1. A group that has clear roles and mutual respect is likely in which stage?

A. Storming

✓ B. Norming

C. Forming

D. Adjourning

In Bruce Tuckman's stages of group development (FS NPA):

- **Forming** – members are still adjusting

- **Storming** – conflicts and misunderstandings happen

- **Norming** – roles become clear; cooperation and respect develop

- **Performing** – the group becomes productive

- **Adjourning** – group disbands

2. In the constructivist approach, the following are the roles of a teacher EXCEPT

A. Scaffolds and guides

B. Warm demander

C. Empowering model

✓ D. "Sage on the stage"

3. Sexual urges remain repressed and children mostly interact with same-sex peers. These instances are under the

A. Anal Stage

☒ B. Latency Stage

C. Phallic Stage

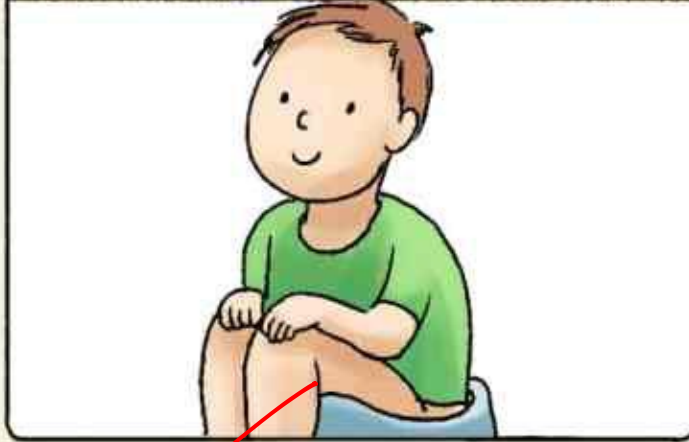

D. Genital Stage

Freud's psychosexual stages

Oral stage: Birth to 1 year
Erogenous zone: Mouth

Anal stage: 1 to 3 year
Erogenous zone: Bowel and Bladder control

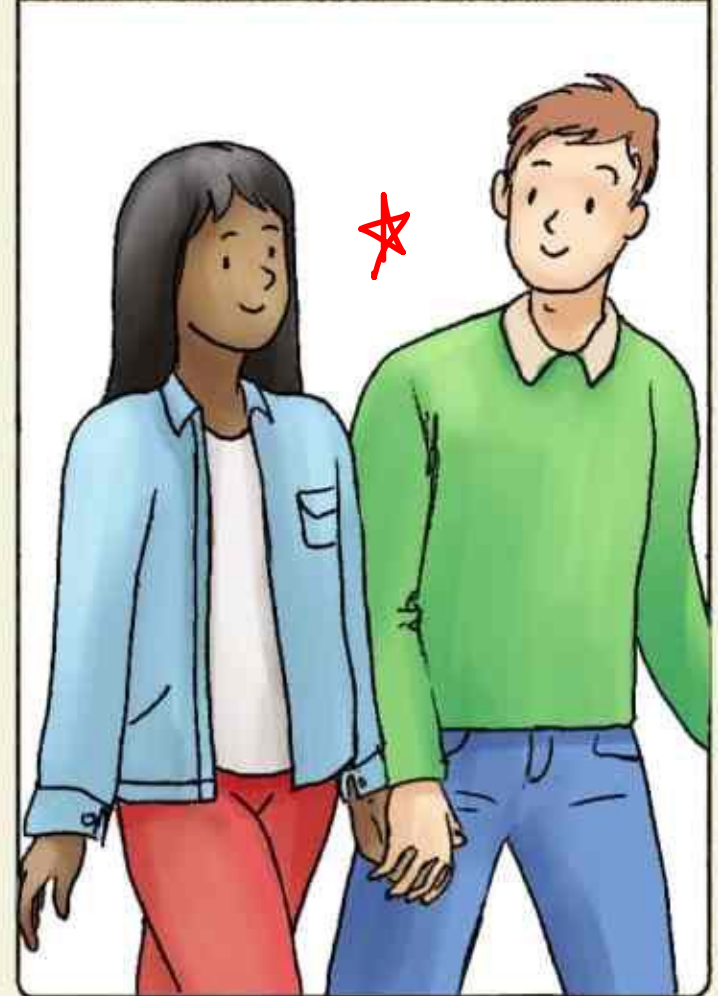

Phallic stage: 3 to 6 year
Erogenous zone: Genitals

Latent stage: 6 to puberty
libido inactive

Genital stage: Puberty to death
maturing sexual interest

4. Based on Freud's theory, which operates when a student hits a classmate at the height of anger?

- ✓ A. Id ✓
- B. Ego
- C. Id and Ego interact
- D. Superego

5. A school wants to develop the learners' metacognitive skills. Which practice is inconsistent with the school's goal?

- ✓ A. Rote teaching
- B. Emphasis on HOTS
- C. Constructivist instruction
- D. Authentic assessment

6. Rizza knows that when their family goes out for dinner, she needs to follow certain rules and mind her manners at the table. Such set of standards is an example of

A. Pre-conventional rule ✓

✓ B. Conventional rule ✓

C. Post-conventional rule ✓

D. Between pre-conventional and conventional rule

7. Which teachers benefit from professional development?

A. New teachers and bad teachers because they don't know what they are doing.

B. Veteran teachers because they need to stay up to date on new technology and research.

C. Good teachers because they will apply what they learned and become even better

✓ D. All teachers need and benefit from professional development in the areas they are weakest.

8. The main goal of summative assessments is to

- ~~A. Monitor learning~~
- ☒ B. Evaluate learning
- C. Get ranked
- ~~D. Check understanding~~

Summative assessment occurs after instruction.

9. Validity is defined as _____.

- ✓ A. the extent to which an assessment accurately measures what it is intended to measure
- B. the extent to which an assessment accurately measures the school's quality of instruction
- C. the extent to which a teacher accurately measures student learning
- D. the extent to which an assessment accurately measures student learning

10. Goals for an IEP are reviewed

A. Weekly

B. Monthly

✓ C. Annually

D. Never

An IEP (Individualized Education Program) is reviewed yearly.

11. Which of the following illustrates the difference between psychological noise and physiological noise?

A. Psychological noise occurs when two people from different cultures are communicating, while physiological noise are those physical sounds that make it difficult to hear someone's message.

✓ B. Psychological noise refers to things that are going on in your head as you engage in the communication process, while physiological noise refers to things that prevent us from giving our full attention.

C. Psychological noise occurs when you have a hard time understanding the words of a message, while physiological noise occurs when you cannot understand the grammatical structure of a message.

D. An example of psychological noise is stress, and a personal opinion is an example of physiological noise.

12. What determines if a blended family will have a positive effect on a child?

- ✓ A. How the family works together as a unit
- B. If they live near their extended families
- C. Whether or not the family is wealthy
- D. The ages of the children when the families join together

A blended family is a household formed when two adults come together as partners and bring children from previous relationships.

13. Jean Piaget believed children learned through experiencing their surroundings. What was the term he used to refer to stored information about an object or process in the mind?

- ✓ A. Schema or schemata
- B. File folder
- C. Box
- D. Brain brick

14. The term learning disability is used as an umbrella term because

A. It's used in combination with other terms that are poorly understood.

B. There is only one type of learning disability.

C. No student has more than one type of learning disability.

✓ D. There are many different types of learning disabilities.

15. According to Max Scheler's Hierarchy of Values, _____ is the highest form of values.

A. Pleasure values

B. Vital values

C. Spiritual values

✓ D. Values of the Holy

religious values

beliefs, bliss, adoration

spiritual values

aesthetic values

legal order values

cognitive values

value of the mind

vital values

health, vitality

hedonic values

16. A student has been staring at a puzzle. He is figuring out how to solve it and suddenly, an idea flashed in the student's mind, and excitedly he was able to learn how to solve the puzzle. This exemplifies _____.

A. Metacognition ✓

✓ B. Insight learning

C. Analytical learning ✓

D. Trial and error learning ✓

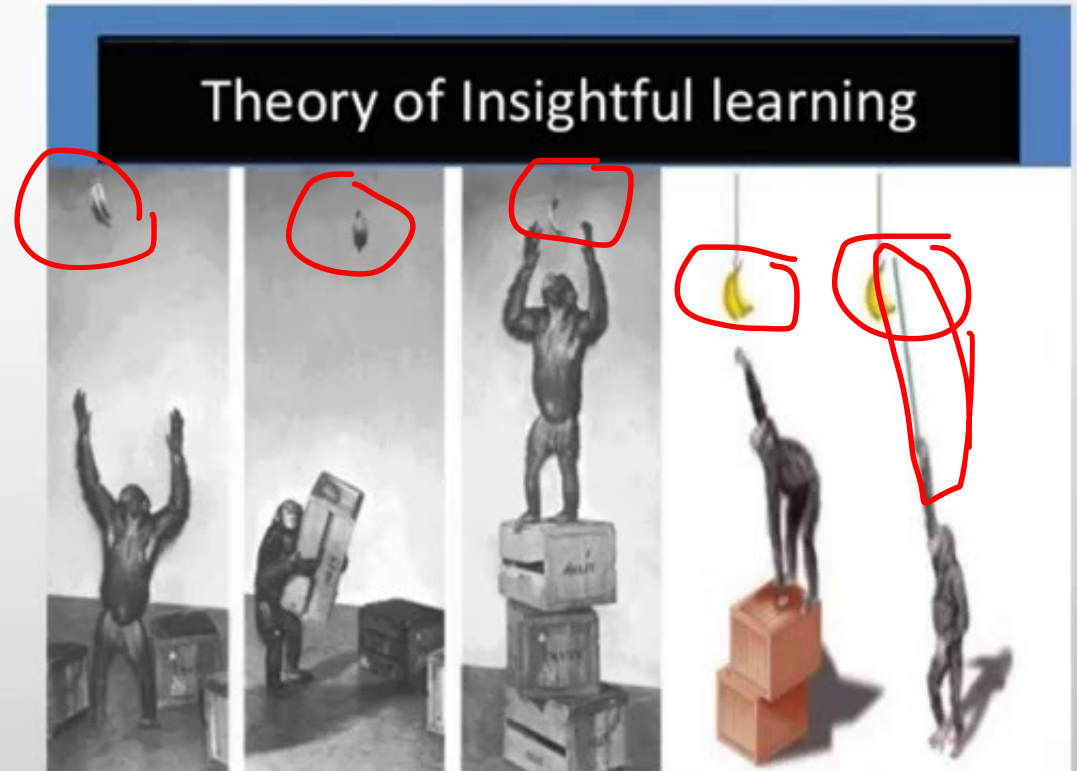

EXPERIMENTS OF INSIGHT LEARNING THEORY

KOHLER'S EXPERIMENTS ON SULTAN

(MENTALITY OF APES-1925)

1. EXPERIMENTS WITH BOX

2. EXPERIMENTS WITH STICKS

17. Teacher Rio is a computer teacher. In his lesson, he introduces the conventional use of Microsoft word to his students. He asks them to complete a word document by using the steps he has given them. What level of technology integration is done?

A. Entry

☒ B. Adoption

C. Infusion

D. Transformation

Technology Integration in the Classroom

- Entry – begins to use
- Adoption – teaches procedural use of technology
- Adaptation – students explore the use of a technology suggested by the teacher
- Infusion – students already make their choice
- Transformation – innovative use, won't be possible without the technology

18. Student's initiative is stifled by

✓ A. Authoritarianism

B. Rationalism

C. "Utang na loob"

D. "Bahala na"

19. A teacher tackles photosynthesis and asks her students to complete a project. The students are given the independence to choose whatever technology they want to use to complete the said project. What level of technology integration is shown here?

A. authentic ^A

B. transformation ✓

✓ C. infusion ✓

D. adaptation ✓

20. A teacher attempting to develop a student's metacognitive skills teaches the student to

- A. Recall the past lesson
- B. Visualize
- C. Formulate hypothesis
- ✓ D. Think about their thinking

21. "An ounce of experience is better than a ton of theory" was one of John Dewey's main contentions. This statement underscores the

- A. The primacy of theory
- B. The need for theory
- ✓ C. The primacy of experience
- D. The need for experience

22. The teacher adheres to the idea that her students do not need to know the learning outcomes of her lessons. She proceeds to learning activities without letting them know what they were supposed to learn for the day. What principle of learning does the teacher violate?

- ✓ A. Effective learning begins with setting clear expectations and learning outcomes.
- B. Learning is the discovery of the personal meaning of ideas.
- C. Learning is a cooperative and collaborative process.
- D. Learning is an active process.

23. What school of thought is behind the student-centered approach in teaching which emphasizes discovery learning among students?

A. Existentialism ✓

- *freedom/choice*

B. Behaviorism ✓

- *environment*

C. Essentialism

- *basics*

✓ D. Progressivism

24. According to RA 4670, the official number of hours spent in school by teachers should be

A. 10 hours

B. 12 hours

☒ C. 8 hours

D. 6 hours

*Under **Republic Act No. 4670** (the Magna Carta for Public School Teachers), actual classroom teaching time is limited to a maximum of six (6) hours a day. The remaining two hours of the standard eight-hour workday are designated for teaching-related duties (lesson preparation, grading, paperwork).*

25. What appropriate intervention did DepEd implement to resolve school children population density in public schools?

- ✓ A. Morning and afternoon sessions
- B. Tapping NGO's who assist schools
- C. Evening vocational classes to drop-outs
- D. Development of instructional materials

double-single-session or double-shift session

26. Teacher Camille interviewed seven students to know the reasons for their frequent absence in class. Then, she showed the whole picture of their class attendance in a cause (lack of transport fare) and effect (missing a day in class) diagram with the use of which organizer?

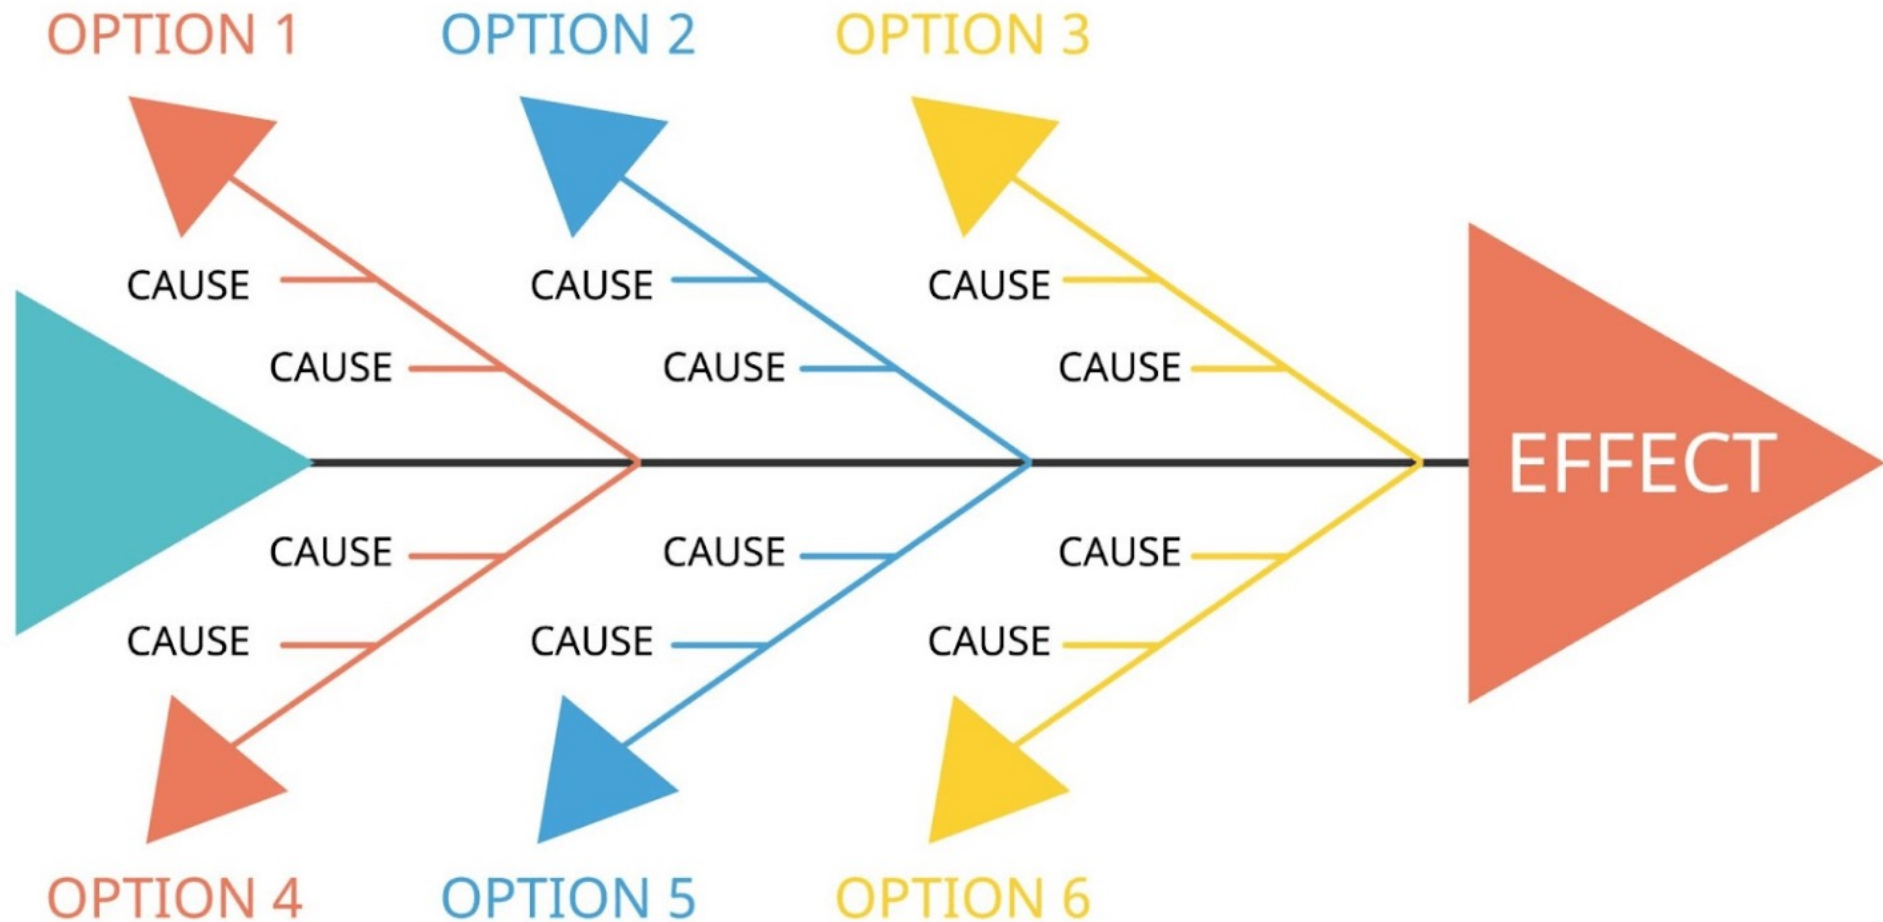

✓ A. Fishbone diagram

B. Flow chart ✓

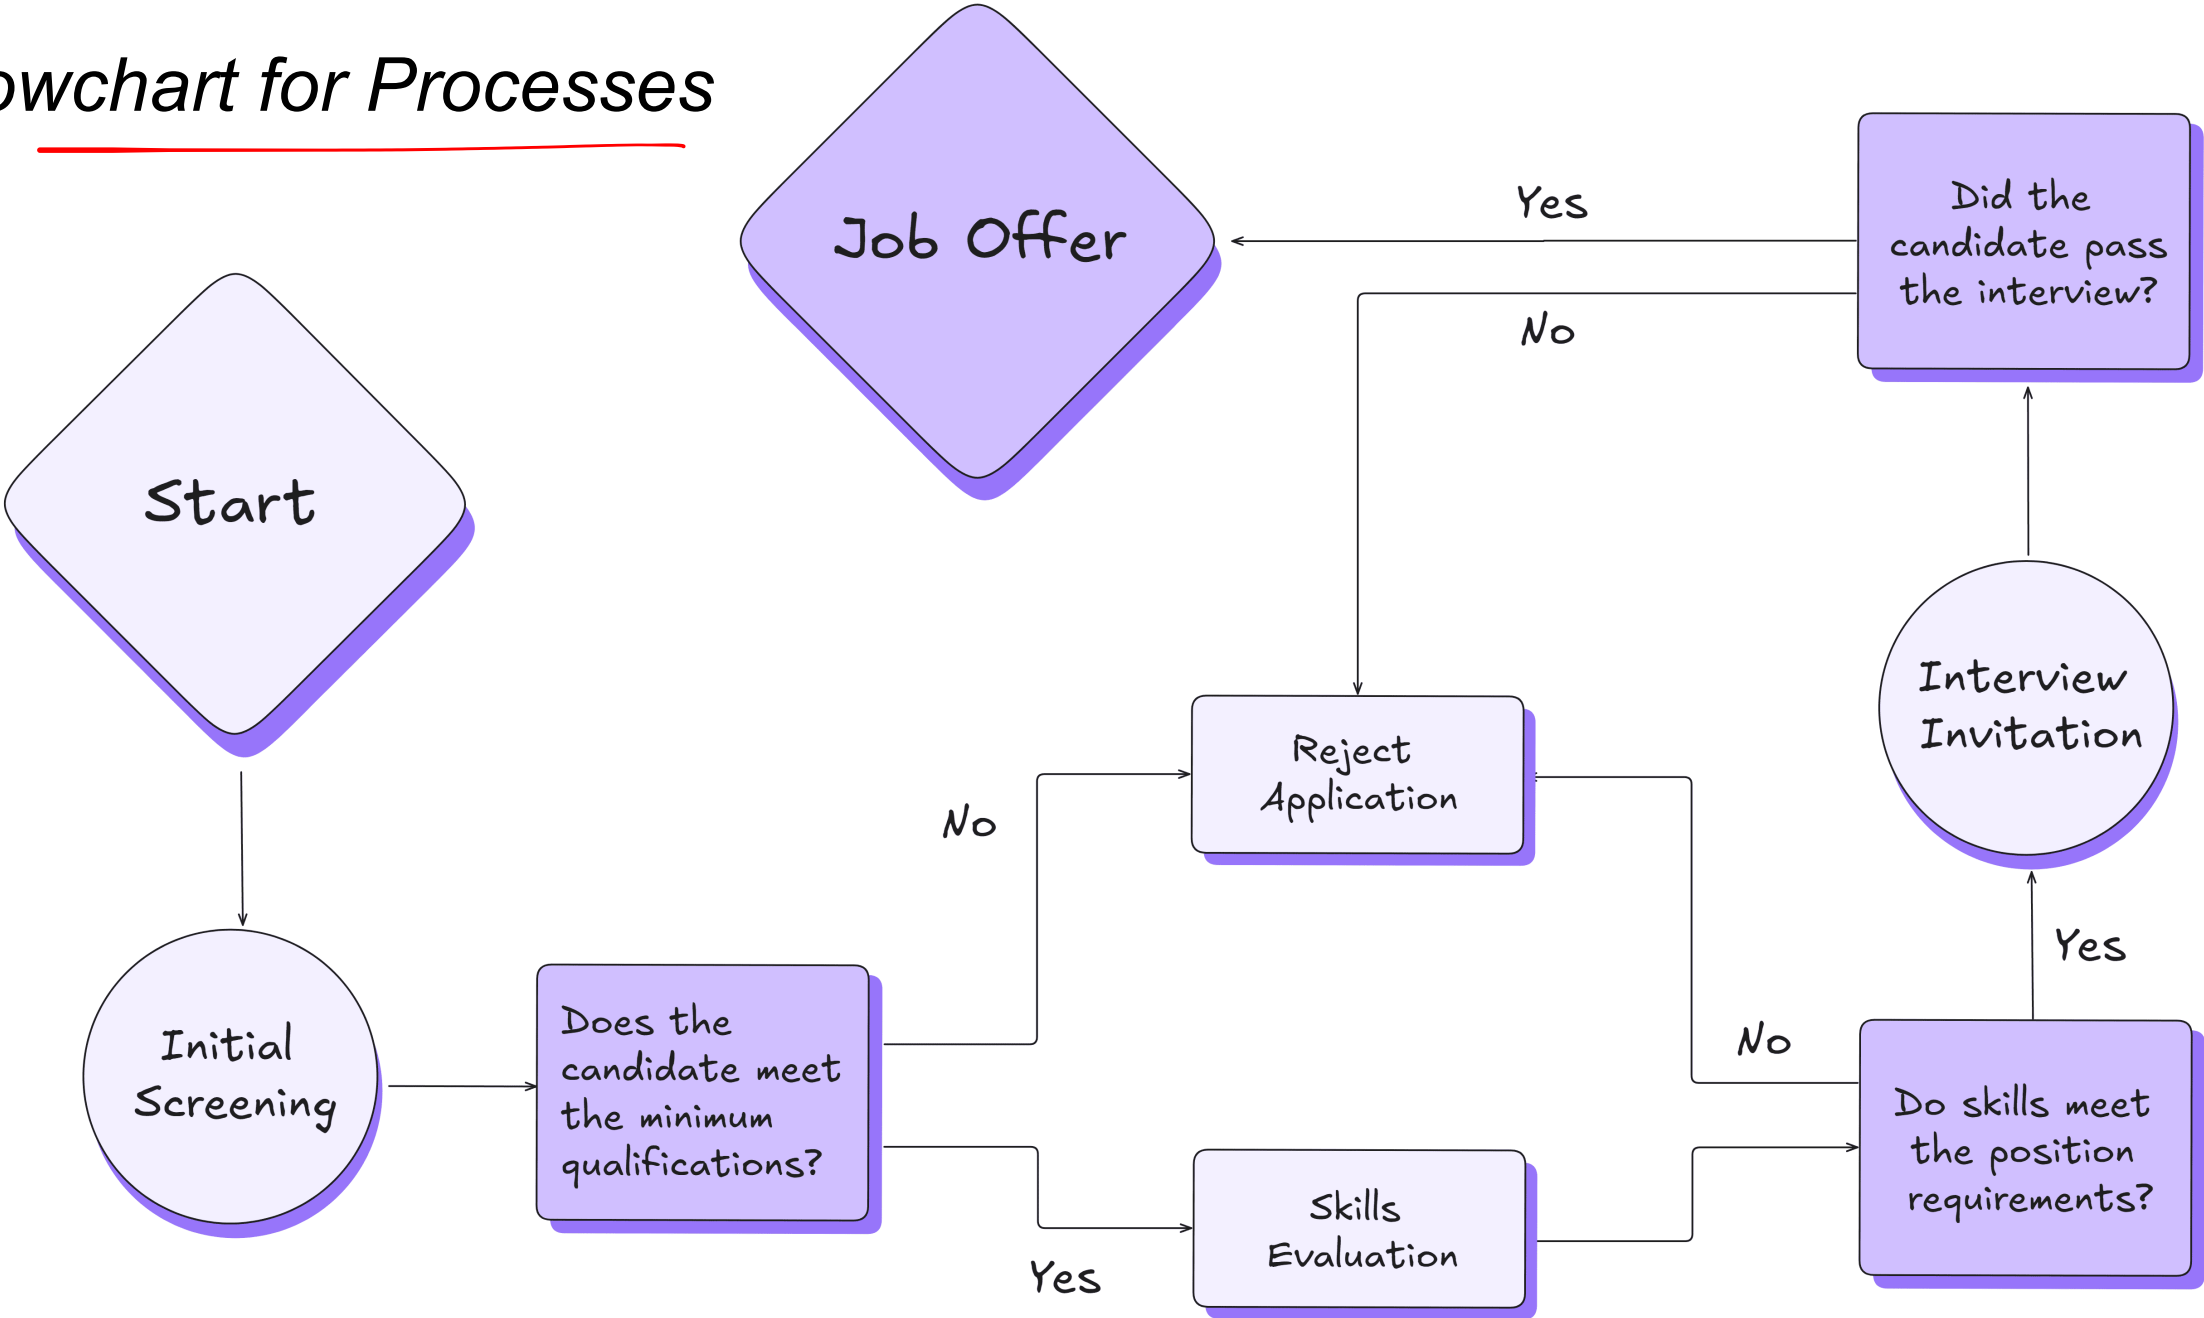

C. Spider web ✓

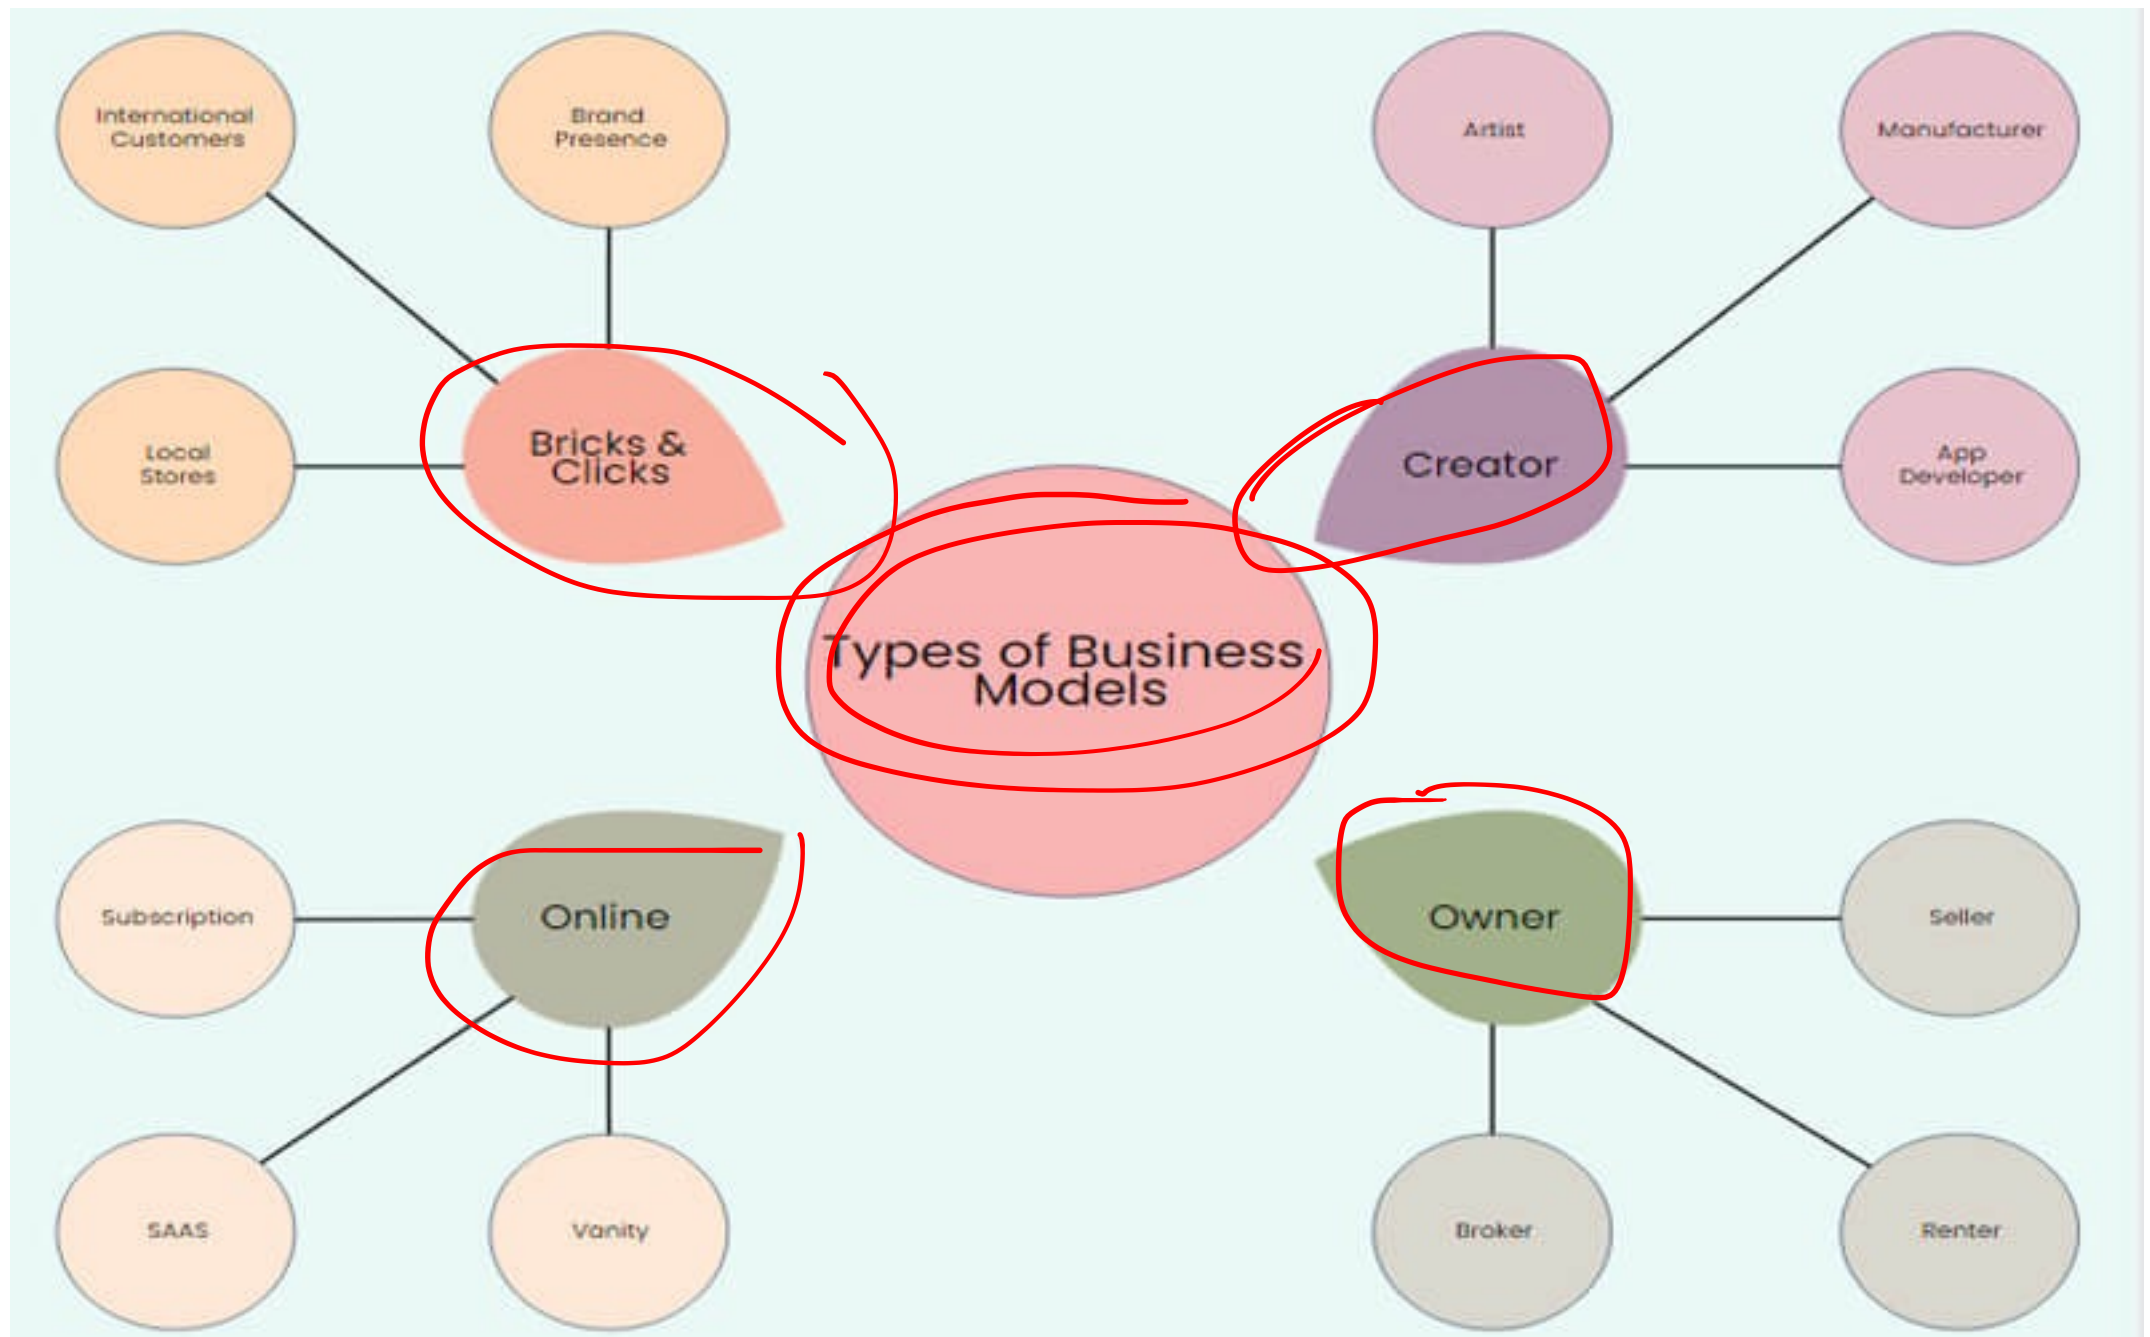

D. Storyboard ✓

CAUSE AND EFFECT DIAGRAM FOR ROOT CAUSE ANALYSIS

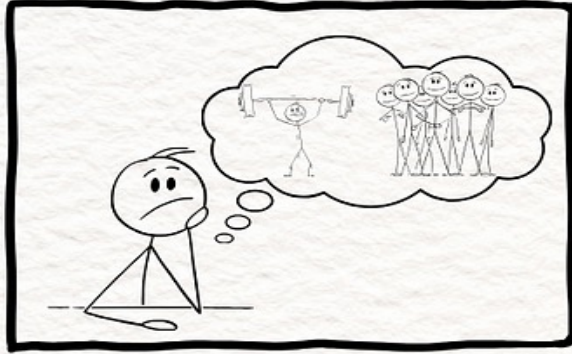

Flowchart for Processes

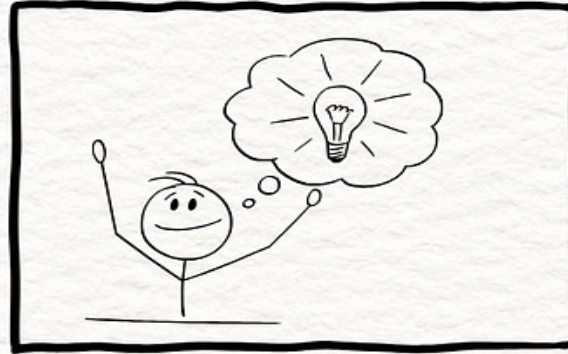

STORYBOARD

Scene 1

Adam wants to workout with the support and motivation of a community.

Scene 2

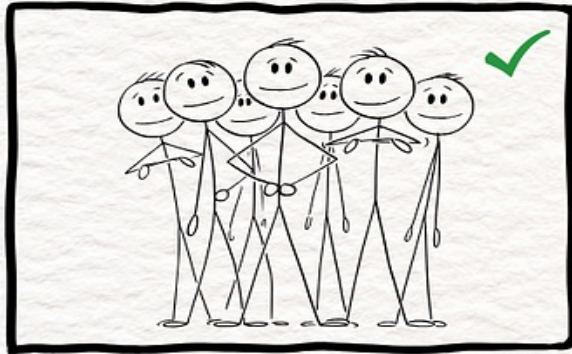

He works from home & he's new to the neighbourhood. He suddenly gets the idea to search for a fitness app.

Scene 3

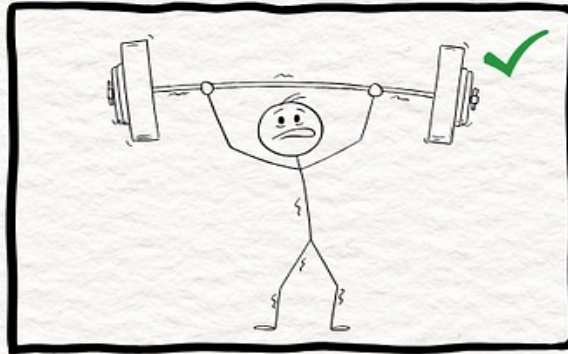

He finds an app, downloads it, and makes an account.

Scene 4

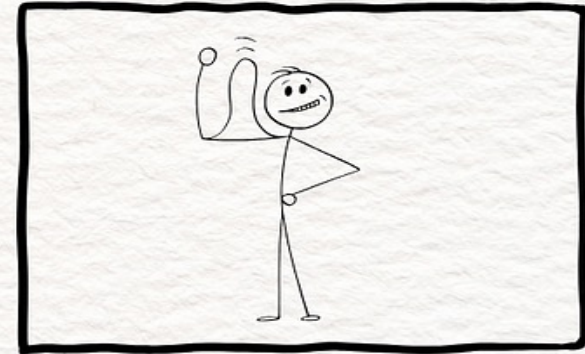

Adam joins a community...

Scene 5

and begins working out diligently.

Scene 6

He's on his way to meeting his fitness goals!

27. Who is considered the most essential member of the IEP team because they provide historical context and long-term goals for the child?

- A. The School Principal
- B. The Physical Therapist
- ☒ C. The Parents or Guardians
- D. The SPED Coordinator

28. Teacher Marco noticed that his student obtained a final grade of 89. What descriptor should appear in the report card?

- A. Outstanding
- ✓ B. Very Satisfactory
- C. Satisfactory
- D. Fairly Satisfactory

Di Not Meet ... below 75

Fairly Satisfactory ... 75-79

Satisfactory 80-84

Very satisfactory 85-89

Outstanding 90-100

Di FaSa Very Old

29. A teacher consistently demonstrates high-level teaching competence and supports the professional development of colleagues in the school. Which career stage does this teacher belong to?

A. Beginning

B. Proficient

✓ C. Highly Proficient

D. Distinguished

Be, PHD

CAREER STAGES

Career Stages 1 Beginning Teachers

Beginning Teachers have gained the qualifications recognized for entry into the teaching profession.

They have a strong understanding of the subjects/areas in which they are trained in terms of content knowledge and pedagogy.

They possess the requisite knowledge, skills and values that support the teaching and learning process.

Career Stages 2 Proficient Teachers

Proficient Teachers are professionally independent in the application of skills vital to the teaching and learning process.

They display skills in planning, implementing and managing learning programs.

They actively engage in collaborative learning with the professional community and other stakeholders for mutual growth and advancement.

Career Stages 3 Highly Proficient Teachers

Highly Proficient Teachers consistently display a high level of performance in their teaching practice.

They provide support and mentoring to colleagues in their professional development, as well as work collaboratively with them to enhance the learning and practice potential of their colleagues.

Career Stages 4 Distinguished Teachers

Distinguished Teachers embody the highest standard for teaching grounded in global best practices.

They exhibit exceptional capacity to improve their own teaching practice and that of others.

They are recognized as leaders in education, contributors to the profession and initiators of collaborations and partnerships.

30. According to Piaget's stages of cognitive development, between ages 12 and 15 children reach formal operational stage. What are they capable of doing at this stage?

A. Can focus on only one aspect of a situation or event

✓ B. Can solve abstract problems and think deductively or inductively

C. Can categorize objects

D. Can do multitasking
