Methods: Guidance (including social guidance), intelligent and cooperative participation; Field Trips, Directed Classroom Study (community life)

I. PHILOSOPHICAL FOUNDATIONS**1. MAJOR PHILOSOPHICAL THOUGHTS****1.1. Idealism**

- adheres to the view that nothing exists except in the mind of man, the mind of God, or in a super or supra-natural realm
- idealists believe that Ideas and knowledge are enduring and can change

Aims:

- to develop the individual spiritually, mentally, morally' (mind, soul and spirit)

- to discover and develop everyone's abilities and full moral excellence in order to better serve society

Methods: Critical discussions, lecture, Socratic method, introspection, imitating models, reflection/reflective thinking,

Content: Literature, History, Philosophy, and Religion

The Learner:

- imitates the teacher who. is an exemplar of an Ideal person
- tries to do the very best he can and strive toward perfection

The Teacher:

- excellent example/ role model for the student – intellectually and morally
- exercise great creative skill In providing opportunities for the learners' minds to discover, analyze, synthesize and create applications of knowledge to life and behavior
- questioner- encourages students to think and ask more questions and develop logical thinking

The School:

- train future leaders
- develop morality and to distinguish right from wrong
- maintain and transmit values
- place emphasis on developing the mind, personal discipline, and *character* development

Proponent Plato - "In order to know something, we need to withdraw from the use of our senses and rely on a purely intellectual approach.

1.2. Realism -

- Stresses that the world is made up of real, substantial and material entities,
- Knowledge is derived from sense experience.

Aim: To provide students with essential knowledge to survive the natural world

Methods: lectures, demonstrations, and sensory experiences, Inductive logic

Content: *Science and Mathematics*

The Teacher:

- a guide,' a demonstrator, who has full mastery of the knowledge of the realities of life
- requires the learner to recall, explain, and compare facts; *to interpret* relationships, *and to infer new meanings*

- rewards the success of each learner and reinforces what has been learned
- utilizes learner's interest by relating the lessons to the *learner's* experiences, *and* by making the subject *matter* as concrete as possible

The Learner:

- sense mechanism, a functioning organism which, through sensory experience, can perceive the natural order of the world.
- can learn only when he follows the laws of learning

The School:

- transmits knowledge
- classrooms are highly ordered and disciplined

Proponents: *Aristotle, Harbart, Comenius*

1.3 Pragmatism/Experimentalism

- Pragmatists believe that the curriculum should reflect the society, emphasizing the needs and interests of the children

Aim: To teach students how to think so that he can *adjust to* the demands of an ever-changing world

Content: Practical and utilitarian subjects

Methods: Project method, free and open discussion, individual problem-solving research

The Learner:

- learn from experiences through interaction to the environment

The Teacher:

- capture the child's interest and build on the natural motivation
- use varying teaching methods to accommodate each individual learning style
- helper, guide, and arranger of experiences

Proponent John Dewey

2. MODERN PHILOSOPHICAL THOUGHTS

1.1. Perennialism

- Knowledge that has endured through time and space should constitute the foundation of education
- Perennialists believe that when students are immersed in the study of profound and enduring ideas, they will appreciate learning for its own sake and become true intellectuals.

Aim: To develop power of thought

Proponent: Robert Hutchins

The Teacher:

- Interprets and tells eternal truth
- spends more time teaching about concepts and explaining how these concepts are meaningful to students

The Learner:

Passive recipients

1.2. Essentialism

- Teaching the essential knowledge and skills

Aim: To promote the intellectual growth of the learners.

Proponent: William Bagley

The Learner:

- receives instruction in skills such as writing, reading, Measurement /arithmetic (3Rs)

The Teacher:

- focuses heavily on achievement test scores as a means of evaluating progress.

2.3. Progressivism

- Education is always in the process of development
- Focused on the whole child and the cultivation of individuality
- Centered on the experiences, interests, and abilities of students
- *Progressivists* strive to make *schooling* both interesting and useful.

Aim: To provide the pupil the necessary skills to be able to interact with his ever changing environment

Proponents: John Dewey, Johann Pestalozzi

The learner:

- Learns through experiences, by doing

The Teacher:

- plans lessons that arouse curiosity and encourage the students to develop a higher level of knowledge

2.4. Existentialism

- Man shapes his being as he lives.
- Knowledge is subjective to the person's decision, and varies from one person to another.

Aim: To train the individual for significant and meaningful existence

Proponent: Jean Paul Sartre

The Teacher:

- Assists students in their personal journey
- Aids children in knowing themselves

The Learner:

- Determines own rule

2.5. Social Reconstructionism

- Emphasizes the addressing of social questions and a quest to create a better society
- Social reconstructionist believe that systems must be changed to overcome oppression and improve human conditions.
- Curriculum focuses on students' experiences

Aim: Education for change and social reform

Proponent: George Counts

The Learner:

- takes social action on real problems such as violence, hunger, international terrorism, Inflation, discrimination and inequality, and environmental problems

The Teacher:

- Uses community-based learning and brings the world into the classroom

3. EASTERN PHILOSOPHIES

3.1. Hinduism

- Emphasizes a commitment to an ideal way of life characterized by *honesty, courage, service*, faith, self-control purity and non-violence which can be achieved through YOGA

Proponent: Mahatma Gandhi

Hinduism in Education:

- The teacher shows the way and imparts knowledge by his own example, responsible for the students' spiritual welfare.
- The students aim to remember everything by heart and *gain* mastery of every subject learned.
- Teaching methods *are* oral and memory intensive, discussion and debates

3.2. Buddhism

- Believes in the FOUR NOBLE TRUTHS
- Believes In the LAW OF KARMA

Proponent; Siddharta Gautama

Buddhism in Education:

- Education Is rooted on faith
- Continuing educational astern- to receive additional teaching and learn from each other during class discussions

3.3. Confucianism

Teaches moral He through devotion to the family, loyalty to Vie elders, love of learning, brotherhood, civil service, and universal love and justice.

Stresses the FIVE CARDINAL VIRTUES (benevolence, righteousness, propriety, wisdom and sincerity).

Proponent Confucius

Confucianism in Education:

- CIVIL service exams
- Religious rituals *in the* schools

3.4. Taoism

TAO: a way of life, a philosophy advocating simplicity, frugality, and the Joys of being close to nature and being in harmony with the whole universe

Strongly believes in WU WEI (Let things come naturally.)

Proponent: Lau-Tzu

Taoism in Education:

- Taoist ethics emphasize compassion, moderation and humility.
- Physical exercises involve slow arid controlled body movements to achieve mental stillness.

3.5. Zen Buddhism (Japanese version)

- Believes in the THIRD EYE (to see things which are invisible, to the naked eyes and to get attuned to the things around us).
- Encourages meditation (mind-awakening).
- Teaches that the entire universe Is one's mind, and if one cannot realize enlightenment in one's own mind now, one cannot ever achieve enlightenment.

3.6. Islam

Has Five pillars: belief in Allah, prayer (5x a day), fasting, almsgiving and pilgrimage).

Proponent: Muhammad / Mohammed Islam in Education:

- Useful knowledge is necessary for the benefit of the self and of humanity.
- A truly Islamic government is required to provide all means to promote adequate education for its citizens, to the best of Its ability.

II. PHILIPPINE EDUCATIONAL SYSTEM

Education during the Pre-Spanish Period

Aims: For Survival, Conformity, and Enculturation

Contents: Informal Education, Religion-oriented

Methods: tell me and shew me, observation, trial and error

Education during the Spanish Period

Aim: To propagate Christianity

Contents: Religious Education, Vocational courses

Methods: Dictation and memorization

- The vernacular was used as the medium of instruction in the parochial schools.
- The religious orders introduced the parochial school.
- Education is suppressed, exclusive (for the elite), and inadequate.

Education during the American Period.

Aim: To teach democracy as a way of life

Methods: Socialized recitation and Student's participation

Contents: Reading, writing, arithmetic, language, GMRC, civics, hygiene and sanitation, gardening, domestic science, American History, and Philippine history

- Formal Education was established.
- Education during the Commonwealth Period (1935-1942)
