

Large Islands of the World

Islands	Location and political affiliation	Area	
		sq. mi	sq. km
Greenland	North Atlantic (Danish)	839,999	2,175,597
New Guinea	Southwest Pacific (West Papua [Irian Jaya] Indonesia, west part; Papua New Guinea, east part)	309,000	800,311
Borneo	West mid-Pacific (Indonesia, south part; Brunei and Malaysia, north part)	287,300	744,108
Madagascar	Indian Ocean (Malagasy Republic)	227,300	587,931
Baffin	North Atlantic (Canadian)	195,926	507,451
Sumatra	Northeast Indian Ocean (Indonesian)	182,859	473,605
Honshu	Sea of Japan-Pacific (Japanese)	89,176	230,966
Great Britain	Off coast of NW Europe (England, Scotland, and Wales)	88,795	229,979
Victoria	Arctic Ocean (Canadian)	83,896	271,291
Ellesmere	Arctic Ocean (Canadian)	75,767	196,236
Sulawesi (Celebes)	West mid-Pacific (Indonesian)	73,057	189,218
South Island	South Pacific (New Zealand)	58,384	151,215
Java	Indian Ocean (Indonesian)	51,038	132,189
North Island	South Pacific (New Zealand)	44,702	115,778
Cuba	Caribbean Sea (republic)	42,803	110,860
Newfoundland	North Atlantic (Canadian)	42,031	108,860
Luzon	West mid-Pacific (Philippines)	40,420	104,688
Iceland	North Atlantic (republic)	39,800	103,082
Mindanao	West mid-Pacific (Philippines)	36,537	94,631
Ireland	West of Great Britain (republic, south part; United Kingdom, north part)	32,597	84,426
Hokkaido	Sea of Japan-Pacific (Japanese)	32,245	83,515
Sakhalin (Karafuto)	North of Japan (Russian)	29,500	76,405
Hispaniola	Caribbean Sea (Dominican Republic, east part; Haiti, west part)	29,300	75,887
Banks	Arctic Ocean (Canadian)	27,038	70,028
Tasmania	South of Australia (Australian)	26,200	67,858
Sri Lanka (Ceylon)	Indian Ocean (republic)	24,900	64,491

THE WORLD HISTORY

Devon	Arctic Ocean (Canadian)	21,331	55,247
Tierra del Fuego	Southern tip of South America (Argentinian, east part; Chilean, west part)	18,605	48,187
Axel Heiberg	Arctic Ocean (Canadian)	16,671	43,178
Melville	Arctic Ocean (Canadian)	16,247	42,149
Kyushu	Sea of Japan-Pacific (Japanese)	16,223	42,018
Southampton	Hudson Bay (Canadian)	15,913	41,214

Top Ten Mountain Peaks of the World

Mountain Peak	Range	Location	Height	
			ft	m
Everest ¹	Himalayas	Nepal/Tibet	29,035	8,850
K2 (Godwin Austen)	Karakoram	Pakistan/China	28,250	8,611
Kanchenjunga	Himalayas	India/Nepal	28,169	8,586
Lhotse I	Himalayas	Nepal/Tibet	27,940	8,516
Makalu I	Himalayas	Nepal/Tibet	27,766	8,463
Cho Oyu	Himalayas	Nepal/Tibet	26,906	8,201
Dhaulagiri	Himalayas	Nepal	26,795	8,167
Manaslu I	Himalayas	Nepal	26,781	8,163
Nanga Parbat	Himalayas	Pakistan	26,660	8,125
Annapurna	Himalayas	Nepal	26,545	8,091

Water Forms In addition to oceans and seas, smaller water forms are found on the face of the earth. Some of these are:

1. **Strait** – a narrow water connection between two larger bodies of water. Straits restrict the movement of shipping and are also barriers to overseas carriage.
2. **Gulf** – an inlet of the sea into land, especially one which is relatively deep.
3. **Bay** – an indentation of the sea into land, especially one with a wide opening or greater in width than in depth.
4. **River** – a natural stream of water flowing regularly or intermittently over a bed, usually in a valley, towards the sea; a lake or inland depression. Most rivers have an upper or mountain course, a middle or plain course, and a lower or estuarine delta course. The source of a river is in a high elevation and its mouth is at a lower elevation. The mouth is the place where it empties into the sea or lake.
5. **Lake** – a body of water entirely surrounded by land, normally applied to an area of considerable size, though sometimes to a small artificial one, usually man-made.

THE WORLD HISTORY

6. **Rapids** – a part of a river where the current moves very swiftly over large rocks.
7. **Spring** – a flow of water from the ground which is the source of stream.
8. **Falls** – a body of water which descends by force of gravity.

Some minor landforms are:

1. **Valleys** – elongated depressions usually with an outlet between the range of hills.
2. **Peninsula** – a tract of land, large or small, nearly surrounded by water or at least having water on three sides that the greatest part of the boundary is a coastline.
3. **Deltas** – alluvial plains that streams have built at their mouths and in ponded water, they are flood plains.
4. **Cape** – a piece of land jutting into the seas; a headland or a promontory.
5. **Canyon** – a deep valley with high steep sides.
6. **Cliff** – a perpendicular or steep rock of considerable height.
7. **Isthmus** – a narrow land connection between two larger expanses of land.
8. **Fjord** – a U-shaped valley that leads to the sea and that appears to be submerged in its lower position.
9. **Desert** – a dry, barren region, usually treeless and sandy.
10. **Tundra** – a treeless plain that is characteristic of arctic and sub-Arctic regions, usually covered with ice or snow.
11. **Volcano** – opening in the earth's surface giving out smoke, steam, ashes, or molten rocks.
