A. Human development considers both maturation and learning.
B. Development refers to the progressive series of changes of an orderly coherent type toward the goal of maturity.
C. Development is the gradual and orderly unfolding of the characteristics of the individuals as they go through the successive stages of growth.
D. All of the above
7. What do you call the quantitative increase in terms of height and weight as observed by the school physician during the physical examination of the students?
A. Development B. Learning C. Growth D. Maturation
8. Mrs. Gomez conducts research on the psychosocial domain of development. In what particular area of the child's development is Mrs. Gomez most likely to be interested with?
A. Perceptual abilities B. Brain-wave pattern C. Emotions D. Use of language
9. What is the best description of Erickson's psychosocial theory of human development?
A. Eight crises all people are thought to face
B. Four psychosocial stages in latency period
C. The same number of stages as Freud's, but with different names
D. A stage theory that is not psychoanalytic

Child and Adolescent Development and Learning Principles

- 10. In Erickson's theory, what is the unresolved crisis of an adult who has difficulty establishing a secure, mutual relationship with a life partner?**
- A. Initiative vs. Guilt
 - B. Autonomy vs. Shame and Doubt
 - C. Intimacy vs. Isolation
 - D. Trust vs. Mistrust
- 11. Alyssa is eight years old, and although she understands some logical principles, she still has troubles in understanding hypothetical concepts. According to Piaget, Alyssa belongs to what particular stage of cognitive development?**
- A. Sensorimotor
 - B. Preoperational
 - C. Concrete operational
 - D. Formal operational
- 12. Which of the following provides the best broad description of the relationship between heredity and environment in determining height?**
- A. Heredity is the primary influence, with environment affecting development only in severe situations.
 - B. Heredity and environment contribute equally to development.
 - C. Environment is the major influence on physical characteristics.
 - D. Heredity directs the individual's potential and environment determines whether and to what degree the individual reaches the potential.
- 13. When a baby realized that a rubber duck which has fallen out of the tub must be somewhere on the floor, he is likely to achieved what aspect of cognitive development?**
- A. Object permanence
 - B. Mental combinations
 - C. Deferred imitation
 - D. Goal-directed behavior
- 14. Which of the following will be Freud's description of the child's behavior if he has biting, sarcastic manner?**
- A. Anally expulsive
 - B. Anally retentive
 - C. Fixated in the oral stage
 - D. Experiencing the crisis of trust vs. mistrust
- 15. What is Freud's idea about a young boy's guilt feelings brought about by jealousy of his father's relationship with his mother?**
- A. Electra complex
 - B. Oedipus complex
 - C. Phallic complex
 - D. Penis envy complex
- 16. Which of the following can best describe the preschooler's readiness to learn new task and play activities?**
- A. Emerging competency and self-awareness
 - B. Theory of the Mind
 - C. Relationship with parents
 - D. Growing identification with others
- 17. James noted that when the preschoolers eagerly begin many new activities but are vulnerable to criticism and feelings of failure, they are experiencing what particular crisis?**
- A. Identity vs. Role Confusion
 - B. Initiative vs. Guilt
 - C. Basic trust vs. mistrust
 - D. Efficacy vs. Helplessness
- 18. What stage of Piaget's Cognitive Development does a person belong to when he can understand specific logical ideas and apply them to concrete problems?**
- A. Preoperational thought
 - B. Operational thought
 - C. Concrete operational thought
 - D. Formal operational thought

Child and Adolescent Development and Learning Principles

- 19. What is the best explanation of Piaget's concrete operational thought to describe the school-age child's mental ability?**
- A. A child can reason logically about things and events he or she perceives.
 - B. Child's ability to think about how he thinks
 - C. Can understand that certain characteristics of an object remain the same when other characteristics are changed
 - D. Can understand that moral principles may supersede the standards of society.
- 20. Elisa who is in between 9 and 11 years of age are most likely to demonstrate moral reasoning at which Kohlberg's stage?**
- A. Pre-conventional
 - B. Conventional
 - C. Post-conventional
 - D. None of the above
- 21. According to Kohlberg, a dutiful citizen who obeys the laws set down by society is at which level of moral reasoning?**
- A. Pre-conventional Stage One
 - B. Pre-conventional Stage Two
 - C. Conventional
 - D. Post-conventional Stage
- 22. Joy, who is low-achieving, shy and withdrawn, is rejected by most of her peers. her teacher wants to help Ana increase her self-esteem and social acceptance. What can Joy's teacher suggest to her parents?**
- A. Transfer her to a different school
 - B. Help their daughter improve her motor skills
 - C. Help their daughter learn to accept more responsibility for her academic failures
 - D. Help their daughter improve her skills in relating to peers
- 23. What is the most accurate definition of puberty stage?**
- A. Rapid physical growth that occurs during adolescence
 - B. Stage when sexual maturation is attained.
 - C. Rapid physical growth and sexual maturation that ends childhood
 - D. Stage when adolescents establish identifies separate from their parents.
- 24. Fifteen-year-old Marie is preoccupied with her "disgusting appearance" and seems depressed most of the time. What is the best thing her parents can do to help her get through this difficult time?**
- A. Ignore her self-preoccupation because their attention would only reinforce it.
 - B. Encourage to "shape up" and not give in the self-pity
 - C. Kid her about her appearance in the hope that she will see how silly she is acting.
 - D. Offer practical advice, such as clothing suggestions, to improve her body image
- 25. What can be the best comparison of the behavior of a 17-year-old girl to that of her 13-year-old brother?**
- A. She is more likely critical about herself
 - B. She tends to be more egocentric.
 - C. She had less confidence in her abilities.
 - D. She is more capable of reasoning hypothetically.
- 26. What is the main source of emotional support for most young people who are establishing independence from their parents?**
- A. Older adolescents of the opposite sex
 - B. Older sibling
 - C. Teachers
 - D. Peer groups

Child and Adolescent Development and Learning Principles

27. Teacher Jay is now 69 years old has been observing changes in himself such as the aging process. Which term refers to the development change in the individual?
- A. Development B. Growth C. Learning D. Maturation
28. Which of the following theory can help Miss Samson determine the readiness of her learners by administering a readiness test?
- A. Conditioning Theories C. Maturation Theory
B. Cognitive Development Theory D. Ethological Theory
29. Mr. Francisco was very much worried about the thumb sucking of his son. A friend of him says that certain behavior among infants. Who presented that notion that certain behavior like thumb-sucking is normal behavior?
- A. Sigmund Freud C. John Bowlby
B. Erick Ericson D. Urie Bronfenbrenner
30. A newborn infant move his whole body at one time, instead of moving a part of it. Which of the following principles is illustrated by his behavior?
- A. Development proceeds from specific to general.
B. Development proceeds from general to specific.
C. Development follows an orderly pattern.
D. Development follows a general pattern.
31. Train up a child in the way he should be; when he grows up, he will not depart from it. Which principle supports this?
- A. Development is determined by his heredity
B. Development is determined by the environment
C. Early development is more critical than the late development
D. Early development is less critical than late development.
32. Which state of the psycho-sexual theory does young boys experience rivalry with their father for their mother's attention and affection?
- A. Oral B. Anal C. Phallic D. Latency
33. Angela focuses her attention on the school work and vigorous play that consume most of her physical energy. Which stage of psychosexual theory illustrates her behavior?
- A. Oral B. Anal C. Phallic D. Latency
34. Which of the following is likely to be developed if infants are shown genuine affection?
- A. Trust B. Autonomy C. Initiative D. Industry
35. Christian develops an integral and coherent sense of self. He seeks answers to the question. "Who am I"? Which of the following is Christian likely to develop?
- A. Initiative C. Intimacy
B. Identity and Role Confusion D. Autonomy
36. Ms. Reyes uses images and language to represent and understand her various lessons to preschool learners. What stage in the cognitive theory of development explains this?
- A. Sensorimotor B. Preoperational C. Concrete operation D. Formal operation

Child and Adolescent Development and Learning Principles

- 37. Connie develops concepts necessary for everyday living, builds healthy attitudes towards oneself, and achieve personal independence. These are among the attributes of an individual in what particular stage?**
- A. Infancy and early childhood
 - B. Middle childhood
 - C. Adolescence
 - D. Early adulthood
- 38. Some children are more active than others, as everyone knows-extremely high levels of activity or hyperactivity are considered problematic. How may a teacher help a child who is hyperactive?**
- A. Make him the leader of the class
 - B. Transfer him to another class
 - C. Give him challenging activities that are appropriate to his ability level and interests.
 - D. Allow him to spend longer at the playground until he gets tired.
- 39. In Piaget's Theory of Cognitive Development, which of the following statements would illustrate Edward who is 11 years old?**
- A. Able to see relationships and to reason in the abstract.
 - B. Unable to breakdown a whole into separate parts.
 - C. Differentiates goals and goal-directed activities.
 - D. Experiments with methods to reach goals.
- 40. Trisha goes with her mother in school. She enjoys the workplace of her mother. Which of the following ecological theories is illustrated by the situation?**
- A. Microsystem
 - B. Mesosystem
 - C. Exosystem
 - D. Macrosystem
- 41. John, a student in secondary level tends to spend more time with his friends and his family, thus, his behavior is greatly affected by them. In which stage in the Psychosocial Stages of Development does Lito belong?**
- A. Autonomous vs Shame and Doubt
 - B. Identity vs. Role Confusion
 - C. Intimacy vs. Isolation
 - D. Initiative vs. Guilt
- 42. Anna believes that authority is respected. She is now in what particular level in moral development theory of Lawrence Kohlberg?**
- A. Social contract
 - B. Law and order orientation
 - C. Interpersonal concordance
 - D. Universal ethics orientation
- 43. What level has a four year old learner like Maryann reached when she acquired new skills such as putting the same shapes and the same colors together?**
- A. Development
 - B. Maturation
 - C. Zone of Proximal Development
 - D. Learning
- 44. Which of the following principles can be the basis of the growing realization of the significance of the early childhood education?**
- A. The young children are capable of doing many things at an early stage.
 - B. The child should be seen and should learn.
 - C. The first five years of life are the formative years of the child.
 - D. Early childhood experiences can be interesting and challenging

Child and Adolescent Development and Learning Principles

45. Which of the following learner's characteristics will affect most of the learners learning in the academic class?
- A. His affective characteristics
 - B. His cognitive characteristics
 - C. His psychomotor characteristics
 - D. His socio-emotional characteristics
46. Teacher Ramon is teaching Grade 8 students, and one of his students Danny is already 30- year-old, despite of this, Teacher Ramon believes that Danny can still improve himself drastically even though he is a lot older than his classmates. According to the lifespan approach of development, what characteristic teacher Ramon believes?
- A. Development is contextual
 - B. Development is plastic
 - C. Development is Multidimensional
 - D. Development is lifelong
47. According to Paul Baltes, an expert in life-span development approach, what characteristic of development says that development is possible throughout the life-span of an individual?
- A. Development is contextual
 - B. Development is plastic
 - C. Development is Multidimensional
 - D. Development is lifelong
48. Teacher Abigail, a 70-year-old retired teacher is now learning to use a computer and planning to be an ESL homebased teacher. What characteristic of lifespan development approach Teacher Abigail believes?
- A. Development is contextual
 - B. Development is plastic
 - C. Development is Multidimensional
 - D. Development is lifelong
49. The Oedipus and Electra Complex were both buried down in what part of the Topographical Model of Sigmund Freud's Human Psyche?
- A. Nonconscious
 - B. Conscious
 - C. Preconscious
 - D. Unconscious
50. Ken let his classmates to ask him to do their project, he does this for the purpose of being socially famous in his circle. What level of moral development is this?
- A. Preconventional
 - B. Conventional
 - C. Post-conventional
 - D. Sub-conventional
51. Two identical beakers are presented to the child, each containing the same amount of liquid. As the child watches, the experimenter pours the liquid from B into C, which is taller and thinner than A and B. When the child was asked whether beakers A and C have the same amount of liquid, the child says "no." Which task or skill is lacking in the child?
- A. Classification
 - B. Seriation
 - C. Centration
 - D. Conservation
52. Based on Freud's theory, which operates when a person is in the height of anger?
- A. Ego
 - B. Superego
 - C. Id and Ego
 - D. Id
53. The teacher before starting a new subject in computer asks her students their previous knowledge about the topic. What concept of cognitive development is exhibited in the situation above?
- A. Schema
 - B. Assimilation
 - C. Accommodation
 - D. Cognitive disequilibrium
54. Mario, a young boy, cried upon an ungranted request from his parents due to lack of money. What do you call the behavior of Mario?
- A. Object permanence
 - B. Seriation
 - C. Egocentrism
 - D. Animism

Child and Adolescent Development and Learning Principles

55. The child begins to represent the world with words and images. These and images reflect increased symbolic thinking. To which stage of Piaget's Cognitive Development the child belongs?
A. Sensorimotor B. Preoperational C. Concrete D. Formal
56. As children move into the elementary school years, they direct their energy toward mastering knowledge and intellectual skills. Which stage of Erikson's Theory is characterized by above statement?
A. Initiative vs. Guilt C. Identity vs. Role Confusion
B. Industry vs. Inferiority D. Intimacy vs. Isolation
57. At what stage in Freud's theory children begin to fondle with their genitals and develop increasing attention and affection towards the opposite sex parent?
A. Oral B. Anal C. Phallic D. Latency
58. Who developed the concept of "zone of proximal development" which adheres to the highest fulfilment of child's potential through the aid of significant adults around him/her.
A. Jean Piaget B. Jerome Bruner C. Lev Vygotsky D. Erik Erikson
59. This theory states that there are 8 basic development stages that the individual has to pass through his life
A. Learning Theory C. Psychosocial Theory
B. Psychoanalytic Theory D. Cognitive Development
60. Which among the concepts below is described by Lev Vygotsky as the one that opens the door for acquiring knowledge and skills?
A. Interaction B. Language C. Classroom D. Instruction
61. Based on Piaget's theory, what should a teacher provide for children in the sensimotor stage?
A. Games and other physical activities to develop motor skill.
B. Learning activities that involve problems of classification and ordering.
C. Activities for hypothesis formulation.
D. Stimulating environment with ample objects to play with.
62. Transition age from childhood to adulthood where rapid physical changes and sex maturity occur resulting in changes in ways of feelings, thinking and acting.
A. Puberty B. Adolescence C. Early adulthood D. Stage V
63. Modifying an existing scheme after an individual's interaction with the environment, resulting in the creation of a new scheme.
A. Assimilation B. Interaction C. Recognition D. Accommodation
64. Theory stating that a person's behavior can be motivated by urges towards self satisfaction.
A. Psychoanalytic Theory C. Psychosocial Theory
B. Cognitive development theory D. Moral development theory
65. The ability of a child to conceptualize the retention and preservation of the same quantity under various changes.
A. Recognition B. Reversibility C. Assimilation D. Conservation

Child and Adolescent Development and Learning Principles

66. **The period of physical, especially sexual, and mental maturation which is characterized by rapid somatic growth is known as**
A. infancy B. early childhood C. puberty D. adulthood
67. **Which of the following is the correct order of psychosexual stages proposed by Sigmund Freud?**
A. Oral stage, anal stage, phallic stage, latency stage, genital stage
B. B. Anal stage, oral stage, phallic stage, latency stage, genital stage
A. Oral stage, anal stage, genital stage, latency stage, phallic stage
B. Anal stage, oral stage, genital stage, latency stage, phallic stage
68. **In Erickson's theory, what is the unresolved crisis of an adult who has difficulty establishing a secure, mutual relationship with a life partner?**
A. Initiative vs. Guilt C. Autonomy vs. Shame and Doubt
B. Intimacy vs. Isolation D. Trust vs. Mistrust
69. **Alyssa is eight years old, and although she understand some logical principles, she still has troubles in understanding hypothetical concepts. According to Piaget, Alyssa belongs to what particular stage of cognitive development?**
A. Sensorimotor C. Concrete operational
B. Preoperational D. Formal operational
70. **What is the correct sequence of prenatal stages of development?**
A. Embryo, germinal, fetus C. Germinal, fetus, embryo
B. Germinal, embryo, fetus D. Embryo, fetus, germinal
71. **When a baby overextends the meaning of the word "dog" for any kind of four-legged animal, this is called _____ in linguistics.**
A. Expansion error C. Broad vocabulary
B. Extension error D. Ambiguous lexicon
72. **How do you describe the child whose parents are authoritarian, restrictive, and rejecting?**
A. High achievers C. Underachievers
B. Withdrawn underachievers D. Aggressive underachievers
73. **When a little girl who says she wants her mother to go on vacation so that she can marry her father, Freud believes that he is voicing a fantasy consistent with?**
A. Oedipus complex C. Electra complex
B. Theory of the mind D. Crisis of initiative vs. Guilt
74. **Erickson's noted that when preschoolers eagerly begin many new activities but are vulnerable to criticism and feelings failure, they are experiencing what particular crisis?**
A. Identity vs. role confusion C. Initiative vs. Guilt
B. Basic trust vs. mistrust D. Efficacy vs. helplessness
75. **Mike, as a preschool, did not like to share a piece of cake with his younger sister. Mike's younger sister was sick. Mike concludes that he made his younger sister got sick. What does this demonstrate?**
A. Inductive reasoning C. Deductive reasoning
B. Transductive reasoning D. Abstract reasoning

Child and Adolescent Development and Learning Principles

76. In stages of play, what stage does the child belong when he spends time watching others. He may talk to them but does not enter into play with them.
- A. Unoccupied B. Onlooker C. Solitary D. Associative
77. These statements imply that children at the early learning stage consider parents and teachers as authorities and models.
- A. Parents and teachers should always coordinate children's activities
B. Parents should enforce strict discipline at home and teachers in school
C. Parents and teachers should be the role models at all times
D. Parents and teachers should always consult each other with regards the child's intellectual development
78. This developmental pattern is the pre-natal maturation from 5 months to giving birth, the fetus grows from inside of the body outwards.
- A. Bottom up
B. Proximodistal trend
C. Top down
D. Cephalocaudal trend
79. The term we use when we refer to the inability of people to recall events that happen when they are at the age of 5 years old.
- A. Babyhood memories
B. Pre-conscious memories
C. child's mental block
D. Infantile amnesia
80. Who said the following quotation "Development, it turns out, occurs through this process of progressively more complex exchange between a child and somebody else- especially somebody who's crazy about that child"?
- A. Sigmund Freud B. Urie Brofenbrener C. Jean Piaget D. Lev Vygostky
81. Having a stable job, selecting a mate and rearing children. This is the time that you must be sure of yourself concept.
- A. Early adulthood B. Middle adulthood C. Old age D. Late adulthood
82. This is the time that an individual assist the new generation in their life.
- A. Early adulthood B. Middle adulthood C. Old age D. Late adulthood
83. Decreasing of strength and health, life review retirement and adjustment to new social roles.
- A. Early adulthood B. Middle adulthood C. Old age D. Late adulthood
84. The 3R'S are mastered during _____.
- A. Middle and late childhood C. Puberty
B. Prenatal Period D. Early childhood
85. Growth spurts, rapid physical changes. Also known as puberty.
- A. Adulthood B. Adolescence C. early adolescence D. Early childhood

Child and Adolescent Development and Learning Principles

86. These is known as the preschool years. Young children learn to become more self-sufficient and to care for themselves.
- A. Middle and late childhood
 - B. Prenatal Period
 - C. Puberty
 - D. Early childhood
87. It is also known as the “From conception to birth” it involves tremendous growth, from single cell to an organism.
- A. Middle and late childhood
 - B. Prenatal Period
 - C. Puberty
 - D. Infancy
88. Most of the psychological activities are beginning in this developmental stage, like language, symbolic thought, sensorimotor coordination and social learning.
- A. Middle and late childhood
 - B. Prenatal Period
 - C. Puberty
 - D. Infancy
89. Adolescent reasoning from general facts/situations to a particular conclusion is _____.
- A. Propositional thinking
 - B. Relativistic thinking
 - C. Combinational Analysis
 - D. Hypothetico-Deductive Reasoning
90. Relativistic thinking is on what stage of cognitive development?
- A. Sensorimotor stage
 - B. Preoperational stage
 - C. Concrete operational stage
 - D. Formal operational stage
91. On what age that they show awareness of identity?
- A. 6 months to 9 months
 - B. 9 months to 12 months
 - C. 1 year to 2-year
 - D. 2 years to 3 years
92. Two- or three-word utterances with syntax but without articles and prepositions are referred as what?
- A. Cooing
 - B. Babbling
 - C. Holophrases
 - D. Telegraphic speech
93. What part of speech that an infant learns first?
- A. Verb
 - B. Noun
 - C. Pronoun
 - D. Adjective
94. In what stage of cognitive development that a human view the world using only his senses?
- A. Preoperational stage
 - B. Sensorimotor stage
 - C. Concrete operational
 - D. Formal operational
95. An infant throws its arms and legs when they hear loud noises. What kind of reflex is this?
- A. Tonic Reflex
 - B. Gripping Reflex
 - C. Moro Reflex
 - D. Galant Reflex
96. This teaching/caregiving style sets reasonable and fair limits to learners. The teacher is warm and nurturing.
- A. Authoritative
 - B. Authoritarian
 - C. Permissive
 - D. Negligent

Child and Adolescent Development and Learning Principles

97. Marlo, go back to college after 10 years of experiencing different job. He always quit because of the reason that he always thinks there are a lot of opportunities out there than his job at any point in time. He took education as his course but still not quite sure if he wants to be a teacher. What phase of identity Marlo is experiencing?
- A. Identity achiever
 - B. Moratorium
 - C. Identity foreclosure
 - D. Identity diffusion
98. On periods of development, what feature characterizes the child in early childhood?
- A. High level of cognition
 - B. Readiness for schooling
 - C. Maturity
 - D. Independence
99. Why is the teacher's authority important in managing the classroom?
- A. To motivate the students to internalize self-discipline
 - B. To sow fear of the teachers to make students focus on classroom learning
 - C. To make students obey all the orders of the teachers
 - D. To coerce the students to behave properly
100. The professional role of teachers is not “sage on the stage” but the “guide from the side”. This implies that the _____.
- A. Teachers must act more as facilitators of learning
 - B. Teachers must cling to their power to improve roles
 - C. Teachers assess on their roles as lecturer
 - D. Teachers must project as “Almighty-omniscient” image
