1. Rubric as a measuring instrument that is best use in assessing _____

- A. Sentence structure
- B. Oral recitation
- C. Multiple choice test
- D. Dictation test

TEACHER

A **rubric** is a scoring tool that explicitly represents the performance expectations for an assignment or piece of work. A rubric divides the assigned work into component parts and provides clear descriptions of the characteristics of the work associated with each component, at varying levels of mastery. Rubrics can be used for a wide array of assignments: papers, projects, oral presentations, artistic performances, group projects, etc. Rubrics can be used as scoring or grading guides, to provide formative feedback to support and guide ongoing learning efforts, or both.

Essay Rubric

Directions: Your essay will be graded based on this rubric. Consequently, use this rubric as a guide when writing your essay and check it again before you submit your essay.

Traits	4	3	2	1
Focus & Details	There is one clear, well-focused topic. Main ideas are clear and are well supported by detailed and accurate information.	There is one clear, well-focused topic. Main ideas are clear but are not well supported by detailed information.	There is one topic. Main ideas are somewhat clear.	The topic and main ideas are not clear.
Organization	The introduction is inviting, states the main topic, and provides an overview of the paper. Information is relevant and presented in a logical order. The conclusion is strong.	The introduction states the main topic and provides an overview of the paper. A conclusion is included.	The introduction states the main topic. A conclusion is included.	There is no clear introduction, structure, or conclusion.
Voice	The author's purpose of writing is very clear, and there is strong evidence of attention to audience. The author's extensive knowledge and/or experience with the topic is/are evident.	The author's purpose of writing is somewhat clear, and there is some evidence of attention to audience. The author's knowledge and/or experience with the topic is/are evident.	The author's purpose of writing is somewhat clear, and there is evidence of attention to audience. The author's knowledge and/or experience with the topic is/are limited.	The author's purpose of writing is unclear.
Word Choice	The author uses vivid words and phrases. The choice and placement of words seems accurate, natural, and not forced.	The author uses vivid words and phrases. The choice and placement of words is inaccurate at times and/or seems overdone.	The author uses words that communicate clearly, but the writing lacks variety.	The writer uses a limited vocabulary. Jargon or clichés may be present and detract from the meaning.
Sentence Structure, Grammar, Mechanics, & Spelling	All sentences are well constructed and have varied structure and length. The author makes no errors in grammar, mechanics, and/or spelling.	Most sentences are well constructed and have varied structure and length. The author makes a few errors in grammar, mechanics, and/or spelling, but they do not interfere with understanding.	Most sentences are well constructed, but they have a similar structure and/or length. The author makes several errors in grammar, mechanics, and/or spelling that interfere with understanding.	Sentences sound awkward, are distractingly repetitive, or are difficult to understand. The author makes numerous errors in grammar, mechanics, and/or spelling that interfere with understanding.
Reviewer's Comments				

TEACHER

2. In developmental reading, this pertains to the familiarity of the students toward the sounds of the language.

A. Phonemic Awareness

B. Phonology

C. Syntax

D. Semantics

TEACHER

3. In development reading, this pertains to the ability of the learner to relate the written symbols to its corresponding sound.

- A. Phonemic Awareness 
- B. Phonics
- C. Syntax
- D. Semantics

TEACHER

Phonemic awareness is the *ability to hear, identify, move or change sounds, called phonemes, in spoken words*. Phonemic awareness is an important basic skill that gets students ready to develop into readers. Phonemic awareness is usually taught during kindergarten and beginning first grade. Phonemic awareness includes six basic components:

Rhyming: Identifying words that rhyme or producing words that rhyme such as, “hat” and “pat” or, “car” and “far.”

Isolation: Identifying a specific sound in a word such as, “What is the beginning sound in the ‘word ball’?” /b/. (Please note that the letter between slashes such as /b/ represents the sound the letter “b” makes when spoken.)

Sound isolation for ending or middle sounds is more difficult, but children also need to be able to identify these sounds. For example: “What is the ending sound in the word ‘tap’?” Answer: /p/. Or, “What is the middle sound in ‘cup’?” Answer: /u/.

Segmentation: Pulling apart the sounds in a word in order. For example: “What sounds do you hear in the word ‘lip’?” Answer: /l/ /i/ /p/. Deletion: Taking a sound off of a spoken word such as, “Say the word ‘sit’ without the /s/.” Answer: “it.”

Substitution: Changing a sound in a word to another sound. For example: “My word is ‘pin.’ Change the /p/ to /w/. What is the new word?” Answer: “win.”

Blending: Putting together sounds to make a word. For example: “Here are the sounds in a word /m/ /a/ /t/. What is the word?” Answer: “mat.”

4. Which hypothesis of Krashen's Monitor Model proposes that when learners are exposed to grammatical features a little beyond their current (i.e., $I + 1$), those features are “acquired”. Acquisition results from comprehensible input, which is made understandable with the help provided by the context.

- A. acquisition/learning hypothesis
- B. natural order hypothesis
- C. input hypothesis 
- D. affective filter hypothesis

TEACHER

Acquisition-Learning Hypothesis

Asserts there are two ways in which communication in a second language develops: language acquisition and language learning. language acquisition has much in common with the way children develop their first language (L1) in that it occurs subconsciously when the acquirer finds a need for communicating with others. Language learning on the other hand, involves explicit learning with direct instruction about the rules of the language.

Monitor Hypothesis

Learners acquire grammatical structures in a natural order, but conscious language rules are not developed until later. Once a student has conscious knowledge of grammatical structures, they are able to edit, or self-monitor, oral and written language. This process requires adequate time to develop.

TEACHER

Natural Order

Learners acquire the rules of language in a predictable sequence. “What is learned early in one language is learned early by others.” (Lightbrown and Spada (1996)

Comprehensible Input

Learners will best acquire language when given appropriate input. Comprehensible Input is easy to understand but still challenges the learner to infer meaning just beyond their level of language competence, often referred to as “ $i+1$ ”. Vygotsky’s zone of proximal development supports this hypothesis where in students must go beyond what they already know and build their new understanding on that foundation

Affective Filter

Learners require an environment where they feel safe to take risks necessary to learn the language. A learner’s emotional state will affect their receptiveness to comprehensible input.

TEACHER

5. All of the following are implications of Krashen's Monitor Model EXCEPT ____.

- A. Teachers should correct errors during the time they are committed as error correction is valuable. 
- B. Teachers should not insist on learners conversing before they feel comfortable in doing so.
- C. Teachers should not expect learners to learn “late structures” such as third person singular early.
- D. Teachers consider grammatical teaching is of limited value.

TEACHER

6. They view the language as a system of related elements or “building blocks” for the encoding of meaning, the elements being phonemes (sounds), morphemes (words), tagmemes (phrases/sentences/clauses).

- A. structuralists
- B. transformationalists
- C. functionalists
- D. interactionalists

● STRUCTURALISTS

- ▣ Believe that language can be described in terms observable and verifiable data as it is being used
- ▣ Language is a system of speech sounds used for human communication.
- ▣ Language is primarily VOCAL.
- ▣ Language is a system of systems.
- ▣ Sounds are arranged in certain fixed order to form meaningful words.
Ex: no words starts in bz- lr- or zl but, there are spr- and str-
- ▣ Language is a system of systems.
- ▣ Words are arranged to form meaningful sentences.
Ex: subject – verb- object
- ▣ Language is a system of systems.
- ▣ Language is a system of structurally related elements:
 - ▣ Phonemes – sounds
 - ▣ Morphemes – words
 - ▣ Tagmemes – phrases & sentences/clauses

TEACHER

● TRANSFORMATIONALISTS

- ▣ Believe that language is a system of knowledge made manifest in linguistic forms but innate and universal
- ▣ Language is a mental phenomenon.
- ▣ Language is INNATE. (LAD - Language Acquisition Device)
- ▣ Language is UNIVERSAL.
- ▣ Language is CREATIVE.

TEACHER

● **INTERACTIONALISTS**

- ▣ Believe that language is a vehicle for establishing interpersonal relations and for performing social transactions between individuals.
- ▣ Language is a tool for creating and maintaining social interactions through CONVERSATIONS.

● **FUNCTIONALISTS**

- ▣ Expressing emotions
- ▣ Persuade people
- ▣ Asking and giving information
- ▣ Making people do things for others

TEACHER

7. Which of the following is a view of a interactionalist?

- A. Language is primarily vocal.
- B. Language is creative.
- C. Language emphasizes the meaning and functions rather than the structures
- D. Language is a vehicle for establishing interpersonal relationship. 

TEACHER

8. Which theory on language teaching has given birth to the methods that are learner-centered, allowing learners to work in pairs or groups in information gap tasks and problem-solving activities where such communication strategies as information sharing, negotiation of meaning, and interaction are used.

- A. Structuralism
- B. Behaviorism
- C. Cognitivism
- D. Functionalism

TEACHER

9. It is a branch of linguistics that deals with how words combine to form phrases, phrases combine to form clauses, and clauses conjoin to make sentences.

A. morphology

B. syntax

C. semantics

D. pragmatics

TEACHER

**10. What category of illocutionary act is demonstrated in the following example?
Recession will worsen in Europe in the next five years.**

- A. representative 
- B. commissive
- C. directive
- D. expressive

TEACHER

Searle's Classification for Types of Illocutionary Acts

- A. **Assertives** (or representatives): *represent a state of affairs*
E.g. stating, claiming, hypothesizing, describing, telling, insisting, suggesting, asserting, or swearing that something is the case
- B. **Directives**: get the *addressee to do something*.
E.g. ordering, commanding, daring, defying, challenging
- C. **Commissives**: get the *speaker (i.e the one performing the act) to do something*
E.g. promising, threatening, intending, vowing to do or to refrain from doing something
- D. **Expressives**: express the *mental state of the speaker*.
E.g. congratulating, thanking, deploring, condoling, welcoming, apologizing
- E. **Declarations**: *bring about the state of affairs to which they refer*.
E.g. blessing, firing, baptizing, bidding, passing sentence, excommunicating

TEACHER

11. This view emphasizes that native language comprises habits that a second language learner must overcome. This is accomplished by forging new habits through repetition of pattern drills with accompanying positive reinforcement.

- A. Behaviorist learning theory
- B. Cognitive learning theory
- C. Functional learning theory
- D. Holistic learning theory

TEACHER

Behaviorism is a systematic approach to the understanding of human and animal behavior. It assumes that the behavior of a human or animal is a consequence of that individual's history, including especially reinforcement and punishment, and the individual's current motivational state and controlling stimuli.

TEACHER

12. Overgeneralization errors such as “goed” and “keeped” are common in children’s speech. Such errors suggest that children _____.

- A. are repeating what was said to them, and should take note of them
- B. do not know the past tense forms of those verbs, and experience difficulty
- C. induce the rules for the past tense from the language to which they are exposed 
- D. repeat the teacher’s mistakes, and those errors are very hard to undo

TEACHER

The term “***overgeneralization***” is most often used in connection with language acquisition by children. For example, a young child may say "foots" instead of "feet," overgeneralizing the morphological rule for making plural nouns.

Fossilization refers to the process in which incorrect language becomes a habit and cannot easily be corrected.

TEACHER

13. This type of language is used to describe the kind of language a learner uses at a given time, that is, his version of a given language, which deviates in certain ways from the language of a mature speaker.

- A. dialect
- B. native language
- C. holophrastic speech
- D. interlanguage

TEACHER

Interlanguage is a type of language (or linguistic system) used by second- and foreign-language learners who are in the process of learning a target language.

STAGES IN A CHILD'S LINGUISTIC DEVELOPMENT

- Babbling – 6-8 months
- One-word stage (**holophrastic stage**) – 9-18 months
- Two-word stage – 18-24 months
- Telegraphic stage (early multiword stage) – 24-30 months
- Later multiword stage – 30+ months

TEACHER

14. According to cognitivists, errors in second language learning is considered _____.

- A. basis for testing
- B. part of learning process 
- C. as proofs of unsystematic way of learning
- D. not part of natural progression in acquisition of English

TEACHER

15. What aptly describes “universal grammar”?

A. language used for communication by people who speak different first languages

B. rules applicable to all human languages 

C. language with the same vocabulary, grammar, and pronunciation

D. rules of grammar that distinguish one language from the others

TEACHER

16. At the border of two countries there is a port where fishermen work. The fishermen do not speak the same language, so they communicate using one that has been invented but only for the purpose of trade. This scenario most accurately describes which of the following types of language?

- A. a dialect
- B. a creole
- C. a pidgin 
- D. a regionalism

TEACHER

A **pidgin** is a simplified language that is developed as a means of communication between two or more groups who do not have a language in common.

A **creole** is a stable natural language that develops from the simplifying and mixing of different languages into a new one within a fairly brief period of time.

A **dialect** is a form of the language that is spoken in a particular part of the country or by a particular group of people.

Regionalism is a linguistic term for a word, expression, or pronunciation favored by speakers in a particular geographic area.

TEACHER

17. If the second language learner “assimilates”, then he ____.

- A. maintains its own life style and values and rejects those of the target language group
- B. adapts to the life style and values of the target language group but maintains its own life style and values for the intragroup use.
- C. gives up his own life style and values and adopts those of the target language group 
- D. maximizes the use of his first language and the target language

TEACHER

Piaget: Assimilation and Accommodation

Jean Piaget's theory of language development suggests that children use both assimilation and accommodation to learn language. **Assimilation** is the process of changing one's environment to place information into an already-existing **schema** (or idea). **Accommodation** is the process of changing one's schema to adapt to the new environment. Piaget believed children need to first develop mentally before language acquisition can occur. According to him, children first create mental structures within the mind (schemas) and from these schemas, language development happens.

- **accommodation** The act of fitting or adapting, or the state of being fitted or adapted; adaptation; adjustment.
- **assimilation** The absorption of new ideas into an existing cognitive structure.

TEACHER

18. The following are the areas of knowledge and skills of communicative competence EXCEPT

- A. grammatical competence
- B. sociolinguistic competence
- C. discourse competence
- D. structural competence

4 Dimensions of Communicative Competence Canale and Swaine (1980)

- ***Grammatical competence*** refers to what Chomsky calls linguistic competence.
- ***Sociolinguistic competence*** refers to an understanding of the social context in which communication takes place (role relationships, shared beliefs, and information between participants...)
- ***Discourse competence*** refers to the interpretation of individual message elements in terms of their interconnectedness and how meaning is represented in relation to the entire discourse or text.
- ***Strategic competence*** refers to the coping strategies that participants use to initiate terminate, maintain, repair, and redirect communication

TEACHER

19. Speaker A's final remark functions as ____.

Speaker A: That's the telephone.

Speaker B: I'm in the bath.

Speaker A: OK.

- A. a request to answer the phone
- B. an excuse for not complying
- C. acceptance of an excuse
- D. sarcasm

TEACHER

20. What is strategy is used by the second language learner in the following situation”

**“The student forgot the English term “train station”.
He used the phrase “the place for trains” instead.**

- A. inference
- B. paraphrase
- C. generalization
- D. adaptation

TEACHER

21. Within the communication process, the area that causes the most breakdowns is ____.

- (A) interference
- (B) feedback
- (C) the situation
- (D) the channel
- (E) the message

TEACHER

22. David is preparing a speech about why Hollywood became the center of the motion picture industry and the impact that its development as the center had on filmmaking. David's speech should be organized using which of the following methods?

- (A) Spatial
- (B) Chronological
- (C) Cause-effect
- (D) Problem-solution
- (E) Topical

TEACHER

23. All of the following are correct descriptions of listening behavior EXCEPT:

(A) Careful listening can lead to anticipation of a speaker's actions.

(B) People who learn to listen selectively can shut out what is undesirable.

(C) Listening comprises more than one-half of all communication.

(D) The ability to be a good listener comes naturally, and no training is necessary.

TEACHER

24. When a group is faced with a problem requiring immediate action, the most effective leadership style is ____.

- (A) authoritarian
- (B) democratic
- (C) laissez-faire
- (D) charismatic
- (E) permissive

TEACHER

Transactional leadership - inquire the interactions between leaders and followers; starts with the premise that team members agree to obey their leader totally when they take a job on.

Autocratic leadership - all decision-making powers are centralized in the leader as shown such leaders are dictators; extreme form of transactional leadership, where a leader exerts high levels of power over his or her employees or team members

Transformational leadership - leadership that creates valuable and positive change in the followers; focuses on “transforming” others to help each other, to look out for each other, to be encouraging and harmonious, and to look out for the organization as a whole.

TEACHER

Servant Leadership - the leader as a servant, with his or her key role being in developing, enabling and supporting team members, helping them fully develop their potential and deliver their best

Charismatic Leadership - can appear similar to a transformational leadership style, in that the leader injects huge doses of enthusiasm into his or her team, and is very energetic in driving others forward; charismatic leaders can tend to believe more in themselves than in their teams

Democratic Leadership - the leader will make the final decision, he or she invites other members of the team to contribute to the decision-making process.

TEACHER

Laissez-faire Leadership - the “hands-off ” style; the manager provides little or no direction and gives employees as much freedom as possible; all authority or power is given to the employees and they must determine goals, make decisions, and resolve problems on their own.

Charismatic Leadership - can appear similar to a transformational leadership style, in that the leader injects huge doses of enthusiasm into his or her team, and is very energetic in driving others forward; charismatic leaders can tend to believe more in themselves than in their teams

Bureaucratic Leadership - emphasizes procedures and historical methods regardless of their usefulness in changing environments; bureaucratic leaders work “by the book”, ensuring that their staff follow procedures exactly. This is a very appropriate style for work involving serious safety risks such as working with machinery, with toxic substances, at heights or where large sums of money are involved such as cash-handling.

TEACHER

25. Schema activation is important to make sense of new information in light of what students already know, and to make the necessary connection between the two. The following are good activities for schema activation EXCEPT ____.

- A. constructing graphic organizer
- B. previewing a passage
- C. brainstorming ideas
- D. evaluating or assessing ideas

TEACHER

26. The following are concerns of teaching reading EXCEPT ____.

- A. vocabulary development
- B. comprehension development
- C. output development 
- D. application

TEACHER

27. The following are principles for designing effective and interesting reading lessons EXCEPT _____.

- A. For reading lessons to be interesting and motivating, they must focus on simple themes. 
- B. Instructional activities have a teaching rather than a testing focus.
- C. Lessons should be divided into pre-reading, during reading, and post-reading.
- D. The major activity of the reading lesson is students reading texts.

TEACHER

28. Content-Based Instruction (CBI) is based on the common underlying principle that successful language learning occurs when students are presented with target language material in a meaningful, contextualized form, with the primary focus on ____.

- A. understanding the lessons
- B. acquiring information and knowledge
- C. making connections between what they learn at school and what they learn outside the school
- D. making meaning from what they learn

TEACHER

29. It is a vocabulary strategy which involves the process of breaking up of a word into its meaningful components: the root words, affixes, and suffixes.

A. contextual clues

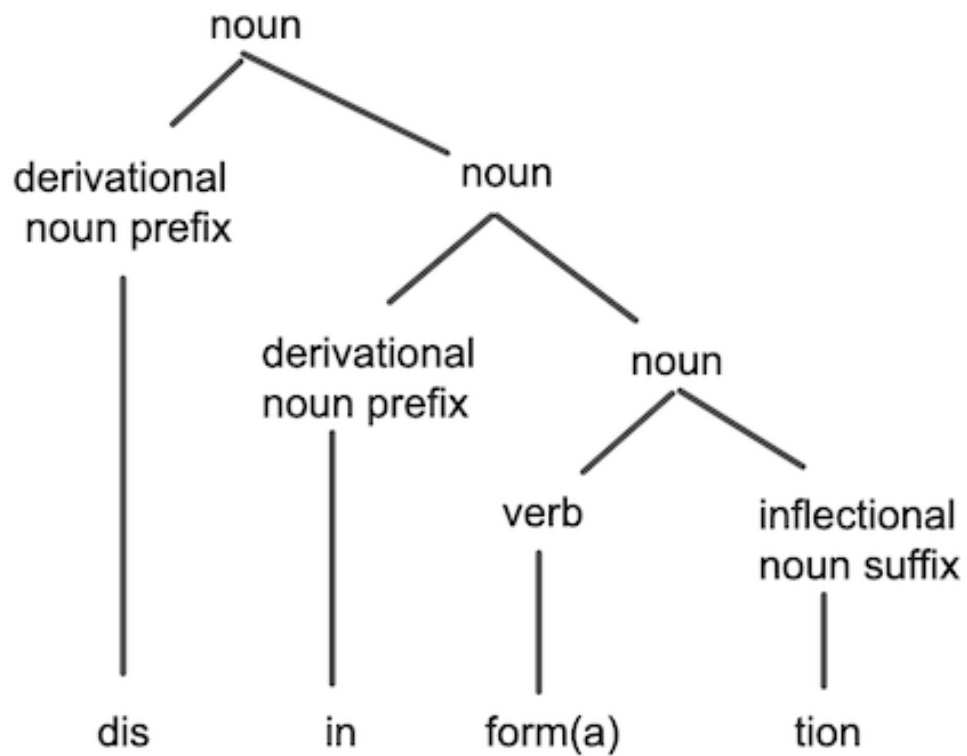

B. structural analysis 

C. summarizing

D. groupings

TEACHER

TEACHER

30. Which of the following questions is best for activating students' prior knowledge to feel that they somehow connected to the topic “snakes” being studied?

- A. What do you know about snakes? What snakes are common in your area? 
- B. What according to the selection are the types of snakes?
- C. What did the writer suggest to the person who was bitten by snakes to do?
- D. What is the importance of animals such as snakes in ecosystem?

TEACHER

31. If the students think about the knowledge of their own thoughts and the factors that influence their thinking, they are engaged in the process of _____.

- A. artistic thinking
- B. metacognition 
- C. higher-order thinking
- D. critical thinking

TEACHER

32. What is shown in the systematic variation of /t/ such as /t/ in top is aspirated, /t/ is stop is released, and /t/ in pot is unreleased?

- A. phoneme
- B. consonant
- C. variation
- D. allophone

Allophones are phonetic variations - different pronunciations - of the same phoneme.

TEACHER

33. Which of the following sounds are produced by bringing the articulators near each other such that the flow of air is impeded but not completely blocked. The air flow through the narrow opening creates friction.

A. p,b,t,d,k,g

B. f,v,θ,ð,s,z,ʃ,ʒ,h 

C. m,n,ŋ

D. l,r

- In 1888 the **International Phonetic Alphabet (IPA)** was invented in order to have a system in which there was a one-to-one correspondence between each sound in language and each phonetic symbol
- Someone who knows the IPA knows how to pronounce any word in any language

WWW.LANGUAGEBASECAMP.COM

TEACHER

Phonetic symbols

used in the dictionary

Consonants

p	pen	/pen/	s	so	/səʊ/
b	bad	/bæd/	z	zoo	/zu:/
t	tea	/ti:/	ʃ	shoe	/ʃu:/
d	did	/dɪd/	ʒ	vision	/ˈvɪʒn/
k	cat	/kæt/	h	hat	/hæt/
g	got	/gɒt/	m	man	/mæn/
tʃ	chain	/tʃeɪn/	n	no	/nəʊ/
dʒ	jam	/dʒæm/	ŋ	sing	/sɪŋ/
f	fall	/fɔ:l/	l	leg	/leg/
v	van	/væn/	r	red	/red/
θ	thin	/θɪn/	j	yes	/jes/
ð	this	/ðɪs/	w	wet	/wet/

Vowels and diphthongs

i:	see	/si:/	ʌ	cup	/kʌp/
i	happy	/ˈhæpi/	ɜ:	bird	/bɜ:d/
ɪ	sit	/sɪt/	ə	about	/əˈbaʊt/
e	ten	/ten/	eɪ	say	/seɪ/
æ	cat	/kæt/	əʊ	go	/gəʊ/
ɑ:	father	/ˈfɑ:ðə(r)/	aɪ	five	/faɪv/
ɒ	got	/gɒt/	aʊ	now	/naʊ/
ɔ:	saw	/sɔ:/	ɔɪ	boy	/bɔɪ/
ʊ	put	/pʊt/	ɪə	near	/nɪə(r)/
u	actual	/ˈæktʃʊəl/	eə	hair	/heə(r)/
u:	too	/tu:/	ʊə	pure	/pjʊə(r)/

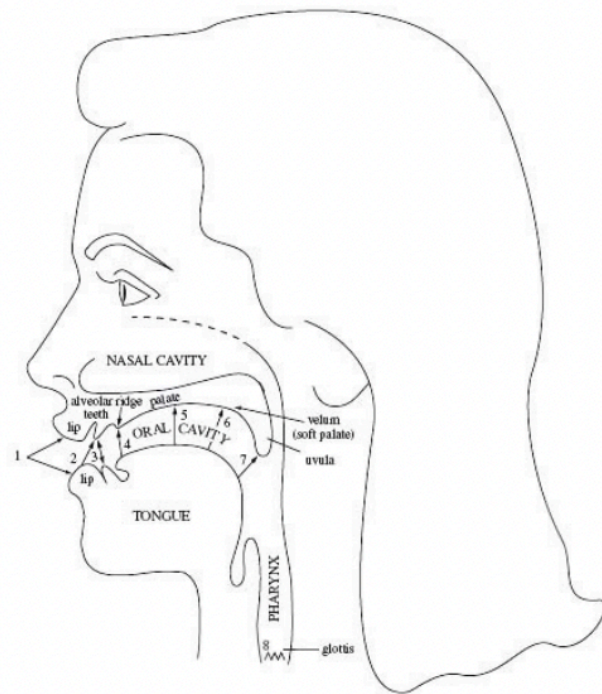

(r) indicates that British pronunciation will have /r/ only if a vowel sound follows directly; otherwise it is omitted. In American pronunciation, every 'r' of the ordinary spelling is retained.

TEACHER

Consonants are sounds produced with some restriction or closure in the vocal tract. Consonants are classified based in part on where in the vocal tract the airflow is being restricted (the place of articulation).

The major places of articulation are: **bilabial, labiodental, interdental, alveolar, palatal, velar, uvular, and glottal.**

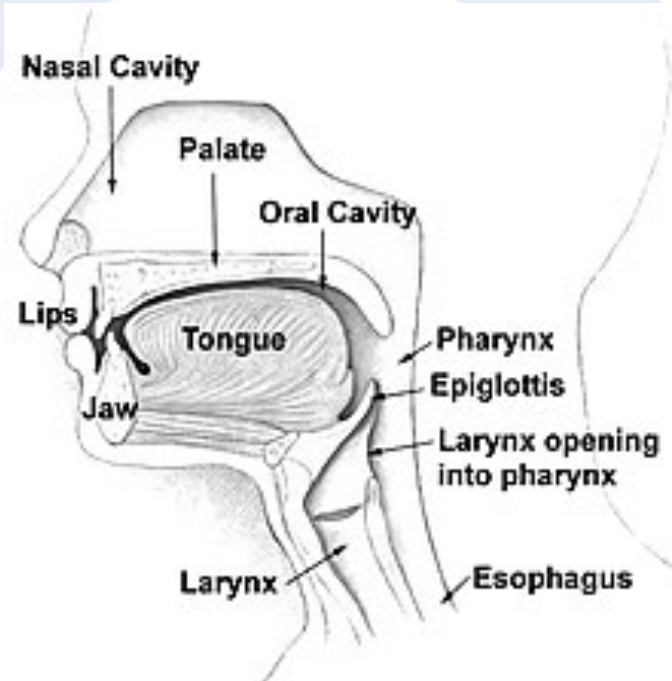

| The vocal tract. Places of articulation: 1. bilabial; 2. labiodental; 3. interdental; 4. alveolar; 5. (alveo)palatal; 6. velar; 7. uvular; 8. glottal.

TEACHER

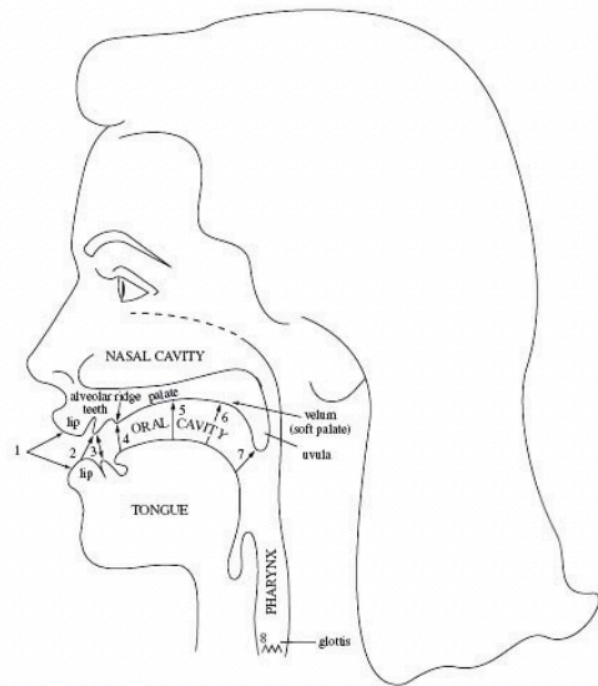

- Most speech sounds are produced by pushing air through the vocal cords
 - **Glottis** = the opening between the vocal cords
 - **Larynx** = 'voice box'
 - **Pharynx** = tubular part of the throat above the larynx
 - **Oral cavity** = mouth
 - **Nasal cavity** = nose and the passages connecting it to the throat and sinuses

TEACHER

- **Bilabials:** [p] [b] [m]
 - Produced by bringing both lips together
- **Labiodentals:** [f] [v]
 - Produced by touching the bottom lip to the upper teeth
- **Interdentals** [θ] [ð]
 - Produced by putting the tip of the tongue between the teeth

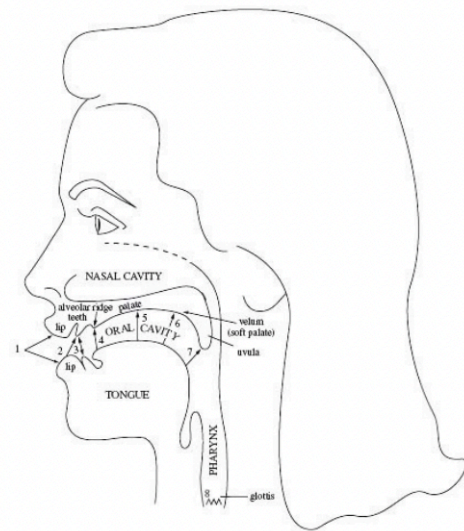

| The vocal tract. Places of articulation: 1. bilabial; 2. labiodental; 3. interdental; 4. alveolar; 5. (alveo)palatal; 6. velar; 7. uvular; 8. glottal.

TEACHER

- **Alveolars:** [t] [d] [n] [s] [z] [l] [r]
 - All of these are produced by raising the tongue to the **alveolar ridge** in some way
 - [t, d, n]: produced by the tip of the tongue touching the alveolar ridge (or just in front of it)
 - [s, z]: produced with the sides of the front of the tongue raised but the tip lowered to allow air to escape
 - [l]: the tongue tip is raised while the rest of the tongue remains down so air can escape over the sides of the tongue (thus [l] is a **lateral** sound)
 - [r]: air escapes through the **central** part of the mouth; either the tip of the tongue is curled back behind the alveolar ridge or the top of the tongue is bunched up behind the alveolar ridge

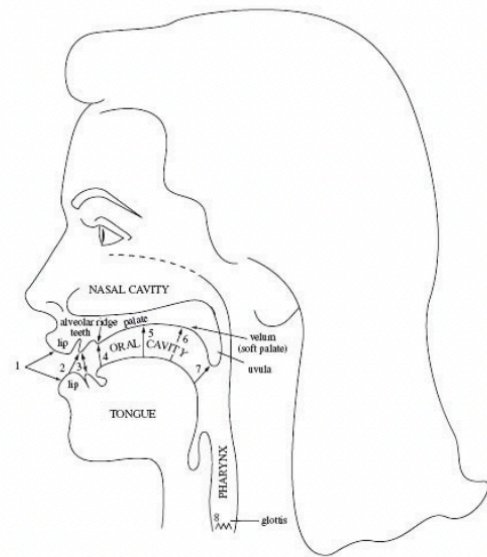

The vocal tract. Places of articulation: 1. bilabial; 2. labiodental; 3. interdental; 4. alveolar; 5. (alveo)palatal; 6. velar; 7. uvular; 8. glottal.

TEACHER

- **Palatals:** [ʃ] [ʒ] [tʃ] [dʒ] [ɹ]
 - Produced by raising the front part of the tongue to the palate
- **Velars:** [k] [g] [ŋ]
 - Produced by raising the back of the tongue to the soft palate or velum
- **Uvulars:** [ʀ] [q] [ʁ]
 - Produced by raising the back of the tongue to the uvula
- **Glottals:** [h] [ʔ]
 - Produced by restricting the airflow through the open glottis ([h]) or stopping the air completely at the glottis (a **glottal stop**: [ʔ])

The vocal tract. Places of articulation: 1. bilabial; 2. labiodental; 3. interdental; 4. alveolar; 5. (alveo)palatal; 6. velar; 7. uvular; 8. glottal.

Consonants

p	pill	t	till	k	kill
b	bill	d	dill	g	gill
m	mill	n	nil	ŋ	ring
f	feel	s	seal	h	heal
v	veal	z	zeal	l	leaf
θ	thigh	tʃ	chill	r	reef
ð	thy	dʒ	gin	j	you
ʃ	shill	ɹ	which	w	witch
ʒ	measure				

TEACHER

Voiced Consonant:

/b/ /d/ /g/ /m/
/n/ /ng/ /v/ /z/
/th/ /zh/ /j/ /w/
/y/ /l/ /r/

Unvoiced Consonants:

/p/ /t/ /k/ /f/ /s/
/sh/ /h/ /th/ /ch/
(Note: Vowels are voiced.)

Voice or voicing is a term used in phonetics and phonology to characterize speech sounds (usually consonants). It refers to the speech sounds produced by the vocal folds (vocal cords). Speech sounds can be described as either voiceless (unvoiced) or voiced. All vowels are normally voiced, but consonants may be either voiced or voiceless.

The liquid consonant *l* and the nasal *m*, *n*, *ng* (as in “sing”) are normally voiced in English, and the stops, fricatives, and affricates characteristically possess both voiced and voiceless forms.

TEACHER

- Some voiceless sounds can be further distinguished as **aspirated** or **unaspirated**

aspirated

pool [p^hul]

tale [t^hel]

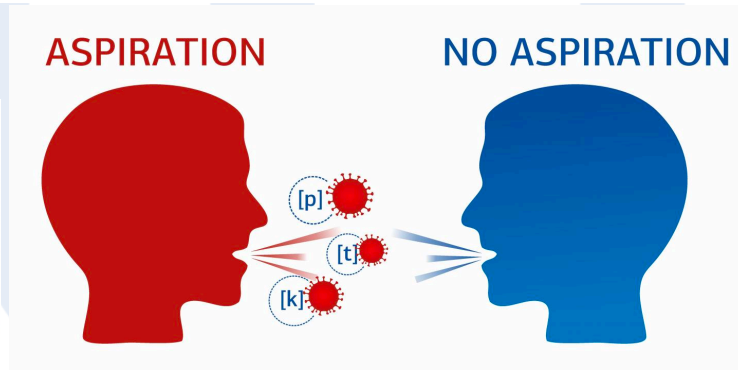

kale [k^hel]

unaspirated

spool [spul]

stale [stel]

scale [skel]

TEACHER

Voiceless stops like ([p], [t], and [k]) are aspirated when they occur **immediately** before (no sound in between) a stressed vowel, and there is no [s] in front of the voiceless stop. So, they are not aspirated after [s], if they occur before an unstressed vowel, or if there is a liquid or glide between the stop and the vowel (and then the liquid/glide is considered voiceless = [r])

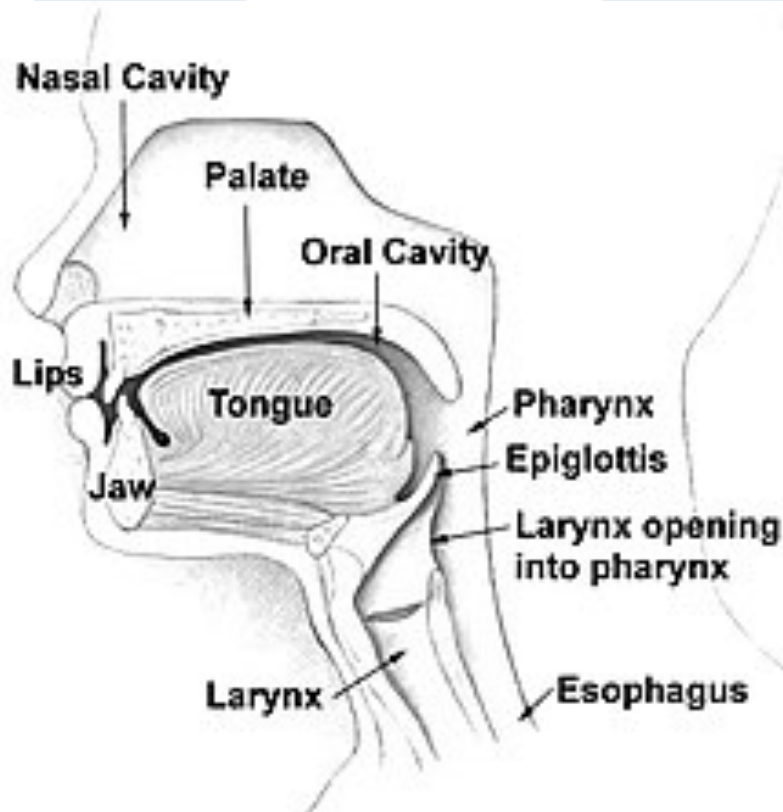

Aspirated	IPA	Not aspirated	IPA
pot	[pʰat]	spot	[spat]

TEACHER

Consonants: Manner of Articulation

- **Oral sounds** are those produced with the velum raised to prevent air from escaping out the nose
- **Nasal sounds** are those produced with the velum lowered to allow air to escape out the nose
- So far we have three ways of classifying sounds based on **phonetic features**: by voicing, by place of articulation, and by nasalization
 - [p] is a voiceless, bilabial, oral sound
 - [n] is a voiced, alveolar, nasal sound

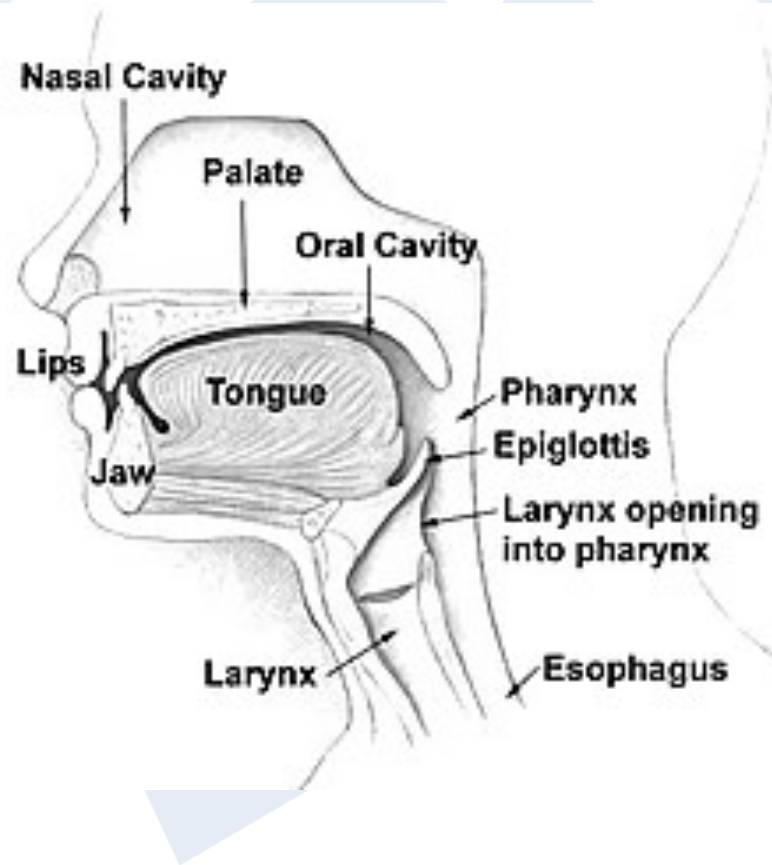

TEACHER

Consonants: Manner of Articulation

- **Stops:** [p] [b] [m] [t] [d] [n] [k] [g] [ŋ] [tʃ][dʒ] [ʔ]
 - Produced by completely stopping the air flow in the oral cavity for a fraction of a second
 - All other sounds are **continuants**, meaning that the airflow is continuous through the oral cavity
- **Fricatives:** [f] [v] [θ] [ð] [s] [z] [ʃ] [ʒ] [x] [χ] [h]
 - Produced by severely obstructing the airflow so as to cause friction

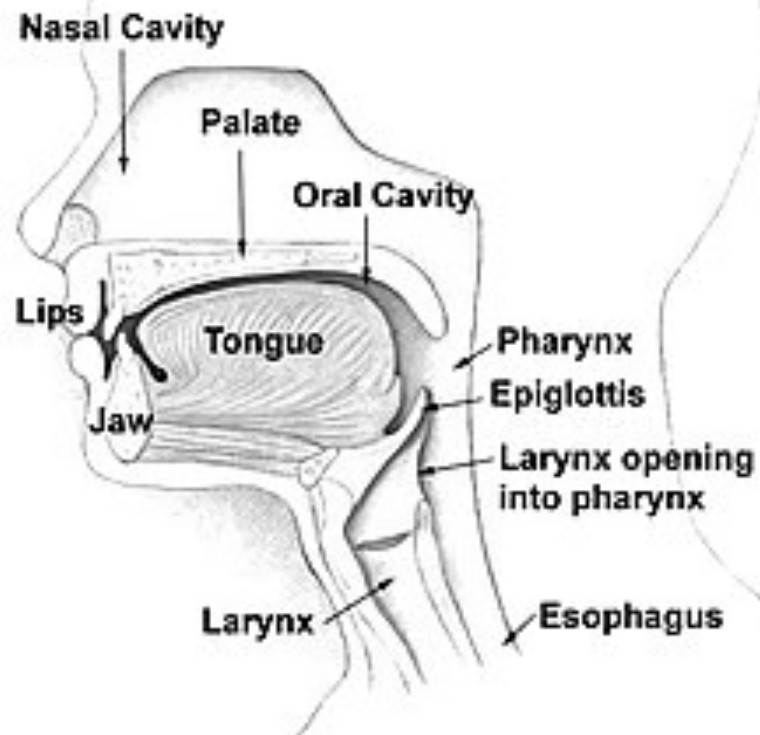

TEACHER

Consonants: Manner of Articulation

- **Affricates:** [tʃ] [dʒ]
 - Produced by a stop closure that is released with a lot of friction
- **Liquids:** [l] [r]
 - Produced by causing some obstruction of the airstream in the mouth, but not enough to cause any real friction
- **Glides:** [j] [w]
 - Produced with very little obstruction of the airstream and are always followed by a vowel

TEACHER

Which of the following sounds is a voiceless labio-dental fricative sound?

A. [r]

B. [ð]

 C. [f]

D. [s]

TEACHER

Which of the following sounds is a voiced velar nasal sound?

A. [ʃ]

B. [j]

C. [ð]

D. [ŋ]

TEACHER

Which of the following words has the [ʌ] sound?

A. fat

B. bet

C. look

D. cut

TEACHER

Short Vowels

IPA Symbol	Word examples
e	Went, intend, send, letter.
æ	Cat, hand, nap, flat, have.
ʌ	Fun, love, money, one, London, come.
ʊ	Put, look, should, cook, book, look.
ɒ	Rob, top, watch, squat, sausage.
ə	Alive, again, mother.

TEACHER

Long Vowels

IPA Symbol	Word examples
i:	Need, beat, team.
ɜ:	Nurse, heard, third, turn.
ɔ:	Talk, law, bored, yawn, jaw.
u:	Few, boot, lose, gloomy, fruit, chew.
ɑ:	Fast, car, hard, bath.

TEACHER

Diphthong Vowels

IPA Symbol	Word examples
ɪə	Near, ear, clear, tear, beer, fear
eə	Hair, there, care, stairs, pear
eɪ	Face, space, rain , case, eight
ɔɪ	Joy, employ, toy, coil, oyster.
aɪ	My, sight, pride, kind, flight
əʊ	No, don't, stones, alone, hole
aʊ	Mouth, house, brown, cow, out

TEACHER

Which of the following words has the [ɜ:] sound?

A. bad

B. bird

C. fate

D. meet

TEACHER

Which of the following words has the [ʊ] sound?

A. food

B. book

C. work

D. love

TEACHER

Which of the following words has the [ɪ] sound?

A. sigh

B. seat

C. sit

D. feet

TEACHER

Which of the following words has the [əʊ] sound?

A. owl

B. plough

C. quote

D. now

TEACHER

Transcribe the word strong

A. /strʊŋ/

B. /strɔ:ŋ/

C. /strʌŋ/

D. /strɒŋ/

TEACHER

Write each line in normal English
orthography.

/kæbəgez/

cabbages

TEACHER

Write each line in normal English orthography.

[ðə taɪm hæz kʌm]

The time has come.

TEACHER

34. What is illustrated in following example? In English, the statement “Marian is a linguist” ends with a fall in pitch, while as a question, “Marian is a linguist?” the pitch goes up.

- A. stress
- B. juncture
- C. intonation 
- D. suprasegmentals

TEACHER

35. It determines if a sound is voiced or voiceless

A. Uvula

B. Voice Box 

C. Tongue

D. Alveolar Ridge

TEACHER

36. Family of Consonant sounds where the air is held back for a moment before it is released abruptly.

- A. Fricative
- B. Plosive
- C. Affricate
- D. Glides

TEACHER

37. The velum is also known as the _____

A. Hard Palate

B. Soft Palate

C. Uvula

D. Alveolar Ridge

TEACHER

38. Which of the following is an example derivational morpheme?

A. helpful

B. stays

C. eaten

D. longest

TEACHER

39. The words “gym, mike, and TV” are formed through _____.

- A. clipping 
- B. back formation
- C. root creation
- D. compounding

TEACHER

Back-formation is the process or result of creating a **new word** via **inflection**, typically by removing or substituting actual or supposed **affixes** from a **lexical item**.

- Noun "taxon", a unit of classification in **taxonomy**,
- Verb "edit" from *editor*
- Verbs "euthanase" or "euthanize" from the noun *euthanasia*

TEACHER

40. What morphophonemic process is involved in which units that occur in some contexts are “lost” in others such as “l i b a r y” instead of “l i b r a r y”?

A. assimilation

B. dissimilation 

C. epenthesis

D. metathesis

In **phonology**, **dissimilation** is a phenomenon whereby similar **consonants** or **vowels** in a **word** become less similar. In **English**, dissimilation is particularly common with **liquid consonants** such as /r/ and /l/ when they occur in a sequence.

TEACHER

Phonological Processes

Typical patterns of error used by all children when they try to imitate adults as they are developing speech.

Phonological Disorder?

When a child uses incorrect speech patterns by making errors on sound patterns or sound blends. Correct speech becomes easier as a child's tongue and motor skills mature and gain experience. Sometimes a child holds onto these "baby" or "immature" patterns of speech simply because they are not aware that they are saying sounds wrong. If a **child continues to use** these processes, the result is a developmental phonological disorder.

PHONOLOGICAL PROCESSES

Phonological processes are patterns of sound errors that typically developing children use to simplify speech as they are learning to talk. A **phonological disorder** occurs when phonological processes persist beyond the age when most typically developing children have stopped using them or when the processes used are much different than what would be expected.

SUBSTITUTION	Definition	Example	Approx. age of elimination
Backing	When alveolar sounds, like /t/ and /d/, are substituted with velar sounds like /k/ and /g/	<i>"gog" for "dog"</i>	Usually seen in more severe phonological delays.
Fronting	When velar or palatal sounds, like /k/, /g/, and sh, are substituted with alveolar sounds like /t/, /d/, and /s/	<i>"tootie" for "cookie"</i>	3.5 yrs.
Gliding	When /r/ becomes a /w/, and /l/ becomes a /w/ or y sound	<i>"wabbit" for "rabbit" or "yeyo" for "yello"</i>	6 yrs.
Stopping	When a fricative (like /f/ or /s/) or affricate (ch,j) is substituted with a stop consonant like /p/ or /d/	<i>"pan" for "fan" or "dump" for "jump"</i>	/f/, /s/ by 3; /v/, /z/ by 3 1/2; sh, ch, j by 4 1/2; th gone by 5
Vowelization	When the /l/ or er sounds are replaced with a vowel	<i>"appo" for "apple" or "papuh" for "paper"</i>	—
Affrication	When a nonaffricate is replaced with an affricate (ch or j)	<i>"joor" for "door"</i>	3 yrs.
Deaffrication	When an affricate, like ch or j, is replaced with a fricative or stop like sh or /d/	<i>"ships" for "chips"</i>	4 yrs.
Alveolarization	When a nonalveolar sound is substituted with an alveolar sound	<i>"tu" for "shoe"</i>	5 yrs.
Depalatalization	When a palatal sound is substituted with a nonpalatal sound	<i>"fit" for "fish"</i>	5 yrs.
Labialization	When a nonlabial sound is replaced with a labial sound	<i>"pie" for "tie"</i>	6 yrs.

TEACHER

ASSIMILATION

Definition	Example	Approx. age of elimination
Assimilation	When a consonant sound starts to sound like another sound in the word	<i>"bub" for "bus"</i> 3 yrs.
Denasalization	When a nasal consonant like /m/ or /n/ changes to a nonnasal consonant like /b/ or /d/	<i>"doze" for "nose"</i> 2.5 yrs.
Final Consonant Devoicing	When a voiced consonant at the end of a word like /b/ or /d/ is substituted with a voiceless consonant like /p/ or /t/	<i>"pick" for "pig"</i> 3 yrs.
Prevocalic Voicing	When a voiceless consonant in the beginning of a word like /k/ or /f/ is substituted with a voiced consonant like /g/ or /v/	<i>"gomb" for "comb"</i> 6 yrs.
Coalescence	When two phonemes are substituted with a different phoneme that still has similar features	<i>"foon" for "spoon"</i> —
Reduplication	When a complete or incomplete syllable is repeated	<i>"baba" for "bottle"</i> 3 yrs.

SYLLABLE STRUCTURE

Definition	Example	Approx. age of elimination
Cluster Reduction	When a consonant cluster is reduced to a single consonant	<i>"pane" for "plane"</i> Gone by 4 yrs. without /s/, gone by 5 yrs. with /s/
Final Consonant Deletion	When the final consonant in a word is left off	<i>"toe" for "toad"</i> 3 yrs.
Initial Consonant Deletion	When the initial consonant in a word is left off	<i>"unny" for "bunny"</i> Usually seen in more severe phonological delays.
Weak Syllable Deletion	When the weak syllable in a word is deleted	<i>"nana" for "banana"</i> 4 yrs.
Epenthesis	When a sound is added between two consonants, typically the uh sound	<i>"bu-lue" for "blue"</i> 8 yrs.

TEACHER

41. Which syntactic structure is shown in the following examples? *responsible officers, trusted friend*

- A. predication
- B. complementation
- C. modification
- D. coordination

TEACHER

41. Which syntactic structure is shown in the following examples? *responsible officers, trusted friend*

- A. predication - subject & predicate
- B. complementation - a verbal element and a complement
- C. modification - head & modifier (noun, verb, adverb, preposition) 
- D. coordination - consists of two or more syntactically equivalent units joined in a structure which functions as a single unit.

TEACHER

42. What is made use in this example “*I told Paul to close the door and he did so*”?

A. homonymy

B. anaphora 

C. deixis

D. hyponymy

TEACHER

Anaphora is a linguistic expression that refers to another linguistic expression (point backwards). The pronoun refers back to its antecedent.

Deixis is a word or phrase (such as *this, that, these, those, now, then, here*) that points to the time, place, or situation in which a speaker is speaking. Deixis is expressed in English by way of personal pronouns, demonstratives, adverbs, and tense.

Hyponymy is a term used to designate a particular member of a broader class. For instance, *daisy* and *rose* are hyponyms of *flower*.

Homonymy is the relationship between words that have different meanings but are pronounced the same or spelled the same or both.

TEACHER

43. A comma indicates:

- A. Pause
- B. Slight pause
- C. Longer pause
- D. No pause

There are three types of juncture:

1. a comma or “single slash” (/) means slight pause
2. a period or “double slashes” (//) means longer pause
3. end of the paragraph or “triple slashes” (///) means longest pause.

TEACHER

44. The teacher was asked to speak for her students when they won the speech choir competition, and so she says “_____ of my student, I want to thank you.”

- A. On behalf 
- B. In behalf
- C. Because
- D. For

TEACHER

45. The underlined verbs in the following sentences are classified as ____.

The time is now.

The world became flesh.

We remain silent.

- A. intransitive
- B. reflexive
- C. transitive
- D. ascriptive

Ascriptive verb - an action verb that when added to a noun ascribes the action to the agent it represents; can be habitual or complete.

TEACHER

- A. **intransitive** - does not need a direct object
- B. **reflexive** - a verb whose direct object is the same as its subject; for example, "I wash myself".
- C. **transitive** - needs a direct object
- D. **ascriptive** - an action verb that when added to a noun ascribes the action to the agent it represents; can be habitual or complete.

TEACHER

46. “ The whale has no famous author and whaling no famous chronicles.” Based on this line from the novel, Moby Dick is treated as:

- A. Whaling is not truly structure.
- B. Whales are ordinary creatures 
- C. Whales is a wild mammal that haunts mariners.
- D. Whaling is an Old hobby.

TEACHER

Moby-Dick; or, The Whale is an 1851 novel by American writer [Herman Melville](#). The book is the sailor [Ishmael](#)'s narrative of the obsessive quest of [Ahab](#), captain of the [whaling ship *Pequod*](#), for revenge against [Moby Dick](#), the giant white [sperm whale](#) that on the ship's previous voyage bit off Ahab's leg at the knee.

TEACHER

47. Five years of intensive language study are required for second language learners. Chun – Li _____ English for three years, but she will need more training to be more proficient.

- A. has studied
- B. will have been studying
- C. has been studying 
- D. hadn't been getting

TEACHER

48. She is _____ a plane.

A. in

B. on

C. at

D. into

The preposition is used in vehicles that are huge enough for one to work inside it.

TEACHER

49. Robert Frost's poems are commonly about

_____.

- A. Beautiful girls
- B. Decision making and fate
- C. God and Faith
- D. End of the World

TEACHER

50. F. Scott Fitzgerald's Story that is about the boy who was born and gets younger every day is titled _____

- A. The Curious Case of Benjamin Button 
- B. The Greatest Gatsby
- C. The Innocent Boy
- D. Growing Young

“Where a Dreamer Becomes an Achiever”
