

FOUNDATION OF THE TEACHING-LEARNING PROCESS

Philosophical Foundations

- What is philosophy?
- "Philo" = love, "Sophia" = wisdom → **Love of wisdom**
 - A person's set of fundamental beliefs and convictions.

Main Branches Of Philosophy		
Branch	Focus	Curricular Implication
Metaphysics	Nature of reality and existence	Goes beyond content; focus on what students can become
Epistemology	Nature of knowledge and how it's attained	Focus on teaching-learning process
Axiology	Study of values (ethics, aesthetics)	Development of moral sense and creativity
Logic	Correct reasoning and thinking	Logical thinking as a key goal of education
Political Philosophy	Government and civil institutions	Education for responsible citizenship

Philosophies Of Education		
Philosophy	Core Idea	Focus in School
Idealism	Mind and spiritual reality	Subject-matter focus
Realism	Tangible reality	Facts, mastery, and objectivity
Pragmatism	Learning by doing	Problem solving, real-world applications
Essentialism	Core knowledge for stability	3Rs, Science, History

Perennialism	Unchanging truths, classics	Great books, logical thinking
Existentialism	Freedom and individuality	Choice-based learning
Reconstructionism	Change society through education	Social issues, civic responsibility
Behaviorism	Learned behavior from environment	Stimulus-response, conditioning
Utilitarianism	Common good	Education for social service
Hedonism	Pleasure	Motivation through enjoyment

Historical Foundations Of Education

- **Primitive Education** – Survival and basic skills.
- **Sumerians (Mesopotamia)** – First civilization with formal schooling.
- **Oriental Education** – Focus on cultural preservation (e.g., Chinese, Egyptian).
- **Greek Education:**
 - **Athenian** – Intellectual training.
 - **Spartan** – Military and physical training.
- **Roman Education** – National success and citizenship.
- **Early Christian Education** – Religion-based formation.
- **Germany (Froebel)** – Origin of Kindergarten; emphasized **learning through play**.

Historical Foundations of Philippine Education

- **March 14, 1521** – Discovery of the Philippines
- **First Teachers** – U.S. Army soldiers
- **Thomasites** – American teachers who arrived by ship "Thomas"
- **UP Founded** – Premier state university
- **Mesopotamia (Iraq)** – Site of the first known schools
- **Persia (Iran)** – Developed schooling and philosophy
- **"Survival of the Fittest"** – Coined by Herbert Spencer, popularized by Darwin

Pre-Spanish Era

- **Purpose:** Survival, enculturation, conformity
- **Nature:** Informal, home-based, passed through generations
- **Methods:** Storytelling, observation, imitation, trial and error
- **Evidences of Early Learning:**
 - Pottery & ceramics
 - Tagbanwa & Mangyan syllabaries
 - Petroglyphs (Angono)
 - Rice terraces
 - Trade with Chinese (Tang Dynasty)
 - Barangay governance

Spanish Period

- **Purpose:** Propagate Christianity
- **Nature:** Formal and religious
- **Medium:** Vernacular (local language)
- **Schools:**
 - **Parochial Schools** (for basic catechism)
 - **Colegios (for boys) and Beaterios (for girls)** = Equivalent to high school
- **1863 Royal Decree:** First public school system and teacher training

American Period

- **Aim:** Instill democracy and use of English
- **Act No. 74 (1901):**
 - Established public school system
 - Created Department of Public Instruction
 - Brought in Thomasites
 - Founded **Philippine Normal School**
- **Curriculum:** 3Rs, GMRC, health, civics, agriculture, hygiene
- **Monroe Survey (1925):** Evaluated system effectiveness

Commonwealth Period (1935–1942)

- **Focus:** Character, citizenship, vocational efficiency
- **Commonwealth Acts:**
 - **Act 586:** Shortened elementary
 - **Act 578:** Teachers are persons in authority
 - **EO 263 (1940):** Mandated teaching of National Language

Japanese Occupation

- **Goal:** Promote Japanese values & anti-American sentiment
- **Emphasis:** Vocational, love of labor, agricultural training
- Promoted **Nippongo** and banned English

Post-War Republic (1946–1972)

- Restored democracy
- **Republic Acts:**
 - **RA 896:** Compulsory elementary
 - **RA 1425:** Rizal Law (study of Noli & El Fili)
 - **RA 4670:** Magna Carta for Public School Teachers

Martial Law / New Society (1972–1986)

- Focus: Nationalism, discipline, manpower
- **PLEDGES** (Peace, Land reform, Economic dev't, etc.)
- **Bilingual Policy:** English & Filipino as media of instruction
- New Programs: **Project IMPACT**, **ISOSA**, **NEAT**, **NSAT**

Contemporary Period (1986–Present)

- Emphasis on:
 - **Values education** (via NESC & SEDP)
 - **Critical thinking**
 - **Science and Technology**
- Reforms: **EDCOM**, **RA 7836 (LET)**, **RA 10533 (K–12)**

Eastern And Middle Eastern Philosophy

1. Confucianism (Confucius / Kung Fu Tzu):

- **Analects** – Collection of teachings.
- **Golden Rule** – “Do not do to others what you do not want done to yourself.”
- **Meritocracy** – Governance based on merit.
- **Humanistic values** – Emphasis on family and social harmony.
- Life is a gift that must be treasured.
- **Confucius** – Advocated *education for all*, *moral development*, and *social harmony*.
- **Mencius** – Believed that *humans are naturally good*.
- **Lao Tzu** – Advocated *natural flow*, *spontaneity*, and the principle of *Wu Wei* (let things happen naturally).

2. Taoism (Lao Tzu):

- **Yin and Yang** – Balance in nature and life.
- **Wu Wei** – “Let things come naturally” / effortless action.

3. Hinduism – Influenced by teachings of Mahatma Gandhi.

- **Vedas** – Ancient sacred hymns and chants.
- **Upanishads** – Sacred philosophical texts discussing meditation, morality, and the nature of reality.
- **Epics:** *Ramayana* and *Mahabharata* – Teach values, divinity, and duties.
- Focus on **divinity of the soul** and **control of desires**.

- **Hedonism** – Belief that pleasure is the highest good.
- **Stoicism** – Belief that virtue is the path to happiness through self-control.

4. **Buddhism:**

- Founded by **Siddhartha Gautama (Buddha)**.
- Goal: **Freedom from suffering**, achieve **enlightenment** and **Nirvana**.
- Emphasizes the **Middle Way** – balance and moderation.

5. **Islamic Philosophy:**

- **Prophet Mohammad** – Founder of Islam.
- Core teaching: *Submission to Allah*.
- Belief in **Theism** – one or more gods exist within the universe.
- **Divine Attributes:**
 - **Omniscient** – All-knowing.
 - **Omnipotent** – All-powerful.
 - **Omnipresent** – Present everywhere.

Educational and Psychological Theories	
Name	Title / Contributions / Theory
John Locke	<i>Father of Liberalism</i> ; Tabula Rasa (blank slate); Empiricism
Francis Bacon	<i>Father of Scientific Method & Empiricism</i> ; promoted inductive reasoning
Jean Jacques Rousseau	Holistic education ; child-centered learning; natural development
Edgar Dale	<i>Father of Modern Media in Education</i> ; Cone of Experience
Erik Erikson	Psychosocial Development Theory (8 stages)
Edward Thorndike	<i>Father of Modern Educational Psychology</i> ; Connectionism ; Laws of Effect , Readiness , Exercise
Friedrich Froebel	<i>Father of Kindergarten</i> ; Play-based early education
Johann Herbart	Founder of Pedagogy as a discipline; formal teaching steps
Johann Heinrich Pestalozzi	“ Head, Heart, and Hand ” approach; symmetrical development

John Dewey	<i>Father of Progressive Education</i> ; “ Learning by doing ”; education as experience
Paulo Freire	<i>Father of Critical Pedagogy</i> ; Pedagogy of the Oppressed ; Problem-posing education
Sigmund Freud	<i>Father of Psychoanalysis</i> ; Psychosexual Theory ; unconscious motivation
Wilhelm Wundt	<i>Father of Psychology</i> ; First psychology lab ; Introspection
Ivan Pavlov	Classical Conditioning ; stimulus-response ; involuntary behavior
B.F. Skinner	<i>Father of Operant Conditioning</i> ; reinforcement and punishment
John Watson	<i>Father of Behaviorism</i> ; observable behavior ; Little Albert experiment
Jean Piaget	<i>Father of Cognitive Development</i> ; stages of thinking in children
David Ausubel	Meaningful Learning Theory ; advance organizers
Wolfgang Köhler	Insight Learning Theory ; Gestalt Psychology
Lawrence Kohlberg	Moral Development Theory (3 levels: Preconventional , Conventional , Postconventional)
Albert Bandura	Social Learning Theory ; Modeling , Observation ; Bobo Doll Experiment
Robert Gagné	Cumulative Learning Theory ; 9 Events of Instruction
Abraham Maslow	<i>Father of Humanistic Psychology</i> ; Hierarchy of Needs ; Motivation Theory
Urie Bronfenbrenner	Ecological Systems Theory : Microsystem to Chronosystem
Benjamin Bloom	Bloom’s Taxonomy ; Cognitive Domain

David Krathwohl	Affective Domain; co-authored Bloom's Taxonomy
Simpson / Anita Harrow	Psychomotor Domain; part of Bloom's learning domains
Jerome Bruner	Discovery Learning; Spiral Curriculum; Scaffolding; Constructivist
Lev Vygotsky	Father of <i>Social Constructivism</i> ; ZPD (Zone of Proximal Development); MKO (More Knowledgeable Other)
Howard Gardner	Multiple Intelligences Theory
John Flavell	Father of <i>Metacognition</i> ; thinking about one's thinking
Kurt Lewin	Father of <i>Social Psychology</i> ; action research; group dynamics
Charles Darwin	Father of <i>Evolutionary Psychology</i> ; natural selection; mental traits evolve
William Sheldon	Somatotype Theory; body type and personality
Max Wertheimer	Co-founder of Gestalt Psychology; perception as a whole
Edward Tolman	Purposive Behaviorism; goal-directed learning; cognitive maps
Plato	Father of <i>Idealism</i> ; ideas exist in the mind; knowledge is recollection
Aristotle	Father of <i>Realism</i> ; empirical observation; logic and organized subject matter
Confucius	Moral education; Golden Rule; social harmony
Mencius	Idealist Confucianism; humans are good; love covers all
Xunzi (Hsün Tzu)	Realist Confucianism; humans are selfish; education builds virtue

Lao Tzu	Founder of <i>Taoism</i> ; Wu Wei (non-action); natural order
John Bowlby	Father of <i>Attachment Theory</i> ; secure and insecure attachment
Wolfgang Ratke	Promoted vernacular in education; early mother tongue instruction

Anthropological Foundations	
Branch	Focus
Biological Anthropology	Human biology, evolution, primates
Cultural Anthropology	Human beliefs, customs, behaviors
Linguistic Anthropology	Language, dialects, communication
Archaeology	Human past through artifacts

Sociological Foundations

5 Major Social Institutions:

- Family, Education, Government, Economy, Religion

Social Science Theories		
Theory	Key Idea	Proponent
Consensus Theory	Social order through agreement	Émile Durkheim
Conflict Theory	Power struggle; inequality in society	Karl Marx
Structural Functionalism	Institutions work together for societal balance	Herbert Spencer
Symbolic Interactionism	Meaning through symbols; micro-level interactions	George H. Mead

School-community Partnership

What Communities Do for Schools:

- **Brigada Eskwela**, work immersion, curriculum input, youth programs

What Schools Do for Communities:

- Use of school as:
 - Evacuation center
 - Venue for meetings, medical missions, training programs

Legal Bases:

- **RA 9155, RA 8525, Education Act of 1982, EFA 2015**

Filipino Character: Strengths & Weaknesses

Strengths:

- Pakikipagkapwa-tao, Family-oriented, Joy and Humor, Faith, Survivability, Hard work

Weaknesses:

- Extreme family-centeredness, personalism, lack of discipline, colonial mentality, crab mentality

Global Issues Affecting Education (Top 10 Global Issues)

1. **Climate change**
2. **Pollution**
3. **Violence**
4. **Security and well-being**
5. **Lack of education**
6. **Unemployment**
7. **Government corruption**
8. **Hunger**
9. **Substance abuse**
10. **Terrorism**

Languages Of Instruction

Level	Language Used
K–Grade 3	Mother Tongue (MTB-MLE), Filipino, and English
Grade 4 onward	Filipino and English only

Moral And Human Development

Good Moral Character includes:

- Being fully human – reaching one's potential.
- Being a loving person – caring and selfless.
- Being virtuous – consistently doing good.
- Being morally mature – integrating values in all aspects of life.

Conscience Types:

- **Right conscience** – knows right from wrong accurately.
- **Erroneous conscience** – sees wrong as right.
- **Pharisaical conscience** – preaches what one does not do.
- **Certain conscience** – confident in judgment.
- **Unsure conscience** – doubtful and uncertain.
- **Scrupulous conscience** – sees sin where there is none.
- **Lax conscience** – tolerates wrongdoing.
- **Callous conscience** – criminal mind, no guilt.

THE PROFESSIONAL TEACHER

A profession is a vocation founded upon specialized training and a body of knowledge. Teachers are professionals because they:

- Undergo **formal education**
- Are licensed through a **Licensure Examination for Teachers (LET)**
- Adhere to a **Code of Ethics**
- Engage in **Continuing Professional Development (CPD)**

Professionalization Of Teaching

P.D. 1006 – Decree Professionalizing Teachers

- Teachers must pass the **PBET**
- Minimum rating: 70%, no sub-score below 50%
- Penalties for practice without license: fine or imprisonment

RA 7836 – Teachers Professionalization Act of 1994

- Created the **Professional Board for Teachers (PRC)**
- Prescribed the **LET** for teaching eligibility
- Board Composition: Chair + 4 members
- LET Required for:
 - Preschool: BECED
 - Elementary: BSEED
 - Secondary: Bachelor's with major/minor + 10 units Prof Ed
 - Vocational: Bachelor's + 18 units Prof Ed

Grounds for Revocation of License:

- **Immorality**
- **Fraud**
- **Malpractice**
- **Drug abuse**
- **Code of Ethics violation**
- **Non-compliance with CPD**

RA 9293 – Amendment to RA 7836

- **Para-teachers** and inactive teachers (5 yrs) need refresher courses
- **Special Permits** for international practice

Continuing Professional Development (CPD – RA 10912)

- Lifelong learning process for career and personal growth
- Required for license renewal
- Covers:
 - Formal/non-formal learning
 - Online learning
 - Work experience
 - Self-directed education

Transition Rules:

- OFWs exempted temporarily
- New passers exempt on 1st renewal
- 15 units minimum during transition

Rights Under Education Act Of 1982 (BP BLG. 232)

STUDENTS:

- Right to quality instruction
- Freedom of expression, religion, and organization
- Right to access school records, counseling, and publications

TEACHERS:

- Protection under the law
- Intellectual property rights
- 6-hour maximum classroom load
- Sabbatical leave (1 year after 7 years service)
- Injury and health benefits
- Participation in decision-making

SCHOOL ADMINISTRATORS:

- Academic freedom in hiring and curricular decisions
- Right to enforce school policies

21st Century Teaching & Globalization

UNESCO's 5 Pillars of Education:

- **Learning to Know** – Foundation skills (literacy, numeracy)
- **Learning to Do** – Application of knowledge
- **Learning to Be** – Personal growth & creativity
- **Learning to Live Together** – Tolerance, respect, collaboration
- **Learning to Transform Society** – Social and global responsibility

Glocal Teacher

- Global + Local mindset
- Teaches with cultural sensitivity
- Uses tech and modern pedagogy
- Can teach anywhere in the world

Code Of Ethics For Professional Teachers (RA 7836)

PURPOSE:

A set of professional, moral, and ethical standards that guide teacher conduct.

KEY ARTICLES:

Article	Key Content
I	Scope: Applies to all teachers at all levels
II	Teacher & State: Promote national values and follow laws
III	Teacher & Community: Be a moral model and help uplift the community
IV	Teacher & Profession: Pursue CPD, uphold integrity
V	Teacher & Colleagues: Loyalty, fairness, confidentiality
VI	Teacher & Superiors: Obey rules, follow proper channels
VII	School Officials: Must support teachers' growth
VIII	Teacher & Learners: Impartial grading, no abuse, no gifts
IX	Teacher & Parents: Open communication, respect
X	Teacher & Business: No conflict of interest
XI	Teacher as a Person: Self-discipline, role model
XII	Disciplinary Action: License suspension or revocation

- Teachers are **trustees of cultural heritage**
- Teaching is a **public trust**
- No discrimination, favoritism, or solicitation
- No business should interfere with teaching
- Teachers must be **role models** (worthy of emulation)
- Librarians are **not included** in this Code

Philippine Professional Standards For Teachers (PPST)

Domains:

- 1. Content Knowledge and Pedagogy
- 2. Learning Environment
- 3. Diversity of Learners
- 4. Curriculum and Planning
- 5. Assessment and Reporting
- 6. Community Linkages
- 7. Personal and Professional Development

Career Stages:

- **Beginning** – Newly licensed
- **Proficient** – Experienced and effective
- **Highly Proficient** – Leads innovation
- **Distinguished** – Mentors and policy influencers.

Career Stages	
Stage	Description
Beginning Teacher	0–1 year; strong in theory and pedagogy
Proficient Teacher	1–2 years; still growing and pursuing graduate studies
Highly Proficient	3–5 years; mentors others, often Master Teachers
Distinguished Teacher	5+ years; has global perspective, can lead and manage

Table Of Education Laws, Guidelines, And Professionalization	
Law / Order / Term	Title / Description
PD 1000	Professionalizing teachers through presidential decree.
RA 7836	Establishment of the Licensure Examination for Teachers (LET).
PBET	Former teacher licensure exam before LET.
RA 9293	Allows para-teachers and grants temporary 2-year licenses.
PRC	Professional Regulation Commission; regulates teaching profession.

BPT	Board for Professional Teachers; regulates and revokes licenses.
Certificate-only teachers	Must earn education units and apply for a license.
18 units	Required for non-education degree holders (unit earners).
Refresher Course	12 units required before retaking the LET.
LET Passing Rate	70% general average, 75% in major/professional subjects.
Reciprocation	Recognition of teaching licenses among ASEAN countries.
License Validity	Renewable every 5 years; includes a 150-day grace period.
RA 10912	CPD Act of 2016; requires continuing education for license renewal.
RA 10157	Kindergarten Education Act; kindergarten is compulsory.
RA 1425	Rizal Law; mandates study of Rizal's life and works.
RA 6655	Free Public Secondary Education Act.
RA 6728	GASTPE; provides subsidies for students in private schools.
RA 10931	Free tuition in SUCs; Universal Access to Quality Tertiary Education.
RA 7722	Created CHED (Commission on Higher Education).
RA 7796	Created TESDA (Technical Education and Skills Development Authority).
RA 4670	Magna Carta for Public School Teachers; teacher rights and benefits.
RA 10533	Enhanced Basic Education Act (K–12); institutionalized K–12 curriculum.
RA 8545	Expanded GASTPE including ESC and voucher programs.

RA 7610	Anti-Child Abuse Law ; protects children from abuse and exploitation.
RA 10627	Anti-Bullying Act ; mandates school anti-bullying policies.
RA 7877	Anti-Sexual Harassment Law ; applies to schools and workplaces.
RA 10173	Data Privacy Act ; safeguards personal and academic data .
RA 7784	Excellence in Teacher Education Act ; enhances teacher education quality.
RA 7880	Fair and Equitable Access to Education Act ; equitable fund distribution.
RA 9155	Governance of Basic Education Act ; decentralizes DepEd governance.
Education Act of 1982	Created MECS (now DepEd); restructured education system.
Education Decree of 1863	Established public schools in every barangay ; foundation of public schooling.
RA 19087	Discontinued MTB-MLE (Mother Tongue) beyond Grade 3 .
MTB-MLE	Mother Tongue-Based Multilingual Education used from Kinder to Grade 3 only.
DepEd Order No. 42, s. 2017	National Adoption of the Philippine Professional Standards for Teachers (PPST) .
PRC Resolution No. 2019-1146	Guidelines for CPD (Continuing Professional Development) implementation.
DO 32, s. 2009	Adoption of the National Competency-Based Teacher Standards (NCBTS) .
CMO 52, s. 2007	Policies and standards for teacher education programs .
NCBTS	Framework for effective teaching practices in the Philippines.

PPST	Philippine Professional Standards for Teachers ; 7 domains of teacher quality.
PPSSH	Philippine Professional Standards for School Heads .
RA 4470	Income Tax Exemption for teachers; improves socioeconomic status .

Teacher Rights, Benefits, and Conditions

- **Teaching Load:** Maximum of **6 hours per day**, rest for related activities
- **Study Leave:** **1-year** paid leave after **7 years of service**
- **Hazard Pay:** **25%** of basic salary
- **Overtime Pay (OT):** **25%** for extra hours
- **Cost of Living Allowance (COLA):** Granted to adjust to inflation
- **Maternity Leave:** **105 days**, fully paid
- **Paternity Leave:** **7 days**
- **Salary Increase:** Every **3 years**, not exceeding allowable limits
- **LET Passers:** Must get permanent position within **5 years**

Continuing Professional Development (CPD)

- **Required Units:** **45 units** every 3 years
- **Transition Period:** 4 units allowed temporarily
- CPD is **mandatory**, regardless of transition status
- Governed by **RA 10912 (CPD Law)**

School Governance And Community Engagement

School-Based Management (SBM) – Promotes **decentralization**; decision-making at the school level.

- **DECS/DepEd** – Exercises **centralized** power.
- **School and Community Partnership** – Mutual cooperation; examples:
 - **Bayanihan** and **Brigada Eskwela**
 - **Adopt-A-School Program** – Private support for public schools
- **PTA (Parents-Teachers Association)** – Suggests, supports, implements school programs.

Additional Concepts

- **Analytical Professional Education** – Deep understanding of foundational teaching concepts.
- **"Window of the world compass"** – Philosophy guiding decisions.
- **Special Permit** – Temporary authority to teach under special conditions.
- **Asean reciprocat**ion – Mutual teacher license recognition.

- **Parateachers** – Support personnel with conditional or temporary licenses.
- **"Cannot manage emotion"** – Linked to emotional or behavioral disorder.

Professionalism & Teaching As A Vocation

- **Teaching is a Vocation:**
 - A calling and mission to teach
 - Anchored on core values (Makatao, Makakalikasan, Maka-Diyos, Makabansa)
- **Requirements to Become a Licensed Teacher:**
 - Bachelor's Degree in Education
 - Pass LET
 - 18 education units for non-BSE grads (unit earners)
 - CPD (Continuing Professional Development) – required seminars
 - Payment of license & seminar fees
 - Attend training and refresher courses
- **Grounds for Revocation of License:**
 - Criminal conviction
 - Habitual drug use
 - Dishonorable conduct
 - Not attending CPD
 - Accepting gifts in exchange for favors
 - Misconduct or business interfering with duties

Key Education Programs & Reforms

PQF (Philippine Qualifications Framework):

- Aligns national standards for skills and qualifications
- **Example Levels:**
 - Level 1 – NC I (TESDA)
 - Level 2 – NC II
 - Level 3 – NC III
 - Level 4 – NC IV / Bachelor's Degree (min. requirement for teaching)
 - Level 5 – Diploma
 - Level 6 – Bachelor's with experience
 - Level 7 – Master's Degree
 - Level 8 – Doctorate
- **Education For All 2015:**
 - Global goal to improve access and quality of education
- **Adopt-a-School Program:**
 - Allows private support for public schools at all levels
- **School and Community Partnership:**
 - Mutual benefit (e.g., Brigada Eskwela)

Religion & Education

- **Religion in Schools:**
 - Allowed **within school hours**
 - Conducted **only by religious authorities**
 - **Not mandatory**
- **Medium of Instruction:**
 - Filipino and English

Teacher's Powers And Roles

Power Type	Meaning
Expert Power	Content mastery ("I know what I'm teaching")
Referent Power	Being likable or admired by students
Reward Power	Grading, praise, incentives
Coercive Power	Discipline or punishment (within limits)
Legitimate Power	Authority given by position/title

1987 Constitution – Article XIV: Education

- **Basic Education (Elementary & Secondary):**
 - Free and compulsory (elementary only)
- Emphasizes access, equality, and quality
- Education must promote national development and foster love of country

Miscellaneous Knowledge

- **School is the nursery of the state** and the **heart of formal education**
- Teachers are not allowed to **file anonymous complaints** against superiors
- **Laws prohibit** accepting bribes or using business for personal gain
- Teachers must be **worthy of emulation** and serve as **role models**
- Teaching is both a **right and a responsibility**, guided by ethics

Licensure And Regulatory Bodies

Body	Function
National Board for Teachers	First to regulate the teaching profession in the Philippines
Board for Professional Teachers (PRC)	Can revoke a license for violations such as criminal conviction or unethical behavior
LET (Licensure Examination for Teachers)	Mandatory for becoming a licensed professional teacher
Associate in Arts graduates	Not qualified to take LET – must have a bachelor's degree in education or allied field

Teacher As Person In Authority	
Point	Details
Teachers are persons in authority	Protected under the law while performing duties
No person shall assault a teacher	Violation of Article 14 – teacher has legal protection from harm while on duty

Merit Examination For Promotion	
Details	Details
Purpose: For career advancement and professional development	Purpose: For career advancement and professional development
Coverage: Both oral and written examinations	Coverage: Both oral and written examinations
Frequency: Once every 5 years	Frequency: Once every 5 years
Fees: No examination fee required	Fees: No examination fee required

Legal And Ethical Responsibilities
- Academic Freedom - Right of higher education institutions (e.g., universities) to determine curriculum and research direction without government interference - Education is not the sole responsibility of the teacher or school head - It is a shared responsibility among parents, community, government, and other stakeholders

Global Education and UNESCO
UNESCO – United Nations Educational, Scientific and Cultural Organization - Advocates for <i>education, science, culture, and international cooperation</i>. Jacques Delors – Chair of the International Commission on Education for the 21st Century. Authored <i>Learning: The Treasure Within</i>.

Important Educational Concepts And Laws
Cory Aquino – Promoted <i>Values Education</i>. Fidel Ramos – Introduced <i>Trifocalization</i> (DepEd, CHED, TESDA). Gloria Macapagal-Arroyo – Strengthened <i>DepEd</i>. Benigno Aquino III – Launched <i>K-12 program</i>.

- Rodrigo Duterte** – Signed *Free Tertiary Education Act*.
- RA 10533** – Enhanced Basic Education Act (K-12 Law).
- DO 32, s. 2017** – Gender inclusivity policy (*no specific requirement on uniforms*).
- DO 120 s. 2027** – Mother Tongue-based education discontinued (*MTB-MLE ended*).
- ASD** – Autism Spectrum Disorder.
- EBD** – Emotional and Behavioral Disorder.

Teaching And Learning Strategies	
Type	Description
Self-Directed Learning	Student learns independently (“I can do it alone!”)
Peer-Directed Learning	Students learn together as a group
Guided Practice	Teacher and students work together (“I need help”)

THE TEACHER AND THE SCHOOL CURRICULUM

Curriculum And The Teacher
Key Concepts: Curriculum is the heart of the teaching profession. - Without curriculum: no education (formal, non-formal, or informal). - Classrooms would be empty and teachers would have no direction. Teachers are always guided by a curriculum, whether written or not. It's the backbone of all school activities and learning processes.

The Sabre-Tooth Curriculum by Harold Benjamin (1939)
- A satirical story written in 1939 that reflects how outdated educational practices persist even when they are no longer useful. - Originally referred to organized knowledge taught in the 19th century. Main point: Curriculum must evolve with time; otherwise, it becomes irrelevant. - Curriculum has now broadened to include multiple forms of learning—formal, informal, experiential, and contextual.

Definitions Of Curriculum	
Scholar	Definition
Daniel Tanner (1980)	Curriculum is a planned and guided set of learning experiences and intended outcomes , formulated through systematic reconstruction of knowledge and experiences under the auspices of the school.
Pratt (1980)	Curriculum is a written document that systematically describes goals, objectives, content, learning activities, evaluation procedures, and more.
Schubert (1987)	Curriculum includes the contents of a subject, concepts and tasks to be acquired, planned activities, desired outcomes, cultural products, and a reform agenda .
Hass (1987)	Curriculum includes all the experiences that learners have in a program of education planned to achieve broad goals and specific objectives.
Grundy (1987)	Curriculum is a program of activities (by teachers and pupils) designed so that learners will attain certain educational and other schooling goals.
Goodland & Su (1992)	Curriculum is a plan that provides learning opportunities within a set timeframe and environment, aiming for behavioral change in students through guided experiences.
Cronbeth (1992)	Curriculum answers the questions: What knowledge, skills, and values are most worthwhile? Why are they worthwhile? How should learners acquire them?

Types Of Curriculum In Schools		
Type of Curriculum	Description	Examples
Recommended Curriculum	Curriculum prescribed by official agencies.	DepEd, CHED, TESDA guidelines; national standards.
Written Curriculum	Official documents that outline what should be taught.	Syllabi, modules, textbooks, instructional guides.
Taught Curriculum	What the teacher actually delivers in class.	Varies depending on teaching style and learner engagement.
Supported Curriculum	Learning materials that assist instruction.	AV materials, modules, ICT tools, teaching aids.
Assessed Curriculum	What is evaluated to check learning.	Quizzes, tests, performance tasks, exams.
Learned Curriculum	What students actually learn and internalize.	Reflected in behavior, performance, and understanding.
Hidden (Implicit) Curriculum	Unspoken influences that affect learning.	Peer influence, teacher behavior, school culture, media, social norms.

Curriculum Development

Four Basic Processes:

- Planning** – Setting goals and priorities.
- Designing** – Organizing content, methods, and materials.
- Implementing** – Putting the plan into action (teaching).
- Evaluating** – Checking if goals were achieved and what can be improved

Teacher As A Curricularist	
Role	Description
Knower	Masters subject matter.
Writer	Writes guides, books, modules.
Planner	Creates daily/monthly/yearly plans.
Initiator	Adopts new curriculum from agencies.
Innovator	Adjusts and improves curriculum creatively.
Implementer	Puts curriculum into practice.
Evaluator	Assesses effectiveness of the curriculum.

Curriculum Views

Traditional Points Of View	
Scholar	View on Curriculum
Robert M. Hutchins	Curriculum should emphasize permanent studies —rules of grammar, reading, rhetoric, logic, and mathematics. Focus is on 3Rs in basic education and liberal education in college.
Arthur Bestor	An essentialist who believes curriculum should focus on intellectual training . Emphasizes subjects like grammar, literature, writing, mathematics, science, history, and foreign language.
Joseph Schwab	Curriculum should be based on academic disciplines such as Science, Mathematics, Social Studies, and English. He coined the term “ discipline ” as the source of curriculum.
Philip Phenix	Curriculum must consist of organized knowledge derived from various disciplines .

Progressive Points Of View	
Scholar(s)	View on Curriculum
John Dewey	Curriculum is based on experience . Emphasizes reflective thinking and learning through application.
Hollis Caswell & Kenn Campbell	Defined curriculum as all experiences learners have under the guidance of teachers.
Othaniel Smith, William Stanley & Harlan Shore	Curriculum is a sequence of potential experiences intended to develop group thinking and social behavior among learners.
Colin Marsh & George Willis	Curriculum includes all experiences in the classroom that are planned and enacted by teachers and learned by students .

Approaches To Curriculum	
Approach	Meaning
1. Curriculum as Content	Focuses on what to teach (topics or subject matter). Ways to present: topical, conceptual, thematic, modular. Selection criteria: significance, validity, utility, learnability, feasibility, interest. Guidelines: based on daily use, age level, career relevance, and subject connection. Principles: balance, articulation , sequence, integration, continuity
2. Curriculum as a Process	Focuses on how to teach (methods and strategies). Also known as PCK or pedagogical content knowledge.
3. Curriculum as a Product	Focuses on what learners achieve (knowledge, skills, values) after instruction.

Curriculum Development Models	
Model	Description
Tyler Model	Focuses on 4 key questions : 1) What are the goals? 2) What experiences help reach them? 3) How should they be organized? 4) How do we know if goals are met?
Taba Model	A 7-step grassroots approach that starts with teachers and learner needs: 1) Diagnose needs 2) Set objectives 3) Select content 4) Organize content 5) Select learning experiences 6) Organize experiences 7) Evaluate outcomes
Saylor & Alexander Model	A 4-step model similar to the development process: 1) Set goals/objectives 2) Design the curriculum 3) Implement it 4) Evaluate and revise as needed

PHILOSOPHICAL FOUNDATIONS	
Philosophy / “-ism”	Key Idea
Essentialism	Focus on core knowledge, basic skills , and the 3Rs (Reading, Writing, Arithmetic); teacher is the authority.
Perennialism	Emphasizes unchanging truths, great books , and classical education ; teacher-centered.
Progressivism	Learning by doing, real-life experiences , and problem-solving ; learner-centered (John Dewey).
Existentialism	Emphasizes freedom, choice , and personal responsibility ; values individuality.
Social Reconstructionism	Uses education to promote social change, justice , and problem-solving in society.

Realism	“ To see is to believe ”; focuses on observable facts, science , and the physical world .
Idealism	Based on Plato ; believes in eternal truths, ideas , and values existing in the mind/spirit.
Behaviorism	Learning is shaped by stimulus-response, reinforcement , and conditioning (Skinner).
Cognitivism	Focuses on mental processes like thinking, memory , and problem-solving (Piaget).
Rationalism	Values logic, reason , and critical thinking as the path to truth.
Constructivism	Learners construct their own knowledge through experiences and interaction .
Humanism	Promotes self-actualization, personal growth , and the development of the whole person .
Pragmatism	Truth is found through experience and what works in practice (John Dewey influence).
Empiricism	Knowledge is gained through senses, observation , and experimentation .
Naturalism	Education should follow the natural development of the child; child-centered learning.
Utilitarianism	Education should serve the greatest good for the greatest number (practical benefit).
Multiculturalism	Respects cultural diversity , promotes inclusive and equitable education.
Critical Pedagogy	Seeks to empower students and challenge oppression through education (Paulo Freire).
Feminism	Advocates for gender equality and questions gender roles and bias in education.

Postmodernism	Rejects absolute truths ; values multiple perspectives and critical questioning .
Transcendentalism	Emphasizes intuition , spirituality , and nature connection (Thoreau, Emerson).
Eclecticism	Combines elements from different philosophies for a flexible and balanced approach.
Phenomenology	Values personal experience , consciousness , and meaning-making in learning.
Theism	Education grounded in faith , divine purpose , and moral development .

Historical Foundations	
Thinker	Major Works / Contributions
Franklin Bobbit	Book: <i>The Curriculum</i> (1918); curriculum must prepare students for adult work life; introduced curriculum as a science .
Werret Charters	Stressed matching objectives and content ; subject matter must serve specific purposes; curriculum should be practical and goal-driven .
William Kilpatrick	Known for Project Method ; curriculum must be based on purposeful student activities ; strong advocate of child-centered learning .
Harold Rugg	Developed interdisciplinary and social issues-based curriculum ; emphasized whole-child development ; teacher as curriculum planner.
Hollis Caswell	Curriculum is interrelated with instruction and learning ; should address learner interests and social functions .
Ralph Tyler	Author of <i>Basic Principles of Curriculum and Instruction</i> (1949); developed Tyler’s Model with 4 essential curriculum questions; curriculum linked to

	problem-solving and outcomes .
Hilda Taba	Developed the Grassroots Model (starts from teachers); promoted critical thinking and concept development ; known for systematic curriculum development steps.
Peter Oliva	Promoted collaborative curriculum planning ; emphasized that teachers and curriculum specialists should work as partners in developing and improving curriculum.

Psychological Foundations	
Psychologist	Theory / Contribution
Ivan Pavlov	Classical Conditioning – learning via association (stimulus-response).
Edward Thorndike	Connectionism – learning by forming associations between stimuli and responses; "law of effect."
Robert Gagné	Hierarchical Learning Theory – different types of learning arranged from simple to complex; 9 instructional events.
Jean Piaget	Stages of Cognitive Development – sensorimotor, preoperational, concrete, formal; children learn through active discovery.
Lev Vygotsky	Sociocultural Theory – learning is social; introduced Zone of Proximal Development (ZPD) and scaffolding.
Howard Gardner	Multiple Intelligences – intelligence is not single; includes linguistic, logical, musical, kinesthetic, interpersonal, etc.
Daniel Goleman	Emotional Intelligence (EQ) – emotional awareness and self-regulation affect learning success.
Abraham Maslow	Hierarchy of Needs – motivation affects learning; self-actualization as the highest goal.

Carl Rogers	Humanistic / Non-directive Learning – learning is student-led; teacher creates a supportive environment.
John Dewey	Experiential Learning – learning by doing; advocated democratic and reflective education.
Alvin Toffler	Author of <i>Future Shock</i> ; education must prepare students for future changes and innovation .
Kurt Lewin	Field Theory – learning is influenced by environment (life space); basis for group dynamics.
Jerome Bruner	Spiral Curriculum – learning is best when structured and revisited; emphasized discovery learning.
David Ausubel	Meaningful Learning Theory – advance organizers help learners relate new info to what they already know.
B.F. Skinner	Operant Conditioning – reinforcement and punishment shape behavior; basis for behavior modification.
Albert Bandura	Social Learning Theory – learning happens through observation and imitation; introduced modeling .
Gestalt Psychologists (Köhler, Wertheimer, Koffka)	Learning as whole perception – understanding comes from seeing the whole picture, not just parts.

Curriculum Design
General Axioms (Peter Oliva) Curriculum development is: • Inevitable (change will happen) • Time-based (shaped by era and society) • People-driven (relies on teachers and stakeholders) • Cooperative (requires collaboration) • Ongoing (never finished) • Systematic (follows steps or structure) Lesson Plan = Mini-Curriculum • ILO/DLO – Intended or Desired Learning Outcomes • Subject Matter – Topic or content • Teaching Method – Strategies or approach • Assessment – Evaluation tools or techniques

Types of Curriculum Design	
Design Type	Description
Subject-Centered	Focuses on content and academic subjects (e.g., Math, Science). May include: • Subject Design • Discipline Design • Correlation Design • Broad Field/Interdisciplinary Design
Learner-Centered	Based on learners’ needs, interests, and experiences . Types: • Child-Centered • Experience-Centered • Humanistic
Problem-Centered	Organized around real-life issues and problems . Includes: • Life Situations Design • Core Problems Design

Design Approaches
• Child/Learner-Centered – Personalized, inclusive, supports diversity • Subject-Centered – Knowledge-driven, focused on mastery of content • Problem-Centered – Engages learners in solving real-world challenges

Curriculum Mapping
Steps to Create a Curriculum Map 1. Create a matrix (spreadsheet or table) 2. Add timeline (e.g., quarterly, semester, yearly) 3. Input ILOs (learning goals) 4. Add content areas (topics or subjects) 5. Align resources (books, modules, tools) 6. Input teaching methods (strategies, approaches) 7. Align assessments (quizzes, performance tasks) 8. Circulate & revise (get feedback, refine map)

Curriculum Implementation
What Is It? • Execution of the written curriculum • Interaction between teachers, learners, and content • Trying out new practices in actual classroom settings

Types of Curriculum Change	
Type	Meaning
Substitution	Replacing old curriculum with a new one
Alteration	Minor adjustments to existing content or methods
Restructuring	Major changes in system or format (e.g., K to 12)
Perturbations	Temporary, disruptive changes (e.g., COVID learning shift)
Value Orientation	Shift in emphasis or philosophy of the curriculum

Curriculum Mapping

Basic Classroom Components

- **Objectives** – Clear learning goals
- **Subject Matter** – What to teach
- **Procedures** – How to teach (steps/method)
- **Assessment** – Checking understanding
- **Assignment** – Follow-up activities

21st Century Literacies

Attributes of 21st Century Education

- **Integrated** – Subjects are connected
- **Student-Centered** – Learner’s needs come first
- **Global** – Culturally aware and internationally focused
- **Tech-Infused** – Uses digital tools and media
- **Project-Based** – Focuses on tasks and real-world problem solving

21st Century Teacher Traits

- **Multi-literate** – Can use and teach with various media and tools
- **Creative** – Finds innovative ways to teach
- **Critical Thinker** – Analyzes and adapts curriculum and challenges
- **Passionate** – Loves teaching and inspires learners
- **Lifelong Learner** – Keeps learning and improving professionally

NEW LITERACIES	
Type	Focus
Multicultural	Diverse perspectives
Global	Justice, sustainability
Social	Empathy, communication
Media	Analyze, evaluate media
MIL	Ethical info use
Financial	Budgeting, saving
Digital	Responsible tech use
Eco	Sustainability awareness
Creative	Aesthetics, innovation

Categories of Curriculum Change	
Category	Meaning
Substitution	Replaces the entire current curriculum with a new one
Alteration	Involves minor modifications to the curriculum
Restructuring	Major or system-wide changes (e.g., K to 12 curriculum)
Perturbations	Sudden, unexpected changes that require quick teacher response
Value Orientation	Shifts the values or focus of the curriculum, requiring adjustments in teaching

Programs And Innovations In Philippine Education

- **BESRA** – *Basic Education Sector Reform Agenda*; key reform strategy supporting K–12 implementation with 5 thrusts.
- **EUSEP** – *Effective and Affordable Secondary Education Project*.
- **MISOSA** – *Modified In-School and Out-of-School Approach*; learners are divided into two groups for flexible learning delivery.
- **IMPACT** – *Instructional Management by Parents, Community, and Teachers* (SEAMEO-Innotech program).
- **OHSP** – *Open High School Program*; designed for learners with long-term absences to continue education.
- **MFAT** – *Multi-Factored Assessment Tool*; used for Grade 1 learners to assess readiness and learning needs.

CHARD

Erikson's Eight Psychosocial Stages		
Stage	Age Range	Key Features
Trust vs. Mistrust <i>Basic virtue: hope</i>	Birth–2yrs	Infant forms trust if caregivers are consistent and affectionate; otherwise, mistrust
Autonomy vs. Shame & Doubt <i>Basic virtue: will</i>	2yrs–3 yrs	Toddlers develop self-control and independence (e.g., toilet training)
Initiative vs. Guilt <i>Basic virtue: purpose</i>	3–6 yrs	Preschoolers assert power through play; if punished, may feel guilty
Industry vs. Inferiority <i>Basic virtue: competence</i>	6–12 yrs	School-aged children learn and compare themselves to peers
Identity vs. Role Confusion <i>Basic virtue: fidelity</i>	12–18 yrs	Adolescents explore roles, values, and personal identity
Intimacy vs. Isolation <i>Basic virtue: love</i>	19–40 yrs	Young adults form deep relationships or feel isolated
Generativity vs. Stagnation <i>Basic virtue: care</i>	40–65 yrs	Middle adults contribute through work, parenting, mentoring
Integrity vs. Despair <i>Basic virtue: wisdom</i>	65+ yrs	Older adults reflect on life with fulfillment or regret

Piaget's Four Cognitive Development Stages		
Stage	Age Range	Key Features
Sensorimotor	0–2 yrs	Object permanence; sensory exploration
Preoperational	2–7 yrs	Symbolic play, egocentrism, centration; lacks conservation
Concrete Operational	7–11 yrs	Logical thought (conservation, classification), inductive reasoning
Formal Operational	11+ yrs	Abstract, hypothetical-deductive reasoning

Piaget's Moral Development		
Period	Age	Key Feature
Adult Authority-Based Justice	5–7/8 yrs	Justice depends on what adults say
Progressive Equalitarianism	8–11 yrs	Rules seen as negotiable/fair
Consideration of Equity	11–12 yrs	Focus on fairness and equity

Freud's Psychosexual Stages of Development		
Stage	Age Range	Focus
Oral	0–1yr (infant)	Mouth (sucking, biting)
Anal	1–3 yrs (toddler)	Bowel and bladder control
Phallic	3–6 yrs (preschool)	Genitals stimulation • <i>Oedipus Complex</i> - son to mom • <i>Electra complex</i> - daughter to dad
Latency	6–12 yrs (school age)	Social aspects, Dormant sexual feelings, interests were temporary
Genital	12+ yrs (adolescence)	Maturation of sexual interests

Freud's Personality Structure		
Component	Description	Key Concepts
ID	Operates on the pleasure principle – seeks immediate gratification regardless of reality or consequences	Referred to as the "evil side" , focused only on what feels good now
Ego	Operates on the reality principle – considers consequences and the needs of others	Emerges in toddler/preschool years , practical and logical
Superego	Embodies a person's moral standards and conscience	Develops during late preschool/phallic stage , known as the "angel side"

Freud's Three Level of Minds		
Level of Mind	What It Includes	Key Details
Unconscious	Deepest part of the mind; contains fears, desires, and unresolved conflicts like the Oedipus and Electra Complex	Strongly influences behavior without awareness
Conscious	Everything actively known and experienced	Smallest part of personality awareness
Subconscious	Not currently active , but can be accessed when triggered	Example: phone numbers, childhood memories
Nonconscious	Unknown and unexperienced , not part of current awareness	Never made part of the personality

Thorndike's Law of Learning	
Law	Meaning
Readiness	Learning happens when the learner is motivated
Exercise	Repeating actions strengthens connections (e.g., practice, drills)
Effect	Behavior followed by satisfaction is strengthened; behavior followed by discomfort is weakened

Brunner's Types of Reinforcement and Punishments		
Type	What Happens	Effect
Positive Reinforcement	Give something pleasant	Increases behavior (e.g., reward, praise)
Negative Reinforcement	Remove something unpleasant	Increases behavior (e.g., no chores, less noise)
Positive Punishment	Add something unpleasant	Decreases behavior (e.g., scolding, extra work)
Negative Punishment	Take away something pleasant	Decreases behavior (e.g., no gadgets, no allowance)

Brunner's Three Modes of Representations		
Mode	Stage	Focus
Enactive	Concrete Stage	Learning through actions (doing things physically)
Iconic	Pictorial Stage	Learning through images and mental pictures
Symbolic	Abstract Stage	Learning through language, symbols, and abstract thinking

Flavell's Three Category Of Metacognitive Knowledge		
Category	What It Is	Example / Clue
Person Variables	Awareness of how one learns and individual learning preferences	Knowing you study better in the morning than at night
Task Variables	Knowing the nature and difficulty of the task	Realizing a philosophy book takes more effort to understand than a novel
Strategy Variables	Being aware of and evaluating the learning strategy used	• Meta-attention: staying focused on a task • Meta-memory: using memory tricks that work best for you

Principles of Gestalt Psychology (MaxMax Wertheimer, Wolfgang Köhler, and Kurt Koffka)		
Principle	Description	Example/Key Point
Law of Continuity	We prefer smooth continuities rather than abrupt changes.	Lines or patterns continue in a smooth path.
Law of Closure	We tend to complete incomplete figures.	We fill in missing parts of an image.
Law of Proximity	Objects that are close together are grouped together.	Items near each other seen as a set.
Law of Similarity	Similar objects are perceived as related .	Circles grouped together; squares grouped separately.
Law of Pragnanz	We perceive the simplest, most stable form possible.	Choose most organized interpretation.
Figure and Ground	We distinguish the figure (object) from the ground (background) .	Helps focus on subject in an image.

Kohlberg's Six Stages of Moral Development		
Level & Stage	Approx. Age	Focus / Reasoning Style
Preconventional	Before age 9	1. Obedience & Punishment: Avoid pain/punishment; 2. Self-interest: "What's in it for me?"
Conventional	Late childhood, adolescence, and most adults	3. Good Boy/Nice Girl: Gain social approval; 4. Law & Order: Uphold laws and duty to maintain order
Postconventional (Principled)	Rare with adolescents and few adults	5. Social Contract: Laws are fluid tools for promoting welfare; 6. Universal Principles: Guided by internal ethics – justice, dignity

Systems of Bronfenbrenner's Theory		
System	Description	Examples
Microsystem	Direct interactions and settings	Family, school, neighborhood, teacher-child
Mesosystem	Connections between microsystems	Parent-teacher relationship, home-school connection
Exosystem	Indirect influences on the child	Parent's job, local policies, social services
Macrosystem	Wider cultural context	Laws, cultural values, traditions
Chronosystem	Time dimension and life transitions	Death of a parent, puberty, socio-historical context

Stages of Human Memory (Richard Atkinson and Richard Shiffrin)		
Stage	Description	Example
Sensory Memory	Brief storage of sensory input; exact copy of stimulus	Color, shape, sound

Short-Term Memory	Active memory where information is consciously processed	Solving a math problem mentally
Long-Term Memory	Permanent store of knowledge (can last minutes to lifetime)	Knowledge of multiplication

Teaching for Transfer (Robert Gagné)		
Type of Transfer	Description	Example
Lateral Transfer	New task at the same level	Solving similar word problems
Vertical Transfer	Learning advanced skill from prior learning	From adding → multiplying
Specific Transfer	Using specific skill/rule in a similar situation	Grammar rule → used in essay writing
General Transfer	Applying a general principle to a different situation	Grammar rule → used in conversation

Hierarchy of Needs / Self-Actualization Theory (Abraham Maslow)	
Level	Description
Physiological	Basic survival needs: food, water, sleep, oxygen, sex
Safety	Protection from danger, illness, loss, and emotional threats
Love & Belonging	Inclusion (group), affection (love), control (influence over others/self)
Esteem	Self-esteem (mastery), recognition (others' respect), need for power
Self-Actualization	Desire to fulfill one's full potential; become the best version of self

Subcategories Of Teachers Movement/movement Management

1. Thrust – Gives directions without checking attention.

2. Dangling – Starts an idea, then leaves it unfinished.

3. Truncation – Cuts off a task without closure.

4. Flip-flop – Switches between topics too often.

5. Stimulus Bound – Gets distracted by students or surroundings.

6. Overdwelling – Spends too long on one issue.

7. Overlapping – Manages multiple tasks at once (positive).

Child And Brain Development

- 3 weeks** – Brain development begins.
- 20 weeks** – Development of the *cerebral cortex*.
- Fine motor skills** – Involve fingers and hand coordination.
- Gross motor skills** – Involve whole-body movements.

Guidance, Counseling, And Psychology In Education

- Sinforoso Padilla** – Known as the *Father of Counseling* in the Philippines.
- Internally Displaced Learners** – Refers to students who are forced to leave their homes due to conflict, disaster, or relocation.

EDUCATIONAL TECHNOLOGY FOR TEACHING AND LEARNING

Introduction To Technology And Learning	
Type	Definition
Online Education	Delivered via Internet
Traditional Education	Face-to-face teaching; teacher and students in the same classroom

Basic Concepts In Ict (T I T E E A A)	
Term	Meaning
Technology	Application of scientific knowledge for practical use
Instructional Technology	Design & management of learning tools/processes
Technology in Education	Use of hardware/software + theory to improve learning
Educational Technology	Study of learning design, delivery, evaluation

Educational Media	Communication tools used in teaching (e.g., videos, books)
Audio-Visual	Uses sight & sound (e.g., slides, video, music)

Digital Terms	
Term	Meaning
Digital Literacy	Ability to use ICT & Internet
Digital Learning	Learning that uses technology
Digital Tools	Apps/software used in learning (online or offline)
Multimedia	Use of text, images, video, audio, animation

Roles Of ICT In Teaching & Learning	
Role	Description
As Tutor	Uses simulations/models for hard concepts
As Teaching Tool	Enables access to info , practice, and interactive learning
As Learning Tool	Makes learning fun, fast, and student-centered
Supports Teachers	Enhances role with audio-visuals, interactive content
Modernizes Learning	Encourages exploration and deeper understanding in STEM
Opens Research Fields	Enables faster data analysis
Teacher Development	Trains teachers in new pedagogy and strategies
Improves Communication	Boosts students' social interaction
Upgrades HOTS	Develops critical thinking, problem-solving, creativity

ICT And Assessment		
Trends in Assessment	Computer-Assisted Assessment (CAA)	E-Portfolio
Multiple measures	Delivered via computers	Digital record of learning
Increased use of technology	Covers formative & summative assessment	Includes text, media, hyperlinks, files
Focus on learner growth	Assesses learning & performance	Tracks progress & abilities
Clear roles/ responsibilities	Can be online/ offline	Useful for self reflection & teacher evaluation

Digital Rubrics	Survey Tools
Describes student performance	Gathers feedback from students
Students identify weaknesses	Helps with planning/improvement
Teachers help in rubric construction	Supports data-based teaching

ICT Policies, Issues, And Guidelines

ICT policies are **roadmaps** or sets of **actions** adopted by governments and organizations to guide the responsible development and use of **information and communication technologies**.

- SOME ISSUES ON ICT
- **Freedom of Expression and Censorship** – Balancing the right to speak with the need to regulate harmful content
 - **Privacy and Security** – Ensuring personal data is protected from misuse
 - **Surveillance and Data Retention** – Government or organization monitoring and storing of user activity
 - **E-pollutants from E-waste** – Improper disposal of devices harms the environment

- E-SAFETY
- Safeguards **children and youth** online
 - Promotes **positive technology use**
 - Teaches both **benefits and risks** of internet use
 - Encourages **safe digital behavior** inside and outside school

Network Management	
Aspect	Description
Network Safety	Keeps school networks protected from harmful content and users
Password Policy	Requires strong, regularly updated passwords
Mobile Devices	Controls the use of personal phones and tablets within school settings
Camera Use	Manages use of devices with cameras to protect privacy and security

Digital Literacy Skills In The 21st Century

Digital literacy means the ability to **use technology responsibly and effectively** in digital society.

The Digital Literacies	
Type	Focus
Media Literacy	Ability to analyze and understand digital media
Information Literacy	Skill in locating, verifying, and evaluating online information
ICT Literacy	Knowing how to choose and use digital tools and apps
Communication & Collaboration	Ability to participate and work with others via digital platforms

Benefits And Dangers Of Social Networking	
Benefits	Dangers
1. Technology literacy	1. Distraction
2. Breadth of knowledge	2. Relationship problems
3. Brings people together	3. Health problems
4. Attracts attention	4. Harmful/malicious acts
5. Business opportunities	5. Reduced worker productivity

Online Communities / Social Networking		
Platform	Key Details	Founded / Owned By
Facebook	2.93B users (2022); social networking, messaging, business pages	Founded in 2004 by Mark Zuckerberg ; now Meta
Twitter	Microblogging with 280-character tweets ; real-time updates	Founded in 2006 by Jack Dorsey and team
LinkedIn	Professional networking; job searching and career building	Acquired by Microsoft in 2016
Google	Major tech company; owns services like Gmail, Maps, Search, Docs, and YouTube	Founded by Larry Page and Sergey Brin in 1998
YouTube	Second most visited website; video sharing platform for creators and viewers	Founded in 2005; acquired by Google
Pinterest	Visual discovery tool; users pin/save images and ideas	Created by Ben Silbermann and team
Instagram	Photo and video sharing; features include Stories, Reels, filters, hashtags	Launched in 2010; owned by Meta
Tumblr	Microblogging with GIFs, blogs, and multimedia; mixed creative content	Founded by David Karp , now owned by Automattic
Flickr	High-resolution photo/video sharing for photographers; image hosting + online community	Created in 2004 by Ludicorp ; owned by SmugMug
Bebo	Social network with multiple relaunches; once acquired by Amazon, eventually shut down in 2022	Originally launched in 2005; multiple relaunches

Identity Management
 (Protecting Yourself Online)

Tips for staying safe on social media platforms:

1. Use **strong, secure passwords**
2. **Log out** after using shared/public devices
3. Understand your **digital footprint**
4. Don't accept invites from **strangers**
5. Regularly check **privacy settings**
6. Think before posting – consider **impact on others**
7. Use **appropriate language** online
8. **Better safe than sorry** – avoid risky behavior
9. Use the **report button** for abuse/misuse
10. Be aware of and report cyberbullying

Learning Skills & Digital Scholarship

- **Learning Skills:** Ability to adapt and study using digital tools
- **Digital Scholarship:** Participation in **academic/professional** practices using technology

8 Digital Literacy Skills (Lynch, 2017)	
Skill	Definition
1. Coding	Assigning a code for classification or identification
2. Collaboration	Working together to create/produce something
3. Cloud Software	Apps hosted online and accessible on multiple devices
4. Word Processing	Using software (e.g., MS Word) to create/edit/print documents
5. Screencasting	Video/audio recording of screen activity, used for tutorials or presentations
6. Archiving	Preserving historical records/documents (e.g., film, digital archives)
7. Information Evaluation	Assessing validity, accuracy, bias, and timeliness of sources
8. Social Media	Platforms for communication, content-sharing, and community participation

RA 8293 – Intellectual Property Code Of The Philippines

- Law establishing the **Intellectual Property Office (IPO)**
- Prescribes protection and rights related to **creative works**, inventions, brands, etc.

ISTE Standards for Students (Philippine Setup)	
Standard	Simplified Description
Creativity and Innovation	Express ideas using the right tools, styles, and formats
Communication and Collaboration	Connect and learn with people from different backgrounds
Research and Information Fluency	Use good strategies to find and use info
Critical Thinking & Problem Solving	Solve problems using tech-based solutions
Digital Citizenship	Be responsible, ethical, and safe online
Tech Operations and Concepts	Use tech to guide, show, and reach learning goals

ISTE Standards for Teachers	
Standard	Simplified Description
Tech Operations and Concepts	Learn and apply best tech practices for teaching
Planning and Designing Learning	Create student-centered activities that meet diverse learning needs
Teaching, Learning, and Curriculum	Use tech to support lessons and student achievement
Assessment and Evaluation	Use data and tech to guide instruction and measure learning
Productivity and Professional Practice	Explore, test, and share new digital tools with peers
Social, Ethical, Legal & Human Issues	Promote respectful and responsible use of tech among students and create inclusive digital spaces

TPACK Framework	
Knowledge Type	What It Means
Content Knowledge (CK)	Mastery of the subject matter being taught.
Pedagogical Knowledge (PK)	Skills and understanding of how to teach effectively.
Technological Knowledge (TK)	Knowing how to use technology tools to enhance learning.

ADDIE Model	
Stage	Focus
Analysis	Understand students' needs , goals, and skill levels.
Design	Plan objectives, content , and choose tools/media based on learners' needs.
Development	Create and test materials using feedback from earlier stages.
Implementation	Deliver the course while making ongoing adjustments to improve it.
Evaluation	Conduct final review using formative and summative assessments to measure success and make improvements.

ASSURE Model	
Step	Simplified Description
Analyze Learners	Understand students' characteristics relevant to learning outcomes.
State Standards/ Objectives	Clearly identify what learners should be able to do after instruction.
Select Strategies & Media	Choose the teaching methods, tech, and materials that best match objectives.
Utilize Tech & Media	Plan how to effectively use the selected tools and resources.
Require Learner Participation	Design activities that actively involve students in learning.
Evaluate and Revise	Assess student performance and adjust teaching strategies and tools as needed.

SAMR Model	
Stage	Description
Substitution	Use tech as a direct replacement for traditional tools (e.g., typing instead of writing by hand).
Augmentation	Replace tools but with enhancements that improve learning (e.g., spell check in word processors).
Modification	Redesign tasks using tech to enable new learning strategies (e.g., real-time collaboration in Google Docs).
Redefinition	Technology allows for entirely new learning tasks that were not possible before. Example: global collaboration through virtual simulations.

Promoting Technology Integration in Education	
Key Strategy	Simplified Description
Promote OER Creation	Technology must be used to create and share engaging Open Educational Resources (OER) .
Appropriate Technologies	Choose practical, low-cost, and inclusive tools like TV, radio, and printed materials .
Donor Coordination	Match initiatives to suitable recipients to reduce costs and increase impact .
Public-Private Financing	Private companies should be encouraged to support ICT4E to ensure a tech-ready workforce .

Guidelines for Creating Instructional Materials	
Principle	Simplified Definition
Unity	Elements must belong together.
Simplicity	Keep it easy to understand .
Legibility	Ensure it's easy to read .
Consistency	Design and style should be uniform throughout.
Clarity	Must be understandable and direct .

Technology-Enhanced Lessons: Instructional Tools	
Non-Digital Tool	Description
Writing Board	Flat surface for writing (e.g., whiteboard).
Diorama	3D model of a scene.
Nature Table	Table showing real items from nature.
Flip Chart	Pad of paper that flips over on a stand.
Zigzag Board	Foldable boards connected by hinges.
Board/Wall Display	Area to post student work or important visual information.
Role and Pole Display	Stand or hanging display board for lessons or projects.

Digital Tools in Teaching	
Tool	Purpose
Mobile Phones & QR Codes	Scannable codes that provide links or data instantly.
Infographics	Visual summaries of data or information .
Online Bulletin Board	Digital space for collaborative discussion (e.g., Padlet).
E-Portfolio	Online collection of student progress and work samples .

Collaborative Tools in the Digital World	
Tool	Use in Learning
Skype	Video calls, screen sharing, and messaging for remote collaboration .
Wiki	Websites that allow shared editing and knowledge building .
Blogging	Students can write and reflect through online journals .
Google Groups/Forms	Create surveys, discussions, and group communication.

Flexible Learning Environment	
Learning Type	Features
Synchronous	Real-time learning, live sessions, instant feedback .
Asynchronous	Students learn at their own pace , no live interaction.

Blended Learning
A combination of online and face-to-face teaching methods.

Models of Blended Learning	
Model	Key Features
Face-to-Face Driver	Traditional classroom teaching with teacher interaction.
Lab Rotation	Students rotate to a computer lab on a fixed schedule.
Flipped Classroom	Students learn content at home and apply it in class through discussions and activities.
Flex Model	Most learning is online; teachers offer support as needed.
À La Carte	Students choose additional online courses beyond core subjects.
Online Driver	Fully online learning ; optional teacher check-ins.
Online Lab	All lessons delivered online in a physical lab with non-teacher supervision.
Self-Blend	Students choose extra online courses based on interest or for advanced learning.

Learning Management Systems (LMS)	
Function of LMS	What It Does
Training Deployment	Deliver and track online learning programs.
Content Development	Create and upload online lessons and materials.
Information Management	Store, manage, and track student/user data.

Types of LMS Access	
LMS Type	Description
Cloud-Based	Online access via browser, no installation needed.
Desktop App	Installed on computer; may work offline depending on setup.
Mobile App	Accessible on phones/tablets; may have limited features.

Technology Tools of 21st Century Education		
Tool	Function/Use	Type
Affinity Groups	Online communities for collaboration and idea-sharing	Social/ Collaborative
Blogs	Platforms for reflective writing, updates, or learning logs	Publishing/ Reflective
E-Portfolios	Digital collections of student work showing learning progress	Assessment/ Showcase
Hypertext	Linked digital text for deeper exploration of topics	Digital Reading
Podcasts	Audio content for learning on the go	Media/ Learning Aid
Web 2.0 Tools	Interactive web apps for collaboration (e.g., wikis, social media)	Interactive Tech
MySpace	Early social networking used in some educational settings	Outdated/ Social
Second Life	Virtual world for simulations and immersive experiences	Simulation/ VR
Semantic Web	Web with machine-readable data to support learning analytics	AI/ Data-Driven

Webkinz	Virtual pet game; used to teach responsibility, money, and basic skills	Educational Game
Wikis	Collaborative editing platforms (e.g., Wikipedia, classroom wikis)	Collaborati ve Writing
YouTube	Video sharing site used for lectures, tutorials, and visual learning	Multimedia Tool
Google	Search engine and productivity tools (Docs, Drive, Classroom)	Research/ Productivity
Prezi	Non-linear presentation tool with visual storytelling features	Presentation Tool
EasyBib	Citation tool for proper referencing and avoiding plagiarism	Research Tool
Social Media Platforms	Used for communication, updates, and learning communities	Social/ Engagement
Smartboards	Interactive whiteboards that enhance visual and interactive learning	Hardware/ Visual Aid
Audience Response Systems	Clicker tools to gather student responses in real-time	Assessment Tool
ReadWriteTh ink.org	Offers free resources like interactive student tools and lesson plans	Literacy Resource
WebQuest Pages	Inquiry-oriented online learning activities	Project- Based Tool
Literacy Web	Provides resources to support reading and writing instruction	Language Resource

METHODS AND STRATEGIES OF TEACHING

Principal Elements Of Teaching

1. The Learner as an Embodied Spirit
- Learners bring **cognitive**, **emotional**, and **sociocultural** dimensions to the classroom.
 - Influencing Factors:
 - **Ability**
 - **Aptitude**
 - **Interest**
 - **Attitude**
 - **Family & Cultural Background**

Gardner's Multiple Intelligences	
Intelligence Type	Description
Verbal-Linguistic	Word smart
Logical Mathematical	Number/reasoning smart
Musical	Sound smart
Bodily-Kinesthetic	Body smart
Visual-Spatial	Picture smart
Interpersonal	People smart
Intrapersonal	Self smart
Naturalist	Nature smart
Existentialist	Life & existence smart

2. The Teacher
- A **licensed professional** with moral, technical, and pedagogical competence.
 - Personal Attributes of an Effective Teacher:
 - a. Passion, Humor, Compassion
 - b. Patience, Creativity, Knowledge
 - c. Communication, Positivity, Motivation
 - d. Flexibility

3. The Learning Environment
- a. Physical Environment

- The **physical space** where learning occurs. It includes:
- **Arrangement** – How furniture and materials are placed
 - **Ventilation** – Airflow to keep the room fresh and comfortable
 - **Lighting** – Sufficient brightness for visibility and focus
- b. Psychological Climate
- The **emotional and social atmosphere** of the classroom.
- Should be **supportive, encouraging, respectful, and motivating**
 - Builds **trust and confidence** in learners
 - Reduces anxiety and boosts participation

c. Seating Arrangements

Pattern	Description	Use Case
Horseshoe	U-shaped, open in front	Encourages group discussion, teacher visibility
Circular	Students form a circle	Promotes equal participation and eye contact
Rectangular	Long rows and columns	Suitable for group work or team seating
Traditional/Formal	Rows facing the teacher	Best for lectures, tests, and focused work

Instructional Planning

- The process by which teachers **visualize**, **organize**, and **structure learning events** ahead of time. Importance:
- Promotes organized and purposeful teaching
 - Saves time and resources
 - Facilitates effective sequencing and pacing
 - Encourages reflective thinking

Variables (Brown, 1988):

Variable	Explanation
Teacher	Beliefs, knowledge base
Students	Age, interest, prior knowledge
Content	Subject complexity, textbook
Materials	Tools, media, resources
Time	Length and availability of instruction

Instructional Objectives

Three Levels	
Level	Description
Aims	Broad, value-laden, national-level
Goals	Subject-level, general, school-wide
Objectives	Classroom-level, specific and measurable

- Objective Components:
- **Audience:** Who?
 - **Behavior:** What to do?
 - **Condition:** Under what conditions?
 - **Degree:** How well?

TYPES OF OBJECTIVES

1. COGNITIVE

Bloom’s Cognitive Domain (1956) vs. Anderson & Krathwohl Revision (2001)		
Original (Bloom)	Revised (A & K)	Key Concept
Knowledge	Remembering	Recall facts, terms, basic concepts
Comprehension	Understanding	Explain ideas, interpret meaning
Application	Applying	Use knowledge in new situations
Analysis	Analyzing	Break information into parts, understand structure
Synthesis	Creating	Combine elements to form new whole (reordered & renamed)
Evaluation	Evaluating	Judge or critique based on criteria

2. AFFECTIVE

Krathwohl’s Affective Domain (1964)	
Level	Meaning
Receiving	Willing to listen or pay attention.
Responding	Participates or reacts to something.
Valuing	Shows that something is important or has worth.
Organizing	Puts values in order and makes decisions based on them.
Characterizing	Acts consistently with strong personal values.

3. PSYCHOMOTOR

Simpson’s Psychomotor Taxonomy (1972)	
Level	What It Involves
Perception	Using sensory input to guide movement (e.g., estimating ball trajectory)
Set	Mental/physical readiness to perform an action (e.g., preparing to assemble)
Guided Response	Early skill attempt via imitation and trial/error (e.g., following demo)
Mechanism	Skill becomes more routine and confident
Complex Overt Response	Smooth performance of complex movements
Adaptation	Adjusting skills to new contexts
Origination	Creating novel movements or patterns

Harrow’s Psychomotor Taxonomy (1972)	
Level	What It Involves
Reflex Movements	Automatic responses (e.g., pulling back hand from heat)
Basic Fundamental Movements	Simple movements (e.g., running, grasping)
Perceptual Abilities	Fine-tuning movements via sensory feedback (e.g., catching a ball)
Physical Activities	Strength/endurance tasks (e.g., long run, lifting)
Skilled Movements	Efficient complex actions (e.g., dance routines, sports skills)
Non-discursive Communication	Expressive movements (e.g., gestures, mime, dance expressions)

Lesson Plan

Components:

- 1. Objectives
- 2. Subject Matter
- 3. Learning Activities
 - o Drills/Review
 - o Motivation
 - o Presentation
 - o Generalization
 - e. Application
- 4. Evaluation
- 5. Assignment (for extension, enrichment, remediation)

Selection & Use Of Learning Materials

Principles of Selecting Learning Materials

Choose materials that are:

- 1. Responsiveness – Match students’ needs and abilities
- 2. Utility – Useful for achieving learning goals
- 3. Authenticity – Realistic and true-to-life
- 4. Simplicity – Easy to understand and use
- 5. Breadth – Covers a wide range of topics or skills
- 6. Relevance – Connected to the lesson or students’ experiences
- 7. Communication Effectiveness – Clear and meaningful to learners

Types of Instructional Materials		
Type	Examples	Use
Visuals	Photos, Charts, Maps, Graphs, Realia (real objects), Models	Help students "see" the concept
Audio	Recordings, CDs	Support listening skills and audio learning
Audio-Visual (AV)	Videos, Films, Slides	Combine sound and visuals for clearer understanding
Digital	Computers, Internet, eLearning platforms	Offer interactive and updated content

Concrete to Abstract Continuum

This is the progression of learning from real objects to abstract ideas:

- 1. Concrete: Real experiences (e.g., touching a plant)
- 2. Iconic: Pictures or videos of the object (e.g., photo of a plant)
- 3. Abstract: Words or symbols (e.g., reading about photosynthesis)

GENERAL PRINCIPLES OF TEACHING	
Principle	Explanation
Context	Use real-world and multi-sensory experiences
Focus	Clear lesson direction
Socialization	Promote cooperation and group learning
Individualization	Adapt to learner’s pace, ability, interests
Sequence	Arrange instruction from simple to complex
Evaluation	Use continuous feedback and appraisal

Methods And Strategies		
Method	Description	Best Used For / Example
Inductive Method	From specific examples to general rule	Discovering concepts (e.g., identifying rules in patterns)
Deductive Method	From general rule to specific application	Teaching formulas, rules (e.g., math operations)
Project Method	Real-life, task-based learning	Making a class garden or building a model for Science
Problem Solving	Learners solve a presented problem step-by-step	Solving a local environmental issue
Inquiry Based	Students generate questions and explore answers	Investigating plant growth under different conditions
Lecture Method	Teacher explains content directly	Large class teaching of historical facts
Demonstration	Teacher shows a skill or process	Cooking, science experiments, art steps

Discussion	Interactive exchange of ideas	Debating social issues, group reflections
Cooperative Learning	Students work together toward shared goals	Group projects, Think-Pair Share
Programmed Instruction	Step-by-step learning via modules or computers	eLearning platforms, online quizzes
Experiential Learning	Learning through doing and reflecting	Field trips, role-play, internships
Differentiated Instruction	Tailoring teaching to students' needs, readiness, or interests	Varied tasks for different ability levels

Discussion Techniques	
Type	Feature
Panel	Small group discussion, moderated
Symposium	Formal speeches on related topics
Debate	Formal argument with opposing sides
Round Table	Face-to-face informal discussion

- Special Techniques:
- Role Play, Case Study, Buzz Session, Workshop, Seminar

Art Of Questioning

- Purposes:**
Stimulate thinking, assess learning, guide discussion
- Types:**
- **Low-level:** Recall facts
 - **High-level:** Analyze, evaluate
 - **Convergent:** One correct answer
 - **Divergent:** Many possible answers
 - **Taxonomy-based:** Knowledge → Evaluation

Strategies:
Wait-time, Prompting, Redirection, Probing, Commenting

EVALUATION IN TEACHING		
Type	When Used	Tools
Pre-assessment	Before class	Readiness/Aptitude Tests
Formative	During	Observation, quizzes
Summative	After	Exams, portfolios

- Evaluation Tools:**
- Rating Scales, Checklists, Essays, Multiple-choice, Matching, Completion Tests

Classroom Management

- Purposes:**
- Ensure safety, minimize disruptions, promote learning
- 3 C's:**
1. **Content** – What is taught
 2. **Conduct** – Behavior
 3. **Context** – Atmosphere

Management Approaches

A. Behavior Modification
(Based on B.F. Skinner's Theory)

Strategy	Simple Definition	Example
Positive Reinforcement	Giving a reward to increase good behavior	Praise for a neat paper
Negative Reinforcement	Removing something unpleasant to encourage good behavior	Stop nagging when student behaves
Extinction	Removing a reward to stop a behavior	Ignoring attention-seeking disruptions
Time-out	Taking the student away from an enjoyable activity	Sitting out of a group game
Punishment	Giving a negative consequence to reduce behavior	Extra task after misbehavior

B. Socioemotional Climate Approach
(Carl Rogers)

- Emphasizes **building positive relationships** in the classroom.
- The teacher shows:

- **Genuineness** – Being real and honest
- **Empathy** – Understanding students' feelings
- **Acceptance/Trust** – Valuing each student as they are

C. Group Process Approach (Schmuck, Kounin)

Focuses on **how the class functions as a group**.

A well-managed group promotes:

- **Cooperation**
- **Shared norms (rules)**
- **Open communication**
- **Group morale and unity**

Time Management

Types:

- **Mandated Time:** Required by curriculum
- **Allocated Time:** Time set for instruction
- **Academic Time:** Time actually used for learning

Principles:

- Be consistently present
- Use fillers for early finish
- Plan and prepare ahead
- Follow structured schedule

Types Of Classroom Management

1. Authoritative / Democratic

- **Democratic teachers** are kind but firm, promoting **shared responsibility** and **clear expectations** for behavior and performance.
- They **encourage** rather than demand, helping build **self-esteem**, even when students make mistakes.

2. Authoritarian

- **Authoritarian teachers** impose **strict control**, using **power**, **pressure**, and **criticism** to enforce rules.
- They make **all decisions**, often leading to **student fear**, **low self-esteem**, and **reluctance to participate** due to **powerlessness**.

3. Permissive / Laissez-Faire

- Places **few demands or controls** on students.
- Teacher **accepts students' impulses and actions**, and is less likely to **monitor their behavior**.
- More concerned with the student's **emotional well-being** than with **classroom control**.
- "**Anything goes**" environment usually leads to **chaos**.
- Classroom is often **disorganized**, causing **student frustration**, **high stress**, and a feeling of being **overwhelmed and lost**.

4. Uninvolved

- Teachers who are **indifferent** and **undemanding** of **student involvement**.

Approaches To Classroom Management

1. Assertive Approach

- Expects teachers to **specify rules of behavior** and **consequences** for disobeying them.
- Teachers must **communicate** these rules and consequences **clearly**.
- Teachers expect students to behave in a certain way in class (*Duke and Mechel*).

2. Behavior Modification Approach

- Strives to **increase the occurrence of appropriate behavior** through a system of **rewards**.
- Aims to **reduce the likelihood of inappropriate behavior** through **punishments**.

3. Behavioral Academic Approach

- Developed by **Evertson and Emmer**.
- Emphasizes the **organization and management** of students as they engage in academic work.
- Focuses on creating a **smooth-running classroom** where **learning is maximized** through effective **routines, procedures, and transitions**.

4. Group Managerial Approach

- Based on **Jacob Kounin's research**.
- Emphasizes the importance of **responding immediately to group behavior** that might be inappropriate or undesirable.
- Focuses on the teacher's ability to **manage the whole group** and **prevent misbehavior** from escalating.

a. Ripple Effect

- Occurs when a teacher **corrects misbehavior in one student**, and this **positively influences others** nearby.
- The correction serves as a **warning or reminder** for the rest.

b. Withitness

- The teacher's **skill to know what is going on** in all parts of the classroom at all times.
- Often described as having "**eyes in the back of one's head**."

c. Pygmalion Effect / Rosenthal Effect

- The phenomenon where the **greater the expectation placed upon people**, the **better they perform**.
- Named after the Greek myth of **Pygmalion**, a sculptor whose statue came to life.

- d. **Hawthorne Effect (Observer Effect)**
- A type of **reactivity** where individuals **modify or improve behavior** because they are **aware of being observed**.
- e. **John Henry Effect**
- The **opposite of the Hawthorne Effect**.
 - Occurs when a **control group**, aware of their status, puts in **extra effort** and achieves similar results to the **experimental group**.
- f. **Placebo Effect**
- A phenomenon where a **fake treatment** (like sugar pills or saline solution) **improves a condition** simply because the person **expects it to help**.
- g. **Halo Effect**
- A **cognitive bias** where an observer's **overall impression** of a person **influences** thoughts or feelings about their **specific traits**.

ASSESSMENT OF LEARNING

Fundamental Concepts And Definitions	
Term	Definition
Test	A tool or instrument used to measure a particular characteristic, ability, knowledge, skill, or quality of a person (e.g., achievement test, IQ test).
Measurement	The process of quantifying traits, skills, or behaviors—assigning numbers or values to the results of tests or observations.
Assessment	The ongoing process of collecting, organizing, and interpreting data to improve teaching and learning. It can be formative or summative, formal or informal.
Evaluation	A broader process involving judgment based on assessment results. It includes making decisions about the value or effectiveness of learning or instruction.

Outcome-based Education (OBE)

A student-centered education system where all aspects (curriculum, teaching, and assessment) are aligned with desired learning outcomes.

Types of Outcomes:

- **Immediate Outcomes** – Direct skills learned after instruction (e.g., reading comprehension, solving math problems).
- **Deferred Outcomes** – Long-term skills and competencies applied in real-life scenarios (e.g., successful job performance, decision-making).

Principles Of OBE	
Principle	Description
Clarity of Focus	Everyone knows what is expected from the students at the end of the program.
Designing Down	Curriculum design starts from intended outcomes down to lessons and activities.
High Expectations	All learners can achieve mastery given time and support.
Expanded Opportunities	Learning is not limited to one time or method; students are given many chances to succeed.

Introduction to Key OBE Frameworks

Two of the most influential figures in Outcome-Based Education (OBE) are **Dr. William Spady** and **Prof. John Biggs**. Both provided essential frameworks that shaped how OBE is applied in schools and higher education today.

Dr. William Spady

- Known as the **"Father of Outcome-Based Education"**.
- An American sociologist and education reformer.
- He introduced **Transformational OBE**, a model that focuses on **long-term outcomes** that students need for life—beyond academics.
- For Spady, OBE is about preparing students to fulfill **real-life roles** such as becoming responsible citizens, productive workers, or even future parents.
- His OBE is **learner-centered**, emphasizes **clarity of purpose**, and aims to ensure that **all students succeed** with the right support.

Prof. John Biggs

- An Australian educational psychologist and scholar in higher education.
- He developed **OBTL (Outcome-Based Teaching and Learning)** with Catherine Tang.
- Biggs' model translates OBE into classroom practice by aligning **teaching methods**, **learning activities**, and **assessments** with the intended **learning outcomes**.
- He introduced the idea of **Constructive Alignment**, which ensures that all parts of the learning process (goals, activities, assessments) work together to help students succeed.

FRAMEWORKS DIFFERENCES		
Framework	Focus	Examples
Spady's OBE	Long-term outcomes (after graduation); real-life roles like worker, citizen, parent	• Becoming a licensed teacher • Practicing lifelong learning • Leading a community project • Managing a family responsibly
Biggs' OBTL	Short-term/classroom application; aligning teaching methods, outcomes, and assessment	• Writing clear lesson outcomes • Giving a rubric for a group task • Aligning quizzes with objectives • Adjusting lessons based on results

Principles Of OBE	
Principle	Description
Clarity of Focus	Everyone knows what is expected from the students at the end of the program.
Designing Down	Curriculum design starts from intended outcomes down to lessons and activities.
High Expectations	All learners can achieve mastery given time and support.
Expanded Opportunities	Learning is not limited to one time or method; students are given many chances to succeed.

Bloom's Taxonomy (Revised)

- Cognitive Domain (Knowledge-based)**
1. **Remembering** – Recalling information (define, list).
 2. **Understanding** – Explaining concepts (summarize, classify).
 3. **Applying** – Using knowledge in new situations (solve, illustrate).
 4. **Analyzing** – Breaking down information (differentiate, organize).
 5. **Evaluating** – Justifying decisions (critique, recommend).
 6. **Creating** – Producing original work (design, formulate).

- Affective Domain (Emotional-based)**
1. **Receiving** – Awareness, willingness to hear.
 2. **Responding** – Active participation.
 3. **Valuing** – Assigning value (volunteer, support).
 4. **Organizing** – Integrating values into belief system.
 5. **Internalizing** – Acting consistently with personal values.

- Psychomotor Domain (Skill-based)**
1. **Imitation** – Copying actions.
 2. **Manipulation** – Practicing from memory.
 3. **Precision** – Accuracy in performance.
 4. **Articulation** – Coordinating skills.
 5. **Naturalization** – Performing effortlessly.

Marzano's New Taxonomy

- **Cognitive System** – Actual processing of information.
- **Metacognitive System** – Planning and monitoring learning.
- **Self-System** – Motivation and emotional response.

Levels of Outcomes

- **Institutional** – Graduate attributes across all programs.
- **Program** – Skills graduates must demonstrate at the end of a degree.
- **Course** – Subject-specific outcomes.
- **Lesson/Learning Outcomes** – Day-to-day lesson goals (most specific).

Types Of Assessment

- Traditional Assessment**
- Paper-and-pencil format (e.g., multiple-choice tests).
 - Two types:
 - **Selected-response** (MCQ, T/F, Matching)
 - **Constructed-response** (Essays, Completion)

Alternative Assessment

- Real-world application (e.g., performance tests, portfolio, journals).

Comparative Table	
Traditional Assessment	Authentic/Alternative Assessment
Select a response	Perform a task
Contrived setting	Real-world simulation
Recall-based	Application-based
Teacher-structured	Student-structured
Indirect evidence	Direct evidence

PURPOSES OF ASSESSMENT	
Type	Purpose
Assessment FOR Learning	Diagnostic & formative , during instruction, to adjust teaching.
Assessment OF Learning	Summative , to judge student learning at the end of instruction.
Assessment AS Learning	Student self-assessment to enhance awareness and responsibility in learning.

Assessments		
Type	Purpose	Timing
Diagnostic	Identify prior knowledge/misc onceptions	Before instruction
Formative	Monitor and guide learning	During instruction
Summative	Evaluate overall achievement	After instruction

Contextualized Vs. Decontextualized Assessment
• Contextualized: Knowledge applied in real-life/job-related situations. • Decontextualized: Focuses purely on academic content.

Non-Test Assessments (Performance Tasks)		
Type	What It Does	Example
Portfolio	Shows collection of student work	Project drafts, best essays
Journal	Records reflections or learning	“What I learned today” entries
Games	Reinforces learning through fun	Science trivia, math bingo
Projects/Models	Creates output showing understanding	Volcano model, triangle poster
Debates/Panels	Expresses views or arguments orally	Debate on plastic ban
Demonstration	Shows how to perform a skill	Proving air has weight
Checklist	Tracks skill mastery or progress	Checklist of mastered topics
Observation	Teacher watches student behavior/skills	Group activity participation

Criteria for Selecting a Performance Task	
Criteria	Meaning
Generalizability	Can be applied in real-life situations
Authenticity	Reflects real-world tasks
Multiple Foci	Covers several skills or learning targets
Teachability	Can be guided and taught effectively
Fairness	Suitable and equitable for all students
Scorability	Can be assessed clearly using a rubric

Performance-based Assessment

- **Definition:** Assessing through actual demonstrations or creation of products.

Types:

- **Demonstration-type:** No product (e.g., role-play).
- **Creation-type:** With product (e.g., brochure, model).

GRASPS Model for Performance Tasks		
Element	What It Means	Example
Goal	What students need to do	Solve a real-life math problem
Role	The role they play	Environmental researcher
Audience	Who will see/use the product	Local community or classmates
Situation	Real-world context or problem	Reducing plastic use in school
Product	What they create or present	Informational brochure or campaign poster
Standards	How quality will be measured	Based on rubric and content accuracy

Portfolio Assessment

- Ongoing process of collecting student work to show progress.

Types:

- **Working Portfolio** – Daily tasks
- **Show Portfolio** – Best work
- **Documentary Portfolio** – Mixed

Elements:

- Cover letter
- Table of contents
- Entries (with dates)
- Reflections

Rubrics	
Rubric Type	Description
Holistic Rubric	One overall score based on a general judgment.
Analytic Rubric	Scores different criteria separately to give specific feedback.

Test Types And Classifications	
Category	Options/Types
Purpose	Educational (Achievement) / Psychological (IQ, Aptitude)
Interpretation	Norm-referenced / Criterion-referenced
Content Scope	Survey / Mastery tests
Difficulty & Time	Power / Speed tests
Administration Mode	Individual / Group
Language Format	Verbal / Non-verbal
Construction Origin	Standardized / Informal (teacher-made)
Scoring Bias	Objective / Subjective

Validity

Does the test measure what it is supposed to measure?

Types of Validity

- 1. **Face Validity** – Test looks like it measures what it should (e.g., math test looks like it tests math).
- 2. **Content Validity** – Covers all the necessary content or objectives (e.g., science test includes all key topics).
- 3. **Criterion Validity** – Compares with other tests:
 - **Concurrent** – Matches current test results (e.g., reading test aligns with national exams).
 - **Predictive** – Forecasts future outcomes (e.g., entrance exam predicts college success).
- 4. **Construct Validity** – Measures a specific psychological trait:
 - **Convergent** – Matches similar traits (e.g., critical thinking aligns with logic test).
 - **Divergent** – Doesn't overlap with unrelated traits (e.g., creativity test doesn't match memory test).

Reliability

Are the test results consistent across time, forms, or items?

Methods of Measuring Reliability

- 1. **Test-Retest** – Checks stability over time (same test given twice to the same group)
- 2. **Parallel Forms** – Checks consistency between two similar tests (uses two equivalent versions)
- 3. **Split-Half** – Checks internal consistency. Compares scores from two halves of the same test (e.g., odd vs even items).

4. Kuder-Richardson (KR-20) – Checks consistency across items in objective tests (uses a formula for multiple-choice reliability)

Statistical Tools In Assessment

Measures of Central Tendency		
Term	Meaning	Example
Mean	Add all scores, then divide by how many scores there are.	Scores: 80, 85, 90 $(80+85+90) \div 3 = 85$
Median	Middle score when the numbers are in order.	Scores: 75, 80 , 85 Median is 80
Mode	The score that appears most often .	Scores: 70, 80, 80 , 85 Mode is 80

Measures of Relative Position		
Term	Meaning	Example
Percentile	What % of students scored lower than you .	If you're in the 90th percentile, you scored better than 90%
Quartile	Divides scores into 4 parts: Q1 (lowest), Q2 (median), Q3 (high).	Q1 = bot 25%, Q2 = mid 50%, Q3 = top 25%
Decile	Divides group into 10 equal parts.	D7 = you're in the top 30%
Z-score	Tells how far your score is from the mean . 0 = average.	Z = +2 means your score is 2 SDs above average
T-score	Like Z-score, but mean = 50, SD = 10.	T = 60 means above average (1 SD higher)
Stanine	Divides scores into 9 levels. 5 = average, 9 = top.	Stanine 7 = above average; Stanine 1 = lowest group

Measures of Shape (Distribution)		
Term	Meaning	Example
Positive Skew	Most students got low scores; few scored very high .	60, 65, 70, 75, 100 → skewed right (high outlier)
Negative Skew	Most students got high scores; few scored very low .	40, 90, 95, 96, 97 → skewed left (low outlier)
Mesokurtic	Normal bell shaped curve . Balanced scores.	Most students scored around the average (normal distribution)
Leptokurtic	Very steep peak (scores are all close to each other)	Almost everyone scored 85–87
Platykurtic	Very flat (scores are very spread out)	Scores are all over: 60, 70, 80, 90, 100

Grading Systems	
Grading Type	Description
Norm-referenced	Based on class comparison
Criterion-referenced	Based on mastery of objectives
Point/Percentage	Based on weighted activities
Contract Grading	Student works for a grade based on agreed tasks

Measures of Variability		
Term	Meaning	Example
Range	Highest score minus the lowest score.	Highest = 95 Lowest = 65 Range = 30
Standard Deviation (SD)	Tells how far scores are from the average .	If scores are 85, 86, 84, 85 Low SD (very consistent)
Quartile Deviation (QD)	Measures how spread out the middle scores are.	If Q3 = 90 & Q1 = 70 QD = $(90 - 70) / 2 = 10$

Affective & Non-cognitive Assessment

Focuses on feelings, behavior, attitudes, values, and learning habits — not just academic performance.

Key Skill Areas		
Skill	Meaning	Examples
Social Skills	How students interact with others	Making friends, teamwork, helping peers
Self Management	Control over behavior and emotions	Following rules, staying focused, handling anger
Academic Habits	Study behaviors and attitudes toward learning	Completing tasks, coming to class on time

Assessment Tools

Tool	What It Does
Anecdotal Records	Teacher writes notes about observed behaviors.
Attitude Scales	Student rates agreement with statements (e.g., Likert).
Self-Reports	Students reflect and rate their own behavior.
Peer Appraisals	Classmates rate or describe each other's behavior.
Personality Tests	Measures traits like introversion, persistence, etc.

Data Analysis Tools

Used to evaluate the quality of test items based on student performance.

Difficulty Index (D.I.)

- **What it means:** Shows how easy or hard a test item is.
- **How it works:** The higher the % of correct answers, the easier the item.
- **Interpretation:**
 - 0.00 – 0.20 → Very Difficult
 - 0.21 – 0.40 → Difficult
 - 0.41 – 0.60 → Moderate
 - 0.61 – 0.80 → Easy
 - 0.81 – 1.00 → Very Easy

Example: If only 3 out of 10 students got it right, D.I. = 0.30 (Difficult)

Discrimination Index

- **What it means:** Shows if a test item can tell the difference between high and low performers.
- **How it works:** Compares scores of top students and bottom students.
- **Interpretation:**
 - Close to +1 → Very good at discriminating
 - Around 0 → Poor discrimination
 - Negative → Bad item; may be confusing or flawed

Example: If high scorers get the item right and low scorers get it wrong → Good discrimination

FOUNDATIONS OF SPECIAL AND INCLUSIVE EDUCATION

Special Education

- A method of educating individuals through **accommodation, modification, and individualization** to address their unique differences and needs.

Key Terms

- **LSEN:** Learner with Special Educational Needs
- **PWD:** Persons with Disabilities
- **Gifted:** Individuals with an IQ over 120

Instructional Approaches

- **Accommodation:** Minimal assistance with the same task as peers
- **Modification:** Changes in parts of a task to help the LSEN
- **Individualization:** Full adaptation of the task based on LSEN's ability

Definitions

- **Impairment:** Loss/abnormality of psychological, physiological, or anatomical function
- **Disability:** Limitation in performing tasks normally
- **Handicap:** Inability to fulfill normal life roles due to impairment

Philippine Republic Acts on SPED

- **RA 3562:** Promotes education for the blind; established the Philippine National School for the Blind
- **RA 7277:** Ensures rehabilitation and integration of disabled persons
- **RA 9442:** Amendment of RA 7277; adds more privileges like discounts for PWDs
- **RA 5250:** Ten-year training program for SPED teachers and appropriation of funds
- **RA 10754:** Expands benefits and privileges for PWDs

Types of Disabilities

1. Intellectual Disabilities

- IQ below 70; difficulty in daily living
- **Fragile X Syndrome**: Genetic mutation in X chromosome
- **Down Syndrome**: Extra copy of chromosome 21
- **Developmental Delay**: Slower development than peers
- **Prader-Willi Syndrome**: Genetic abnormality on chromosome 15
- **Fetal Alcohol Spectrum Disorder**: Result of prenatal alcohol exposure

2. Physical Disabilities

- **Cerebral Palsy**: Brain injury affecting movement
- **Stroke**: Bleeding/interruption in brain blood supply
- **Spina Bifida**: Incomplete closure of spinal cord during pregnancy
- **Arthritis**: Inflammation in joints and muscles
- **Spinal Cord Injury**: Inadequate blood/oxygen to spinal cord
- **Epilepsy**: Recurring seizures
- **Muscular Dystrophy**: Weakening of movement muscles

3. Learning Disabilities

- **Dyslexia**: Trouble in reading/writing/comprehension
- **Dysgraphia**: Difficulty expressing thoughts in writing
- **Dyscalculia**: Issues in math calculations
- **Dyspraxia**: Affects coordination and movement
- **Auditory Processing Disorder**: Challenges in processing sounds
- **Language Processing Disorder**: Difficulty in understanding spoken language
- **Nonverbal Learning Disabilities**: Struggles in interpreting social cues
- **Visual Perceptual/Visual Motor Deficit**: Poor hand-eye coordination

4. Attention Deficit Hyperactivity Disorder (ADHD)

- Mental disorder affecting behavior regulation; includes inattention, hyperactivity, and impulsiveness

5. Emotional and Behavioral Disorders

- **OCD**: Repetitive thoughts and behaviors
- **Agoraphobia**: Fear of public spaces
- **Adjustment Disorder**: Trouble coping with change
- **Acute Stress Reaction**: Short-term trauma response
- **Bipolar Disorder**: Intense mood swings
- **Conduct Disorder**: Disregard for others, lack of guilt

6. Sensory Disabilities

- **Blindness/Low Vision**: Irreversible visual impairment
- **Hearing Loss/Deafness**: Loss of hearing ability
- **Deaf-Blindness**: Combined loss of vision and hearing
- **Sensory Processing Disorder**: Difficulty responding to sensory inputs

7. Eating Disorders

- **Anorexia Nervosa**: Fear of weight gain, extreme thinness
- **Bulimia Nervosa**: Binge eating followed by purging
- **Binge Eating Disorder**: Overeating with no purging
- **Pica**: Eating non-food items
- **Rumination Disorder**: Regurgitating and re-chewing food
- **Avoidant/Restrictive Food Intake**: Sensory-related food avoidance
- **Purging Disorder**: Vomiting or other methods without bingeing
- **Night Eating Syndrome**: Excessive eating during nighttime

Types of Aptitude/Quotients

- **IQ (Intelligence Quotient)**: Measures cognitive ability and problem-solving
- **EQ (Emotional Quotient)**: Measures emotional management and empathy
- **AQ (Adversity Quotient)**: Measures resilience in adversity
- **SQ (Social Quotient)**: Measures social relationship skills

FIELD STUDY AND TEACHING INTERNSHIP

What Is Experiential Learning?

Experiential learning means learning through real-life experience rather than just through books or lectures. It involves doing, reflecting, and applying what you've learned.

According to David Kolb (1984):

“Learning is the process whereby knowledge is **created** through the transformation of **experience**.”

Philosophical Roots

1. Pragmatism

- Belief that ideas must be tested through **practice**.
- If it works → it's true/good; if not → it's false/bad.
- Also known as:
 - **Experimentalism** – (Charles Sanders Peirce)
 - **Practicalism** – (William James)
 - **Instrumentalism** – (John Dewey)

Example: A new teaching strategy is only valuable if it helps students learn better in practice.

2. Progressivism

- Belief that education must constantly evolve.
- Education is the *reconstruction of experience*.
- Change (not permanence) is the core of reality.

Example: Adapting teaching methods as student needs and society change.

Kolb's Experiential Learning Cycle		
Stage	Meaning	Simple Example
Concrete Experience (CE)	Doing something new.	Teaching a real class.
Reflective Observation (RO)	Thinking deeply about what happened.	Asking: What went well? What didn't?
Abstract Conceptualization (AC)	Making sense of the experience.	Connecting your experience to what the theory says.
Active Experimentation (AE)	Trying out what you've learned.	Applying improvements in the next lesson.

Experiential Learning Courses (ELC)

These are the hands-on components of the education program:

Components:

1. **Field Study 1 (FS1)** – *Observation*
2. **Field Study 2 (FS2)** – *Participation and Assistantship*
3. **Practice Teaching / Teaching Internship** – *Full-time teaching experience*

Purpose:

- Let future teachers **observe**, **assist**, and finally **teach** in real classroom settings.
- Develop skills through **authentic, guided experiences**.

Frameworks & Standards for ELCs

1. Philippine Professional Standards for Teachers (PPST) DepEd Order No. 42, s. 2017

PPST is the national framework that defines what makes a good teacher.

7 Domains of PPST:

1. **Content Knowledge and Pedagogy** – Understanding subject matter and how to teach it.
2. **Learning Environment** – Creating a safe and engaging classroom.
3. **Diversity of Learners** – Knowing and adapting to different student needs.

4. **Curriculum and Planning** – Organizing lessons that follow curriculum standards.
5. **Assessment and Reporting** – Checking and reporting on student learning.
6. **Community Linkages and Professional Engagement** – Involving parents and community.
7. **Personal Growth and Professional Development** – Lifelong learning for teachers.

2. Competency Framework for Southeast Asian Teachers (CFSAT 21)

- Created by **SEAMEO INNOTECH**.
- Provides **11 essential competencies** for 21st-century Southeast Asian teachers.
- Helps design **training programs**.

3. LET Competencies

Used for preparing for the **Licensure Examination for Teachers (LET)**. Focuses on:

- Observational learning
- Teaching skills
- Reflective thinking
- Action research

4. CHED Program Outcomes (CMO 74–80, 82 s. 2017)

CMO No.	Program	What Graduates Should Be Able to Do
74	Bachelor of Elementary Education (BEEd)	Teach all subjects in elementary (Grades 1–6): English, Math, Science, Filipino, Araling Panlipunan, MAPEH, etc.
75	Bachelor of Secondary Education (BSEd)	Teach one specific subject (e.g., English, Math, Science) in Junior & Senior High School
76	Bachelor of Early Childhood Education (BECEd)	Care for and teach infants, toddlers, preschoolers, and early graders (K to Grade 3)
77	Bachelor of Special Needs Education (BSNEd)	Teach learners with disabilities or giftedness using specialized strategies
78	Bachelor of Technology and Livelihood Education (BTLEd)	Teach TLE subjects in Junior High (e.g., Home Economics, ICT, Industrial Arts)

79	Bachelor of Technical-Vocational Teacher Education (BTVTEd)	Teach in TVET schools or SHS Tech-Voc tracks; earn TESDA qualifications
80	Bachelor of Physical Education (BPEd)	Teach PE and sports, promote health and fitness across all levels
82	Bachelor of Culture and Arts Education (BCAEd)	Teach arts and cultural subjects, promote Filipino heritage and creativity

Legal Guidelines for Teaching Internships	
Law / Memo	Purpose
DO 03, s. 2007	Guidelines for FS and Internship deployment
JCDMO 1, s. 2021	New policy updates for pre-service deployment
CMO 30, s. 2004	Revised curriculum standards
CMO 74–80, 82, s. 2017	Standards for teacher education
RA 8371	Indigenous Peoples' Rights
DO 14, s. 2020	COVID-19 health standards
DOH AO 2020-0015	Public health standards (COVID-19)

Important Terms & Acronyms	
Term	Meaning
CBAR	<i>Classroom-Based Action Research</i> – Simple research by interns to improve teaching.
Coaching and Mentoring	Guidance given by experienced teachers.
FSS	<i>Field Study Students</i> – Teacher candidates in observation phase.
PTs	<i>Practice Teachers</i> – Those doing actual teaching internships.
RTs	<i>Resource Teachers</i> – Observed by FSS or PTs.

LDM	<i>Learning Delivery Modality</i> – Ways schools deliver lessons (e.g., online, radio, TV).
MELCs	<i>Most Essential Learning Competencies</i> – Priority curriculum during crises.
Flexible Learning	Multiple methods to teach depending on students' situation or access.

Field Study 1: Observation of Teaching and Learning

Main Focus: Observation only
(you don't teach yet)

You will observe the following:

A. Learner Diversity

Understanding how learners are different in development, interests, and behavior:

Domain	Indicators
Physical	Gross/fine motor skills, self-help abilities
Emotional	Moods, how feelings are expressed, emotional independence
Cognitive	Communication, thinking, problem-solving
Social	How students interact with peers and teachers, social interests

B. School Environment

The physical surroundings of the school that affect learning.

A good environment is:

- Safe and clean
- Well-maintained
- Responsive to students' physical, social, psychological needs

Facilities to Observe:

- Principal's office
- Library
- Counseling office
- Clinic
- Canteen
- Audio-Visual Center
- Science Lab
- Gymnasium
- Auditorium
- Outdoor learning areas (gardens, fields)

C. Classroom Aspects to Observe

- Subject matter coverage
- Lesson structure
- Strategies used
- Student-teacher interaction
- Classroom discipline
- Student engagement
- Teaching aids used

Field Study 2: Participation and Teaching Assistantship

Main Focus: You assist the teacher and do basic teaching-related tasks. You also begin working on your **CBAR (Classroom-Based Action Research)** here.

Tasks You Will Do:

- Prepare instructional materials (IMs)
- Design bulletin/display boards
- Help with classroom assessment
- Assist in classroom management and daily routines

Assessment

Assessments help the teacher know if students are learning. They may be:

- **Formative** (for learning): quizzes, games
- **Summative** (after learning): final exams, projects

Classroom Management

Managing students’ behavior and keeping the class running smoothly.

Tips:

- Set clear rules from day one
- Be consistent and fair
- Be organized and prepared
- Be a role model for your students

Face-to-Face vs. Online Distance Learning		
Feature	Face-to-Face	Online
Communication	Immediate feedback	Delayed response possible
Tools	May not use tech	Uses tech (LMS, video calls)
Structure	Physical routines	Virtual rules & platforms

Teaching Internship (Full-Time Practice Teaching)

What is Teaching Internship?

- A **one-semester full-time course** where PTs (practice teachers) teach in real classrooms.
- Guided by **Cooperating Teachers (CTs)**.
- Uses a **clinical approach**—learn by teaching and reflecting.

Internship Phases:

1. **Orientation Sessions**
 - 1st: At TEI – policies, rules, and schedule
 - 2nd: At cooperating school – school tour, rules
 - 3rd: With subject coordinator – content, grading, forms
2. **Observation & Relationship Building**
 - Watch your CT teach
 - Learn routines, strategies, student behavior

3. **Onsite Tasks**
 - Assist in teaching, checking outputs, filling forms
4. **Final Demonstration**
 - Teach a planned lesson observed by mentors
5. **Evaluation**
 - You’re graded based on performance

People Involved	
Role	Description
TEI	Your teacher education college or university
College Supervisor	Your TEI’s faculty monitoring your progress
Cooperating School	Partner school where you teach
Cooperating Teacher (CT)	Mentor teacher who guides you
Practice Teacher (PT)	You! The student-teacher doing the internship

Designing Differentiated Instruction

Definition: Teaching the same lesson in different ways to meet the needs of diverse learners.

Example: If one student learns better through visuals and another through hands-on activity, the teacher provides **both types** of activities.

Mainstreaming: Inclusion of learners with special needs in regular classrooms.

Accomplishing School Forms

Accomplishing School Forms	
Form	Purpose
SF 1	Class enrollment list
SF 2	Daily attendance
SF 3	Books issued/returned
SF 4	Monthly attendance and movement
SF 5	Individual student promotions
SF 6	Summary of promotions
SF 7	Staff profile and assignments
SF 8	Learner’s health profile
SF 9	Report card
SF 10	Permanent academic record

Creating Instructional Materials (IMs)

Definition: Any tool or resource a teacher uses to make learning easier and more fun.

Types of IMs:

- **Print** – Books, posters, charts
- **Non-Print** – Real objects, models, field trips
- **Electronic** – PowerPoints, videos, AR/VR tools

Criteria for Good IMs (Buglar et. al.)

1. Accuracy
2. Depth of Knowledge
3. Engagement
4. Support to learning

Community Linkages and Professional Growth

A. Building Community Linkages

Definition: Working together with people who care about education.

Stakeholders:

- **School-based:** Teachers, students, admin, staff
- **Community-based:** Parents, business groups, civic orgs, LGUs

Parent-Teacher Conference – Meetings between teachers and parents to talk about students’ progress.

B. Continuing Professional Development (CPD)

RA 10912 – CPD Act of 2016

- **Requirement:** 45 CPD units to renew teacher license
- **Sources:** Seminars, in-house training, LGU-sponsored activities

Conducting Demonstration Teaching

What is Demonstration Teaching?

A **Demonstration Lesson** is a planned teaching activity delivered by the intern to:

- Showcase teaching skills
- Be observed and evaluated by mentors

Detailed Lesson Plan (DLP)

Your **DLP** is like a roadmap—it guides your teaching process.

Parts of a DLP (Based on DO 42, s. 2016):

1. **Objectives** – What you want learners to achieve
2. **Content** – Lesson topic and key concepts
3. **Learning Resources** – Materials and tools to use
4. **Procedures** – Step-by-step flow of the lesson
5. **Remarks** – Notes for improvement or continuation
6. **Reflection** – Evaluation of what worked or didn’t

Internship Portfolio

What is a Portfolio?

A **portfolio** is a collection of your work, reflections, and documentation of your internship experience.

Can be submitted as a **hardcopy** or **e-portfolio** (softcopy).

Parts of a Teaching Internship Portfolio:

1. **Introduction** – Overview of your internship
2. **Acknowledgements** – Gratitude to mentors and schools
3. **Curriculum Vitae (CV)** – Resume with background
4. **Certificate of Completion** – Proof of finished internship
5. **Professional Readings** – Articles or books you studied
6. **Weekly Journals** – Reflections on weekly activities
7. **Experiences & Reflections on PPST Domains** – How you applied teacher standards
8. **Teaching Philosophy** – Your personal belief on teaching and learning

ACTION RESEARCH

Concepts, Perspectives, and Frameworks

- **Action Research** is research done **by teachers for themselves**. (*Mertler, 2009*)
- It helps teachers **examine** their own classrooms, **strategies**, assessments, and **interactions** with students to improve teaching.
- It is a **cyclical process** of testing new ideas, analyzing results, and either implementing or revising the approach.

Needs and Demands for Action Research

Who can be an action researcher?

Any teacher who wants to:

- understand more about **teaching and learning**
- improve their **skills and knowledge**
- take **action** to improve **student learning**

Addressing and Conquering Research

Constraints

1. **Time** constraint
2. Lack of **competence**
3. Lack of **interest**
4. Lack of **confidence**
5. Lack of **statistical skill**
6. Difficulty in identifying **topic/problem**
7. **Financial** issues
8. Lack of **reading initiative**
9. **Complex** data gathering
10. Lack of **admin support**

Action Research Process	
Stage	Description
1. Identify the problem	Know the issue in the classroom/school
2. Define an intervention	Plan a possible solution

3. Develop & collect data	Implement and gather info
4. Analyze the data	Study results
5. Reflect & share	Interpret findings and communicate
6. Plan next cycle	Improve or redo the process

Types of Action Research (Ferrance, 2000)		
Type	Who does it	Focus/Impact
Individual	One teacher	Single classroom issue
Collaborative	Two or more teachers	Common/shared issue
School-Wide	Admin, faculty, personnel	Collective concerns; leads to restructuring, policy change
District-Wide	District heads, staff	District-level or structural concerns

- **Support Systems** may include: supervisors, admins, parents, community
- **Expected Effects:** changes in **curriculum, instruction, assessment,** or policy

Action Research vs. Formal Research		
Aspect	Action Research	Formal Research
Goal	Solve local classroom/school problems	Develop/test theory; contribute to knowledge
Sources of Data	First-hand (direct from school)	Often secondary data
Sampling	Purposive sampling	Random sampling
Design	Can be qualitative or quantitative	Usually quantitative
Output	Used locally by teachers/schools	Shared publicly
Conclusion	Based on results	Stated in final chapter
Recom.	In a brief paragraph	In a detailed chapter with SOPs

Research Proposal vs. Research Report		
Aspect	Research Proposal	Research Report
Purpose	Communicates a researcher's plan	Communicates results and what was done
Tense	States what will be done	States the analysis, findings, and conclusions
Action	Denotes future actions	Denotes past actions
Pronouns	Both use third person for formal tone	Same

- Varieties of Action Research**
 - **Diagnostic** – identifies and understands the problem
 - **Participatory** – uses data to give solutions
 - **Empirical** – based on real, observable evidence
 - **Experimental** – tests variables using a hypothesis and scientific methods

- Kinds of Research Designs**
 1. **Qualitative** – Collects narrative data; uses inductive reasoning
 2. **Quantitative** – Collects numerical data; uses deductive reasoning
 3. **Mixed Method** – Combines quantitative and qualitative data

- Methods/Strategies of Qualitative Design**
 - **Ethnography** – Describes interactions in cultural/social settings
 - **Case Study** – In-depth study of individuals, groups, or activities
 - **Phenomenological Studies** – Focus on lived experiences
 - **Narrative Research** – Gathers life stories to form a narrative

- Methods/Strategies of Quantitative Design**
 - **Experimental Research** – Uses scientific approach with control variables and measures their effects
 - **Non-Experimental Research** – Describes relationships or existing conditions without manipulation

Methods in Mixed Method	
Type	Approach
Sequential	Start with qualitative , followed by quantitative for generalization
Concurrent	Merge both qualitative and quantitative simultaneously
Transformative	Use both methods within a broader perspective

Presentation, Analysis, and Interpretation of Data

- Involves **organizing, analyzing, and interpreting** data
- Often shown in **tables, graphs, charts**, etc.

Conclusions and Recommendations

- **Conclusions** – Valid insights drawn from your **findings**
- **Recommendations** – Suggestions for **future research** or follow-up study

References and Appendices

- **References** – List of **sources** cited in the study
- **Appendices** – Include **questionnaires, letters, legal docs**, and **extra materials** not in the main text

Principle of Triangulation

Using **multiple sources** of data to **verify and confirm** the consistency of findings.

Example

A **teacher-researcher** used **checklists, field notes**, and **survey questionnaires** as tools to collect data in the study.

Ethics in Action Research

Carson et al., 1989 identified four ethical principles in AR:

- **Ethics of Hope** – Ensure concern for the **broad needs** of students and the **school community**
- **Ethics of Caring** – Prioritize the **welfare** of both students and teachers
- **Ethics of Openness** – Make the **purpose, participation**, and **intent** of AR **clear to all involved**
- **Ethics of Responsibility** – Researchers must commit to **principled actions**

Action Research Reporting and Sharing

To help **improve research culture**, teacher-researchers may share findings through:

- **Sharing** results with other **schools and districts**
- **Collaborating** with school **administrators** for possible changes

- Conducting **seminars** for **parents and teachers**
- Organizing **in-house training** within the school
- **Publishing** and **presenting papers**

Data Collection Tools	
Tool	Description
Observations	Watching people/events in natural setting
Anecdotal Records	Narrative after a specific behavior
Field Notes	Like anecdotal, but includes impressions
Checklists/ Scales	Study of behaviors using defined codes
Diaries	Personal regular accounts
Logs	Chronological listing of activities
Focus Group	Group discussion guided by a facilitator
Surveys	Widely used for reliable results
Tests	Standardized way to assess knowledge/perception
Survey Questionnaires	Gather data for quantitative/qualitative analysis
Sociometric Techniques	Measure of skills and relationships
Portfolio	Compilation of student work or progress
Document Analysis	Interpreting written/recorded documents
Multimedia Analysis	Analyzing audio or video materials
Projective Techniques	Based on interpretations by psychologists or evaluators
