

1. **She promotes and models digital citizenship and responsibility:** Teacher A demonstrates understanding of local and global issues and exhibits ethical and legal use of info and communications technology tools. Which is true about her?
2. **Because this kind of practice lessens interaction capabilities:** Why is one-way delivery of information a misuse of communication tools?
3. **Productivity tool:** Teacher A would like to create a presentation material for her lesson on the types of computer-assisted instruction. To make her presentation effective, which tool should she use?
4. **Facilitator:** With the increasing use of educational technology inside the classroom, what role is expected of the teacher?
5. **Constructing of knowledge and information exchange:** Teacher A employs student-centered instruction as the learners create their digital portfolios in her computer class. What could be developed among them through this approach?
6. **Computer-assisted instruction:** In the delivery of distance education, what computer application is used to organize instructions and track students' records and progress?
7. **On-line:** Internet consists of thousands of connected computer networks around the world. Which term does not refer to the internet?
8. **Let the pupils write a friendly letter using word processing and have it critiqued by their peers:** Teacher A would like to integrate technology in writing a friendly letter. Which of the following is the most effective way of doing it?
9. **To determine which media to use best:** Which is the best reason why teachers state the objectives before instructional media?
10. **Utilization is the action phase:** Which of the following statements is correct about the domains of educational technology?
11. **Modify the available materials:** After Teacher A planned her lesson in English, she found out that the materials at hand do not match her objectives. Which is the best thing that she can do?
12. **The projected materials are readily available:** Teacher A uses projected visuals such as Digital Liquid Projector (DLP) in presenting her lesson. What could be her main reason for using it?
13. **Model digital-age work and learning:** Teacher A, an ICT teacher takes into account technology standards to address the needs of the students and help them

adapt with the changing society and technology. Which of the following standards is an exception?

14. **Electronic bulletin board and email:** Which technology tool can Teacher A use to communicate asynchronously with her students?

15. **Yes, because he could learn at his own pace using a wide spectrum of technologies:** Your father wanted to finish his long dreamed course but he wanted to do it at home during his free time. Would you recommend an online learning?

16. **II, I, III, IV:** Teacher A is planning to integrate technology in her Math class. Which of the following would be the logical steps in doing this?

Analyze the learners

Set the objectives

Utilize the materials with showmanship

Evaluate the performance of the students

17. **Graphic organizer:** You asked your students to show a 2 dimensional illustration of what they have understood from what they have read. Which of the following non-projected visuals are you referring to?

18. **The learner:** Which of the following should Teacher A primarily consider in determining his teaching-learning objectives and use of instructional media?

19. **When the method, technologies, and assessment used are appropriate to the required competencies:** When is distance education as effective as the traditional instruction?

20. **To ensure appropriateness of the materials with the objectives and target audience:** Which is the most important reason why teachers need to preview their instructional materials that will be used in the class?

21. **It refers to live student interaction with an expert:** Which statement is incorrect about computer conferencing?

22. **Situating tool:** Computers can be classified according to the roles they play namely communicative tool, informative tool, and constructive tool. What is the other role of computers not mentioned in this item?

23. **Print, audio, visual materials, computers and realia:** Which of these technologies used in the classroom are arranged from the most symbolic to multisensory?

24. **Tutorials:** Which of the following computer-based instructional materials can be used to learn new concepts?

25. **Web-based instruction:** Teacher A is thinking of an online learning approach by which content provides links to information at other locations and serves as a focal point for a distance education experience. Which of the following should she use?

26. **Pictures and videos:** Which of the following technologies provide *iconic experiences* to students?

27. **Model:** It is impractical to bring real objects to the classroom so Aaron constructed 3 dimensional visuals instead. Which of the following did he construct?

28. **They pose problems on storage:** Which of the following is a limitation of models and real objects in teaching and learning?

29. **Drill and practice:** Which of the following categories of CAI will you use in your class if your objective is to increase proficiency in a newly-learned skill or refresh an existing one?

30. **I, III, IV only:** With the fast-paced evolution of technologies nowadays, why are teachers encouraged to shift gradually from a teacher-centered instruction to learner-centered instruction?

31. **Scavenger Hunt:** Which instructional tool application will you introduce to your class if your objective is to help them find and use information resources available in the internet?

32. **Realia and computer:** Which group of technologies has the highest degree of concreteness?

Realias and computers are *multisensory*.

Videos, pictures, TV, films and versatile compact discs provide *iconic experiences* which involve hearing and seeing only.

The types of technologies in books, imaginative literature and programmed instructions present *verbal symbols* which are abstract and far from reality. For instance, a student who is reading a material without pictures or listening to lecture that is nothing than words will learn less. *Thus, the more sensory channels possible in interacting with a resource, the better the chance that many students can learn from it.*

33. **Present the instructional materials simultaneously:** Which of the following is inappropriate in using printed visuals such as charts, graphs and drawings?

34. **Spatial contiguity:** Teacher A placed text together with the relevant graphics on the same page in her multimedia presentation. Which principle did she apply?
35. **Apply different computer effects per slide:** Teacher A will have a multimedia presentation in his Science class. Which of the following should he avoid?
