LET
Questions

1. Which of the following best develops fine motor skills of pre-school learners?

- a. Fun and challenging activities involving hand muscles ✓
- b. Daily coloring book activities
- c. Repeated writing drills
- d. Right eating habit activities

Gross motor skills pertain to skills involving **large muscle movements**, such as independent sitting, crawling, walking, or running. **Fine motor skills** involve use of **smaller muscles**, such as grasping, object manipulation, or drawing.

2. The concept of Kindergarten school is drawn from a _____ root word which means "children's garden."

a. Italian

c. French

b. German

d. English

The German educator **Friedrich Froebel** is significant for developing an Idealist philosophy of early childhood education and establishing the kindergarten, a school for four-and five-year-old children that is found worldwide.

3. Which teacher's personal trait is demonstrated by being gender sensitive and inclusive towards learners?

a. Motivation

c. Efficiency

b. Fairness

d. Passion

Every child has the right to quality education and learning. **Inclusive education** means all children in the same classrooms, in the same schools. It means real learning opportunities for groups who have traditionally been excluded – not only children with disabilities, but speakers of minority languages too.

4. After the 1987 Constitution, what is the first legal basis that makes teaching a profession and considers teachers as professionals?

a. Code of Ethics for Professional Teachers

b. R.A. 7836

c. P.D. 1006

d. R.A. 7640

Republic Act (R.A.) 7836 (The Philippine Teachers Professionalization Act of 1994) mandates the conduct of the Licensure Examination for Teachers (LET). It was enacted in recognition of the role of teachers in nation-building and development through a responsible and literate citizenry.

5. Which of the following is the best relationship for the school and community?

a. Community rule

c. Partnership ✓

b. School supervision

d. Teacher-led projects

Family-school-community partnerships are a shared responsibility and reciprocal process whereby schools and other community agencies and organizations engage families in meaningful and culturally appropriate ways, and families take initiative to actively support their children's development and learning.

6. What is the appropriate teaching-learning strategy to respond to cultural diversity among learners?

- a. Variety of teaching and assessment methods
- b. Use of comparative assessment tools
- c. Group entire class homogenously
- d. One set of teaching-learning methods

Cultural diversity is about appreciating that society is made up of many different groups with different interests, skills, talents and needs. It also means that you recognize that people in society can have differing religious beliefs and sexual orientations to you.

7. Which of the following exemplifies differentiated instruction directed at heterogeneous groups in a class?

- a. Different tasks, appropriate for each group
- b. Same task for all groups
- c. Divide class, same tasks
- d. Three different teachers to assess groups

Differentiation means tailoring instruction to meet individual needs. Whether teachers differentiate content, process, products, or the learning environment, the use of ongoing assessment and flexible grouping makes this a successful approach to instruction.

8. What level of education is primarily aimed at by the UN's "Education for all?"

a. Secondary

c. Basic

b. Tertiary

d. Lifelong learning

The K to 12 Program covers 13 years of **basic education** with the following key stages:

Kindergarten to Grade 3

Grades 4 to 6

Grades 7 to 10 (Junior High School)

Grades 11 and 12 (Senior High School)

9. Which of the following shows a total physical environment that supports learning?

- a. Safe and secure building and classroom structures
- b. Bulletin boards in every building
- c. Tall three-storied building
- d. Classrooms with furniture

A conducive learning environment is more than just a classroom—it's a space in which students feel safe and supported in their pursuit of knowledge, as well as inspired by their surroundings.

10. What kind of displays should be placed on bulletin boards of schools?

a. Instructional-interactive

c. Motivational-affective

b. Newsworthy-informational

d. Decorative-colorful

Interactive displays support active learning through student engagement opportunities and creating a more efficient classroom for teachers and administrators.

11. By being sensitive and responsive in class above gender, racial, economic differences or class Teacher Mina has shown _____ to her students.

a. passion

c. efficiency

b. motivation

d. fairness

Fairness refers to the consideration of learner's needs and characteristics, and any reasonable adjustments that need to be applied to take account of them.

12. How will you characterize the use of PowerPoint presentation to deliver a lesson?

a. Technology

c. Academics

b. Culture

d. Machinery

Where teachers lack content or pedagogical knowledge, **technology** can support structured lesson plans or text-based nudges to build this capacity. Teachers' use of technology will empower them to leverage an array of resources to provide more focused, personalized learning to students.

13. What kind of teaching-learning approach is adopted in teaching the same major subjects (English, Math, Science) in the K-to-12 curriculum?

- a. Spiral teaching-learning
- b. Redundant teaching-learning
- c. Differentiated teaching-learning
- d. Higher order thinking teaching-learning

In a **spiral curriculum**, learning is spread out over time rather than being concentrated in shorter periods. In a spiral curriculum, material is revisited repeatedly over months and across grades.

14. Why are routines helpful for class management?

a. To ensure order

c. To punish offenders

b. To eliminate stress

d. To reward performers

Teaching students what to do during daily **routines** will help them be successful and can minimize disruptions in the classroom. The beginning of class, in between lessons, and the end of the school day are all critical times when having clear routines can help maximize instruction time. Teaching classroom routines as early in the school year as possible will allow students to learn expectations and the flow of the classroom.

15. Among communication indicators, which can ensure effective communication between teacher and learners?

a. Technology-based

c. Group dynamics

b. Fun learning

d. Two-way ✓

Two-way communication involves feedback from the receiver to the sender. This allows the sender to know the message was received accurately by the receiver. Communication is also negotiated which means that the sender and receiver listen to each other, the messages then gathers information to respond.

16. Which of the following ensures a safe and secure environment for learners in school?

- a. Having security guards
- b. Keeping the ID system
- c. Caring and protective teachers ✓
- d. Installing CCTV cameras

The goal of **child protection** is to promote, protect and fulfil children's rights to protection from abuse, neglect, exploitation and violence as expressed in the UN Convention on the Rights of the Child.

17. Which of the following exemplifies making lesson relevant to the life of students along the 3 domains of cognitive, affective, and psycho-motor skills?

- a. Lesson with real-person, real-events connection
- b. Lesson with clear logical idea connections
- c. Lesson with pre-test and post test
- d. Lesson taught with teacher peers

In education, **authentic learning** is an instructional approach that allows students to explore, discuss, and meaningfully construct concepts and relationships in contexts that involve real-world problems and projects that are relevant to the learner.

18. What is the major aim in essentialist education along traditional learning of school subjects?

a. Applied knowledge

c. Thorough learning

b. Experiential learning

d. Rote memorization

Essentialism is the educational philosophy of teaching basic skills. This philosophy advocates training the mind. Essentialist educators focus on transmitting a series of progressively difficult topics and promotion of students to the next level or grade. This philosophy stresses core knowledge in reading, writing, math, science, history, foreign language, and technology. The tools include lecturing, memorization, repetition, practice, and assessment. William C. Bagley (1874–1946) was one of the most influential advocates of essentialism.

19. On classroom activities, the following are appropriate for learners who have good spatial skills, but NOT to include:

- a. community projects ✓
- b. concept maps
- c. visual presentation
- d. preparing graphs

Spatial intelligence, or visuo-spatial ability, has been defined “the ability to generate, retain, retrieve, and transform well-structured visual images” (Lohman 1996). It's what we do when we visualize shapes in our “mind's eye.” It's the mental feat that architects and engineers perform when they design buildings.

20. What is being asked of students in a task to determine elements and explain them in relation to other parts or the whole?

- a. analysis ✓
- b. assessing
- c. recall
- d. understanding

Analysis means a detailed examination of anything complex in order to understand its nature or to determine its essential features, a thorough study doing a careful analysis of the problem, a statement of such an examination and separation of a whole into its component parts.

21. On principles of teaching-and-learning, what do Cognitive theorists see as the way to develop learners?

- a. learning by modelling of skills
- b. learning by thinking ✓
- c. learning by perceiving the environment
- d. learning by imitation of ideas

Cognitivism is a learning theory that focusses on how information is received, organized, stored and retrieved by the mind. It uses the mind as an information processor, like a computer. Therefore, cognitivism looks beyond observable behavior, viewing learning as internal mental processes.

22. In the K to 12 Basic Education Curriculum, science is formally taught from:

a. Grade 4 to Grade 12

b. Grade 1 to Grade 10

c. K to Grade 12

d. Grade 3 to Grade 12 ✓

Republic of the Philippines
Department of Education
DepEd Complex, Meralco Avenue
Pasig City

K to 12 Curriculum Guide

SCIENCE

(Grade 3 to Grade 10)

August 2016

23. You want to know who a good teacher is. In the Philippines which would you consult?

- a. Philippine Professional Standards for Teachers ✓
- b. Professional Philippine Teacher Standards
- c. National Competency-Based Teacher Standards
- d. Professional Code of Ethics

The **Philippine Professional Standards for Teachers** defines teacher quality in the Philippines. The standards describe the expectations of teachers' increasing levels of knowledge, practice and professional engagement. At the same time, the standards allow for teachers' growing understanding, applied with increasing sophistication across a broader and more complex range of teaching/learning situations.

24. If I apply Vygotsky's theory of learning, which will I do?

- a. allow the child to choose his learning activity
- b. establish classroom disciplining from the very start
- c. assist the child where he needs assistance until he can be on his own ✓
- d. follow a logical arrangement of topics

Vygotsky scaffolding is a theory that focuses on a student's ability to learn information through the help of a more informed individual. When used effectively, scaffolding can help a student learn content they wouldn't have been able to process on their own.

25. Due to the advent of COVID 19, which initiative is required for curriculum change?

a. curriculum implementation

b. curriculum evaluation

c. curriculum design

d. curriculum modification ✓

Curricular accommodations or modifications are alterations to the curriculum to better suit the needs of students who have some level of disadvantage. It can help children take full advantage of the learning activities, routines and materials in your classroom, or in any learning environment. These modifications can be helpful to any child who is struggling to participate.

26. In a lesson, when do teachers make ideas universally applicable to other ideas or situations?

a. summarization

b. generalization

c. comparison ✓

d. abstraction

Comparison involves looking at two or more things or ideas and considering their similarities and differences. In many classrooms, teachers use Venn diagrams to help students organize their thoughts when making simple comparisons.

27. What is the philosophical basis for education in recent years of General Education subjects in career studies in College level?

a. utilitarianism

b. traditionalism

b. essentialism

c. perennialism

Essentialism is an educational philosophy that strives to ensure that students acquire a common core of knowledge in a systematic, disciplined way. In contrast, **perennialism** is an educational philosophy that states one should teach the things that are of everlasting importance to all individuals everywhere.

28. As a teacher, how will you best understand the need to nourish the child along the axiom “Man does not live by bread alone”?

- a. need to enforce discipline
- b. need to teach human values ✓
- c. need to follow the syllabi
- d. need to teach the 3Rs

The proverb **man does not live by bread alone** means that human beings need more than the simple necessities to keep them biologically alive, they need things that feed them mentally, spiritually, aesthetically, and they need things that give their lives meaning.

29. What does “grading on the curve” mean?

- a. grading compared with achievement
- b. normal scale of grades of students ✓
- c. achievement more important than grades
- d. grading more important than achievement

Grading on a curve means adjusting student scores after an assignment. The idea of "the curve" goes back to a bell curve. In a typical class, teachers can expect a majority of grades to fall near the class average, with a smaller number of A grades and failing grades.

30. Which is the best class performance on a 100-item test?

- a. mean is 80 and SD is 2 ✓
- b. mean is 82 and SD is 10
- c. mean is 90 and SD is 2
- d. mean is 80 and SD is 12

The formula for calculating a **z-score** is $z = (x - \mu) / \sigma$, where x is the raw score, μ is the population mean, and σ is the population standard deviation. As the formula shows, the z-score is simply the raw score minus the population mean, divided by the population standard deviation.

31. Among varied tasks, how can the virtual learning management system help instruction?

- a. through face-to-face learning
- b. through ending instructional tasks
- c. through digital game activities ✓
- d. through posting assignments

A virtual learning management system delivers online learning materials to students and allows both teachers and students to develop, upload, and share content, as well as plan courses and lessons. Most of it also offer real-time data tracking and communication between students and professors.

32. Which of the following exemplifies differentiated instruction directed at heterogenous groups in a class?

- a. different tasks, appropriate for each groups ✓
- b. divide class, same tasks
- c. three different teachers to assess groups
- d. same task for all groups

Differentiation means tailoring instruction to meet individual needs. Whether teachers differentiate content, process, products, or the learning environment, the use of ongoing assessment and flexible grouping makes this a successful approach to instruction.

33. Vygotsky says that learning occurs in a social context. Which learning activity is most appropriate?

a. research

b. peer discussion ✓

c. individual PowerPoint presentation

d. journal entry

Vygotsky's sociocultural theory asserts that learning is an essentially social process in which the support of parents, caregivers, peers and the wider society and culture plays a crucial role in the development of higher psychological functions.

34. Which is most likely the behavior if students whose minds are solely guided by the ID?

- a. students would discuss and ask questions a lot
- b. students would be very considerate and understanding with one another
- c. students would find it difficult to wait patiently for their turn at the canteen when hungry ✓
- d. students would do more independent work

According to Freud's psychoanalytic theory, the **id** is the primitive and instinctual part of the mind that contains sexual and aggressive drives and hidden memories, the **super-ego** operates as a moral conscience, and the **ego** is the realistic part that mediates between the desires of the id and the super-ego.

35. What level of the cognitive process is required in writing an essay on the personality of a fellow classmate?

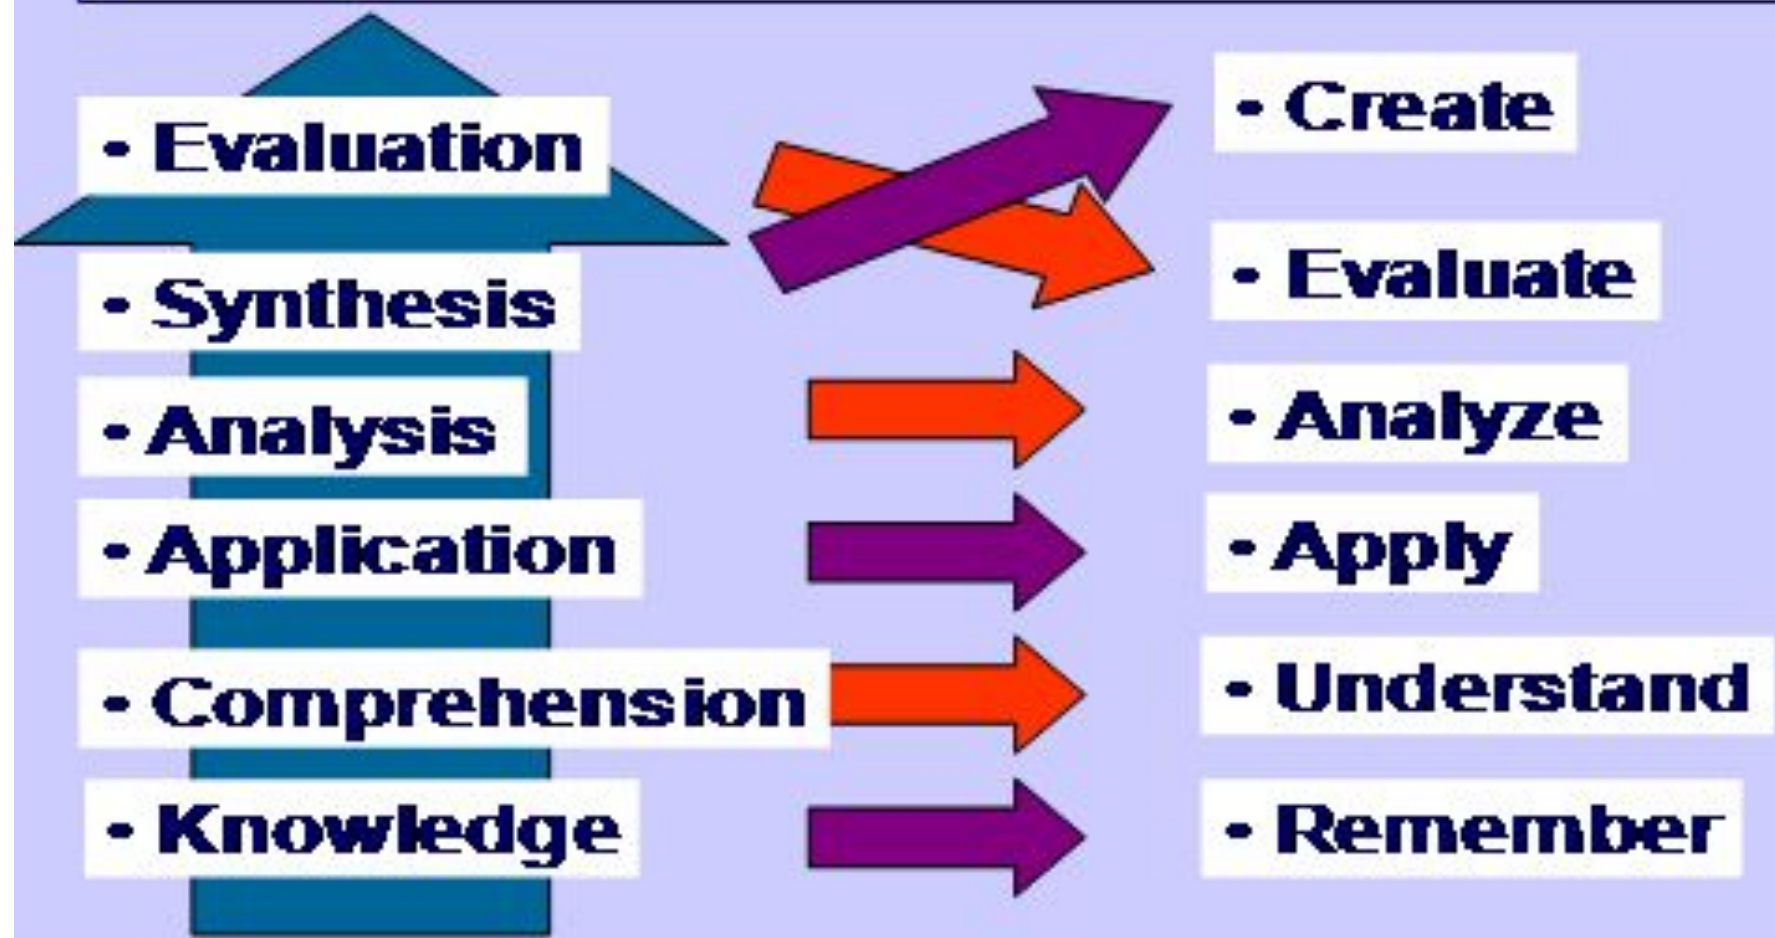

a. Creating

c. Analyzing

b. Recalling

d. Applying

"Old" Blooms "Revised" Taxonomy

36. Why is a daily lecture NOT pragmatic as a lesson methodology?

- a. It is no longer used in modern teaching
- b. It is always not liked by students
- c. It may not apply to specific lessons
- d. It is a dull methodology

Pragmatism is an educational philosophy that says that education should be about life and growth. That is, teachers should be teaching students things that are practical for life and encourage them to grow into better people. Many famous educators, including John Dewey, were pragmatists.

37. Which of the following ideas exemplify stereotyping that is unfair to student-learners?

- a. All students require quality instruction
-  b. All students from peasant communities are dull
- c. All students have rights to be respected
- d. All students can best learn at their own pace

In social psychology, a **stereotype** is a fixed, over generalized belief about a particular group or class of people. By stereotyping we infer that a person has a whole range of characteristics and abilities that we assume all members of that group have.

38. Teacher Sonny finds that student Elisa is emotionally insecure. Which of the following is the best way to assist Elisa?

- a. Give her extra assignments
- b. Give her more physical and less mental work
- c. Exempt her in some subjects
-  d. Align activities to her needs

Alignment between activities and assessments helps minimize wasted time as students are able to focus on skills geared towards the learning objectives.

39. Which of the following is practiced in a brainstorming situation?

- a. Suggestions must have merit
- b. Only good ideas are allowed
- c. No objections to ideas
- d. Opinions must meet counter opinions

Brainstorming is a method of generating ideas and sharing knowledge to solve a particular commercial or technical problem, in which participants are encouraged to think without interruption. **Brainstorming** is a group activity where each participant shares their ideas as soon as they come to mind.

40. Which materials will you use for instructional planning of course content and strategies?

a. instructional materials

c. Syllabus

b. Seating arrangement

d. exhibits

Curriculum contains all the subjects and outlines how they will be studied during the course while **syllabus** is more detailed version for each subject under the course.

41. Which is regarded by scholars as the faculty of intelligence linked to creative thinking among learners?

a. Analytical thinking

c. Judgment

b. Imagination

d. Logical thinking

Imagination aids in the development of social, emotional, creative, physical, lingual, and problem-solving skills in children. These are important skills to develop in early childhood, as they can be good markers for understanding a child's overall development. But mostly, playing pretend is fun for kids.

42. What is required in order to go up the next grade level for a student who did not meet expectations in TWO learning areas?

- a. Pass remedial classes
- b. Take remedial classes even without passing them
- c. Repeat the whole grade level
- d. Reduction to lower level

Classroom assessment is an integral part of curriculum implementation. It allows the teachers to track and measure learners' progress and to adjust instruction accordingly. Classroom assessment informs the learners, as well as their parents and guardians, of their progress.

43. How will you characterize present efforts to use concrete situations in teaching Math concepts and formula?

a. Symbolic mathematics

c. Theoretical mathematics

b. Applied mathematics

d. Abstract mathematics

Applied mathematics involves the application of mathematics to problems which arise in various areas, e.g., science, engineering or other diverse areas, and/or the development of new or improved methods to meet the challenges of new problems.

44. What is shown by results in a pre-test?

- a. Present psycho-motor skills
- b. Current moral values
- c. Past experiences
- d. Previous knowledge ✓

Pre-tests are a non-graded assessment tool used to determine pre-existing subject knowledge. Typically, pre-tests are administered prior to a course to determine knowledge baseline, but here they are used to test students prior to topical material coverage throughout the course.

45. Of the following, most important for classroom management is ensuring that _____.

a. latecomers are duly noted

 b. the classroom is conducive to learning

c. instructional tools are used

d. the students are quiet in class

A conducive environment for learning,
such as one with comfortable classroom
set-ups, relevant use of teaching
materials and interesting classroom
activities, will further motivate the
students to learn.

46. According to progressivist educators like Carl Rogers, what is the essence of creativity among school learners?

a. Conformity

c. Industry

b. Convention

d. Novelty

Rogers' theory of personality development was based on humanistic psychology. According to his approach, everyone exists in a world full of experiences. These experiences shape our reactions that include external objects and people. Also, internal thoughts and emotions. This is known as their phenomenal field.

47. What kind of mistaken goal among students is hurting others to make up for being hurt. rejected, unloved thus becoming cruel, hostile or violent towards others?

a. Power-seeking

c. Withdrawal

b. Attention-getting

d. Revenge-seeking

4 Goals of Misbehavior

Goals (Child's Negative Approach)	What the Child is Actually Needing	How You Feel When Subjected to This Misbehavior	How Your Child May Act/Respond to Correction	Positive Ways to Respond
ATTENTION	Contact/Belonging Physical or emotional contact with other human beings.	"Would you knock it off!" <i>Annoyed; Irritated</i>	Will stop behavior but start again very soon.	Ignore behavior. Give FULL attention at other times. Act, don't talk.
POWER (Rebellion)	Power Be able to influence their environment (or at least feel a measure of control)	"You can't get away with that!" <i>Provoked; Challenged</i>	Will increase misbehavior or give in - only to fight another day.	Remove yourself from conflict. Don't fight or give in. Talk about it after a cooling off period.
REVENGE	Protection To protect himself from physical harm or from threats to his self-esteem	"How could you do this to me?" <i>Hurt; Angry</i>	Will continue to hurt you or increase misbehavior.	Refuse to be hurt. (Avoid temptation to hurt back.) Withdraw from conflict. Show love.
INADEQUACY (Avoidance)	Withdrawal Ability to withdraw, re-group, center	"What can I do?" <i>Despair; Pity</i>	Will become passive (helpless), refuse to try	Be patient. Find ways to encourage child. Build skills using baby steps

48. How is periodic reporting of student grades useful?

a. As feedback

c. As way to please parents

b. As an obligation

d. As way to win support for the school

Feedback is information given to the learner about the learner's performance relative to learning goals or outcomes. It should aim to (and be capable of producing) improvement in students' learning. **Feedback** redirects or refocuses the learner's actions to achieve a goal, by aligning effort and activity with an outcome.

49. What is the descriptor for a numerical grade of 90 as level of proficiency?

a. Outstanding

c. Fairly Satisfactory

b. Satisfactory

d. Very Poor

Table 10. Descriptors, Grading Scale, and Remarks

DESCRIPTOR	GRADING SCALE	REMARKS
Outstanding	90–100	Passed
Very Satisfactory	85–89	Passed
Satisfactory	80–84	Passed
Fairly Satisfactory	75–79	Passed
Did Not Meet Expectations	Below 75	Failed

50. What numerical grade corresponds to the descriptor "Did not meet expectations?"

a. Below 75%

c. 85%

b. 80%

d. 90%

Table 10. Descriptors, Grading Scale, and Remarks

DESCRIPTOR	GRADING SCALE	REMARKS
Outstanding	90–100	Passed
Very Satisfactory	85–89	Passed
Satisfactory	80–84	Passed
Fairly Satisfactory	75–79	Passed
Did Not Meet Expectations	Below 75	Failed

51. What is demonstrated by DepEd's emphasis on learning and assessment for percentage contribution to the grade of students in Grades 1-to-10?

-  a. More importance for performance tasks
- b. More stress on student discipline
- c. More value for written work
- d. More stress on leadership

Table 4. Weight of the Components for Grades 1–10

	Components	Languages	AP	EsP	Science	Math	MAPEH	EPP/ TLE
1 to 10	Written Work	30%			40%		20%	
	Performance Tasks	50%			40%		60%	
	Quarterly Assessment	20%			20%		20%	

52. What approach to motivating students is used by making encouraging remarks, such as "I know you can do it; keep trying; that's the boy/girl?"

- a. Assertive approach
- b. Success approach
- c. Behavioral modification approach
- d. Acceptance approach ✓

Approaches to Classroom Management

1. Assertive Approach

- Expects teachers to specify rules of behavior and consequences for disobeying them and to communicate these rules and consequences clearly.

2. Business-Academic Approach

- Emphasizes the organization and management of students as they engage in academic work.

3. Behavioral Modification Approach

- Spends little time on the personal history of students or on searching for the reasons for a particular problem.

4. Group Managerial Approach

- Emphasizes the importance of responding immediately to group student behavior that might be inappropriate or undesirable in order to prevent problems rather than having to deal with them after they emerge.

5. Group-Guidance Approach

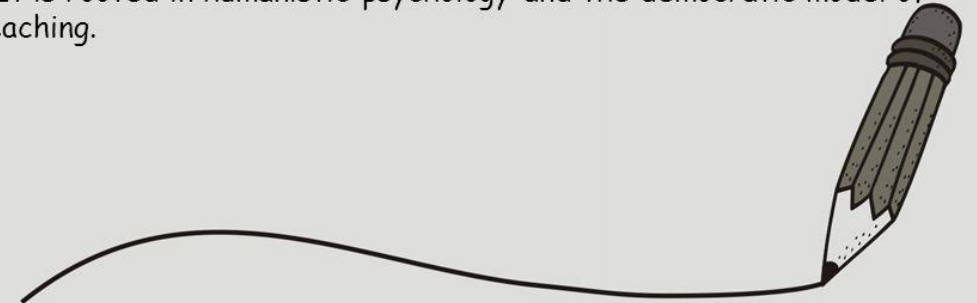

- Based on changing the surface behavior of the students on a group basis.

6. Acceptance Approach

- It is a discipline rooted in humanistic psychology and maintains that every person has a prime need for acceptance.

7. Success Approach

- It is rooted in humanistic psychology and the democratic model of teaching.

53. Among thinking skills, Complex-Cognitive means ability

_____.

- a. to maintain distinctions
- b. to break down varied information
-  c. to integrate varied information
- d. to identify and place ideas into categories

There are seven comprehension skills that learners can develop, one is the **analysis** this is the ability to break down complex information into component parts, second **focusing or scanning** the ability to select relevant or important information without being distracted, third the **comparative analysis** the ability to select a correct time from among several alternatives and to compare information, fourth **narrowing** the ability to identify and place new information into categories, fifth **complex cognitive**, sixth **sharpening** to maintain distinction between cognitive structures including old and new information, last was the **tolerance** it is to monitor and modify thinking, the ability to deal without frustration.

54. Which item page in newspapers demonstrates critical thinking worthwhile for use in instruction on current issues and events?

a. News page

c. Opinion page

b. Entertainment page

d. Society page

Critical thinking is the intellectually disciplined process of actively and skillfully conceptualizing, applying, analyzing, synthesizing, and/or evaluating information gathered from, or generated by, observation, experience, reflection, reasoning, or communication, as a guide to belief and action.

55. What is the descriptor for a numerical grade of 80 as level of proficiency?

a. Satisfactory

c. Outstanding

b. Very Satisfactory

d. Advanced

Table 10. Descriptors, Grading Scale, and Remarks

DESCRIPTOR	GRADING SCALE	REMARKS
Outstanding	90–100	Passed
Very Satisfactory	85–89	Passed
Satisfactory	80–84	Passed
Fairly Satisfactory	75–79	Passed
Did Not Meet Expectations	Below 75	Failed

56. What is the philosophy behind Philippine schools that seek to promote democratic opportunities for all and humanistic education through lifelong learning?

a. Classical education

c. Perennialism

b. Progressivism

d. Positivism

The **progressivist classroom** is about exploration and experience. Teachers act as facilitators in a classroom where students explore physical, mental, moral, and social growth. Common sights in a progressivist classroom might include small groups debating, custom-made activities, and learning stations.

57. What is asked by the teacher in making students do a deduction or inference on the lesson presented to the class?

a. Summary

c. Conclusion

b. Assumption

d. Hypothesis

The **conclusion paragraph** should restate your thesis, summarize the key supporting ideas you discussed throughout the work, and offer your final impression on the central idea. This final summation should also contain the moral of your story or a revelation of a deeper truth.

58. What is the descriptor for a numerical grade of 80 as level of proficiency?

- a. satisfactory ✓
- b. advanced
- c. very satisfactory
- d. outstanding

Table 10. Descriptors, Grading Scale, and Remarks

DESCRIPTOR	GRADING SCALE	REMARKS
Outstanding	90–100	Passed
Very Satisfactory	85–89	Passed
Satisfactory	80–84	Passed
Fairly Satisfactory	75–79	Passed
Did Not Meet Expectations	Below 75	Failed

59. When is it best for teacher Anna to set up classroom routines, e.g., passing of paper, seeking permission in class, etc.?

- a. at the end of the year
- b. in the middle of the year
- c. at start of every class
- d. at the start of the year ✓

Routines create structure and promote mental, physical and emotional health. The absence of a routine can often lead to stress and feelings of unmanageability.

60. Which is true of a constructivist teaching learning process?

I. based on students' questions and interests

II. interactive

III. dialogue

IV. group work

a. II and III

b. I and IV

c. I and II

d. I, II, III and IV ✓

Examples of constructivist classroom activities:

1. Reciprocal teaching/learning
2. Inquiry-based learning (IBL)
3. Problem-based learning (PBL)
4. Cooperative learning.

61. When will parents find reporting of grades of their children meaningful?

- a. by distributing grade report cards
- b. by comparing grades of individual students
- c. by telling parents the limitations of their children
- d. by explaining grades and performance of students

Grading is used to evaluate and provide feedback on student work. In this way, instructors communicate to students how they are performing in the course and where they need more help to achieve the course's goals. For instructors, grades help to assess what information, concepts, and skills students have successfully understood and which ones they have not. This kind of information helps you know what you may need to reiterate in class and what may require reworking in the course design. Grades also provide a standardized way of communicating student performance to third parties, including the departments in which students are enrolled, and students themselves.

62. At what level of Kohlberg's stages of moral development is taxi driver Ed returning the wallet of a passenger who left it in his cab?

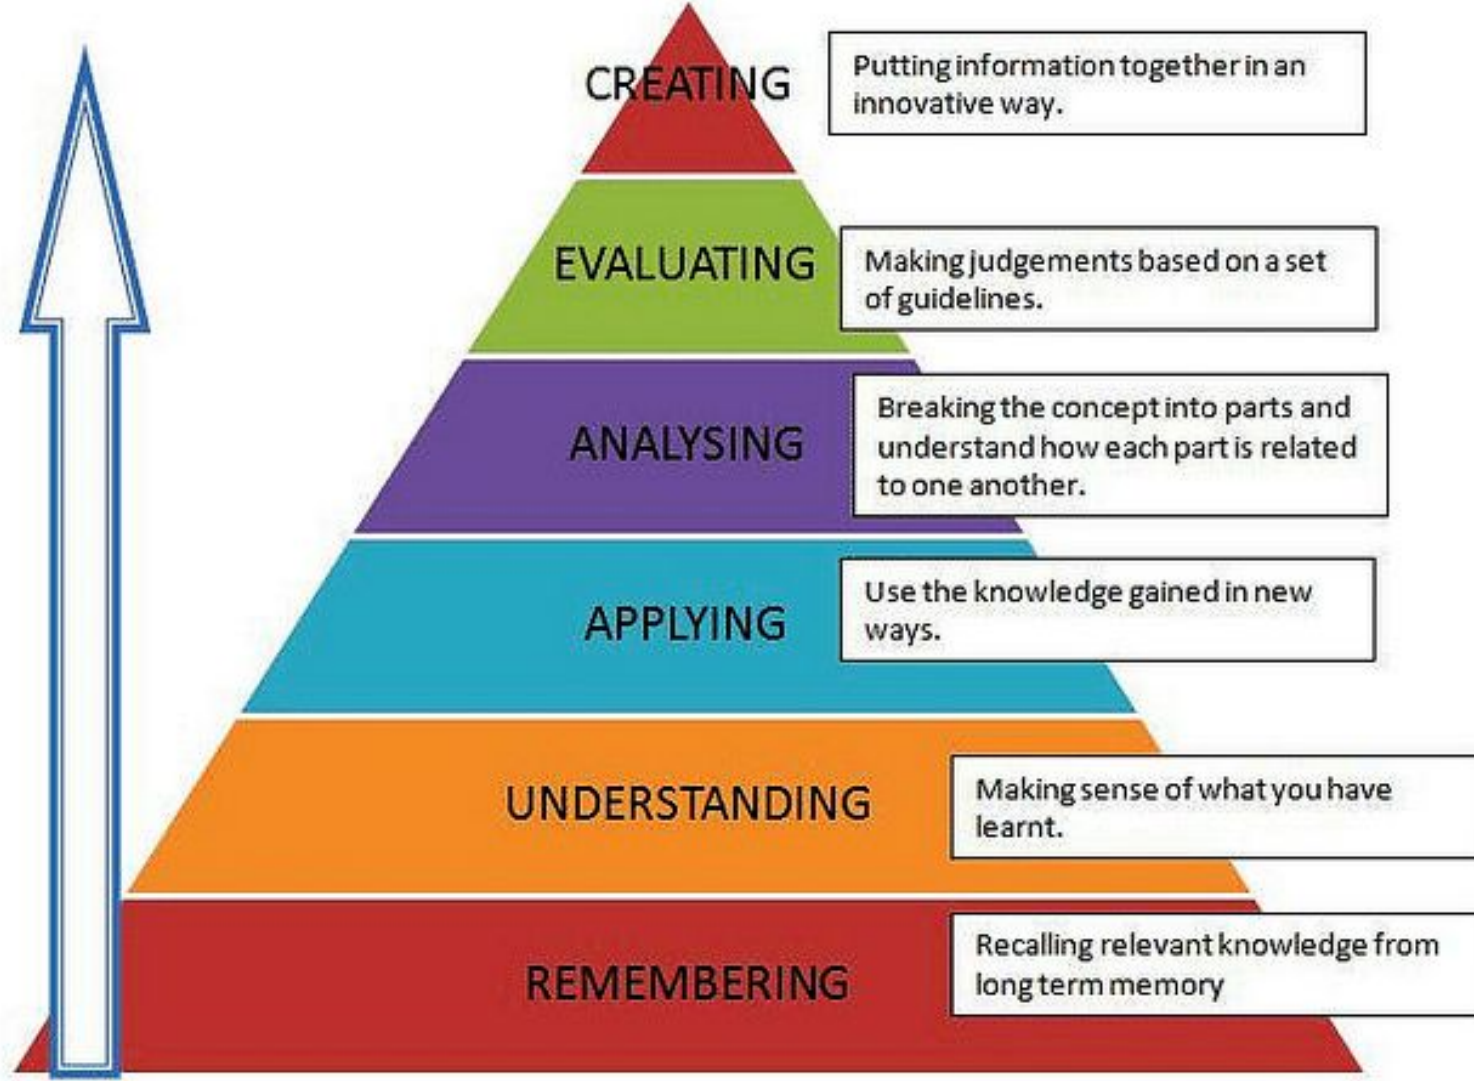

- a. preconventional for the reward money
- b. preconventional for fear of punishment
- c. conventional for social approval of what other people will say
- d. post-conventional for the common good ✓

Kohlberg's Theory of Moral Development

63. What cognitive process is required in writing a personality profile of a fellow classmate?

- a. creating ✓
- b. applying
- c. recalling
- d. analyzing

64. What is meant by action research following a cyclical process?

- a. problems occur again and again like a cycle
- b. teachers form a circle during meetings
- c. the circle of participants change from time to time
- d. effort is continuing until problem is resolved ✓

Action research aims to identify problems and then produce an iterative plan of action with strategies to strive for best practice. There are four basic stages in the cyclical action research process: reflect, plan, act, observe, and then reflect to continue through the cycle (Dickens & Watkins, 1999).

65. What is the aim in interpreting grades against standards?

- a. Understanding of performance
-  b. Rating of performance
- c. Assessment of behavior
- d. Ranking of students in a class

Norm-referenced tests make comparisons between individuals, and **criterion-referenced** tests measure a test taker's performance compared to a specific set of standards or criteria.

66. Or the following, which will you implement as the most effective strategy for influencing human emotion for retention and discovery of learning?

- a. Applying drills to augment retention
-  b. Using of inspirational tool (book, film, art, etc.)
- c. Using the Internet by surfing for information
- d. Being humorous and light in teaching

Social-emotional learning (SEL) is the process of developing the self-awareness, self-control, and interpersonal skills that are vital for school, work, and life success.

67. How will you judge a student who gives unjustified reasons for what he or she knows was a wrong decision or action, e.g., not coming to class because it's already late?

a. Justifying

c. Reasoning

b. Rationalizing

d. Clarifying

Rationalization is a defense mechanism (ego defense) in which apparent logical reasons are given to justify behavior that is motivated by unconscious instinctual impulses. It is an attempt to find reasons for behaviors, especially ones own.

68. Which of the following exemplifies a class dialogue?

a. Demonstration

c. Exhibit

b. Lecture

d. Discussion

Discussion is an extended communication (often interactive) dealing with some particular or an exchange of views on some topic. While **lecture** is teaching by giving a discourse on some subject (typically to a class).

69. These are rights given the Child in indigenous minorities, but NOT to include _____.

- a. to profess his/her religion
- b. to enjoy his/her culture
- c. to use his/her own language
-  d. to be exempted from formal education

Indigenous education is born from the territory and the ancestors. It is unique to each indigenous people, since it is rooted in the life and the culture of each indigenous people in their territory. Indigenous education is key to keeping indigenous children and youth grounded in their unique cultures.

70. Which best indicates a two-way communication between teacher and students?

a. Ready to talk

c. Open to listen

b. Defense for ideas

d. Ability to explain

Open listening is letting go of conventional means of listening. It means listening to and valuing the telling of stories and letting pauses in conversation extend into silence rather than jumping into dispute, agree, question or move on.

71. Which philosophy supports universal values in education, as these are important in molding young minds towards broad ideals such as democracy, freedom, human rights?

a. Essentialism

c. Existentialism

b. Pragmatism

d. Empiricism

Existentialism is the philosophical belief we are each responsible for creating purpose or meaning in our own lives. Our individual purpose and meaning is not given to us by Gods, governments, teachers or other authorities.

72. Among thinking strategies, Comprehension Monitoring is the ability
_____.

- a. to make appropriate choices
-  b. to check progress
- c. to be relaxed yet alert
- d. to synthesize new information

Comprehension monitoring is a method used in education that is aimed at teaching students to monitor their understanding of the text, even if it means rereading or asking questions about the text in order to fully understand the meaning of the text.

73. Which research finding regarding use of the mother tongue as language of instruction is TRUE? The use of mother tongue _____ the learning of the second language.

a. enhance

b. delays

c. does not affect

d. hampers

Mother tongue makes it easier for children to pick up and learn other languages. Mother tongue develops a child's personal, social and cultural identity. Using mother tongue helps a child develop their critical thinking and literacy skills.

74. What is the main objective of action research in instruction and school management?

- a. it aims at strengthening authority of principals
- b. it seeks to solve instructional and school problems
- c. it aims at increasing the work of teachers
- d. it seeks to make students loyal to the school

Action research generates knowledge around inquiry in practical educational contexts. Action research allows educators to learn through their actions with the purpose of developing personally or professionally. Due to its participatory nature, the process of action research is also distinct in educational research.

75. Which of the following shows the teacher's respect for human dignity?

a. joining professional associations

b. using social media

c. working with people of different views ✓

d. practicing diligence and industry

Human dignity is the recognition that human beings possess a special value intrinsic to their humanity and as such are worthy of respect simply because they are human beings.

76. Which of the following will most likely help students internalizing classroom rules?

- a. teacher explaining the rules to students to follow
- b. student participation in setting rules ✓
- c. students following teacher's rules
- d. teacher formulation the rules

Internalization means taking social norms, roles, and values into one's own mind. Society was seen as the primary factor responsible for how individuals learned to think and behave.

77. On classroom activities, the following are appropriate for learners who have good logical-mathematical skills, but NOT to include

- a. storytelling ✓
- b. number games
- c. experiments
- d. calculations

Logical-Mathematical Intelligence is the ability to analyze situations or problems logically, identify solutions, conduct scientific research, and easily solve logical/mathematical operations. It is one of the eight multiple intelligence types proposed by Howard Gardner.

78. In addition to showing grades of students to their parents, which can be shown to demonstrate performance?

- a. teacher's syllabus
- b. memorandum of the principal
- c. copy of curriculum
- d. written work ✓

Written Works shall be administered to assess essential knowledge and understanding through quizzes and long/unit tests. Items should be distributed across the Cognitive Process Dimension using a combination of selected-response and constructed-response so that all are adequately covered.

79. On the reasoning process, which is used for pure philosophy that is a deductive, rather than an inductive science?

- a. it starts from prior ideas in the mind ✓
- b. it starts with the real outside the mind
- c. it relates external reality to mental reality
- d. it starts from the real to the mental

Inductive reasoning is a bottom-up approach, while **deductive reasoning** is top-down. Inductive reasoning takes you from the specific to the general, while in deductive reasoning, you make inferences by going from general premises to specific conclusions.

80. What is the most preferable ratio of students for peer tutoring?

a. 2:2 students ratio

c. 1:1 student-student ratio

b. 2: 1 students-student ratio

d. 1:10 student-students ratio

Peer tutoring is an instructional strategy that consists of student partnerships, linking high achieving students with lower achieving students or those with comparable achievement, for structured reading and math study sessions.

81. Which level of teacher planning establishes general content and often prepared by a committee of experts?

a. weekly planning

c. Term planning

b. Unit planning

d. Course mapping

Course maps are useful visual tools when designing or redesigning your course. Paralleling the backward design process, a course map is essentially a representation of how you intend to approach and assess each of the student learning outcomes you identified for your course.

82. Which of the following demonstrates the teacher's integrity?

a. Moral courage

c. Entrepreneurship

b. Innovation

d. Decisive thinking

Moral courage involves the willingness to speak out and do that which is right in the face of forces that would lead a person to act in some other way.

83. Which of the following shows the teacher's respect for human dignity?

- a. Using social media
- b. Practicing diligence and industry
-  c. Working with people of different views
- d. Joining professional associations

Human dignity is the recognition that human beings possess a special value intrinsic to their humanity and as such are worthy of respect simply because they are human beings.

84. Among facets of the "hidden curriculum" that transmit right moral values, the most powerful by way of personal influence are

_____.

- a. teachers' peer efforts
- b. teacher's authority over learners
-  c. teacher's attitudes and behavior
- d. teacher's innovation

Hidden curriculum refers to the unwritten, unofficial, and often unintended lessons, values, and perspectives that students learn in school.

85. The most basic principle in Mastery Instruction is high rate of learning that _____.

- a. corrects instruction e.g. alternative instructional material
- b. enriches instruction, e.g. independent study
- ✓ c. adapts to the learner rather than the learner to instruction
- d. assesses instruction, e.g. use rubrics

Mastery learning is the transformational education innovation of our time. At its core, mastery learning enables students to move forward at their own pace as they master knowledge, skills, and dispositions. Effective implementation at scale will completely change how students learn, how teachers teach, and how schools work. It will revolutionize state testing, education research, and the labor market. It will transform how curricula are developed, how learning is measured, and how teachers are trained.

86. The way for values clarification by examination of situations involving values is _____.

a. action learning

c. valuing

 b. analysis of issues

d. inculcation

Values clarification is a psychotherapy technique that can often help an individual increased awareness of any values that may have a bearing on lifestyle decisions and actions. This technique can provide an opportunity for a person to reflect on personal moral dilemmas and allow for values to be analyzed and clarified.

87. Which correlative concepts will you NOT include as pairs to the positive-negative characteristics of teachers?

a. original :: conventional

c. cautious :: Outspoken

b. Amiable :: hostile

d. Bubbly :: resourceful ✓

Analogy is a comparison of two otherwise unlike things based on resemblance of a particular aspect, resemblance in some particulars between things otherwise unlike, similarity, and inference that if two or more things agree with one another in some respects they will probably agree in others.

88. It is reasonable to say that high moral character is demonstrated by following thoughts, attitudes and deeds, but REMOTELY to include

_____.

- a. nurturing at home and school
- b. positive philosophy of life
- ✓ c. technology Innovations
- d. human behavior during stages of growth

Moral character can be conceptualized as an individual's disposition to think, feel, and behave in an ethical versus unethical manner, or as the subset of individual differences relevant to morality.

89. When the industrial age introduced empirical research, what became valuable as basis for objective truth?

- a. Observable and measurable evidence
- b. Customs and traditions
- c. Church doctrine and morals
- d. Authoritative rules and norms

Empiricism is the theory that human knowledge comes predominantly from experiences gathered through the five senses. In empiricism, concepts are spoken of as a posteriori or “from the latter” meaning from the experiences.

90. On transferring learning. how will you classify a demonstration on applying first aid for accidental wounds, as done by an invited professional nurse resource person?

a. Concept-related

c. Utilization-related ✓

b. Inquiry-related

d. Learner-related

Utilitarianism is a theory of morality, which advocates actions that foster happiness and oppose actions that cause unhappiness. Utilitarianism promotes "the greatest amount of good for the greatest number of people."

91. Among major schools of learning theories, which consider how the individual perceives the learning environment or situation?

a. Cognitive theories

c. Behavioral theories

b. Field and Gestalt theories

d. Social theories

Gestalt theory emphasizes that the whole of anything is greater than its parts. That is, the attributes of the whole are not deducible from analysis of the parts in isolation. The word Gestalt is used in modern German to mean the way a thing has been “placed,” or “put together.”

92. From contemporary cognitive psychology, learning is proposed to be task-oriented, purposive and efficient which is same as being

_____.

a. appropriate

c. situational

b. meaningful

d. goal-directed

Purposive behaviorism a cognitive theory of learning postulating that behavioral acts have a goal or purpose that selects and guides the behavioral sequence until the goal or purpose is attained.

93. What characteristics show that a teacher has empathy towards learners/ students?

a. Caring and love

c. Discipline and fortitude

b. Loyalty and affinity

d. Strength and conviction

Sympathy involves understanding from your own perspective. **Empathy** involves putting yourself in the other person's shoes and understanding why they may have these feelings.

94. How do you judge the teaching style of a teacher who is fussy, teaches things over and over, and is concerned with functional order and structure?

a. Entertainer type

c. Quiet one type

 b. Compulsive type

d. Secular type

Frank Riessman (1967)

Teaching Style	Description
<i>Coach</i>	This teacher is informal, earthy, and maybe an athlete ; he is physically expressive in conducting the class.
<i>Maverick</i>	Everybody loves this teacher, except perhaps the principal. S/he raises difficult questions and presents ideas that disturb .
<i>The Entertainer</i>	This teacher is free enough to joke and laugh with the students

Frank Riessman (1967)

Teaching Style	Description
<i>Secular</i>	This person is relaxed and informal with children; s/he will have lunch with them or play ball with them.
<i>Academic</i>	This teacher is interested in knowledge and substance of ideas.

Frank Riessman (1967)

Teaching Style	Description
<i>Compulsive</i>	This teacher is fussy, teaches things over and over, and is concerned with functional order and structure .
<i>Boomer</i>	This teacher shouts in a loud, strong voice: "You're going to learn", there is no nonsense in the classroom.
<i>Quiet One</i>	Sincere, calm, but definite, this teacher commands both respect and attention .

95. Which of the following is simulation to abstract the real world in learning?

a. Chess

c. Monopoly

b. Role playing

d. Scrabble

Monopoly is a multi-player economics-themed board game. In the game, players roll two dice to move around the game board, buying and trading properties, and developing them with houses and hotels. Players collect rent from their opponents, with the goal being to drive them into bankruptcy. Money can also be gained or lost through Chance and Community Chest cards, and tax squares.

96. What is an encouraging teacher nonverbal behavior that can be used in class?

- a. Facial expression that is condescending
- b. Slouching on chair
- c. Avoiding eye contact
-  d. Patting student on the back

While getting a pat on the back is a common gesture signaling, “**Well done**”, patting someone's shoulder often conveys the same meaning.

97. These are the ways successful learners can add new information with old knowledge in a meaningful way but NOT to include _____.

- a. modify old knowledge
- b. reorganize new knowledge or values
- c. add and integrate new information
-  d. store new information and values

The Assimilation vs Accommodation Of Knowledge

Assimilation of knowledge occurs when a learner encounters a new idea, and must 'fit' that idea into what they already know. Think of this as filling existing containers.

Accommodation of knowledge is more substantial, requiring the learner to reshape those containers.

98. Which of the following situations can show that a teacher is "chill" in a tense situation?

a. Not excited, but calm

c. Not alone, but with peers

b. Not passive, but active

d. Not revengeful, but forgiving

Chill means calm, relaxed, easygoing.

99. In the beginning the learning goals and learning may be short-term but these can be refined by the following initiatives but NOT to include

- a. filling learning gaps
- b. deepening understanding of the subject matter
-  c. scheming through lesson topics
- d. resolving inconsistencies in the topics

Skimming and scanning are reading techniques that use rapid eye movement and keywords to move quickly through text for slightly different purposes. Skimming is reading rapidly in order to get a general overview of the material. Scanning is reading rapidly in order to find specific facts.

100. Modern universities abroad has Yoga and Meditation relaxation and wellness classes in their curriculum. Which values are integrated in this program of studies?

a. Moral values

c. Sacred values

b. Vital values

d. Social values

Max Scheler's Hierarchy of Values

101. What question is asked for reflecting on issues or problems in a lesson?

a. What

c. Where

b. Why

d. When

Reflection is a critical process for supporting your growth and development as a professional. At the end of each lesson, you should reflect on the experience and analyze its effectiveness. This part of the process consists of two parts: the reflection and the analysis.

102. What is Teacher Ryan doing when he probes students by asking a sequence of questions on a subject matter to arrive at a satisfactory answer?

a. Clarifying

c. Analyzing

b. Conversing

d. Prompting ✓

Prompting is a technique to move on to another student in order to maintain interest. Prompting questions use hints and clues to aid students in answering questions or to assist them in correcting an initial original question with clues or hints included.

103. Experts refer to these helpful abilities for self-expression by learners but NOT to include _____.

a. imagining

c. building

 b. speculating

d. developing insights

Speculating means to guess possible answers to a question when you do not have enough information to be certain

104. Which of the following demonstrates that a teacher is competent in content knowledge and pedagogy?

- a. Research-based teaching
- b. Teacher-centered teaching
- c. Concept-based teaching
- d. Rote and drill-teaching

105. How is action research Important to instruction and school management?

- a. It seeks to solve instructional and school problems
- b. It seeks to make students loyal to the school
- c. It aims at increasing the work of teachers
- d. It aims at strengthening authority of principals

Action research may also be called a cycle of action or cycle of inquiry, since it typically follows a predefined process that is repeated over time. A simple illustrative example:

1. Identify a problem to be studied
2. Collect data on the problem
3. Organize, analyze, and interpret the data
4. Develop a plan to address the problem
5. Implement the plan
6. Evaluate the results of the actions taken
7. Identify a new problem
8. Repeat the process

106. When a student gathers data or information and arrives at a conclusion, what process of research is followed?

a. Deduction

c. Experiment

 b. Induction

d. Implication

Both **deduction** and **induction** are a type of inference, which means reaching a conclusion based on evidence and reasoning. Deduction moves from idea to observation, while induction moves from observation to idea.

107. Along Erikson's psychosocial theory, what is displayed by the child trying out new ways of doing things?

a. Self-reliance

c. Autonomy

 b. Initiative

d. Independence

Erikson's Stages of Psychosocial Development

Approximate Age	Psycho Social Crisis
Infant - 18 months	Trust vs. Mistrust
18 months - 3 years	Autonomy vs. Shame & Doubt
3 - 5 years	Initiative vs. Guilt
5 -13 years	Industry vs. Inferiority
13 -21 years	Identity vs. Role Confusion
21- 39 years	Intimacy vs. Isolation
40 - 65 years	Generativity vs. Stagnation
65 and older	Ego Integrity vs. Despair

108. Along Erikson's psychosocial theory what is displayed by the child in saying "I do things without worrying about them?"

a. Discipline

c. Obedience

b. Endurance

d. Autonomy

Erikson's Stages of Psychosocial Development

Approximate Age	Psycho Social Crisis
Infant - 18 months	Trust vs. Mistrust
18 months - 3 years	Autonomy vs. Shame & Doubt
3 - 5 years	Initiative vs. Guilt
5 -13 years	Industry vs. Inferiority
13 -21 years	Identity vs. Role Confusion
21- 39 years	Intimacy vs. Isolation
40 - 65 years	Generativity vs. Stagnation
65 and older	Ego Integrity vs. Despair

109. How is reflection recorded in action research?

- a. Through a report journal
- b. Through a syllabus
- c. Through the curriculum
- d. Through a lesson plan

Action research may also be called a cycle of action or cycle of inquiry, since it typically follows a predefined process that is repeated over time. A simple illustrative example:

1. Identify a problem to be studied
2. Collect data on the problem
3. Organize, analyze, and interpret the data
4. Develop a plan to address the problem
5. Implement the plan
6. Evaluate the results of the actions taken
7. Identify a new problem
8. Repeat the process

110. In Vygotsky's socio-cultural theory of development the following contribute to the learners' social environment with _____ opening the door for learners to acquire knowledge.

a. activities

c. lessons

b. language

d. classroom

Vygotsky's sociocultural theory of human learning describes learning as a social process and the origination of human intelligence in society or culture. The major theme of Vygotsky's theoretical framework is that social interaction plays a fundamental role in the development of cognition.

111. During the COVID virtual learning, what is missed by learners?

a. Face-to-face teaching-learning

c. On-line instruction

b. Virtual interaction

d. Cyber interchange

Face-to-face learning is an instructional method where course content and learning material are taught in person to a group of students. This allows for a live interaction between a learner and an instructor. It is the most traditional type of learning instruction.

112. At what level of Kohlberg's stages of moral development is taxi driver Rod returning the wallet of a passenger who left it in his cab?

- a. Preconventional for the reward money
-  b. Post-conventional for the common good
- c. Conventional for social approval of what other people will say
- d. Preconventional for fear of punishment

Kohlberg's Theory of Moral Development

.....

113. What will you see as an application of Pavlov's idea of discrimination?

- a. Engaging students in collaborative learning
- b. Giving way for peer tutoring
- c. Mentoring low achievers in class
-  d. Allowing students to choose electives

Discrimination. For example, if a bell tone were the conditioned stimulus, discrimination would involve being able to tell the difference between the bell tone and other similar sounds. Because the subject is able to distinguish between these stimuli, they will only respond when the conditioned stimulus is presented.

114. When do you think Thorndike's Law of Readiness applies best applies?

- a. When a teacher prepares well for presentation
- b. When a teacher pairs the quick and slow learners
- ✓ c. When a teacher gives enough time for students to answer questions
- d. When a teacher's requires quick answers to questions

The Law of Learning

Law of Effect

- Emotional reaction of the learner
- Positive outcomes = repeat behaviour

Law of exercise

- Encourage repetition to acquire skills
- Practice makes perfect

Law of readiness

- Physical, mental and emotional state of the learner
- Cold room = negative learning experience

115. What situation will you depict as conformed to Pavlov's behaviorist classical conditioning in learning by way of stimulus and response?

- a. Bringing student in field study
- b. Giving rewards to student achievers
- c. Using PowerPoint presentation
- d. Engaging students in open discussion

Discovered by Russian physiologist Ivan Pavlov, **classical conditioning** is a type of unconscious or automatic learning. This learning process creates a conditioned response through associations between an unconditioned stimulus and a neutral stimulus.

116. Researchers on the brain tell that the brain is more "plastic" in younger children and potentially more malleable for re-routing neural circuits. What is an implication on reading disabilities?

- I. Early identification of reading disabilities is very important.**
- II. Remediation for reading disabilities must be given as early as possible.**
- III. Reading disabilities in late childhood are beyond remediation.**

a. I and II

b. I only

c. I only

d. III only

The 2 Types of Brain Plasticity

**What is Neuroplasticity
(aka Brain Plasticity)?**

**Brain's ability to
change and adapt**

verywell

Type 1: Structural Plasticity

**Experiences or memories
change a brain's physical
structure**

Type 2: Functional Plasticity

**Brain functions move from
damaged area to
undamaged area**

117. Constructivist Teacher Karie asked her students to present ideas on what should characterize modern political heroes in today's millennial society. What kind of presentation does she expect from her students?

a. Narrative

c. Advance organizer

b. Schema

d. Script

Ausubel's idea of an “**advance organizer**” is to relate what a student already knows to the new content to be learned and thus increase retention. Advance organizers should be at a higher level of abstraction, generality, and inclusiveness than the content to be presented.

118 Constructivist Teacher Ed asked his students to present the episodes EDSA people power revolution. What does he expect from his students?

a. Advance organizers

c. Script

b. Schema

d. Paradigm

Ausubel's idea of an “**advance organizer**” is to relate what a student already knows to the new content to be learned and thus increase retention. Advance organizers should be at a higher level of abstraction, generality, and inclusiveness than the content to be presented.

119. Arrange chronologically the following instructional events for designing instruction and media following Gagne's conditions of learning.

- I. Eliciting performance**
- II. Providing feedback**
- III. Gaining attention**
- IV. Informing learners of expectancy**
- V. Presenting stimulus**

a. I, III, II, IV and V

b. V, IV, III, II and I

c. I. II. III, IV and V

d. III, IV, V, I and II

1. Gaining attention

2. Informing the learner of the objective

3. Stimulating recall of prior knowledge

4. Presenting information

5. Providing guidance

6. Eliciting performance

7. Providing feedback

8. Assessing performance

9. Enhancing retention & transfer

9

Events

120. Advance organizers use _____ to make connections among various pieces of information for efficient recall.

a. Visual imagery

c. Organization

b. Rehearsal

d. Elaboration

*Prior
Knowledge*

*Organize
Information*

*Receive New
Information*

121. These can serve as components of a Graphic Organizer but NOT _____.

a. Concept patterns

c. Pictographs

 b. Narrative

d. Descriptive patterns

*Prior
Knowledge*

*Organize
Information*

*Receive New
Information*

122. There are varied aspects to professionalism among teachers, but which aspect is their inner ideals, commitment and dedication as teachers?

a. Cultural aspect

c. Work aspect

b. Social aspect

d. Ethical aspect

Ethics is connected to cultural meaning and social power to provide the philosophical base for justice, proper use of power and authority, and right relationships. As a whole, decisions and their rightness, consequences and context are all ethically very important in the development of sustainable society.

123. Which of the following is the equivalent of self-awareness which is basic to social emotional growth among learners?

a. integrity

c. altruism

 b. ego-esteem

d. trust

Self-esteem is your overall opinion of yourself — how you feel about your abilities and limitations. When you have healthy self-esteem, you feel good about yourself and see yourself as deserving the respect of others. When you have low self-esteem, you put little value on your opinions and ideas.

124. What activity of human intelligence attaches value or quantitative description to measuring results of learning and school activities?

a. Understanding

c. Analysis

b. Critical thinking

d. Assessment

In education, the term **assessment** refers to the wide variety of methods or tools that educators use to evaluate, measure, and document the academic readiness, learning progress, skill acquisition, or educational needs of students.

125. Which of the following will NOT be acceptable to Max Scheler's hierarchy of spiritual values?

a. Goodness

c. Sin ✓

b. Beauty

d. Truth

Max Scheler's Hierarchy of Values

126. How will you characterize contemporary progressive education?

a. Traditional

c. Virtue-driven

b. Science-based

d. Classic knowledge

Science – based essentially means that some decision that is made is done in a way that takes scientific methods and results into account.

127. In Matching Type questions, what are "distractors" that ensures only one correct response among choices or alternatives?

a. Test focus

c. Items economy

b. Item additions

d. Incorrect choices ✓

Distractors are the incorrect answers in a multiple-choice question.

128. Which of the following belongs to authentic assessment?

a. Indirect evidence

c. Contrived incident

b. Simple recall

d. Performing a task ✓

Authentic assessment is "a form of assessment in which students are asked to perform real-world tasks that demonstrate meaningful application of essential knowledge and skills" (J. Mueller).

129. What kind of multiple question is: "For an agricultural country like the Philippines, which should the country advance for its economic development: (a) agriculture production (b) industrial development (C) tourism (d) finance and banking"?

a. Simple knowledge

c. Assessment of a problem

b. Application of a formula

d. Application of a concept

Concepts can be based on real phenomena and are a generalized idea of something of meaning. Examples of concepts include common demographic measures: Income, Age, Education Level, Number of Siblings.

130. What does “teaching to the test” mean?

- a. Use of tests to assess learning
- b. Teaching students to perform well on meaningful tasks
- ✓ c. Focus on content that will be tested
- d. Begin and end class with a test

Teaching to the test means that teachers focus on specific items in order to ensure that their students achieve higher scores during standardized tests.

131. Which is TRUE of the Philippine educational system?

- a. Free education in public elementary and secondary schools
- b. Full tuition subsidy for students enrolled in the private schools in all levels
- c. Free education in the government schools in all levels
- d. Full tuition subsidy for students enrolled in the private schools in the basic level

Enhanced Basic Education Program. — The enhanced basic education program encompasses at least one (1) year of kindergarten education, six (6) years of elementary education, and six (6) years of secondary education, in that sequence. Secondary education includes four (4) years of junior high school and two (2) years of senior high school education.

132. How does a behaviorist explain the observation of a child enjoying school?

- a. He is rewarded for his good performance
- b. He feels he belongs
- c. He taught life skills
- d. Learning is highly personalized

Behaviorism is a theory of learning based on the idea that all behaviors are acquired through conditioning, and conditioning occurs through interaction with the environment. Behaviorists believe that our actions are shaped by environmental stimuli.

133. What does a difficulty index of .10 mean? The test item is _____.

a. easy

c. not reliable

 b. difficult

d. not valid

Level of Difficulty

Index Range	Difficulty Level
0.00-0.20	Very Difficult
0.21-0.40	Difficult
0.41-0.60	Average/Moderately Difficult
0.61-0.80	Easy
0.81-1.00	Very Easy

134. Complete the analogy: School heads : National Competency-Based Standards for School Heads Teachers : _____

- a. Professional Philippine Standards for Teachers
- b. National Competency-Based Teacher Standards
-  c. Philippine Professional Standards for Teachers
- d. National Competency-Based Teaching Standards

The **PPST** is a public statement of what teachers need to know, value, and be able to do in their practice. It has four career stages: Beginning, Proficient, Highly Proficient, and Distinguished. It is built on the National Competency-based Teacher Standards (NCBTS).

135. For effective teaching-learning, there is no such thing as "one-size-fits-all". What does this imply?

- a. Allow students to use their cellphones in class.
- b. Always end up with a lesson summary.
- c. Use performance tests since they are more reliable.
- ✓ d. Consider multiple intelligences in teaching.

Education has traditionally been approached using a “**one size fits all**” model, wherein students are subjected to the same teaching styles and evaluation methods irrespective of their ability or interest.

136. What needs to be written by teachers for day-to-day teaching aligned with curriculum requirements?

a. A lesson plan

c. A weekly journal

b. A self-reflection

d. A portfolio

A lesson plan is a teacher's daily guide for what students need to learn, how it will be taught, and how learning will be measured. Lesson plans help teachers be more effective in the classroom by providing a detailed outline to follow each class period.

137. You want to know who a good teacher is. In The Philippines which would you consult?

- a. Professional Philippine Teacher Standards
- b. Professional Code of Ethics
-  c. Philippine Professional Standards for Teachers
- d. National Competency-Based Teacher Standards

The **PPST** is a public statement of what teachers need to know, value, and be able to do in their practice. It has four career stages: Beginning, Proficient, Highly Proficient, and Distinguished. It is built on the National Competency-based Teacher Standards (NCBTS).

138. Which of the following set of exceptional learners have superior intelligence rather than disabilities for learning?

a. Gifted learners

c. Sensory impaired learners

b. Mentally retarded learners

d. Autistic learners

Gifted learners are those whose potential is distinctly above average in one or more of the following domains: intellectual, creative, social and physical. They need services and activities not ordinarily provided by the school in order to fully develop their potential.

139. What factor should Teacher Julie be careful about when she is teaching in a school for children in a poverty-stricken slum area?

- a. Children's socio-economic status
- b. Children's beliefs
- c. Children's ethnicity
- d. Children's race

Socio-economic background takes account of social and economic factors including parents' educational qualifications, parents' occupations, household income, the level of reliance on government income support and the level of household overcrowding.

140. If you apply the cognitive theories of learning with which do you agree?

- a. Learning is an active process of organizing and integrating information
- b. Learning is strengthening the connection between stimulus and response
- c. Learning involves a mind that is totally blank
- d. Learning is automatically responding to a stimulus.

Cognitivism is a learning theory that focuses on how information is received, organized, stored and retrieved by the mind. It uses the mind as an information processor, like a computer. Therefore, cognitivism looks beyond observable behavior, viewing learning as internal mental processes.

141. Which is an effective way of developing a sense of ownership?

- a. Abide totally by the students' suggestions.
- b. Let students formulate the class rules.
-  c. Make students participate in the formulation of class rules.
- d. Involve students in all decision-making that involve the class.

Sense of ownership means not waiting for others to act and caring about the outcome as much as an owner of the company would. It is being accountable for the results of your actions – that they are of the highest quality and delivered in a timely manner. Taking ownership shows others that they can trust you to do the right thing.

142. Which statements is/are TRUE?

- I. In the cognitivist classroom, student's minds are "tabula rasa"**
- II. Rote memorization and drill are features of behaviorist classroom**
- III. In the cognitivist classroom teacher builds on what students know**
- IV. In the constructivist classroom, students build their own knowledge based on personal meaning.**

a. II, III and IV

b. I, III and IV

c. II and IV

d. I, II and IV

Philosophically speaking, **behaviorism** has its origins in the associationism of the philosopher John Locke (1632–1704). Locke believed that the human being was born as a tabula rasa — that, mentally, a human infant was a blank slate, with no prior knowledge or ideas.

143. Vygotsky says that learning occurs in a social context. Which leaning activity is most appropriate ?

a. Individual PowerPoint presentation

c. Research

b. Journal entry

d. Peer discussion

A **peer discussion** is an activity that encourages you to engage with others in reflection on learning and practice. Research shows that having another person's view can help you to reflect on your practice and can reduce the potential for professional isolation.

144. What is characteristic of the Lesson Plan that integrates its outcomes, methods and assessment components?

a. Their alignment

c. Their independence

b. Their sequencing

d. Their differentiation

Curriculum alignment is a process aimed at ensuring coherence and consistency between the intended outcomes as specified in the formal curriculum and teaching methods, assessment tasks, and learning activities in the classroom.

145. In introducing a new lesson, what should Teacher Lanie try to determine when she relates a past lesson to a new lesson?

a. Learners' knowledge base

b. Learners' motivation to know more

c. Learners' curiosity to know a new lesson

d. Learners' style in knowing

Knowledge based learning is learning that revolves around both the knowledge that the student already has, and the understanding that they are going to achieve by doing work. When learning is based around knowledge that students already have, and knowledge they are going to be achieving, the learning is better connected to real life.

146. Which of the following characteristics among learners can indicate that their parents have been authoritarian?

a. Fearful-inhibited

c. Open- friendly

b. Strong- Outgoing

d. Responsive- active

Permissive

"Whatever you want!"

- Low expectations
- Few rules
- Indulgent
- Accepting
- Lenient
- Avoids confrontation
- Warm

Authoritative

"Let's discuss this."

- High expectations
- Clear standards
- Assertive
- Democratic
- Flexible
- Responsive
- Warm

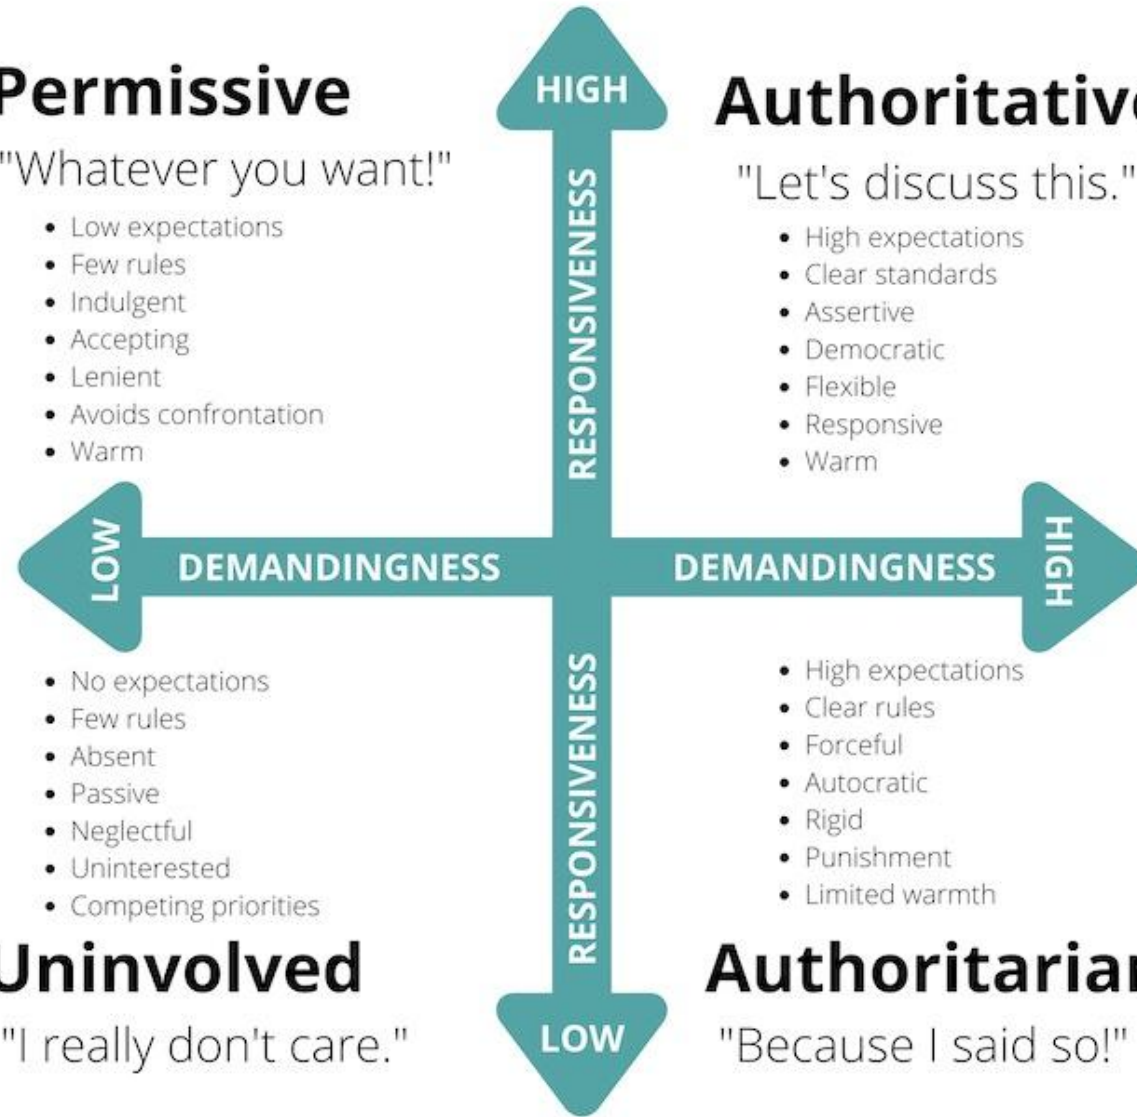

Uninvolved

"I really don't care."

- No expectations
- Few rules
- Absent
- Passive
- Neglectful
- Uninterested
- Competing priorities

Authoritarian

"Because I said so!"

147. At what instance is the teacher a writer of the curriculum?

a. Preparing lesson plans

c. Assessing lesson outcomes

b. Presenting class lessons

d. Checking lesson exams

Teacher as a Curricularist

1. Plans the curriculum.
2. Writes the curriculum.
3. Initiates the curriculum.
4. Implements the curriculum.
5. Evaluates the curriculum.
6. Innovates the curriculum.
7. Knows the curriculum.

148. Can a licensed teacher go back to teaching even if she has not taught for the past five years?

a. Yes, because he has a license.

b. No, unless he completes additional 6 units of Professional Education and 6 units of specialization in school recognized by the government.

c. Yes, the past five years of experience outside teaching can supplant five years of teaching experience.

d. No, unless she earns 45 CPD units.

RA 9293: Professional teachers who have not practiced their profession for the past five (5) years shall take at least twelve (12) units of education courses, consisting of a least six (6) units of pedagogy and six (6) units of context courses or the equivalent training and number 1 hours to be chosen from a list of courses to be provided by the Board and the Department of Education, before they can be allowed to practice their profession in the country.
