

SOCIOLOGICAL AND ANTHROPOLOGICAL FOUNDATIONS OF EDUCATION

Sociology

- The science of man and society
- Study of patterns of human behavior
- Study of groups and societies and how they affect the people

Society - a group of organized individuals who think of themselves as a distinct group, and who live together sharing the same culture occupying the same territory, who interrelates and interacts with one another, recruits its members by inter group sexual reproduction and has a shared comprehensive culture, with common shared attitudes, *sentiments*, aspirations and goals

Socialization

- A process of adapting or conforming to the common needs and interests of a social group
- A process whereby people learn the attitudes, values and actions appropriate to individuals as members of a particular society, where a member of a group learns and internalizes the norms and standards of the other member among whom she/he lives

Agents of Socialization:

- a) Family - smallest social institution whose members are united by blood, marriage or adoption, constituting a household and having a common culture.
- b) School / Education - established by society for the basic enculturation of the group; an agency which makes student learn how to value oneself and eventually others; an agency organized by society for the basic function of teaching and learning.
- c) Church
- d) Mass media

Institutional Group Agencies for Education

Three (3) very important groups that serve as agencies for learning:

1. Family

- smallest social institution

Educative Functions of the Family (Home)

- Health Education -proper food to eat, proper hygiene
- Ethics, Morality, Religion - spiritual, moral, and desirable social values
- Socialization - roles and status in society
- Psychomotor and manipulative skills-how to walk, dance and to use properly kitchen tools, utensils, etc.
- Recreational skills
- Academic-reading, writing, arithmetic

2. School

- an Institution, center of learning, established by society in which the accumulated experiences of the past generations are passed on to the incoming generation by means of systematized programs of instructions.

Roles of the School:

1) The school as an agent of socialization

- Children learn how to get along with other students in the school.
- Social ethics are taught in the schools.
- The student government trains the students to become good leaders and followers.
- The school prepares the individual to become worthy members of the society by making them aware of their responsibilities.

2) The school as an agent of cultural transmission

- Culture can be transferred through:

a) Enculturation

- the passing on of group's custom, beliefs and traditions *from one generation to the next generation*

b) Acculturation

- learning other culture; the passing of customs, *beliefs and* tradition through interaction/reading/inter marriages, etc.
- Values and attitudes formation are easily transmitted through lessons *provided by* the teachers.
- Culture can be transmitted through field trips, experiential learning, experimentation, group dynamics, cooperative learning, peer learning, rote playing and dramatization.
- Knowledge about the latest development in science and technology, and about the nations and people of the world can be acquired through different learning activities.

3) The school as an agent of cultural change

- Cultural changes are best discussed in the school.

4) The school as agent of modernization

- Educational systems are focused on future needs of the students.
- Changes which are mostly attempts to modernization are being discussed in the school.
- The elements of cultural change which lead to modernization:
 - Development of oral and written communication and other modern means of communication
 - Improvement of science and technology in all fields

5) Other functions of the schools:

- Serves as a multi-purpose institution
- Provides training of the mind, teaches the basics
- Develops problem solving and critical thinking
- Promotes social integration, enculturation and cultural perception
- Accelerates adjustment of society

3. Church

- a lifetime school of teaming

Education from the Church (through the bible):

- History
Ex: Persia (now Iran), Mesopotamia (now Iraq)
- Prophecies
Ex: Earthquake, Famine, Calamities

- Divine Values
Ex: Love, Hope, Faith, Wisdom

Sociology of Education

- provides a study of the relationships between society and the educational processes which contribute to the analysis and solution to problems confronting the educational system.

Anthropology

- science that studies the origin and development of man, his work and achievements which includes the study of physical, intellectual, moral, social and cultural development of man, including his customs, mores, folkways and beliefs

Culture

- The shared products of human learning, the set of learned behaviors, beliefs, attitudes, values, and ideals that are characteristics of a particular society or population
- The complex whole which includes knowledge, beliefs, arts, laws, morals, customs and other capabilities and habits acquired by man as a member of society

Characteristics Of Culture:

CULTURE is

- Transferable, Dynamic, Learned, Continuous, Shared, Universal, Symbolic, Adaptive, Borrowed

Elements of Culture

- Language - an abstract system of word meanings and symbols for *all* aspects of culture; the foundation of culture; verbal and nonverbal
- Norms - are established standards of behavior maintained by a society; it must be shared and understood

- Sanctions-penalties or rewards for conduct concerning social norms
 - a) positive sanctions- pay, promotion, medals, word of gratitude
 - b) negative- fines, Imprisonment, threats, stares, ostracism
- Values - are collective conceptions of what is considered good, desirable and proper or bad, undesirable and Improper in a particular culture.

Change

- An enduring force in history; is inevitable, takes place from time to time
- The adjustment of persons or group to achieve relative harmony

Forms of Change:

- a) *Cultural change* - refers to an alteration affecting new trait or trait complexes to change the culture's content and structures
- b) *Technological change* - revision that occur in man's application of his technical knowledge and skills as he adopts himself to environment

Examples of technological changes in education: .

- Introduction of new methods of learning
 - Vocational education, computer education, and practical arts in the curriculum.
 - Inclusion of information and communication technology in the curriculum
- c.) *Social change* - refers to the variation or modifications in the patterns of social organization, of such groups within a society or of the entire society

Example of social changes in education:

- Revival of nationalism themes in literature, music and arts etc.

Anthropological-Sociological Implications to Education:

- The curricular program of all learning institutions should be examined by the Commission on Higher Education (OfD) and the

Department of Education (DepEd) so that those will be responsive to the needs of the society.

- Parents should be involved In the school projects and activities, and in enculturation and socialization processes.

SOCIAL CONCEPTS:

1. Values

- generally considered as something - a principle, quality, actor entity – that is intrinsically desirable

2. Justice

- giving others what is due to them; rendering to every man that exact measures of his due without regard to his personal worth or merit

3. Freedom, Rights and Responsibility

- Freedom is not absolute, it is not doing something without restrictions or reservations or interference and influence of others.
- Right means what is just, reasonable, equitable, what ought to be, what is justifiable, something that is owed or due to others.
- Rights and responsibility come in pairs. If one wants more 'rights and freedoms/he shall also have to accept more responsibility. A right is abused when it Interferes with the rights of others
- The reciprocation of rights and duties is the true foundation of social order.
- Duties - refer to those that are due justice, to another individual or collective persons and to God.
- Authority- refers to the right given to give commands, enforce laws, take action, make decisions, and exact obedience, determine or judge.
- Accountability - means to be answerable for; emphasizes liability for something of value either contractually or-because of one's position of authority
- Responsibility - *refers to trustworthy performance of fixed duties and consequent awareness of the penalty for failure to do so.*

4. Ethics/Moral law

Ethics Is based on one's station in life: to each station corresponds a certain behavior according to which a person must live.

THEORIES OF ETHICS:

- 1) Consequentialism - claims that the morality of an action is *determined* by its consequences
 - a) Hedonism - views that only pleasure is good as an end; pleasure is the highest good
 - b) Utilitarianism - believes that the greatest happiness of the greatest number is the test of right or wrong
 - c) Self-realizations - holds that the ultimate end is the full development or perfection of the self
- 4) Non-consequentialism - claims that the morality of an action depends on its intrinsic nature or on its motives'
- 5) Divine Command Theory - claims that the morality of an act depends on whether it is in accordance with the will of God
- 6) Categorical Imperative Theory - holds that for one's action to be morally right, s/he must be willing to have everyone act in the same way
- 7) Egoism - claims that an action is right only if it is in the interest of the agent
- 8) Situation Ethics - claims that the morality of an action depends on the situation and not on the application of the law
- 9) Intuitionism-claims that one's knowledge of right *and* wrong is immediate and self-evident
- 10) Emotive Theory -* claims that moral judgment do not 'state anything that is capable of being true or false but merely express emotions like oaths or exclamations
- 11) Ethical Relativism -holds the view that there is no one correct moral code for all times and peoples, that each group has its own morality relative to its wants

- Teacher A
