PREFACE

This LET Reviewer is prepared to help you pass the LET. Mind you, not all who take the LET pass it. In fact, majority of those who took the LET since 1996 failed. The national percentages of passing the LET published in the national daily newspapers ranged from 15% to 36%. This means that the mortality rates have been very high - from 64% to 85%! In other words, for every ten (10) examinees, 6 to 8 examinees fail. Only 2 to 4 LET examinees pass.

Increase your Chances in Passing the LET! This is how.

1. Engage yourself in a review that is focused on the LET competencies. This LET Reviewer in the Specialization – English Book 2 will be of great help. There are some who prepare blindly for the LET. They have no knowledge on the competencies on which they are tested. You are fortunate to have the Table of Specifications with you. They are the focus of this LET Reviewer. Engage yourself in a review that is focused on the LET competencies promulgated by the Board for Professional Teachers, Professional Regulation Commission, in Resolution No. 10 series of 2009.
2. Master the competencies in all the tests. Test your mastery of the competencies by doing the practice test in this Reviewer. Answer the test items given in this Reviewer to the best of your ability. Don't be afraid to commit mistakes; learn it from them.

If you want an honest evaluation of how much you have mastered, be true to yourself. Don't look at the Answer Keys as you are answering the test items. Refer to the Answer Keys only after you have answered the test items.

If after checking your answers against the Answer Keys you find out that you didn't get all items correctly, this means that you have to do more reading. So, read some more. Read as many references as you can in both print and electronic forms to the point of concept mastery. You are given a list of references for additional reading in this Reviewer. It goes without saying that you do not have to limit yourself to these references.

After further reading, go back to the test items which you did not get correctly and answer them once more. This is the way to mastery. If you do that for every competency, you are assured of passing the LET!

3. Learn to shade answer sheets correctly. Many examinees fail the LET because they don't know how to shade their answer sheet correctly. Learn to do it - not light nor dark shading with the use of the LET-like answer sheets attached to this Reviewer.
4. Develop your reading comprehension skills in English. Except in the test items for Filipino in General Education and in the Specialization, all written test items are in English. If your reading comprehension in English is excellent, you will have greater chances.
5. Most of all put your mind and heart into your LET preparation. Right after graduation, prepare the required documents for LET application and once you have them complete, apply for LET at the nearest PRC office as early as possible. You have the list of required documents in the PRC website. Avoid the rush. Avoid the long queue at PRC which happens on the last days of filing for LET application. Take note, the deadline for LET application is usually three months before the conduct of the LET.

Prepare months before the conduct of the LET. The months before the LET should be devoted to serious study. Remember "no pain, no gain". Or better still from William Penn, "no pain, no palm; no thorns, no throne; no gall, no glory; no cross, no crown".

You can't afford to take the LET a second time! Now that you have decided to take it, make a promise and more than that, make a commitment to pass the LET!

- | | |
|-------------|----------------------|
| A. coercion | C. ignorance |
| B. harm | D. public disclosure |
136. As a researcher, you employ the inductive approach? Which do you do?
- | |
|--|
| A. Generate new theory emerging from the data and then test the validity of the theory |
| B. Test the validity of the theory |
| C. Generate new theory emerging from the data |
| D. The validity of the theory then come up with conclusion |
137. What is expected of the researcher in the Methods/Procedure part of the research?
- | |
|---|
| I. Describes what s/he did, how s/he did it |
| II. Gives strategies, sample calculations |
| III. Describes tools and instruments |
- | | |
|------------------|---------------|
| A. I, II and III | C. II and III |
| B. I and III | D. I and II |
138. Why does a researcher do a literature review?
- | |
|---|
| I. To survey the current state of knowledge in the area of inquiry |
| II. To identify key authors, articles, theories, and findings in the area of research |
| III. To identify gaps in knowledge in that research area |
- | | |
|---------------|------------------|
| A. I and II | C. I, II and III |
| B. II and III | D. I, II and III |
139. You would like to research on academic problems met by Indigenous Peoples' children in your school, which sampling will you use?

 - C. Dedication
 - D. Scientific attitude
167. Which step is undertaken when the researcher mulls over a chosen topic and purpose, thinking about aspects and dimensions of a chosen social issue?
- A. Observation
 - B. Operationalization
 - C. Conceptualization
 - D. Population and sampling
168. There are many ways to conduct a research, but what is the stage of study when the researcher selects the appropriate way to gather evidence that can support analysis of data obtained?
- A. Population sampling
 - B. Conceptualization
 - C. Operationalization
 - D. Choice of research method
169. When data gathered from survey, interview or other methods are interpreted, this is the research stage for ____.
- A. sampling
 - B. operationalization
 - C. data processing
 - D. application
170. Communicating the findings of a completed research to school, institution or sponsor of the study is the ____ stage of research.
- A. analysis
 - B. application
 - C. operationalization
 - D. publication
171. There are many dimensions or variables in considering social values that cause corruption in government, but which is NOT one of them?

- A. verbal description
B. simple averages
C. complex formulas
D. methodical models
173. Choose the logical sequence to operationalize selected stages of a study on drug addiction:
- I. Observation and data gathering
II. Arrive at conclusion
III. Specify method to get data on variables
IV. Set testable hypothesis
V. Process and analyze
- A. IV, III, I, V and II
B. II, I, III, V and IV
C. V, III, I, II and IV
D. III, II, I, IV and V
174. Which system is applied for careful, deliberate and quantifiable observation of evidence in order to describe an object or event in terms of indicators?
- A. Examination
B. Measurement
C. Construction
D. Introspection
175. What can be used to classify observations in terms of attributes, e.g. classify newspapers as pro-administration or pro-opposition?
- A. Scaling
B. Indexing
C. Typology
D. Validating
176. The technique used in selecting large, representative sample for social research e.g. election poll ranking is known as ____.
- A. probability sampling
B. nonprobability sampling
C. snowball sampling
D. quota sampling
177. Which is the sampling technique in studying a sub-set of a large population that can show a meaningful result, e.g. by interviewing some people during a rally?
- A. snowball sampling
B. Judgmental sampling
C. Quota sampling
D. Nonprobability sampling

178. Which sampling technique is used by selecting a few members of a target population, e.g. migrant workers you meet at the airport?
- A. Judgmental sampling
 - B. Quota sampling
 - C. Snowball sampling
 - D. Probability sampling
179. What sampling technique helps determine the proportion of the population by use of a matrix and relative proportion for each cell, e.g. interviewing a few people who meet the characteristics of being non-religious?
- A. Quota sampling
 - B. Purposive sampling
 - C. Probability sampling
 - D. Snowball sampling
180. What is the grouping of units composing a population into homogenous groups before sampling in order to achieve a greater degrees of representativeness?
- A. Indexing
 - B. Scaling
 - C. Weighting
 - D. Stratification
181. Which affects the validity of research results due to external events, e.g. popularity decline of a senator accused of illegal drug involvement?
- A. Testing
 - B. Maturation
 - C. History
 - D. Statistical regression

 - C. The earth is flat.
 - D. The earth will survive forever.
184. Is the validity of research results affected due to people continually changing e.g. getting older, more wealthy, etc.? Yes, because of _____?
- A. experimental mortality
 - B. testing
 - C. selection biases
 - D. maturation

185. Is the validity of research results affected due to participants dropping out of the e.g. experimental or control group? Yes, because of _____?
- A. history
B. instrumentation
C. experimental mortality
D. testing
186. Is the validity of research results affected due to what happens to people over time, e.g. participants in class achievement getting worse?
- A. Testing
B. Statistical regression
C. History
D. Diffusion
187. Arrange the logical sequence of steps in constructing an index measurement e.g. to determine degrees in political activism:
- I. Index analysis
II. Select items to measure variables
III. Examine relationship of indices
IV. Index validation
- A. II, III, IV and I
B. I, II, III and IV
C. IV, III, II and I
D. III, IV, I and II
188. What pattern results from your data that show, e.g. how often child abuse is committed in a region?
- A. Processes
B. Frequencies
C. Magnitude
D. Consequences
189. What pattern results from your data that show e.g. levels of child abuse in a community?
- A. Processes
B. Frequencies
C. Magnitude
D. Consequences
190. What is a part of instruction which gives due consideration to differences in interests, abilities and needs of learning?
- A. Remedial
B. Experimental
C. Adaptive
D. Experiential

PRIMER ON SOCIAL STUDIES/SOCIAL SCIENCES

Social studies or Sociology is the science of society and social interactions.

It helps students understand society more objectively and see their place in it. Through training in scientific methodology students learn objective pieces of information or data, providing a capacity to see through social realities.

Social investigations done by social scientists are useful to community leaders, entrepreneurs and government officials for advancing progress in society. Sociology, however, fall under a larger scope of social sciences that contribute to understanding and appreciating society with its institutions, authority, tradition and common sense.

Social scientists have made knowledge on social realities more reliable resulting in theory about observable behavior.

All social studies deal with the study of man which is too broad and complex thus requiring various social sciences – of which sociology is only a part – in order to deal on specific matter, focus, and basic approach. The division of the sciences may be better understood through an illustration:
