

INTENSIVE REVIEW English Major

DR. ROWENA R. CONTILLO

1. Which of the following statements is FALSE about remedial instruction and special education?

- A. Remedial instruction and special education have the same objectives.
- B. Remedial instruction focuses on reading and math skills.
- C. Special education is intended for students with disabilities.
- D. In remedial program, students may be taken out of their normal classroom and taught in a different environment.

- **Special education** is intended to address the ongoing needs of students with disabilities in order to assist them in making academic progress.
- **Remedial services** are intended to bridge the difference between what a student already knows and what he should know.

1. 2. Which of the following is a NOT remedial teaching strategy ?

A. Individualized Educational Program

B. Peer Support Program

C. Reward Scheme

D. Test and Drill

Individualized Educational Program (IEP) seeks to strengthen the basis of learning, assist students in overcoming their learning challenges, and improve their potentials in order to meet the learning needs of each individual.

Support Program: Teachers may train students who excel in a particular subject to become “little teachers” who will assist classmates with learning disabilities in group teaching and self-study sessions, as well as outside of class. Peer support programs assist students in reinforcing their expertise, developing communication and collaboration skills, and fostering positive interpersonal relationships.

Reward Scheme: Teachers must incorporate an incentive system that focuses on guiding students in setting their own goals and strategies, as well as positively reinforcing their successful grades. Teachers must consider the following factors when designing incentives.

- Learning difficulties people face:
 - Poor memorization power
 - Short attention span and are easily distracted
 - Low level of comprehensive control
 - Motivation to learn is lacking
 - Lack of self-assurance and a low level of self-expectation
 - Vulnerability of problem-solving abilities.
 - Failure to understand knowledge effectively and a proclivity for mixing things up.
 - Have a hard time grasping new or abstract ideas
 - Need additional time to complete my task

3. Which of the following should be avoided in scientific or academic writing?

A. passive voice

B. opinions

C. first person point of view

D. all of the above

GENERAL	ACADEMIC
Informal	Formal
Conversational/Subjective	Objective and requires referencing
focuses more on listening and speaking	focuses more on reading and writing
used in everyday life	used in the academe and business correspondence

Applied linguistics is a field of study that looks at how linguistics can help understand real-life problems in areas such as psychology, sociology and education. It can be compared with theoretical linguistics, which looks at areas such as morphology, phonology and lexis. Areas of applied linguistics of interest to teachers of languages include language acquisition, corpus studies and sociolinguistics.

4. Which of the following BEST defines ESP?

A. ESP is a language teaching approach which is based on learner's needs.

B. ESP is an approach not a product.

C. ESP is a particular kind of language methodology.

D. ESP consists of a particular type of teaching material.

English for Specific Purposes

the content and aims of the course are oriented to the specific needs of the learners

focuses on the language, skills, and genres appropriate to the specific activities the learners need to carry out in English - Paltridge & Starfield (2013)

English for Academic Purposes

employ different models, including intensive English programs (IEPs), content and language integrated learning (CLIL) - Blok, Lockwood & Frendo (2020)

5. One problem in ESP teaching is *the new realms of knowledge that ESP teachers have to cope with*. What does it mean?

- A. ESP teachers have to struggle to master language and subject matter they know very little about.
- B. ESP teachers often feel a sense of utter inadequacy at their ability to cope.
- C. ESP teachers feel boredom as they teach subject matter that are very simple and familiar.
- D. A and B

SUB-FIELDS OF ESP

- English for Science and Technology (EST)
- Vocational English as a Second Language (VESL)
- English for Vocational Purposes (EVP)
- English for Specific and Academic Purposes (ESAP)
- English for Professional and Academic Purposes (EPAP)
- English as a Lingua Franca in Academic Settings (ELFA)
- English for Occupational Purposes (EOP)
- English for Business Communication (EBC)
- English for Sociocultural Purposes (ESCP)
- English for General Business Purposes (EGBP)
- English for Medical Purposes (EMP)
- English for Legal Purposes (ELP)
- English for Academic Legal Purposes (EALP)
- English for Research Publication Purposes (ERPP)

6. Which type of syllabus would contain the following set of topics: taking notes; writing essays; study techniques and examinations; improving your reading, etc?

A. Skill syllabus

B. Discourse/skills syllabus

C. Functional/task-based syllabus

D. Skills and strategies

Skill-based Syllabus

The content of the language teaching is a collection of specific abilities that may play a part in using language. Skills are things that people must be able to do to be competent in a language, relatively independently of the situation or setting in which the language use can occur. While situational syllabi group functions together into specific settings of language use, skill-based syllabi group linguistic competencies (pronunciation, vocabulary, grammar, and discourse) together into generalized types of behavior, such as listening to spoken language for the main idea, writing well-formed paragraphs, giving effective oral presentations, and so on. The primary purpose of skill-based instruction is to learn the specific language skill. A possible secondary purpose is to develop more general competence in the language, learning only incidentally any information that may be available while applying the language skills.

Language skills	The first modular group (module 1–20)	The second modular group (module 21–40)	The third modular group (module 41–60)
Listening	Able to understand the local news in general	Able to understand the foreign news in general	Able to understand speeches and news in relation to social, political, and economic issues of Singapore
Speaking	Able to converse with others on topics related to daily life	Able to discuss with others about school work and career-related topics	Able to discuss issues related to economic, social, and culture of Singapore
Reading	Able to read and understand the local news, announcements, and simple passages in publications	Able to read and understand speeches of political leaders and community leaders in general, as well as articles in newspapers and magazines	Able to read and understand newspaper editorials and literary and artistic works
Writing	Able to write simple correspondences and proposition essays with not less than 220 words	Able to write covering letters, simple notices, and proposition essays with not less than 300 words	Able to write proposition essays with not less than 500 words

Structural (formal) Syllabus

The content of language teaching is a collection of the forms and structures, usually grammatical, of the language being taught. Examples include nouns, verbs, adjectives, statements, questions, subordinate clauses, and so on.

Notional/functional Syllabus

The content of the language teaching is a collection of the functions that are performed when language is used, or of the notions that language is used to express. Examples of functions include: informing, agreeing, apologizing, requesting; examples of notions include size, age, color, comparison, time, and so on.

Task-based Syllabus

The content of the teaching is a series of complex and purposeful tasks that the students want or need to perform with the language they are learning. The tasks are defined as activities with a purpose other than language learning, but, as in a content-based syllabus, the performance of the tasks is approached in a way that is intended to develop second language ability. Language learning is subordinate to task performance, and language teaching occurs only as the need arises during the performance of a given task. Tasks integrate language (and other) skills in specific settings of language use. Task-based teaching differs from situation-based teaching in that while situational teaching has the goal of teaching the specific language content that occurs in the situation (a predefined product), task-based teaching has the goal of teaching students to draw on resources to complete some piece of work (a process). Examples include: applying for a job, talking with a social worker, getting housing information over the telephone, and so on.

Situational Syllabus

The content of language teaching is a collection of real or imaginary situations in which language occurs or is used. A situation usually involves several participants who are engaged in some activity in a specific setting. The language occurring in the situation involves a number of functions, combined into a plausible segment of discourse. The primary purpose of a situational language teaching syllabus is to teach the language that occurs in the situations. Examples of situations include: seeing the dentist, complaining to the landlord, buying a book at the book store, meeting a new student, and so on.

7. Which Secondary Education Curriculum was implemented to replace the Revised Secondary Education Program (RSEP)?

A. Program for Decentralized Education

B. Secondary Education Development Program

C. New Secondary Education Curriculum

D. Revised Secondary Education Curriculum

8. What is the main objective of the K to 12 program?

- A. to cope with other ASEAN educational systems
- B. to follow global trends
- C. to produce graduates at the age of 18 instead of 16

- D. to provide sufficient time for mastery of concepts and skills, develop lifelong learners, and prepare graduates for tertiary education, middle-level skills development, employment, and entrepreneurship

K-12 EDUCATION SYSTEM	VS	OLD SYSTEM
> The K-12 program offers a decongested 12-year program that gives students sufficient time to master skills and absorb basic competencies. > Students of the new system will graduate at the age of 18 and will be ready for employment, entrepreneurship, middle level skills development, and higher education upon graduation. > The K-12 program accelerates mutual recognition of Filipino graduates and professionals in other countries. > Kindergarten is mandatory for five-year-old children, a pre-requisite for admission to Grade 1.		> Students lack mastery of basic competencies due to a congested ten-year basic education curriculum. > Graduates of the old curriculum are younger than 18 years old and are not legally ready to get a job or start a business. > Foreign countries perceive a ten-year curriculum as insufficient. They do not automatically recognize Overseas Filipino workers (OFWs) as professionals abroad. > Kindergarten (a strong foundation for lifelong learning and total development) is optional and not a pre-requisite for admission to Grade 1.

9. According to DepEd, which subject will be integrated into the teaching of Language?

A. Reading

B. Physical Education

C. Science

D. Social Studies

10. The transcription /ðɪz/ represents the word _____.

A. this

B. these

C. thighs

D. tease

Manner	Description	E.g.
stop	Total occlusion (followed by release)	<u>t</u> able, <u>P</u> at, <u>c</u> ook
fricative	Partial occlusion with frication noise	<u>sh</u> ower, <u>f</u> ire, <u>z</u> oo, <u>g</u> enre
affricate	Total occlusion (with release) followed by partial occlusion with frication noise	<u>J</u> ohn, D <u>J</u> , <u>ch</u> eck
(Rhotic) liquid	Partial occlusion, tongue tip raised and curled back near the alveolar ridge	<u>r</u> ock, <u>r</u> ide
Lateral liquid	Partial occlusion, air stream flows around the sides of the tongue as tongue tip makes contact with the alveolar ridge	<u>l</u> ight, <u>l</u> ow
Glide (semi-vowel)	Produced with the tongue in motion, from and to a vowel position	<u>y</u> et, <u>w</u> ater
Flap	Tongue tip tapping the alveolar ridge	But <u>t</u> er, med <u>a</u> l
Manner	Description	E.g.
nasal	Velum is lowered and air passes through the nasal cavity	<u>m</u> other, <u>n</u> ight, <u>ri</u> ng

14. Which one has the correct stress?

A. ceremony

B. ceremony

C. ceremony

D. ceremony

15. Which has an odd-sounding word in the following group of words?

A. maintain

B. domain

C. contain

D. mountain

T Rule	Rule	Notes on Rule	Examples
T = T	The regular T sound is almost always used when "t" is the first letter of a word.	ST or TS always keep the regular T sound as well.	table, tall, test, best all first letter T's
T = D Between Vowel Sounds	When T is between two vowel sounds (A,E,I,O,U) or between a vowel and L or R (these letters are called semi-vowels to linguists), it becomes a D sound. In phonetics, this sound is called a "flap," which means the tongue touches the roof of the mouth quickly.	It should be a soft, light sound. This is the key difference between British and American speech. This rule is widely applicable—you may find a few exceptions, but you will be more surprised by how well the rule works. **	Practice with: computer, water, bottle, heater, better, matter, ability, university, put it on, great idea Say: compuder, wader, bodul, header, beder, mader, abilidy, universidy, pudidon, gread'idea
T = Silence When after N	When T comes after N, the T sound is dropped in many words. This rule is not as important, as it's informal. It is mostly used when people speak quickly, but it's good to be able to listen for this change.	It is also good to remember not to pronounce a strong T at the middle or end of a word. When not at the beginning or stressed, a T should be fast and soft or barely heard at all.	Practice with: interview, interstate, international, wanted, don't know, printer, enter, twenty Say: inerview, inerstate, inernational, wanned, don'know, priner, ener, tweny
T = Hard N When before N	When T is before an N, the sound is stopped and turns into a hard N. The final N should be strong. This sound is more difficult.	It may be best to listen for it for a while and then start trying to use it.	Practice with: mountain, fountain, curtain, written, forgotten, important, sentence Say: mou-N, fou-N, cur-N, wri-N, forgo-N, impor-Nt, sen-Nce
T = Stopped Sound	When T is at the end of a word (and this is not followed by a vowel), the sound stops. To say this correctly, emphasize the preceding vowel, put your tongue into place and simply stop the sound.	This one too can be difficult to master, so listen for it first, especially when people say "It's hot!" or "That's that."	hot, hat, mat, fat, lot, rat, pat, foot, want, sit, sat, fit, bat, pot

16. Which word is supposed to be stressed when the speaker means that the robber may have taken some jewelry.

A. I didn't say he **stole** the money.

B. I **didn't** say he stole the money.

C. I didn't say he stole the **money**.

D. I didn't **say** he stole the money.

Tip 1: practice sentence stress

1. I didn't say he stole the money. Someone **else** said it.
2. I **didn't** say he stole the money. **That's** not true at **all**.
3. I didn't **say** he stole the money. I only **suggested the possibility**.
4. I didn't say **he** stole the money. I think someone **else** took it.
5. I didn't say he **stole** the money. Maybe he just **borrowed** it.
6. I didn't say he stole **the** money, but rather some **other** money.
7. I didn't say he stole the **money**. He may have taken some **jewelry**.

- I didn't eat your cake. Meaning, somebody else ate your cake, not me!
- I **didn't** eat your cake. Meaning, I've told you I didn't eat your cake, so stop saying I did!
- I didn't **eat** your cake. Meaning, I didn't eat your cake, *I just threw it away. (Example)*
- I didn't eat **your** cake. Meaning, I did eat someone else's cake, but not your cake.
- I didn't eat your **cake**. Meaning, I didn't eat your cake, but I did eat your *buscuit. (Example)*

17. Which of the following sentences is done in acceptable English?

A. Maria cleaned the table up.

B. Maria is eager to talk to.

C. That Maria dances well surprises me.

D. Maria desires that you go.

18. Which of the sentences has the correctly placed modifier?

- A. Sam asked me to go for a ride on the telephone.
- B. The cowboy was thrown by the bull in a leather vest.
- C. The opera singer was upstaged by the mime with the robust voice
-  D. The bus station made of red brick was located by a river.

TEACHER

Three Kinds of Misplaced Modifier

1

Classic misplaced modifier

could modify the wrong thing.

Coax the monkey **with a banana**.

Which does it modify?

2

Squinting modifier

could feasibly modify the thing to its left or right.

Whispering **quickly** annoys her.

Which does it modify?

3

Dangling modifier

has nothing to modify.

Aware of risk, the job was abandoned.

19. Which of the sentences has a dangling modifier?

A. Making only minimum wage, I earned P 5,000 last summer.

B. Left alone in the house, the thunderstorm was terrifying.

C. Writing carefully, Ana finished the essay on time.

D. While still a student, he received a job offer.

Leaving Starbucks, the foamy latte fell
and exploded all over the sidewalk.

2

Irresponsibly texting while driving, the young
moose was struck down and died.

3

The kind mother handed out bologna sandwiches to all the kids in Ziploc bags.

When the pigs left their pens, I gave
them a new coat of paint.

SCRIBENDI

I saw a dead skunk driving
on the highway.

20. Which is a homonym for the word blew **YOU**?

A. we

B. your

C. hue

D. cue

TEACHER

21. Given below are some of the contributions of the theoretical linguistics to teaching EXCEPT ONE.

A. Changing views and theories of language teaching.

B. Different technical terms like phoneme, morpheme, hyponymy, etc.

C. Pronouncing words and transcribing sounds using the IPA

D. Different approaches to language teaching

- **Theoretical linguistics** is the branch of linguistics that is most concerned with developing models of linguistic knowledge. The fields that are generally considered the core of theoretical linguistics are syntax, phonology, morphology, and semantics.
- **Applied linguistics** is an interdisciplinary field of study that identifies, investigates, and offers solutions to language-related real-life problems. Some of the academic fields related to applied linguistics are education, linguistics, psychology, anthropology, and sociology.

22. Which of the following is NOT a contribution of applied linguistics to language teaching?

- A. How to develop the macro-language skills of listening, speaking, reading.
- B. Ideas about learning styles of students and materials production
- C. Learning strategies, principles of test construction, and conducting classical research
-  D. Relationships between and among sentences in a text

22. Genre analysis, macro-discourse patterns, text analysis, micro-discourse analysis are concept developments in linguistics. Which list of authors would you consult to know more about those?

- A. Michael Hoey, Winifred Crombie, John Swales, Trimble
- B. Svaidik, Geoffrey Leech, Celce-Murcia, Terence Odin
- C. John Austin, John Searle, and Dell Hymes
- D. John Austin, Winifred Crombie, John Swales, Trimble

23. Pedagogical grammar, collocational grammar, ergative verbs, semantic grammar are concept developments in linguistics. Which list of authors would you consult to know more about them?

- A. John Austin, John Searle, and Dell Hymes
- B. Michael Hoey, Winifred Crombie, John Swales, and Trimble
-  C. Svaidik, Geoffrey Leech, Celce-Murcia and Terence Odlin
- D. John Austin, John Searle, Dell Hymes, Terence Odlin

24. Language learning refers to how an individual learns a language. Which statement about language learning is **CORRECT**?

- A. Language learning occurs in a natural manner.
- B. Language learning happens when a person knows how to speak a language after living in the country that has it as its native tongue.
-  C. Language learning occurs in a formal and nonconstructive process.
- D. Language learning is a constructive process through which we know and use the language.

Language learning is the teaching about a language (its use, its speaker, its structure), with the hope that the student will learn enough to actually be able to speak the target language. Language acquisition, in its current sense, tries to expose the student to the target language in meaningful ways so that he or she acquires the language's structure through actual use.

Language Acquisition	Language Learning
Children acquire a language that is normally spoken in the surrounding community	Adults learn a language that is NOT normally spoken in the surrounding community
Acquisition takes place naturally in communicative situations with others who know the language	Learning is a more conscious process of accumulating knowledge of language in an institutional setting
Acquisition is relatively faster; it takes place with no language system in the background	Learning is slower; it takes place against an already acquired language system

25. Which hypothesis on second language acquisition states that grammatical structure proceeds in a predictable order, that is, some grammatical structures are to be acquired early and the others later?

- A. Monitor hypothesis
- B. Input hypothesis
- C. Affective Filter hypothesis
- D. Natural order hypothesis

Natural Order hypothesis suggested that the acquisition of grammatical structures follows a 'natural order' which is predictable. For a given language, some grammatical structures tend to be acquired early while others late. This order seemed to be independent of the learners' age, L1 background, conditions of exposure, and although the agreement between individual acquirers was not always 100% in the studies, there were statistically significant similarities that reinforced the existence of a Natural Order of language acquisition. Krashen however points out that the implication of the natural order hypothesis is not that a language program syllabus should be based on the order found in the studies. In fact, he rejects grammatical sequencing when the goal is language acquisition.

The 5 hypotheses of Krashen's Theory of Second Language Acquisition

Krashen's theory of second language acquisition consists of five main hypotheses:

- the **Acquisition-Learning** hypothesis;
- the **Monitor** hypothesis;
- the **Input** hypothesis;
- and the **Affective Filter** hypothesis;
- the **Natural Order** hypothesis.

The **Acquisition-Learning**

According to Krashen there are two independent systems of foreign language performance: 'the acquired system' and 'the learned system'. The 'acquired system' or '**acquisition**' is the product of a subconscious process very similar to the process children undergo when they acquire their first language. It requires meaningful interaction in the target language - natural communication - in which speakers are concentrated not in the form of their utterances, but in the communicative act.

The "learned system" or "**learning**" is the product of formal instruction and it comprises a conscious process which results in conscious knowledge 'about' the language, for example knowledge of grammar rules. A deductive approach in a teacher-centered setting produces "**learning**", while an inductive approach in a student-centered setting leads to "**acquisition**".

According to Krashen 'learning' is less important than 'acquisition'

The **Monitor** hypothesis explains the relationship between acquisition and learning and defines the influence of the latter on the former. The monitoring function is the practical result of the learned grammar. According to Krashen, the acquisition system is the utterance initiator, while the learning system performs the role of the 'monitor' or the 'editor'. The 'monitor' acts in a planning, editing and correcting function when three specific conditions are met:

- The second language learner has sufficient time at their disposal.
- They focus on form or think about correctness.
- They know the rule.

The **Input hypothesis** is only concerned with 'acquisition', not 'learning'. According to this hypothesis, the learner improves and progresses along the 'natural order' when he/she receives second language 'input' that is one step beyond his/her current stage of linguistic competence. For example, if a learner is at a stage 'i', then acquisition takes place when he/she is exposed to '**Comprehensible Input**' that belongs to level 'i + 1'. Since not all of the learners can be at the same level of linguistic competence at the same time, Krashen suggests that *natural communicative input* is the key to designing a syllabus, ensuring in this way that each learner will receive some 'i + 1' input that is appropriate for his/her current stage of linguistic competence.

The **Affective Filter** hypothesis embodies Krashen's view that a number of 'affective variables' play a facilitative, but non-causal, role in second language acquisition. These variables include: motivation, self-confidence, anxiety and personality traits. Krashen claims that learners with high motivation, self-confidence, a good self-image, a low level of anxiety and extroversion are better equipped for success in second language acquisition. Low motivation, low self-esteem, anxiety, introversion and inhibition can raise the affective filter and form a 'mental block' that prevents comprehensible input from being used for acquisition. In other words, when the filter is 'up' it impedes language acquisition. On the other hand, positive affect is necessary, but not sufficient on its own, for acquisition to take place.

26. What approach involves a lot of repetition of the second language grammatical forms especially those that are different from the learner's first language?

- A. Natural approach
- B. Communicative approach
- C. Linguistic approach
- D. Audiolingual approach

The Grammar-Translation Approach

This approach was historically used in teaching Greek and Latin. The approach was generalized to teaching modern languages.

Classes are taught in the students' mother tongue, with little active use of the target language. Vocabulary is taught in the form of isolated word lists. Elaborate explanations of grammar are always provided. Grammar instruction provides the rules for putting words together; instruction often focuses on the form and inflection of words. Reading of difficult texts is begun early in the course of study. Little attention is paid to the content of texts, which are treated as exercises in grammatical analysis. Often the only drills are exercises in translating disconnected sentences from the target language into the mother tongue, and vice versa. Little or no attention is given to pronunciation.

The Reading Approach

This approach is selected for practical and academic reasons. For specific uses of the language in graduate or scientific studies. The approach is for people who do not travel abroad for whom reading is the one usable skill in a foreign language.

The priority in studying the target language is first, reading ability and second, current and/or historical knowledge of the country where the target language is spoken. Only the grammar necessary for reading comprehension and fluency is taught. Minimal attention is paid to pronunciation or gaining conversational skills in the target language. From the beginning, a great amount of reading is done in L2, both in and out of class. The vocabulary of the early reading passages and texts is strictly controlled for difficulty. Vocabulary is expanded as quickly as possible, since the acquisition of vocabulary is considered more important than grammatical skill. Translation reappears in this approach as a respectable classroom procedure related to comprehension of the written text.

The Audiolingual Method

This method is based on the principles of behavior psychology. It adapted many of the principles and procedures of the Direct Method, in part as a reaction to the lack of speaking skills of the Reading Approach.

New material is presented in the form of a dialogue. Based on the principle that language learning is habit formation, the method fosters dependence on mimicry, memorization of set phrases and over-learning. Structures are sequenced and taught one at a time. Structural patterns are taught using repetitive drills. Little or no grammatical explanations are provided; grammar is taught inductively. Skills are sequenced: Listening, speaking, reading and writing are developed in order. Vocabulary is strictly limited and learned in context. Teaching points are determined by contrastive analysis between L1 and L2. There is abundant use of language laboratories, tapes and visual aids. There is an extended pre-reading period at the beginning of the course. Great importance is given to precise native-like pronunciation. Use of the mother tongue by the teacher is permitted, but discouraged among and by the students. Successful responses are reinforced; great care is taken to prevent learner errors. There is a tendency to focus on manipulation of the target language and to disregard content and meaning.

The Silent Way

This method created by Caleb Gattegno begins by using a set of colored rods and verbal commands in order to achieve the following:

To avoid the use of the vernacular. To create simple linguistic situations that remain under the complete control of the teacher To pass on to the learners the responsibility for the utterances of the descriptions of the objects shown or the actions performed. To let the teacher concentrate on what the students say and how they are saying it, drawing their attention to the differences in pronunciation and the flow of words. To generate a serious game-like situation in which the rules are implicitly agreed upon by giving meaning to the gestures of the teacher and his mime. To permit almost from the start a switch from the lone voice of the teacher using the foreign language to a number of voices using it. This introduces components of pitch, timbre and intensity that will constantly reduce the impact of one voice and hence reduce imitation and encourage personal production of one's own brand of the sounds.

Communicative Competence Approach

- The classroom is devoted primarily to activities that foster acquisition of L2. Learning activities involving practice and drill are assigned as homework.
- The instructor does not correct speech errors directly.
- Students are allowed to respond in the target language, their native language, or a mixture of the two.
- The focus of all learning and speaking activities is on the interchange of a message that the acquirer understands and wishes to transmit, i.e. meaningful communication.
- The students receive comprehensible input in a low-anxiety environment and are personally involved in class activities.

Functional-Notional Approach

This method of language teaching is categorized along with others under the rubric of a communicative approach. The method stresses a means of organizing a language syllabus. The emphasis is on breaking down the global concept of language into units of analysis in terms of communicative situations in which they are used.

Notions are meaning elements that may be expressed through nouns, pronouns, verbs, prepositions, conjunctions, adjectives or adverbs. The use of particular notions depends on three major factors: a. the functions b. the elements in the situation, and c. the topic being discussed.

Total Physical Response

James J. Asher defines the Total Physical Response (TPR) method as one that combines information and skills through the use of the kinesthetic sensory system. This combination of skills allows the student to assimilate information and skills at a rapid rate. As a result, this success leads to a high degree of motivation. The basic tenets are:

Understanding the spoken language before developing the skills of speaking. Imperatives are the main structures to transfer or communicate information. The student is not forced to speak, but is allowed an individual readiness period and allowed to spontaneously begin to speak when the student feels comfortable and confident in understanding and producing the utterances.

27. If a teacher asks the students to prepare a written story/text of their experience, what kind of approach has been used?

-  a. Language experience approach
- b. Dialogue journals
- c. Culture studies
- d. Total physical response

28. The domain of language that an individual acquires from 1-2 years is _____.

A. Cognitive-Academic Language Proficiency (CALP)

B. First Language

C. Second Language

D. Basic Interpersonal Communication Skills (BICS)

Basic Interpersonal Communication Skills (BICS) refer to linguistic skills needed in everyday, social face-to-face interactions. For instance, the language used in the playground, on the phone, or to interact socially with other people is part of BICS. The language used in these social interactions is context embedded. That is, it is meaningful, cognitively undemanding, and non-specialized. It takes the learner from six months to two years to develop BICS.

Cognitive Academic Language Proficiency (CALP) focuses on proficiency in academic language or language used in the classroom in the various content areas. Academic language is characterized by being abstract, context reduced, and specialized. In addition to acquiring the language, learners need to develop skills such as comparing, classifying, synthesizing, evaluating, and inferring when developing academic competence. It takes learners at least five years to develop CALP. Research from Collier and Thomas (1995) has shown that it may take children with no prior instruction or no support in native language development at least seven years to develop CALP.

29. Which sentence shows the need for mastery of their plural form?

-  A. Bacteria is a disease-causing microorganisms.
- B. Bacteria are studied microscopically.
- C. Bacteria have cell walls.
- D. Bacteria abound anywhere.

30. What is at the heart of reading, be it in the first or second language?

A. pronunciation

B. comprehension

C. spelling

D. grammar

31. Tenses express time. Which sentence shows that an action happened at a recent past?

A. Carlo just climbed the mountain last year.

B. Carlo has just climbed the mountain.

C. Carlo had just climbed the mountain.

D. Carlo is just climbing the mountain.

PRESENT PERFECT

americanenglish.state.gov

Image: ©alexmillos/Shutterstock

Duration from the Past Until Now *

He has been a teacher
since 2002.

I have had a cold for a week.

has/have + past participle

.....

Change Over Time

Your English has improved
since the last time we met.

My niece has grown a lot in
the past year.

Event in the Past at an Unspecified Time

She has been to Paris.

I've seen that movie.

Repeated Events in the Past Until Now

We have had four exams so far
this semester.

I've been to this restaurant many
times since I moved next door.

Uncompleted Action that is Expected to Happen

She hasn't finished her
homework yet.

They still haven't arrived.

* Often the present perfect is used in this way with stative verbs (verbs that are not used in the -ing form).

PRESENT PERFECT PROGRESSIVE

(present perfect continuous)

has/have + been + verb-ing

Stative verbs usually are not used in progressive forms.
With these verbs, use the present perfect form instead.

When do we use the present perfect progressive?

Duration from the Past until Now

I have been working in New York for five years.

She has been studying English for two years.

Actions Happening Recently (Lately)

She has been working a lot recently.

I have been learning guitar lately.

Actions that Recently Stopped

I've been working all day. I'm tired, so I'm going to take a nap.

It has been raining. The sidewalk is wet.

Temporary Actions

We've been visiting our family for the past week.

I've been taking a break from my usual routine this week.

32. Which question is CORRECT?

A. That is your car?

B. How much this bag is?

C. Are these your pens?

D. These your pens?

33. What is syntactic ambiguity?

- A. words having the same meaning
- B. phrases with the same meaning
- C. words with more than one meaning
-  D. phrases with more than one meaning

34. Which word pair exemplifies hyponymy?

A. pasta - spaghetti

B. beauty - pulchritude

C. fly (insect) - fly (zipper)

D. benevolent - malevolent

Hyponyms and Hypernyms

- **Hyponym**: the sense is a subclass of another sense
 - *car* is a hyponym of *vehicle*
 - *dog* is a hyponym of *animal*
 - *mango* is a hyponym of *fruit*
- **Hypernym**: the sense is a superclass
 - *vehicle* is a hypernym of *car*
 - *animal* is a hypernym of *dog*
 - *fruit* is a hypernym of *mango*

hypernym	vehicle	fruit	furniture	mammal
hyponym	car	mango	chair	dog

35. All of the following are summaries of the second language acquisition theory formulated by Stephen Krashen EXCEPT

A. acquisition is more important in learning

B. low or weak affective filter is required to allow language input

 C. age is a definite predictor of second language rate or attainment

D. language acquisition requires comprehensible input containing

$i+1$

36. Saussure's distinction between language and parole is basically _____ while Chomsky's is basically psycholinguistic.

- A. Applied linguistic
- B. Computational linguistic
- C. Neurolinguistic
- D. Sociolinguistic

Competence vs. Performance given by Chomsky closely resembles the langue/parole dichotomy given by Saussure. But it differs in that while langue is the same with every language user, competence may differ from person to person. **Saussure's understanding of langue emphasizes its predominant social aspect, while Chomsky's Competence is based on psychology and presumes individual differences between human beings.** Thus speaker A may be more competent than B, though they share the same conventions of language. Similarly A's Performance would also be different from that of B. Chomsky's view of competence is also based on the idea of an inbuilt language acquisition device (LAD) in humans what enables a person to acquire competence i.e. to internalize the system of the rules of the language, enabling him to generate the infinite number of sentences. The similarity is that both linguists regard language as a system and ignore the individual speech acts. The notion of langue emphasizes the importance of language as a social phenomenon (Behaviorism). This makes it different from Chomsky's competence where the tendency is to see language as a biological and genetically inherited faculty (Mentalism); but both the theories see language as an abstract system.

37. Which type of grammar is applied in this sentence?

“I ain’t going nowhere.”

A. Generative

B. Prescriptive

C. Descriptive

D. Constructive

Descriptive grammar is a study of a language, its structure, and its rules as they are used in daily life by its speakers from all walks of life, including standard and nonstandard varieties.

Prescriptive grammar, on the other hand, specifies how a language and its grammar rules should be used. A prescriptivist view of language implies a distinction between “good grammar” and “bad grammar,” and its primary focus is on standard forms of grammar and syntactic constructions.

38. Which describes a periodic sentence?

- A. It suspends the conclusion of the sence at the end of a sentence.
- B. It has syntactic units of equal lengths.
- C. It is a basic pattern of antithetical inversion of the sentence.
- D. It has a series of clauses extended from the independent clause.

A periodic sentence has the main clause or predicate at the end. This is used for emphasis and can be persuasive by putting reasons for something at the beginning before the final point is made. It can also create suspense or interest for the reader.

39. Which of the following uses extensive verbs?

A. Brent and his brothers seemed too tired.

B. At 10 p.m., Jenny vanished into thin air.

C. I am so angry because of what you did.

D. Jenny looks very young.

Extensive Verbs are used to say what the subject is doing. Extensive verbs are most other verbs, they do not have a subject complement. Extensive means to cover a wider area, it takes information away from the subject. Words or phrases following an extensive verb work as the verb's object. They apply to the verb, not the subject.

Examples:

“John runs very fast.” – The focus of this sentence is run, and how he does that.

“Mary paints quite badly.” – The focus of this sentence is paints, and how she does that.

Intensive Verbs are used to describe the subject. Intensive verbs are also called copula verbs, are usually followed by a noun or a noun phrase, an adjective or a prepositional phrase. Intensive means to focus on one thing; in this case, the subject. The words or phrases following an intensive verb work as the subject complement. This means they apply to the subject, not the verb.

Examples:

“Rose is a student.” – The focus of this sentence is Rose and what she is.

“Tomas looks very young for his age.” – The focus of this sentence is Tomas and what he looks like.

40. Which of the following is a complex sentence?

A. Mary did not go to the party.

B. Mary went to work but John went to the party.

C. He left in a hurry after he got a phone call.

D. He left in a hurry after he got a phone call but he came back five minutes later.

- **Simple sentences:** A simple sentence is an independent clause with no conjunction or dependent clause.
- **Compound sentences:** A compound sentence is two independent clauses joined by a conjunction (e.g., and, but, or, for, nor, yet, so).
- **Complex sentences:** A complex sentence contains one independent clause and at least one dependent clause. The clauses in a complex sentence are combined with conjunctions and subordinators, terms that help the dependent clauses relate to the independent clause. Subordinators can refer to the subject (who, which), the sequence/time (since, while), or the causal elements (because, if) of the independent clause.
- **Compound-complex sentences:** A compound-complex sentence contains multiple independent clauses and at least one dependent clause. These sentences will contain both conjunctions and subordinators.

41. What is the function of the gerund phrase in the sentence? “**Every Sunday, my friends go hiking.**”

A. Appositive

B. Direct Object

C. Subject Complement

D. Object of the Preposition

42. Which of the following contains a reflexive pronoun?

A. The mother gave herself a relaxing bath.

B. The president himself believes that he can lead as expected.

C. Those friendly neighbors themselves were skeptic about the progress.

D. Susan herself made a nice cup of tea.

INTENSIVE PRONOUNS VERSUS REFLEXIVE PRONOUNS

Intensive Pronouns
add emphasis.

Intensive Pronouns
are not essential to
the meaning of a
sentence.

Intensive Pronouns
are not used in
sentences where the
subject and object
refers to the same.

Intensive Pronouns
cannot act as the
object of a sentence.

Reflexive Pronouns
refer back to the
subject.

Reflexive Pronouns
are essential to the
meaning of a
sentence.

Reflexive Pronouns
are used in a sentence
when the subject and
the object are the
same.

Reflexive Pronouns
act as the object of a
sentence.

43. “If I hadn’t been sick, I would have gone to the party.” This sentence is an example of which conditional sentence?

- A. zero conditional
- B. first conditional
- C. second conditional

D. third conditional

TEACHER

English
Grammar

Conditionals

CONDITION

+

RESULT

ZERO
conditional

If you stand in the rain, you get wet.
If you heat ice, it melts.

PRESENT SIMPLE

+

PRESENT SIMPLE

USES: Facts which are generally true or scientific facts.
The condition always has the same result.

FIRST
conditional

If it rains, we will cancel the trip.
If you study, you will pass the exam.

PRESENT SIMPLE

+

WILL / WON'T + VERB

USES: A possible situation in the future.
Predicting a likely result in the future (if the condition happens).

SECOND
conditional

If I won the lottery, I would travel a lot.
If they sold their house, they would be rich.

PAST SIMPLE

+

WOULD + VERB

USES: Hypothetical or unlikely situations.
Unreal or improbable situation now or in the future.

THIRD
conditional

If you had studied, you would have passed the exam.
If I hadn't been sick, I would have gone to your party.

PAST PERFECT

+

WOULD HAVE + PAST PARTICIPLE

USES: The person is imagining a different past.
Imaginary situation that did not happen in the past.

44. **“They had went to the lake without me by the time I got there,” said Jacques.** Which part has an error?

- A. had went
- B. without me
- C. I got there
- D. No error

45. Work as quick as you can but as carefully as possible when you take the test.

Which part has an error?

A. as quick

B. as you can

C. as carefully

D. no error

47. Which of the following approaches focuses on the figures of speech found in a literary text?

A. Formalism

B. Structuralism

C. Biographical criticism

D. Psychological criticism

Structuralism/Semiotics focuses on literature as a system of signs where meaning is constructed in a context, where words are inscribed with meaning by being compared to other words and structures.

Formalism compels readers to judge the artistic merit of literature by examining its formal elements, like language and technical skill. Formalism favors a literary canon of works that exemplify the highest standards of literature, as determined by formalist critics.

Historical-biographical criticism examines literature through the perspective of the author's historical context. This approach assumes that the significance of a particular piece of literature is inextricably linked to its historical context. For example, historical-biographical critics evaluate Shakespeare's work within the context of English literature, history, and culture during the late sixteenth and early seventeenth centuries.

Psychoanalytic criticism examines literature based on the psychological desires and neuroses of the characters within a particular piece of literature. Psychoanalytic critics believe that an author's unconscious thoughts are expressed through their work.

Literary Criticism – involves the reading, interpretation and commentary of a specific text or texts which have been designated as literature. Literary criticism is the application of a literary theory to specific texts. Literary theory identifies what makes literary language literary and the function of literary text in social and cultural terms.

48. Which of the following approaches investigates the underlying patterns of the different texts that people read?

A. Formalism

B. Structuralism

C. Biographical criticism

D. Psychological criticism

49. “Magnificence” by Estrella Alfon shows how a mother’s image becomes a protector instead of the stereotyped father. What approach should be used to investigate its role?

A. Gender Criticism

B. Reader-response Criticism

C. Psychological Criticism

D. Biographical Criticism

Reader-response criticism is rooted in the belief that a reader's reaction to or interpretation of a text is as valuable a source of critical study as the text itself.

Feminist criticism: As the feminist movement gained steam in the mid-twentieth century, literary critics began looking to gender studies for new modes of literary criticism. One of the earliest proponents of feminist criticism was Virginia Woolf in her seminal essay, *A Room of One's Own*. Other notable feminist critics include Elaine Showalter and Hélène Cixous.

50. What approach focuses on man's relationship with others in the society, politics, religion, and business?

- a. Sociological Approach
- b. Biographical Approach
- c. Psychological Criticism
- d. Mythological Criticism

51. In the Middle Ages and Renaissance, it was commonly described as a symbol of purity and grace, which could only be captured by a virgin.

A. Troll

B. Dragon.

C. Kappa

D. Unicorn

52. The writing style used by Salman Rushdie and Gabriel Garcia Marquez is most often referred to as ____.

A. Stream of Consciousness

B. Magical Realism

C. Minimalism

D. Social Realism

53. The Pyramus and Thisbe love affair shows

A. immaturity of teenagers

B. the aggressiveness of young lovers

C. the authority of parents over their children

D. the attempt to change traditional practices

Pyramus and Thisbe

Pyramus and Thisbe are two lovers in the city of Babylon who occupy connected houses. Their respective parents, driven by rivalry, forbid them to wed. Through a crack in one of the walls they whisper their love for each other. They arrange to meet near a tomb under a mulberry tree and state their feelings for each other. Thisbe arrives first, but upon seeing a lioness with a bloody mouth from a recent kill, she flees, leaving behind her cloak. When Pyramus arrives, he is horrified at the sight of Thisbe's cloak: the lioness had torn it and left traces of blood behind, as well as its tracks. Assuming that a wild beast has killed her, Pyramus kills himself, falling on his sword, a typical Babylonian way to commit suicide, and in turn splashing blood on the white mulberry leaves. Pyramus's blood stains the white mulberry fruits, turning them dark. Thisbe returns, eager to tell Pyramus what had happened to her, but she finds Pyramus's dead body under the shade of the mulberry tree. Thisbe, after a brief period of mourning, stabs herself with the same sword. In the end, the gods listen to Thisbe's lament, and forever change the color of the mulberry fruits into the stained color to honor forbidden love. Pyramus and Thisbe proved to be faithful lovers to each other until the very end.

54. What is the poem “To A Lost One” about?

A. An appeal to be remembered by a lover.

B. A threat to a lover

C. Beautiful memories of a dead person

D. A ghost that haunts a fastidious lover

To A Lost One

Angela Manalang-Gloria

I shall haunt you, O my lost one, as the twilight
Haunts a grieving bamboo trail,
And your dreams will linger strangely with the music
Of a phantom lover's tale

You shall not forget, for I am past forgetting
I shall come to you again
With the starlight, and the scent of wild champakas,
And the melody of rain.

You shall not forget. Dusk will peer into your
Window, tragic-eyed and still,
And unbidden startle you into remembrance
With its hand upon the sill.

55. What is the problem or conflict in the story “The Mat” by Francisco Arcellana?

A. Emilia's indifference

B. Sibling rivalry

C. Mr. Angeles' emotionality

D. Hunger in the family

The Mats

As the story opens Mr Angeles, head of a large family, has just returned from one of his periodic inspection tours on the families farm lands in the Marivales in the province of Bataan. Mr. Angeles return is always very exciting for his children as he always brings them a nice gift in addition to the huge amount of fruit he brings home. He has a special surprise this time. While he was gone he had met a marvelous artist who specializes in making sleeping mats. His wife still treasures the sleeping mat she got as a wedding present. Whenever anyone in the family is sick they sleep on the mat. Everyone gathers around for the mats to be given out, he has them all rolled together. The mats are great works of art, each one has the name of the child it belongs to woven into it along with a special symbol that relates to their life. They are all totally thrilled. Then the father tells them that they are to not use these mats until they have reached a milestone in their lives such as enrollment in the University of the Philippines. This seems a little cruel but maybe it was motivational. I am not quite sure how this should be taken. Then they notice they notice there are three more mats rolled up. Those are for their children that have passed away. This somehow brings a chill on the occasion, or at least it did to me. It almost seemed a burden a father should share on his own but it can also be taken as total family bonding even with members that have passed and placing a spirit of history in the children.

56. What is the message of the short story, “The Centipede” by Romy V. Diaz?

A. Childhood memories are treasures.

B. Teasing of taunting should only be done by adults.

C. Children should be responsible with what trick they do with their siblings.

D. Childhood relationships between siblings were sometimes painful.

The Centipede

A boy named Eddie hated his sister Delia. This started when Delia beat his dog Biryuk. He wanted to stop her but can't since Delia has a weak heart.

A flashback shows that Eddie and Delia treat each other as rivals. Delia was 8 years old when Eddie was born and her mother died, which seems to be the reason why she also hated Eddie and blamed him for the death of her mother.

Delia is also jealous of Eddie since the latter gains more attention. While Eddie loves animals and insects, Delia doesn't, which is why she tortures them just to make Eddie more miserable.

This went out of hand when Delia stabbed Eddie's dog in the eye. He wanted revenge. A helper named Berto gave Eddie the centipede. He wished to frighten Delia. His senses were clouded with hate.

While Delia embroidered a white cloth, he threw the centipede on his sister's lap. He returned to his senses and saw his sister down and writhing in pain. He regretted it about the damage has already been done.

57. 'The Good Earth' was rejected fourteen times, before being published and going on to win the Pulitzer Prize. Who was the author

A. Pearl S. Buck

B. John Steinbeck

C. Edith Wharton

D. Henry Miller

58. Name the book which opens with the line
'All children, except one grew up'?

A. The Jungle Book

B. Tom Sawyer

 C. Peter Pan

D. The Adventures of Huckleberry Finn

59. In the book 'The Lord of the Rings',
who or what is Bilbo Baggins?

A. man

B. hobbit

C. wizard

D. dwarf

60. Who wrote this line? “Where ignorance is bliss, it is folly to be wise”.

- A. Robert Browning
- B. William Shakespeare
- C. Rudyard Kipling
- D. Thomas Gray

End of session.
