a learner's performance?
- a. Grade
 - b. Objectives**
 - c. Relative measures
 - d. Forms
18. What within the experiential part of the Basic Education Curriculum is Values Education that serves as the practice environment for holistic learning to develop a healthy personal and rational self-identity?
- a. Makabayan
 - b. MAPEH
 - c. TLE
 - d. Edukasyon sa Pagpapahalaga**
19. Which of the following is an example of positive non-verbal behavior by teachers?
- a. Teachers frowns and sneers
 - b. Teacher grabs, slaps student
 - c. Voice volume shows arrogance
 - d. Stands or sits that shows alertness**
20. Among the cognitive objectives, what refers to putting together the components of an idea in order to summarize a concept?
- a. Analysis
 - b. Synthesis**
 - c. Comprehension
 - d. Application
21. Considering the children's cognitive developmental stages based on Piaget's theory, in the preschool how would you tackle a lesson on classification? Ask one preschooler
- a. to classify objects on one attributes at a time
 - b. to arrange objects based on two or three attributes at the same time
 - c. just to color objects to develop manipulative skills because they are not yet capable of classifying**
 - d. color objects to classify them
22. At what historical phase did Filipinos get formal tutoring for democratic sovereign life which we started to enjoy on July 4, 1946?
- a. Hispanic colonial regime
 - b. June 12, 1898 Declaration of Independence
 - c. Japanese occupation
 - d. American colonial regime**

23. What variation of storytelling involves children telling a story with the use of material sets and props?
- a. **Story enactment**
 - b. Lap board stories
 - c. Puppet stories
 - d. Flannel board stories
24. Scientific attitudes need to be developed among young learners. Which attitudes does pupil Lina lack when she accused without evidence her seatmate Tin of stealing her sandwich?
- a. Humility
 - b. Persistence
 - c. Curiosity
 - d. **Objectivity**
25. Schools are referred to as second homes. What pillar stands for caring and nurturing schools?
- a. Learning to be
 - b. Learning to do
 - c. **Learning to live together**
 - d. Learning to know
26. The teacher is obliged to ensure certain qualities in choice and use of assessment instruments. What was not observed when teacher Leslie gave a test that included materials that were not covered by class lessons?
- a. Efficiency
 - b. **Validity**
 - c. Practicality
 - d. Reliability
27. Teacher Lina says “very good” to every student after an answer. Is this a sound classroom practice?
- a. No, because the teacher must equally say “very bad” when necessary
 - b. Yes, because students must be made to feel good every time
 - c. Yes, because the teacher must be generous with praise
 - d. **No, because genuine praise must be deserved**
28. Teacher Loraine is aware that she cannot teach reading in a flash. Following the Goddel’s Reading Skills Ladder, what step will she first focus on for beginners?
- a. Using sentence structural analysis
 - b. **Basic sight words**
 - c. Using word phonetic analysis
 - d. Using contextual clues
29. Following Ausubel’s Meaningful Learning Theory, what kind of behavior model is applied by the Cinderella character in portraying moral lessons on life from rags-to-riches?
- a. Concrete
 - b. **Symbolic**
 - c. Live
 - d. Real
30. Of the type of toys for children, which is not only safe but is a favorite tool for a child’s aesthetic expressions?
- a. manipulative toys
 - b. musical toys
 - c. building books
 - d. **craft toys**

31. How do you classify the objective “To summarize the salient features of a good essay” in terms of Bloom’s Hierarchy of educational objectives at the cognitive level?
- a. analysis
 - b. application
 - c. knowledge
 - d. synthesis**
32. Which of the following situations shows technology engaging learners in active, constructive, intentional, authentic and cooperative learning?
- a. Posting messages/ photos in the Facebook
 - b. Discovery activity in intense group research**
 - c. Surfing internet information sites
 - d. Collating materials from the web
33. Among written categories of assessment methods, what instrument did teacher Mona use when she used a checklist in order to grade the dramatic performance of students in a play?
- a. product rating scale
 - b. oral questioning
 - c. performance test**
 - d. observation and self-reports
34. Education should help in inculcating a spirit of empathy in students so that it can have a positive effect to their social behavior throughout their lives. This refers to learning to
- a. live together**
 - b. know
 - c. be
 - d. do

- a. support of students
 - b. support of parents and community
 - c. support of education officials
 - d. get permit for rally outside of work hours**
36. Teachers evaluate student’s achievements because _____
- a. they want to know how their students perceived their method of teaching
 - b. they have to translate their student’s performance into marks
 - c. they have finished the coarse outline
 - d. they want to know if they are able to reach the goal of their teaching efforts**
37. What scientific skill is demonstrated in inferring the probable weight of four guavas, when one of these guavas weigh 50 grams?
- a. comparison
 - b. observation
 - c. interpretation
 - d. measurement**
38. In science teaching, what can be classified as a self-directed strategy in knowing concepts, principles and motivations?
- a. field trips
 - b. project**
 - c. realia
 - d. role playing

39. What value between sexes is inculcated in efforts to develop non-existent attitude among young children such as through the use of non-biased language, neutral toys, etc.?
- a. neutrality
 - b. gender respect**
 - c. sensitivity
 - d. justice
40. English teacher Jun teaches grammar by limited concentration on memory and application of rules, immediately tested by daily quizzes. What learning theory is applicable in this case?
- a. cognitivist
 - b. Gestaltist
 - c. connectionist
 - d. behaviorist**
41. How is the moral character of a teacher most accurately summed up when he/she have reached a level of development emotionally, socially, spiritually, appropriate to age status?
- a. being a virtuous person
 - b. being loving person
 - c. being morally mature**
 - d. being fully human
42. In technology setting, which is essential so that learners can achieve effectively the learning outcomes?
- a. graphs and maps
 - b. audio visuals
 - c. digital or computer devices**
 - d. realia
43. At the elementary level which must be done to curb pupil's lack of motivation, low self-esteem, and lethargy?
- I. help children discover their special talents and interests
 - II. organize interest clubs
 - III. focus solely on academic for lesson mastery
- a. III only
 - b. I and II**
 - c. I only
 - d. II only
44. Which is most likely the behavior of students whose minds are solely guided by the id?
- a. students would be very considerate and understanding with one another
 - b. students would discuss and ask questions a lot
 - c. students would do more independent homework
 - d. students would find it difficult to wait patiently for their turn at the canteen when hungry**
45. Which of the following is an effective closure of a lesson parallel to the importance given to set induction?
- a. Time is over. See you again tomorrow!
 - b. There is the bell. Goodbye class!
 - c. It is already time. See you tomorrow!
 - d. Before we end, state our science concept again.**

46. Among unit plan components, to what cluster do models, replicas, charts, graphs and specimens belong?

- a. objectives
- b. resources and materials**
- c. learning activities
- b. evaluation

47. Guided by Max Scheler's Hierarchy of values, what did student Mimi prefer to practice when she decided to go on an out-of-town picnic to enjoy the day with friends, rather than attend a required Sunday mass?

- a. vital values
- b. spiritual values
- c. pleasure values**
- d. values of the holy

48. Student teacher Ana has a very strong knowledge base in Earth Science. In effect, which will she most likely be capable of doing?

- a. can make an experimental set up on the planets
- b. can answer all questions pertaining to Earth Science**
- c. can easily make new associations with other disciplines
- d. can plan a trip to Mars

49. Using rubrics, which is futuristic and hypothetical among the following criteria chosen to assess a planned student affairs program for the school year?

- a. Feasibility of projects/ activities
- b. Projected impact of projects**
- c. Significance of the student affairs program
- d. Full participation of students

50. How do you classify the objective "To identify the parts of the flower" in terms of Bloom's taxonomy of educational objectives at the cognitive level?

- a. application
- b. analysis
- c. knowledge**
- d. synthesis

51. Teacher Lia manages a nursery class. What stage/period of reading should she observe in teaching reading skills to her pupils?

- a. period of refinement
- b. reading readiness**
- c. period of rapid growth
- d. beginning reading

52. In his class, Teacher Jim carefully focuses on his students' strengths and weaknesses. What type of test should he give?

- a. summative
- b. formative
- c. diagnostic**
- d. developmental

53. Beyond formal learning, modern schools give regard to parents and the community. What contemporary theory of learning favors this attitude?

- a. academic cognition
- b. social cognition**
- c. organizational cognitions
- d. economic cognition

54. In introducing a lesson, at what point has Teacher Noni engaged his students in metacognition?
- a. mention the part of the lesson
 - b. introduction of the topic and learning outcome of the lesson**
 - c. tell the class the topic to be discussed and learned
 - d. talk about the lesson
55. How is the disorderly behavior of children classified when they are shy?
- a. psychomotor
 - b. intellectual
 - c. moral
 - d. psychological**
56. In the revised basic education curriculum, what is the basic tool subject and essential learning areas in addition to Filipino, English and Science?
- a. Music
 - b. Philippine culture
 - c. Mathematics**
 - d. Physical Education
57. Which of the following opinions about books is about the sensible delight they give the reader?
- a. Books are treasured wealth of the world
 - b. The book is man's greatest invention so far
 - c. A man without a book is like a body without a soul
 - d. A book is a garden in a pocket**
58. Which of the following is NOT among the elements to consider in applying David Ausubel's advance organizer process?
- a. age of learners
 - b. degree of prior familiarity
 - c. nature of the learning material
 - d. subject overview**
59. Which forms the foundation of all cognitive objectives without which the next level of higher thinking skills cannot be attained?
- a. analysis
 - b. application
 - c. synthesis
 - d. knowledge**
60. Which one of the following categories in the taxonomy indicates the highest level of learning?
- a. comprehensive
 - b. application
 - c. synthesis**
 - d. analysis
61. Within the context of instruction learning, which of the following manifests the teacher as an effective teacher?
- a. great command of technology
 - b. teacher transmission of bulk of information
 - c. setting of a fun environment in teaching
 - d. discovery by students of learning opportunities**

62. Teacher Anna answers that the aim of development is the complete fulfillment of man and his development in a holistic way as an individual member of a family and community and as a responsible citizen. Which fundamental type of learning does Teacher Anna assert?

a. **learning to be**

b. learning to do

c. learning to live together

d. learning to know

63. Ms. Casio was having problems with discipline in her class. Which questioning technique is appropriate for the situation?

a. varied questions

b. **stimulating questions**

c. difficult questions

d. low- level thinking questions

64. At what point does the science learner engage in critical thinking?

a. gathering evidence

b. learning procedures

c. **examining or judging objects**

d. observing objects

65. Synthesis is a complex method for creativity and may require a skilled facilitator to implement. What is a more parallel methodology which can be more easily applied in classroom or in school?

a. group dynamics

b. seminar

c. conference

d. **brainstorming**

66. Principal Dona is carefully focused on providing healthy, beautiful, and nurturing physical environment in her school. She believes learners are shaped by their own environment. What philosophical heritage of learning does she values most?

a. existentialist

b. **behaviorist**

c. essentialist

d. perennialist

 - III. Review of the past events leading to 1896
 - IV. Assessment of achievements of the 1898 republic
- a. I, II, III and IV
 - b. IV, III, II and I
 - c. **III, I, II and IV**
 - d. II, IV, I and III
83. One very important type of communication skill which is receptive in nature and requires one to be very alert is
- a. writing
 - b. reading
 - c. speaking
 - d. **listening**
84. Who introduced Gestalt psychology which influenced the importance of understanding in the teaching – leaning process?
- a. Robert Gagne
 - b. David Ausubel
 - c. **Max Wertheimer**
 - d. Albert Bandura

85. This is a more appropriate understanding of technology in education?
a. inventions and equipment
b. methods and process
c. hardware, designs and equipment
d. channels and instruments
86. Of the various facets of schedule of class events of the day, which pertains to the flow of daily activities to facilitate learning, comfort and security?
a. variety
b. balance
c. routine
d. pace
87. What does a teacher do if she practices differentiated instruction?
a. sees to it that all students are motivated to learn
b. present learning material appropriate to the students' developmental level
c. applies a multidisciplinary teaching approach
d. makes students collaborate with one another on instructional tasks
88. What is the most basic foundation for moral principles?
a. the civil code
b. the criminal code
c. the manual law
d. the constitution
89. Following Albert Bandura's social learning theory, what can be achieved from the public television's live coverage of Senate hearings on plunder cases, such as on the misuse of pork barrel funds?
a. personality imaging
b. behavior change
c. TV revenues
d. entertainment
90. Reading involves an organic and mental process. Which faculty of a normal person is used for the physiological process of seeing and identifying images (words)?
a. nose
b. hands
c. ears
d. eyes
91. In a one-hundred item test, what does Jenny's raw score of 70 mean?
a. she got a score above the median
b. she surpassed 30 of her classmates in terms of scores
c. she got 70 items correct
d. she failed the exam
92. What is the introduction of new ideas, goods, services and practices in education e.g. new educational technologies?
a. progression
b. integration
c. innovation
d. inculcation

- a. help them to develop a sense of self and personal identity
 - b. consistently provide children with care and affection
 - c. help them cope with the demands of academic tasks
 - d. help them develop their sense of personal control over physical skills and a sense of independence**
94. From researches and your own observation, which among the following is NOT an identifiable characteristic among elementary students?
- a. strong gang spirit
 - b. physical growth and development
 - c. boys growing more rapidly than girls**
 - d. strong tendency to imitate
95. During Hispanic days in the Philippines, friars taught the Cartilla and discipline by the “use of the rod” on erring young “indio” students. What type of conditioning was applied for this practice?
- a. onward conditioning
 - b. operant conditioning**
 - c. overt conditioning
 - d. outright conditioning
96. What is being developed when students are engaged in activities that require examination, diagnosis or analysis?
- a. open- mindedness
 - b. critical thinking**
 - c. objective thinking
 - d. creativity
97. Problems of discipline (misdeeds, lapses, minor offenses) can be reduced through enthusiasm which can be matched by the enthusiasm of learners. What can draw a laugh and reduce tension from all?
- a. verbal reinforces
 - b. non- verbal gestures
 - c. dialogues
 - d. sense of humor**
98. Teacher Joe makes his lesson content within the capacity of his young fourth grade learners. What is the quality of teacher Joe’s lesson content when he fits lessons to learners’ capacity to absorb the lesson content?
- a. learnability**
 - b. validity
 - c. balance
 - d. variability
99. It is believed that the teacher has an invisible aura of light surrounding his/her person that influences the class. To what learning does this influence best relates to?
- a. learning by drills
 - b. learning by recitation
 - c. learning by trial and error
 - d. learning by observation and imitation**

100. For young Filipino learners studying English as a second language, which of the following can best generate language learning?

- a. listening activities
- b. simple exercise by use**
- c. drills
- d. study of grammar

101. What mistake is Teacher Zeny trying to avoid by never ignoring any student or group of students in her discussions and other activities?

- a. non-direction
- b. dangled activity
- c. divided attention**
- d. abrupt end

102. Teaching English, Teacher Ramon is careful about his lesson content. What quality of content did he achieve when he made certain her information came with the “information explosion” which he got in the internet, such as on how to effectively teach phonics?

- a. balance
- b. interest
- c. significance**
- d. learnability

103. Teacher Lina practices experiential or learner-centered teaching. Which of the following strategies will she LEAST engage in?

- a. project discovery quest
- b. problem-solving activity
- c. lecture- test/assessment**
- d. laboratory

104. In Piaget’s theory of cognitive development, at what age does the child acquire the use of logic and reasoning so as to be able to sort objects and situations by size, color, shape and type?

- a. 0-1 years
- b. 4-7 years
- c. 2-3 years
- d. 7-12 years**

105. What initiative provides unity and camaraderie among professional teachers?

- a. communication with former classmates
- b. membership in the teacher association**
- c. friendship among peers
- d. loyalty to one’s alma mater

106. Which words can be used in formulating competency outcomes in the comprehension level?

- a. reframing, critic, evaluation
- b. discussion, differentiation, comparison**
- c. generalization, composition, construction
- d. perception, recognition, observation

107. Teacher Buenaflor was awarded for her special efforts to create a nurturing environment in the school. What character has she shown?

- a. humble
- b. simple
- c. loving**
- d. mature

108. Teacher Lorna thinks she is the best among peers, while others are below her stature. What is her attitude towards people?

- a. bukas nalang attitude
- b. crab mentality

- c. holier than thou attitude**
- d. bahala na attitude
