PRAYER

Heavenly Father,

As we begin this online review, we ask for Your guidance and wisdom. Help us to focus, understand, and remember the lessons we study. Calm our minds, remove our worries, and give us confidence in our abilities. May this preparation lead us closer to success in our board exam. We offer everything to You.

Amen.

Question #1

What is the primary gas found in the Earth's atmosphere?

- A. Oxygen
- B. Nitrogen
- C. Carbon Dioxide
- D. Argon

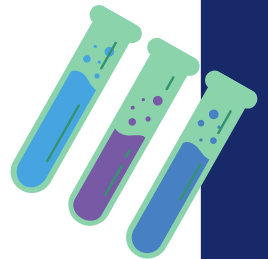

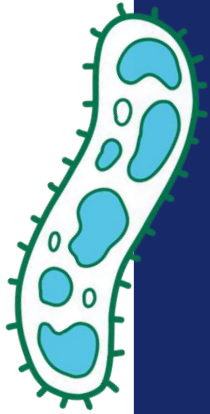

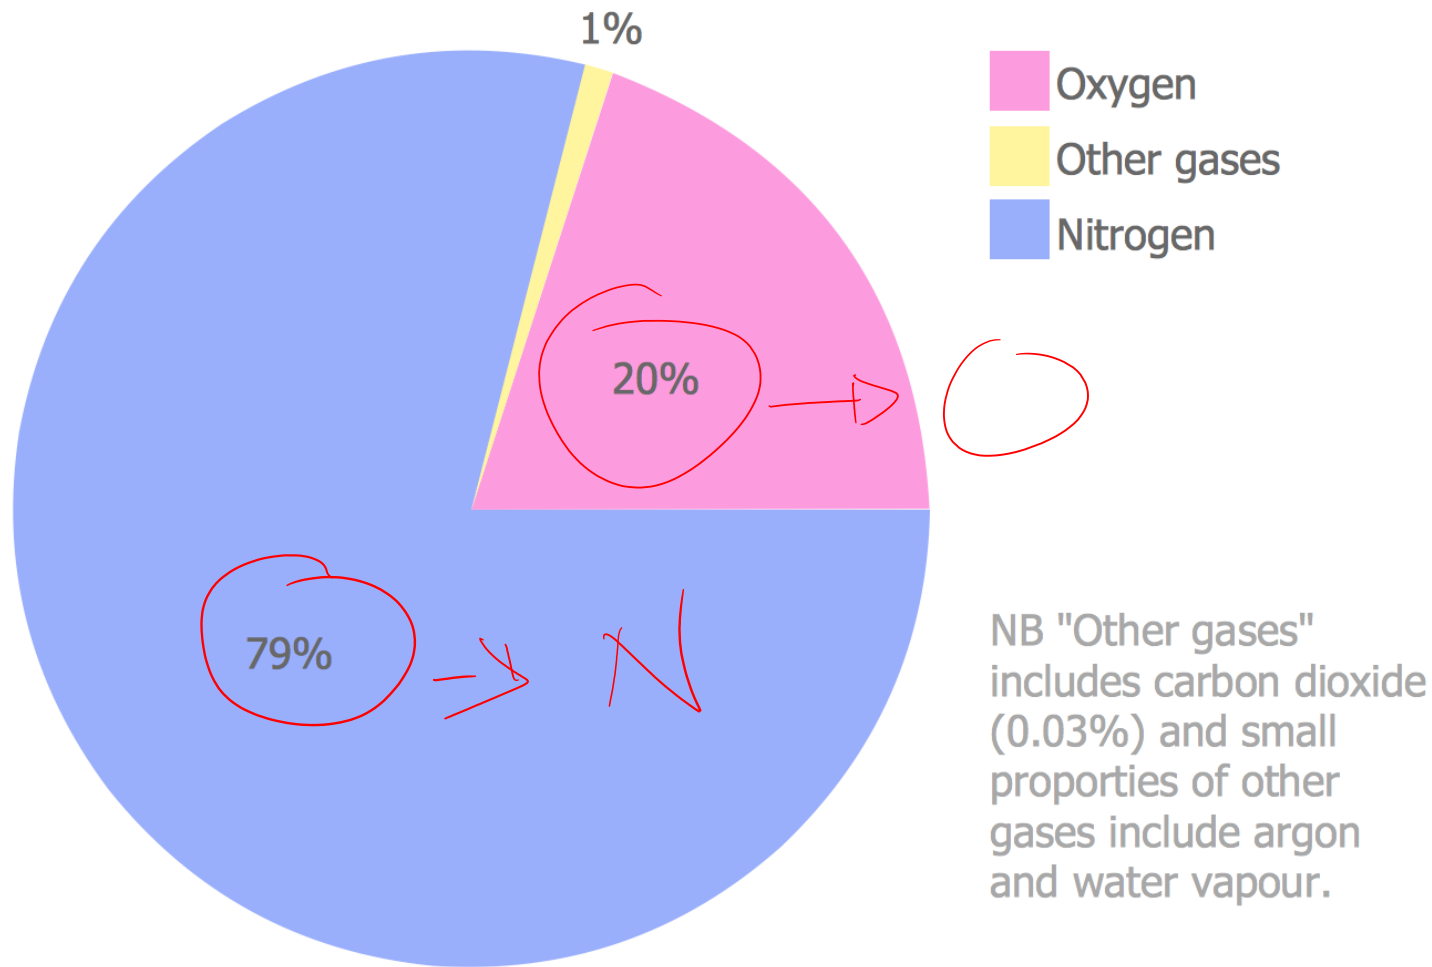

Question #1

What is the primary gas found in the Earth's atmosphere?

- A. Oxygen
- B. Nitrogen**
- C. Carbon Dioxide
- D. Argon

GENED SCIENCE REFRESHER REVIEW

Question #2

Which part of the human brain is responsible for regulating balance and coordination?

- A. Cerebrum
- B. Brainstem
- C. Thalamus
- D. Cerebellum

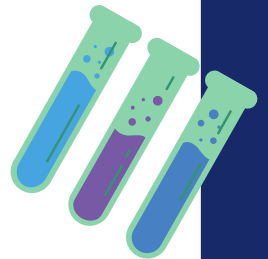

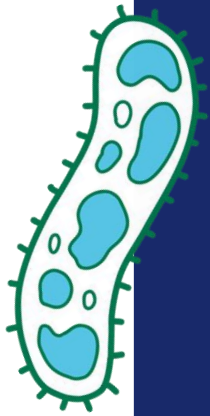

Question #2

Which part of the human brain is responsible for regulating balance and coordination?

- A. Cerebrum – emotions, thinking, creativity
- B. Brainstem – heart rate, breathing, blood pressure *4s in voluntary*
- C. Thalamus – relay station for sensory signals
- D. Cerebellum – balance and coordination

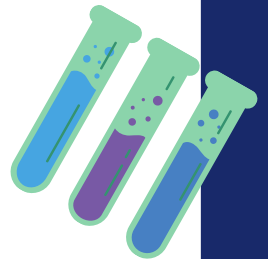

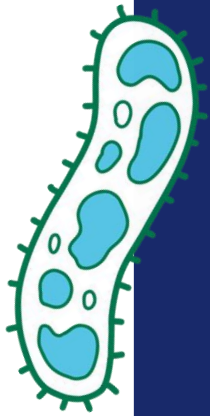

Question #3

How long does it take for sunlight to reach the Earth?

- A. 30 seconds
- B. 8 minutes
- C. 24 hours
- D. 1 minute

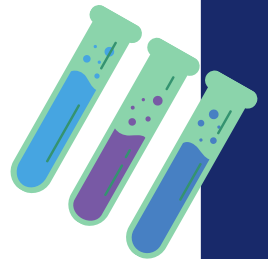

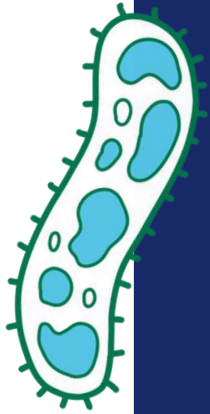

Question #3

How long does it take for sunlight to reach the Earth?

- A. 30 seconds
- B. 8 minutes**
- C. 24 hours
- D. 1 minute

Question #4

Which law of motion states that for every action, there is an equal and opposite reaction?

- A. Newton's First Law
- B. Newton's Second Law
- C. Newton's Third Law
- D. Law of Universal Gravitation

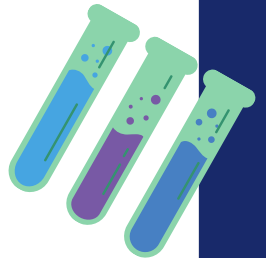

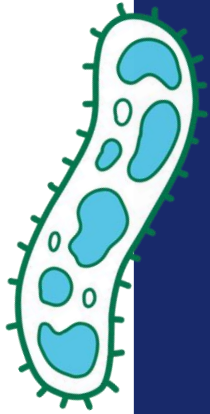

Question #4

Which law of motion states that for every action, there is an equal and opposite reaction?

- A. Newton's First Law
- B. Newton's Second Law
- C. Newton's Third Law**
- D. Law of Universal Gravitation

Newton's Laws of Motion

1st Law

Inertia

A body in motion remains in motion or a body at rest remains at rest, unless acted upon by a force.

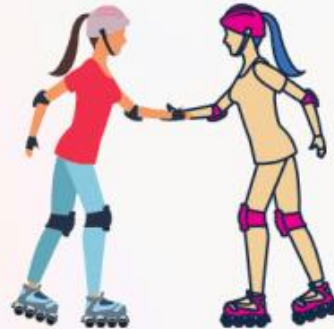

2nd Law

Force equals mass times acceleration: $F = m \cdot a$

2nd Law

3rd Law

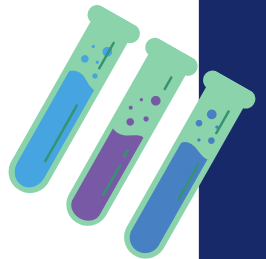

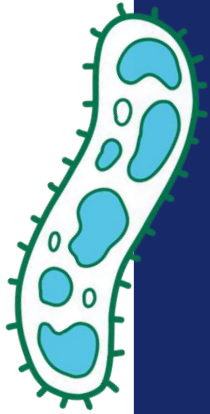

For every action, there is an equal and opposite reaction.

Question #5

What is the most common state of matter in the universe?

- A. Solid
- B. Liquid
- C. Gas
- D. Plasma

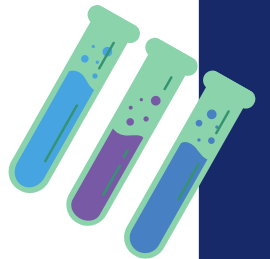

Question #5

What is the most common state of matter in the universe?

- A. Solid
- B. Liquid
- C. Gas
- D. Plasma**

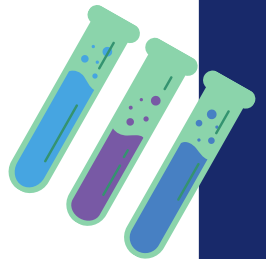

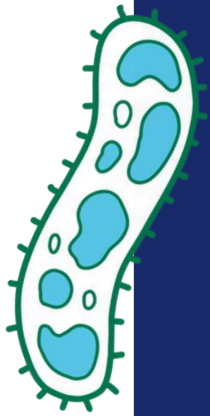

Question #6

Which planet in our solar system is known as the "Red Planet"?

- A. Venus
- B. Mars
- C. Jupiter
- D. Saturn

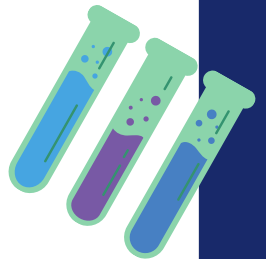

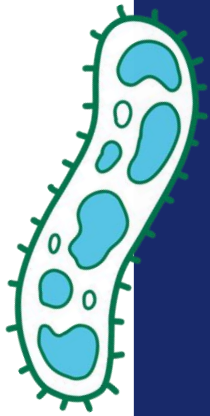

Question #6

Which planet in our solar system is known as the "Red Planet"?

- A. Venus – hottest planet
- B. Mars – red planet**
- C. Jupiter – largest planet
- D. Saturn – second largest

GENED SCIENCE REFRESHER REVIEW

THE RED PLANET

THE RUSTY WORLD OF MARS

Question #7

Which type of rock is formed by the cooling and solidification of magma or lava?

- A. Sedimentary
- B. Igneous
- C. Metamorphic
- D. Limestone

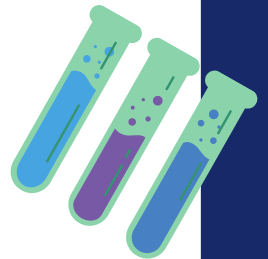

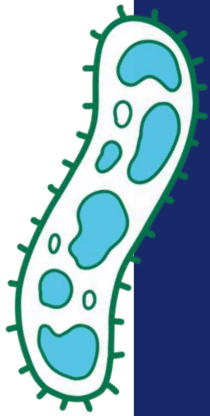

Question #7

Which type of rock is formed by the cooling and solidification of magma or lava?

- A. Sedimentary – “sediments”
- B. Igneous – from magma or lava**
- C. Metamorphic – high heat/pressure
- D. Limestone - sedimentary

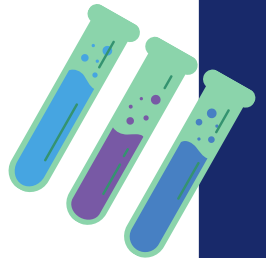

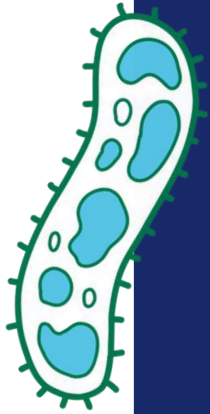

Question #8

What is the PH value of pure water?

pH

- A. 0
- B. 5
- C. 7
- D. 14

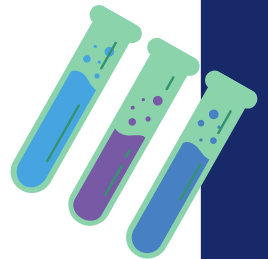

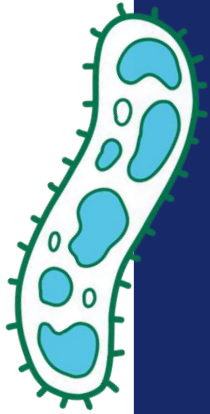

Question #8

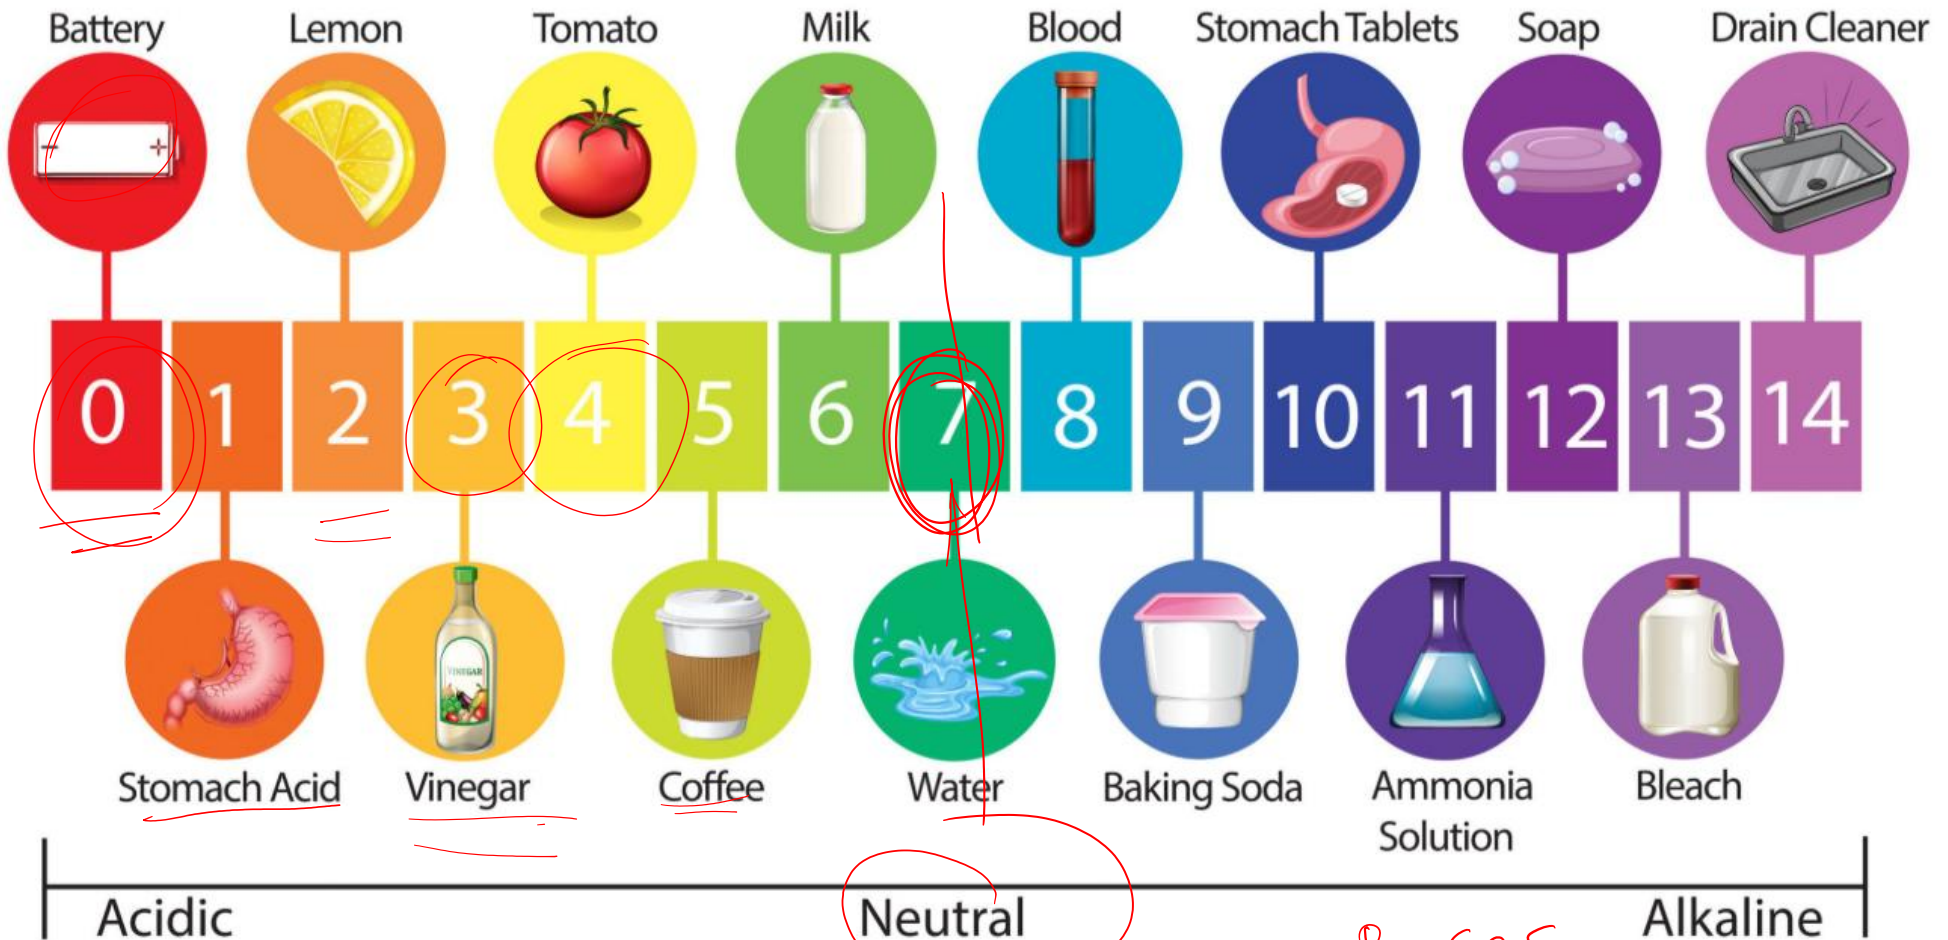

What is the pH value of pure water?

- A. 0 – extremely acidic
- B. 5 – acidic
- C. 7 – neutral pH**
- D. 14 – extremely basic

0 - 14

The pH Scale

0 - 6.9

Bases
7.1 - 14

Question #9

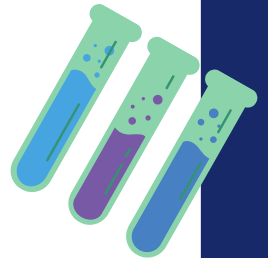

Which organ in the human body is primarily responsible for filtering blood?

- A. Kidney
- B. Liver
- C. Heart
- D. Lungs

Organs

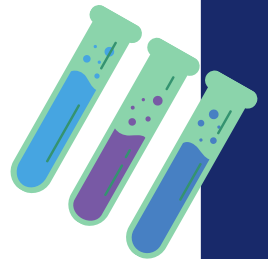

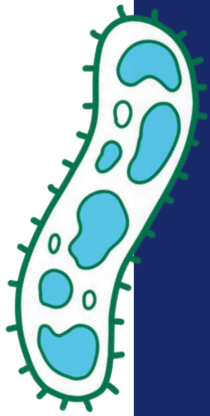

Question #9

Which organ in the human body is primarily responsible for filtering blood?

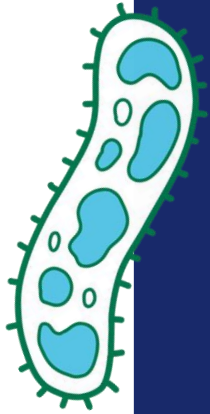

- A. Kidney – filters blood**
- B. Liver – bile production
- C. Heart – pumps blood
- D. Lungs – gas exchange

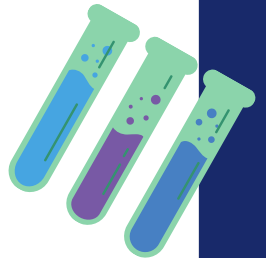

Question #10

What is the name of the process by which plants lose water through their leaves?

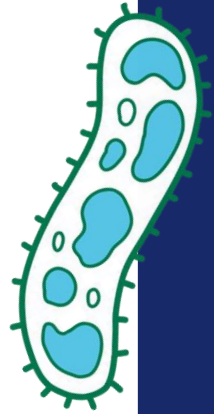

- A. Photosynthesis
- B. Respiration
- C. Transpiration
- D. Osmosis

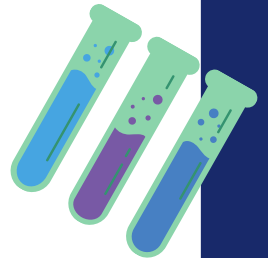

Question #10

What is the name of the process by which plants lose water through their leaves?

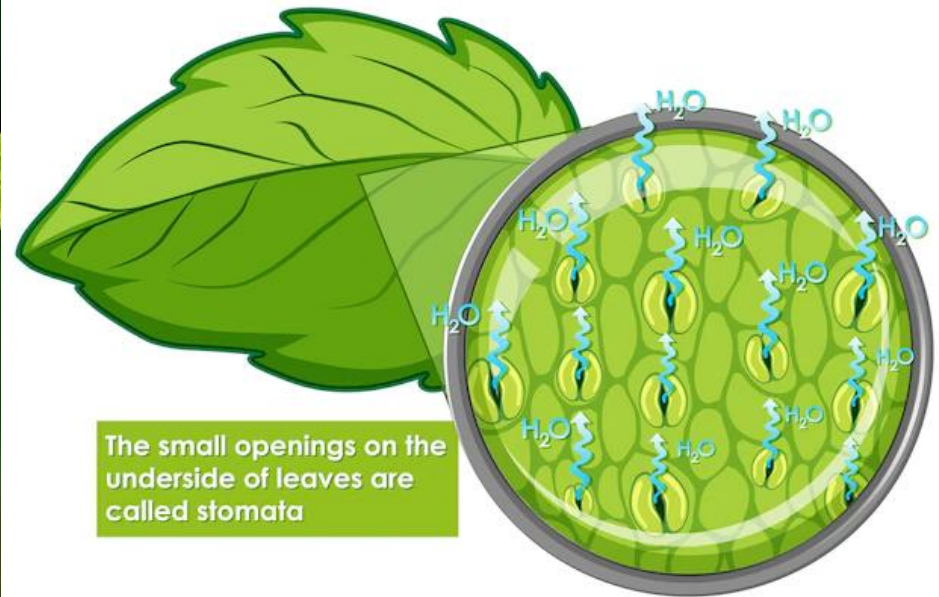

- A. Photosynthesis – make own food
- B. Respiration - breathing
- C. Transpiration – “sweat”**
- D. Osmosis – movement of water

GENED SCIENCE REFRESHER REVIEW

Transpiration

The small openings on the underside of leaves are called stomata

Question #11

Which fundamental force keeps the planets in orbit around the sun?

- A. Gravity
- B. Electromagnetism
- C. Strong Nuclear Force
- D. Weak Nuclear Force

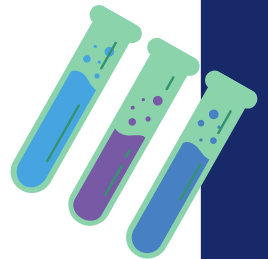

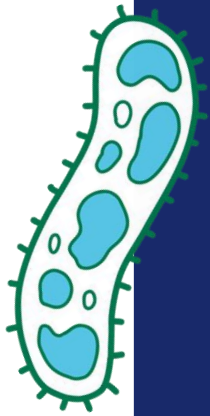

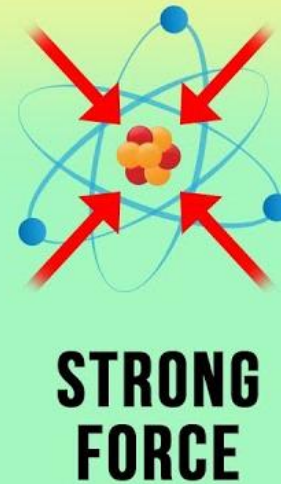

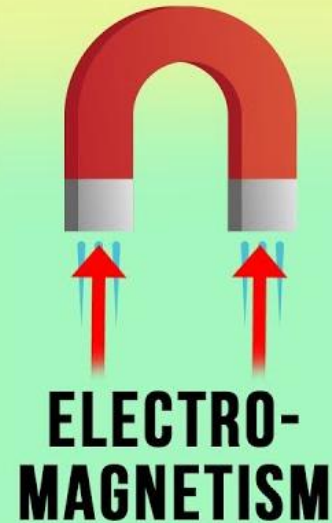

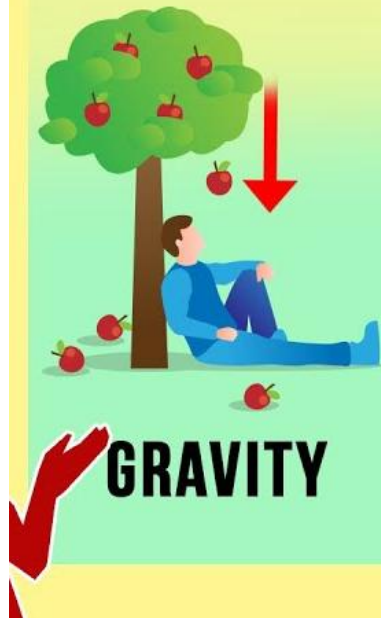

Question #11

Which fundamental force keeps the planets in orbit around the sun?

- A. Gravity**
- B. Electromagnetism
- C. Strong Nuclear Force
- D. Weak Nuclear Force

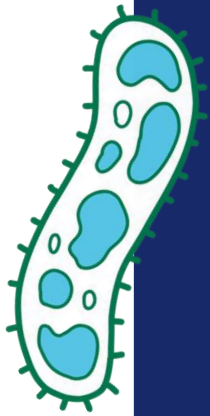

4 FUNDAMENTAL FORCES

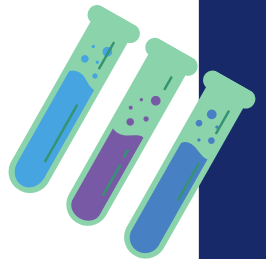

Question #12

Which scientist is famous for developing the theory of General Relativity?

- A. Isaac Newton
- B. Albert Einstein
- C. Stephen Hawking
- D. Marie Curie

Question #12

Which scientist is famous for developing the theory of General Relativity?

A. Isaac Newton – three laws of motion and law of universal gravitation

B. Albert Einstein – theory of relativity and $E=mc^2$

C. Stephen Hawking – black holes

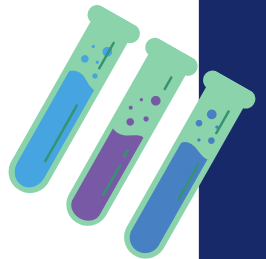

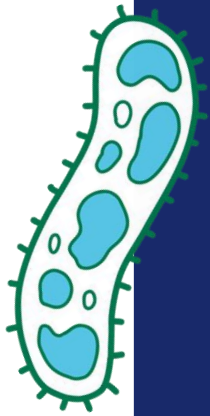

D. Marie Curie – radioactivity and elements Polonium and Radium

Question #13

What is the hardest natural
substance found on Earth?

- A. Steel
- B. Quartz
- C. Diamond
- D. Graphite

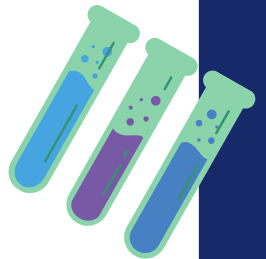

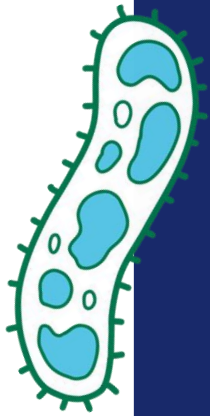

Question #13

What is the hardest natural substance found on Earth?

- A. Steel
- B. Quartz
- C. Diamond**
- D. Graphite

Mohs Hardness Scale

Increasing Hardness ↑	Mineral Name	Scale Number	Common Object
	Diamond	10	
	Corundum	9	Masonry Drill Bit (8.5)
	Topaz	8	
	Quartz	7	Steel Nail (6.5)
	Orthoclase	6	
	Apatite	5	Knife/Glass Plate (5.5)
	Fluorite	4	
	Calcite	3	Copper Penny (3.5)
	Gypsum	2	
	Talc	1	Fingernail (2.5)

Question #14

What is the main function of red blood cells?

RBCs

- A. To carry oxygen
- B. To fight infection
- C. To clot blood
- D. To produce hormones

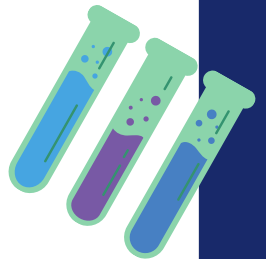

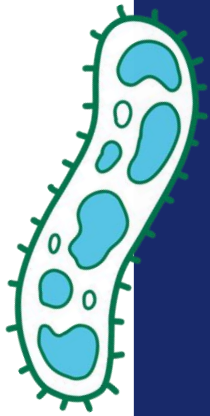

Question #14

What is the main function of red blood cells?

- A. To carry oxygen - RBCs**
- B. To fight infection - WBCs
- C. To clot blood – platelets
- D. To produce hormones – glands

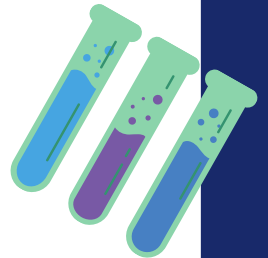

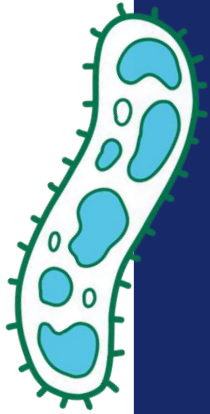

Question #15

Which element is essential for the process of combustion to occur?

↳ fire

- A. Nitrogen
- B. Hydrogen
- C. Oxygen
- D. Helium

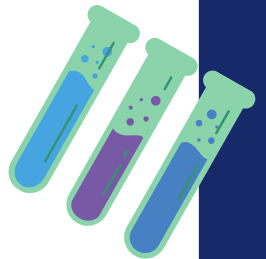

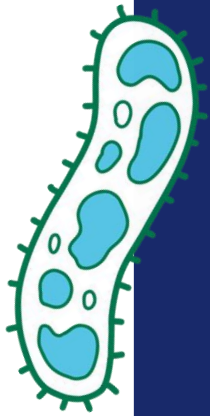

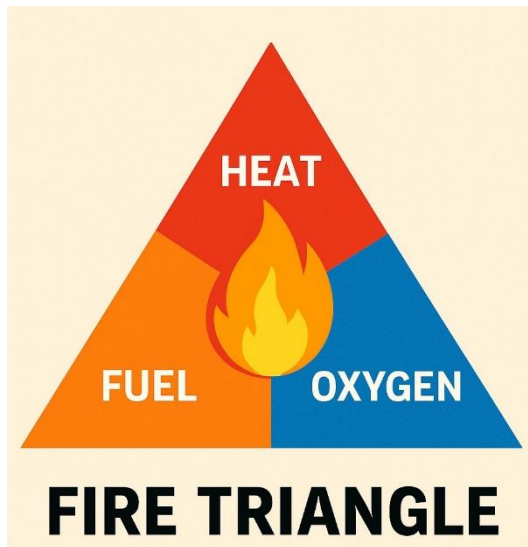

Question #15

Which element is essential for the process of combustion to occur?

- A. Nitrogen
- B. Hydrogen
- C. Oxygen**
- D. Helium

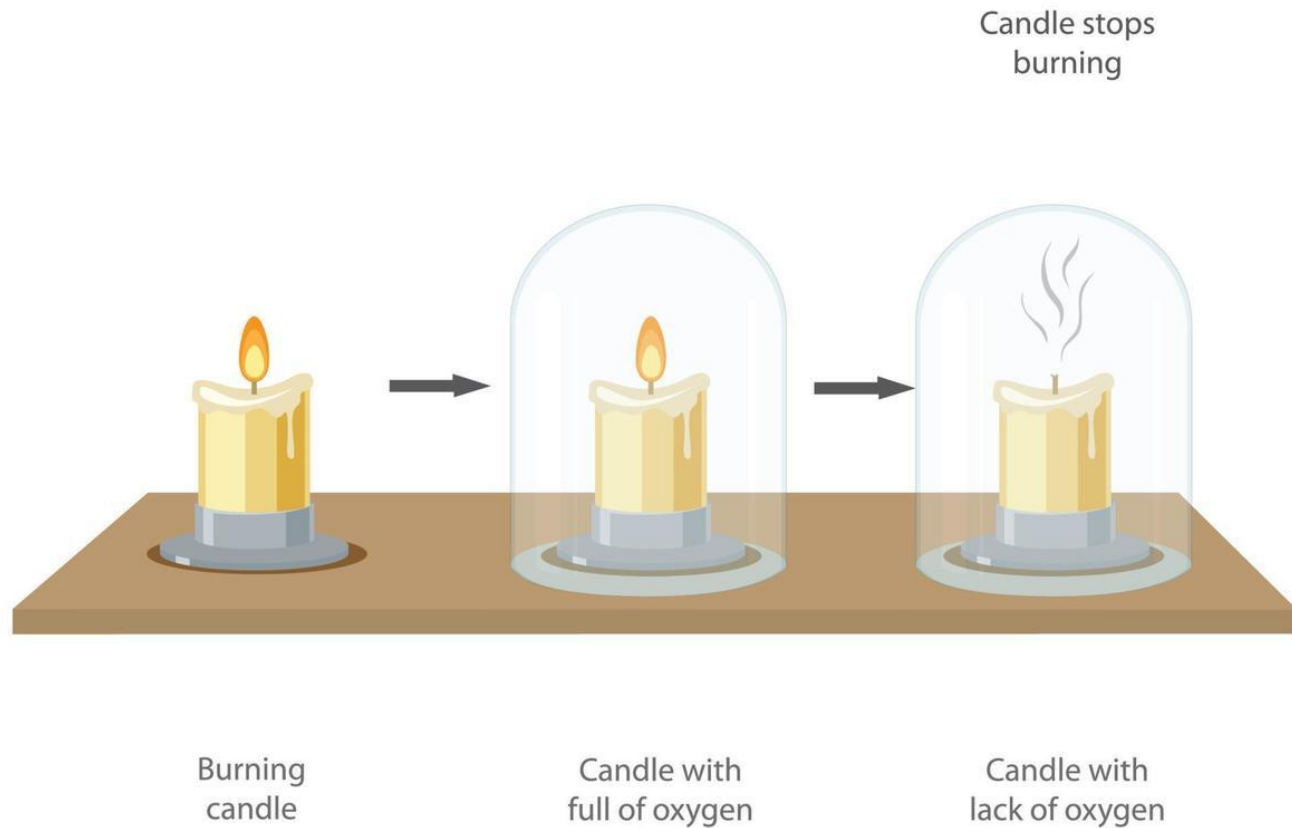

GENED SCIENCE REFRESHER REVIEW

Oxygen as an Oxidizer:
During combustion, oxygen combines with a fuel source (like wood, gasoline or fabric) to produce heat and light. The more oxygen available, the more intense the combustion process

OXYGEN IS NEEDED TO BURN

Question #16

What is the scientific term for the "voice box"?

- A. Pharynx
- B. Larynx
- C. Trachea
- D. Esophagus

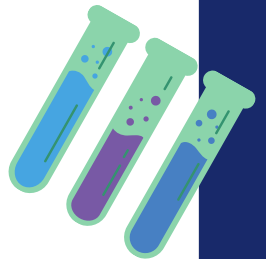

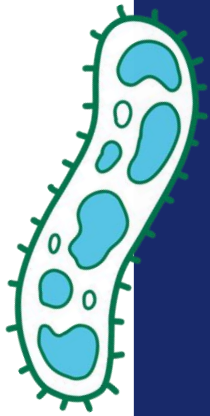

Question #16

What is the scientific term for the "voice box"?

- A. Pharynx – “throat”
- B. Larynx – “voice box”** ✓
- C. Trachea – “windpipe”
- D. Esophagus – “food pipe”

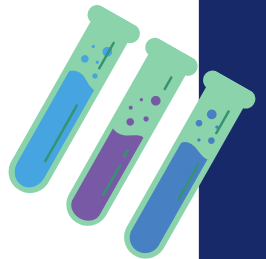

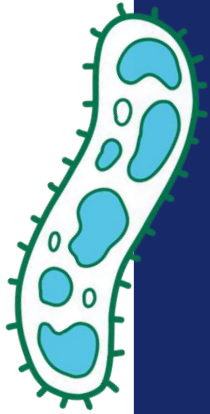

Question #17

How many bones are found in an average adult human body?

- A. 150
- B. 300
- C. 206
- D. 215

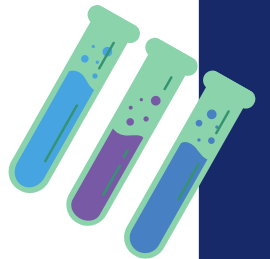

Question #17

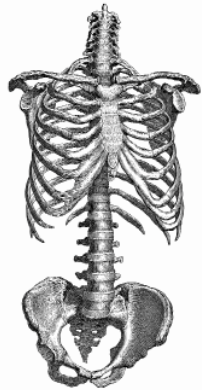

How many bones are found in an average adult human body?

- A. 150
- B. 300
- C. 206**
- D. 215

How Many Bones Are in the Human Body?

The average adult has 206 bones.

- **29** skull bones

- **26** vertebral bones

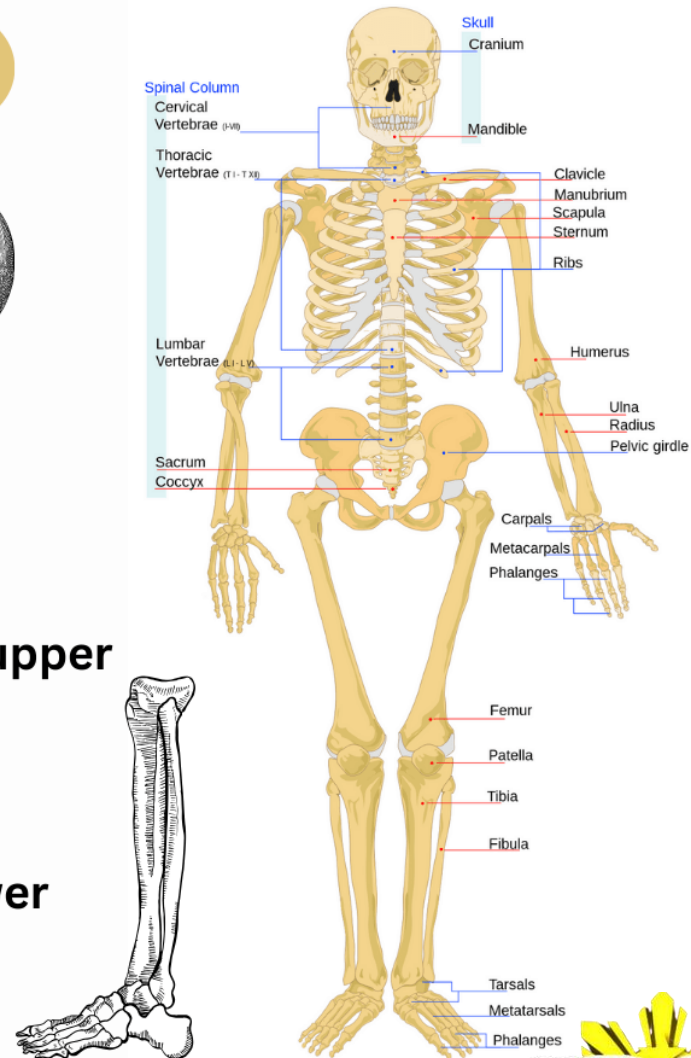

- **1** sternum with **24** rib bones

- **4** pectoral girdle bones with **60** upper limb bones

- **2** pelvic girdle bones with **60** lower limb bones

Question #18

What is the unit used to measure electrical resistance?

- A. Volt
- B. Ampere
- C. Ohm
- D. Watt

Question #18

What is the unit used to measure electrical resistance?

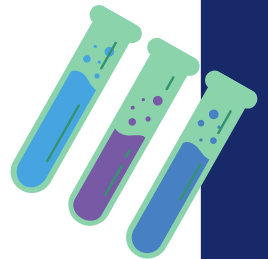

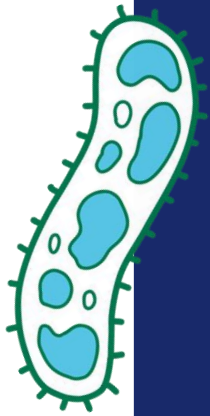

- A. Volt - unit of electrical potential, potential difference and electromotive force
- B. Ampere – electric current
- C. Ohm – electrical resistance**
- D. Watt - power

Question #19

Which vitamin is produced when the human skin is exposed to sunlight?

- A. Vitamin A
- B. Vitamin B12
- C. Vitamin C
- D. Vitamin D

Question #19

Which vitamin is produced when the human skin is exposed to sunlight?

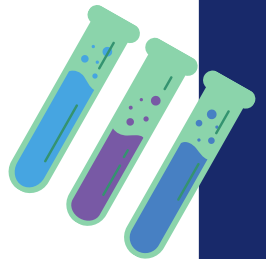

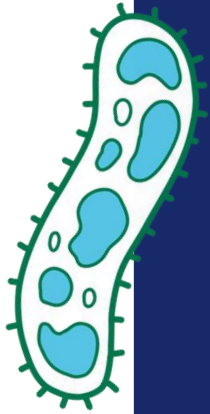

The only vitamin your skin produces is **Vitamin D**. It is often called the "sunshine vitamin" because your skin synthesizes it when exposed to ultraviolet (UV) light

Question #20

What is the boiling point of water at sea level in Celsius?

- A. 50°C
- B. 100°C
- C. 212°C
- D. 0°C

Question #20

What is the boiling point of water at sea level in Celsius?

A. 50°C

B. 100°C – boiling point of water

C. 212°C → 212 °F

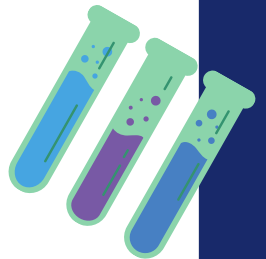

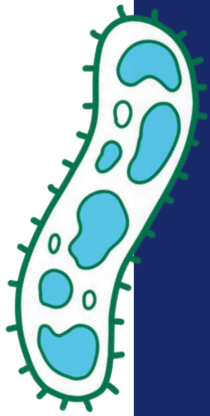

D. 0°C – freezing point of water

Question #21

What is the largest organ of the human body?

- A. Liver
- B. Skin
- C. Small Intestine
- D. Lungs

Question #21

What is the largest organ of the human body?

A. Liver – largest internal organ

B. Skin – largest organ, 14% to 16% of your body weight

C. Small Intestine - longest section of the gastrointestinal tract

D. Lungs - primary organs of the respiratory system

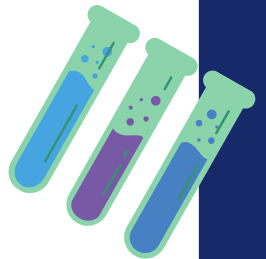

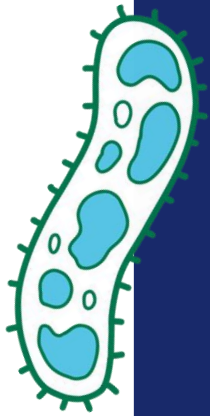

Question #22

What is the process called when a solid turns directly into a gas?

- A. Evaporation
- B. Condensation
- C. Sublimation
- D. Deposition

solid $\rightarrow$ gas

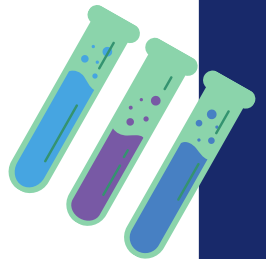

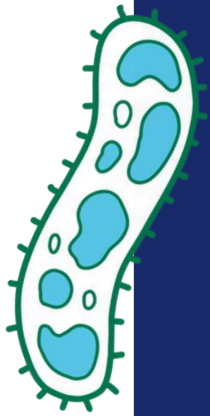

Question #22

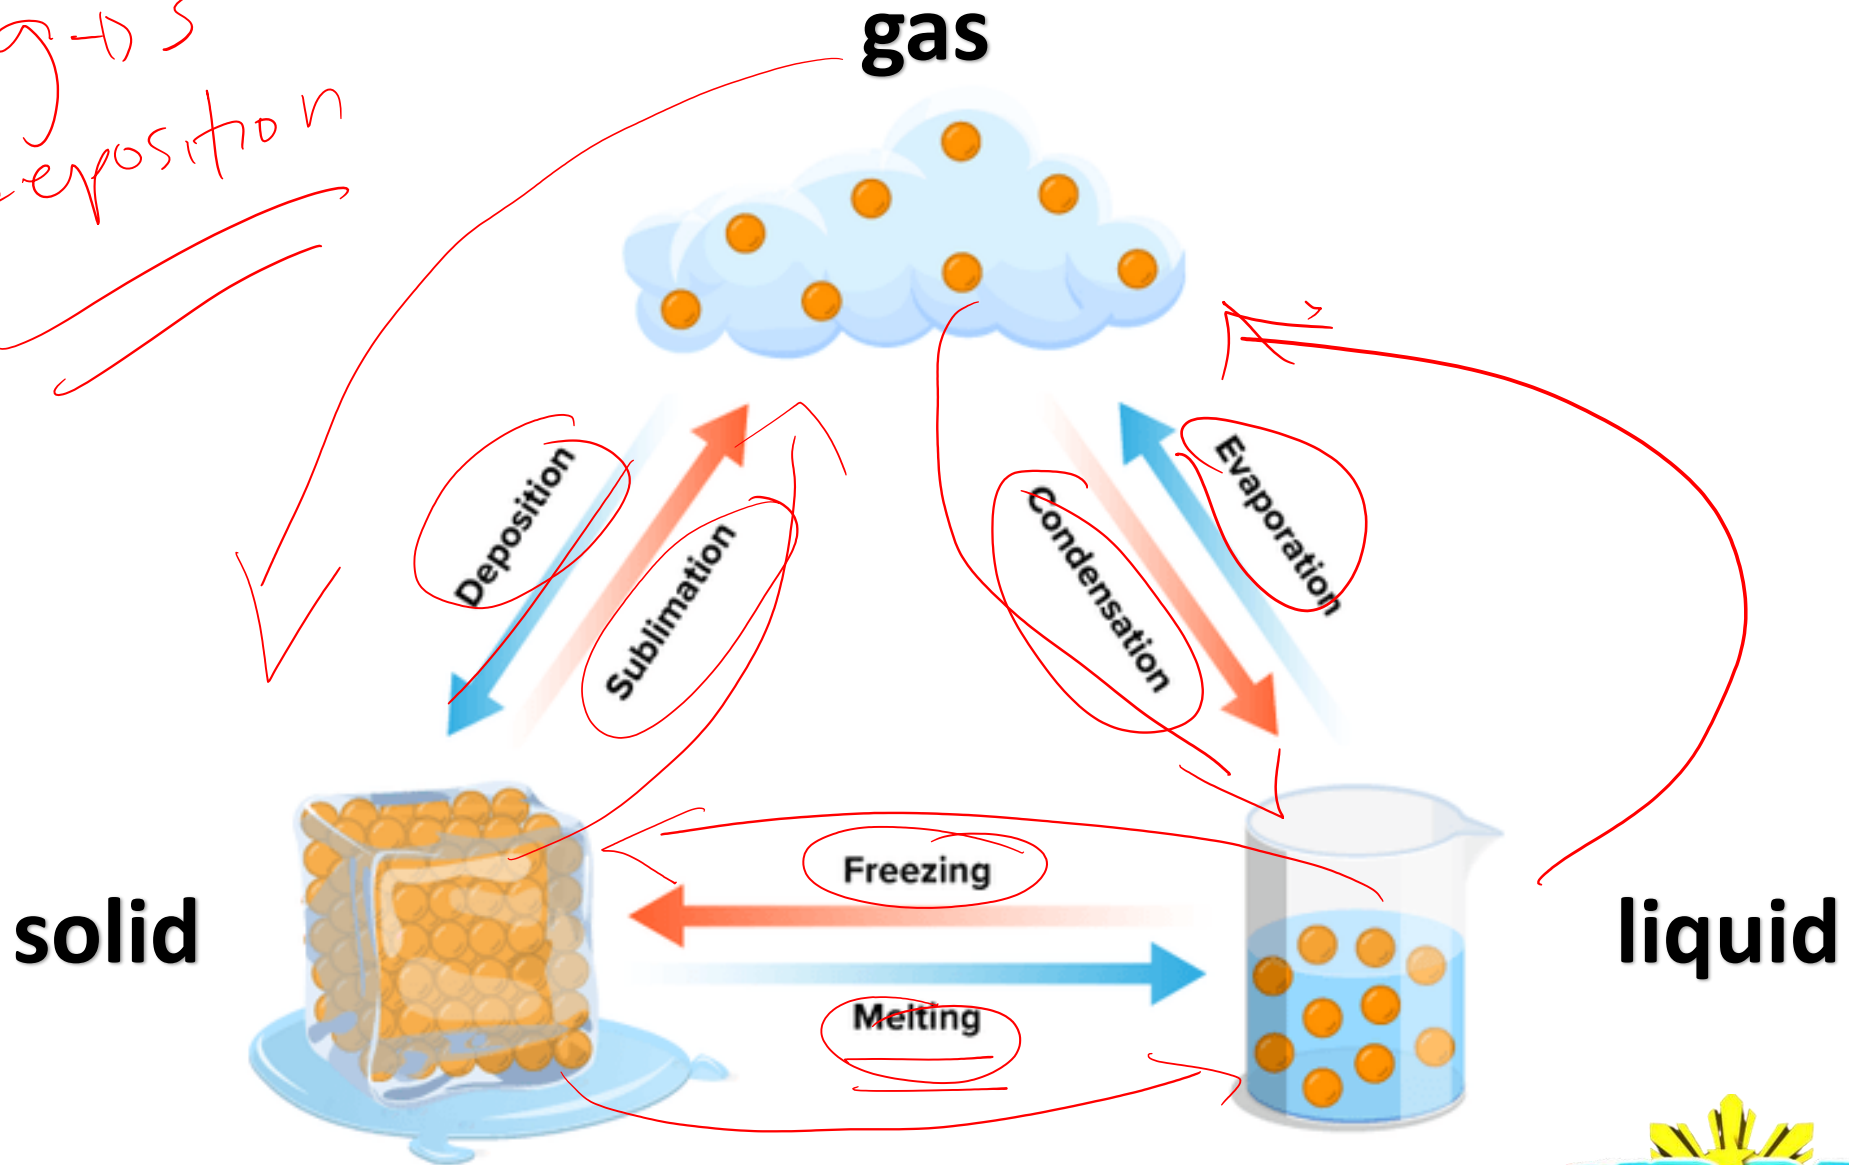

What is the process called when a solid turns directly into a gas?

- A. Evaporation
- B. Condensation
- C. Sublimation**
- D. Deposition

GENED SCIENCE REFRESHER REVIEW

Question #23

Which instrument is used to measure atmospheric pressure?

- A. Thermometer
- B. Barometer
- C. Anemometer
- D. Hygrometer

Question #23

Which instrument is used to measure atmospheric pressure?

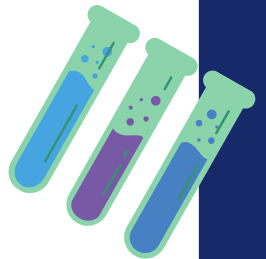

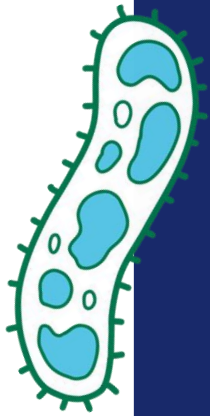

- A. Thermometer – temperature
- B. Barometer – atmospheric pressure**
- C. Anemometer – wind speed
- D. Hygrometer – humidity (amount of water vapor)

Question #24

What are the building blocks of proteins?

- A. Amino acids
- B. Nucleotides
- C. Fatty acids
- D. Monosaccharides

Question #24

What are the building blocks of proteins?

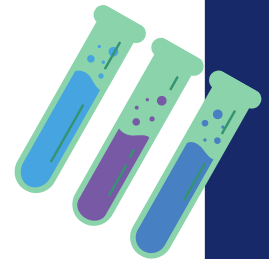

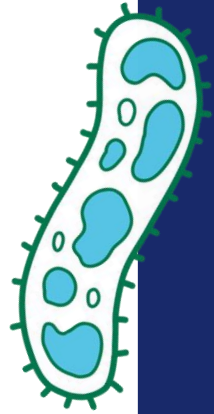

Building Blocks | Macromolecules

A. Amino acids - Proteins

B. Nucleotides - DNA

C. Fatty acids - Lipids

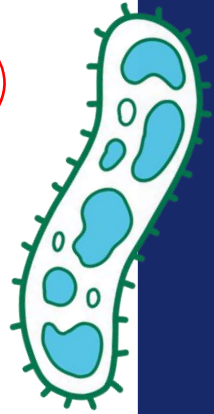

D. Monosaccharides - Sugars

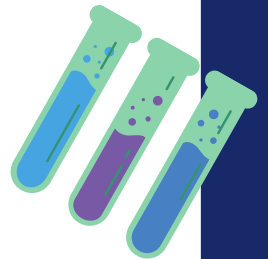

Question #25

Which type of mirror is used as a side-view mirror in vehicles to provide a wider field of vision?

- A. Plane mirror
- B. Concave mirror
- C. Convex mirror
- D. Parabolic mirror

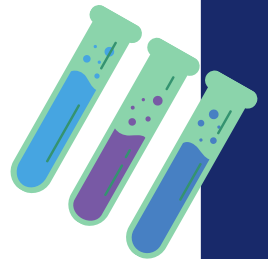

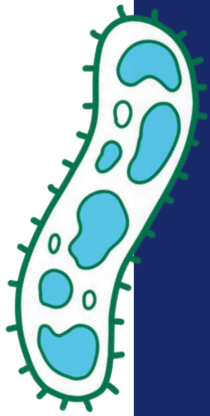

Question #25

Which type of mirror is used as a side-view mirror in vehicles to provide a wider field of vision?

- A. Plane mirror
- B. Concave mirror
- C. Convex mirror**
- D. Parabolic mirror

Question #26

Which blood type is known as the "universal donor"?

- A. AB⁺ positive
- B. AB⁻ negative
- C. O⁺ positive
- D. O⁻ negative

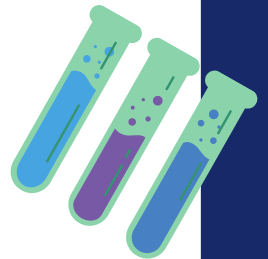

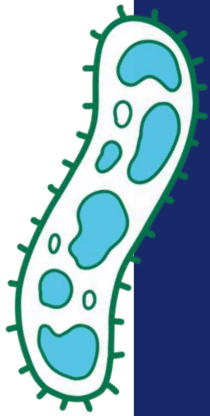

Question #26

Which blood type is known as the "universal donor"?

- A. AB positive – universal recipient
- B. AB negative – rarest blood type
- C. O positive – most common
- D. O negative – universal donor**

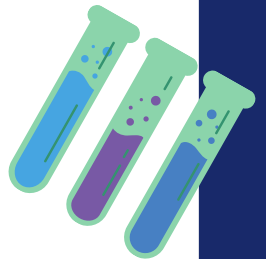

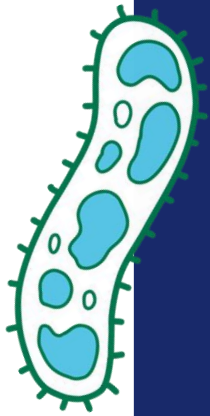

Question #27

Which discovery is Alexander Fleming famous for?

- A. Gravity
- B. Radium
- C. Penicillin
- D. The structure of DNA

Question #27

Which discovery is Alexander Fleming famous for?

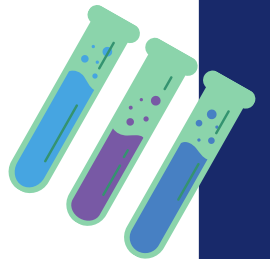

- A. Gravity- Isaac Newton
- B. Radium – Marie Curie
- C. Penicillin – Alexander Fleming**
- D. The structure of DNA – James Watson and Francis Crick

Question #28

Which scientist proposed the theory of evolution by natural selection?

- A. Gregor Mendel
- B. Charles Darwin
- C. Jean-Baptiste Lamarck
- D. Louis Pasteur

Question #28

Which scientist proposed the theory of evolution by natural selection?

A. Gregor Mendel – modern genetics

B. Charles Darwin - evolution

C. Jean-Baptiste Lamarck – “use and disuse”

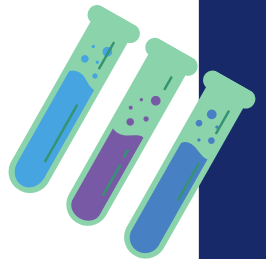

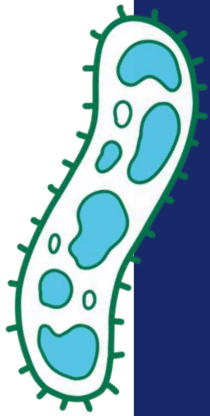

D. Louis Pasteur – pasteurization

Question #29

Which human organ system is responsible for producing hormones?

- A. Nervous system
- B. Digestive system
- C. Endocrine system
- D. Excretory system

Question #29

Which human organ system is responsible for producing hormones?

- A. Nervous system – balance and coordination; think, feel, and do
- B. Digestive system – breaking down of food
- C. Endocrine system – hormones and glands**
- D. Excretory system – waste elimination

excrete

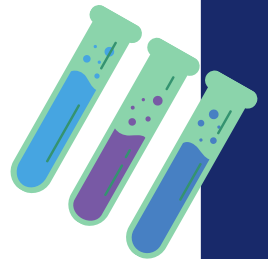

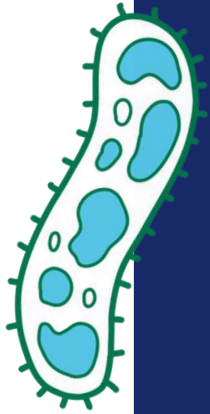

Question #30

Which scale is used to measure the magnitude of earthquakes?

↳ seismograph

- A. Richter Scale
- B. Kelvin Scale
- C. Beaufort Scale
- D. Celsius Scale

Question #30

Which scale is used to measure the magnitude of earthquakes?

↳ seismograph

- A. Richter Scale – earthquake magnitude**
- B. Kelvin Scale – absolute temperature
- C. Beaufort Scale – wind force at sea or land
- D. Celsius Scale – freezing and boiling point (0°C and 100°C)

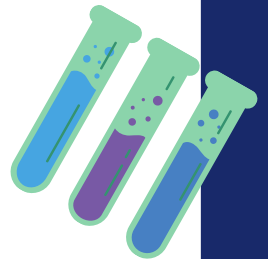

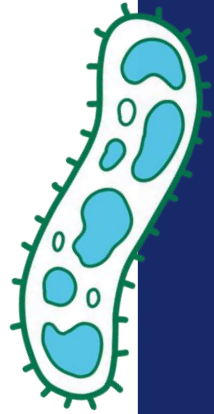

Question #31

What is the phenomenon where light bends as it passes from one medium to another?

bending of light

- A. Reflection
- B. Refraction
- C. Diffraction
- D. Polarization

Question #31

What is the phenomenon where light bends as it passes from one medium to another?

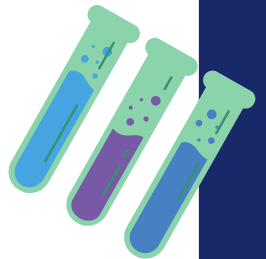

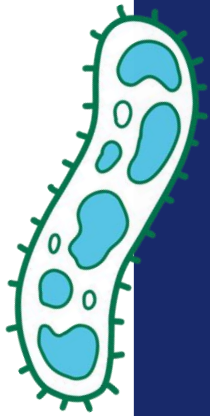

- A. Reflection- bouncing back of light
- B. Refraction – bending of light**
- C. Diffraction – bending and spreading of light
- D. Polarization – light specifies the geometrical orientation of the oscillations

Question #32

Which part of the plant cell is responsible for photosynthesis?

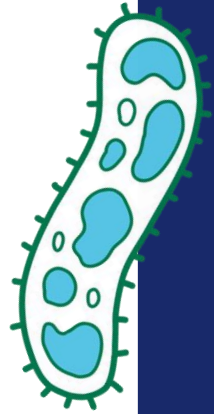

- A. Mitochondria
- B. Nucleus
- C. Chloroplast
- D. Ribosome

Question #32

Which part of the plant cell is responsible for photosynthesis?

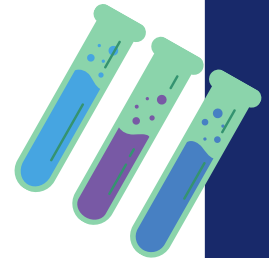

A. Mitochondria – powerhouse of the cell

B. Nucleus – DNA storage

C. Chloroplast – site of photosynthesis

D. Ribosome – protein synthesis

Chlorophyll → green pigment

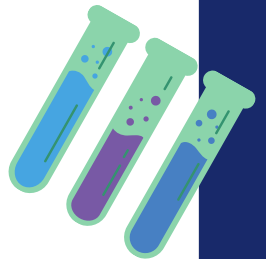

Question #33

What is the most abundant gas in the universe?

- A. Hydrogen
- B. Helium
- C. Oxygen
- D. Carbon

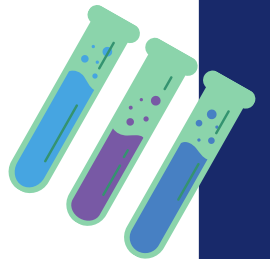

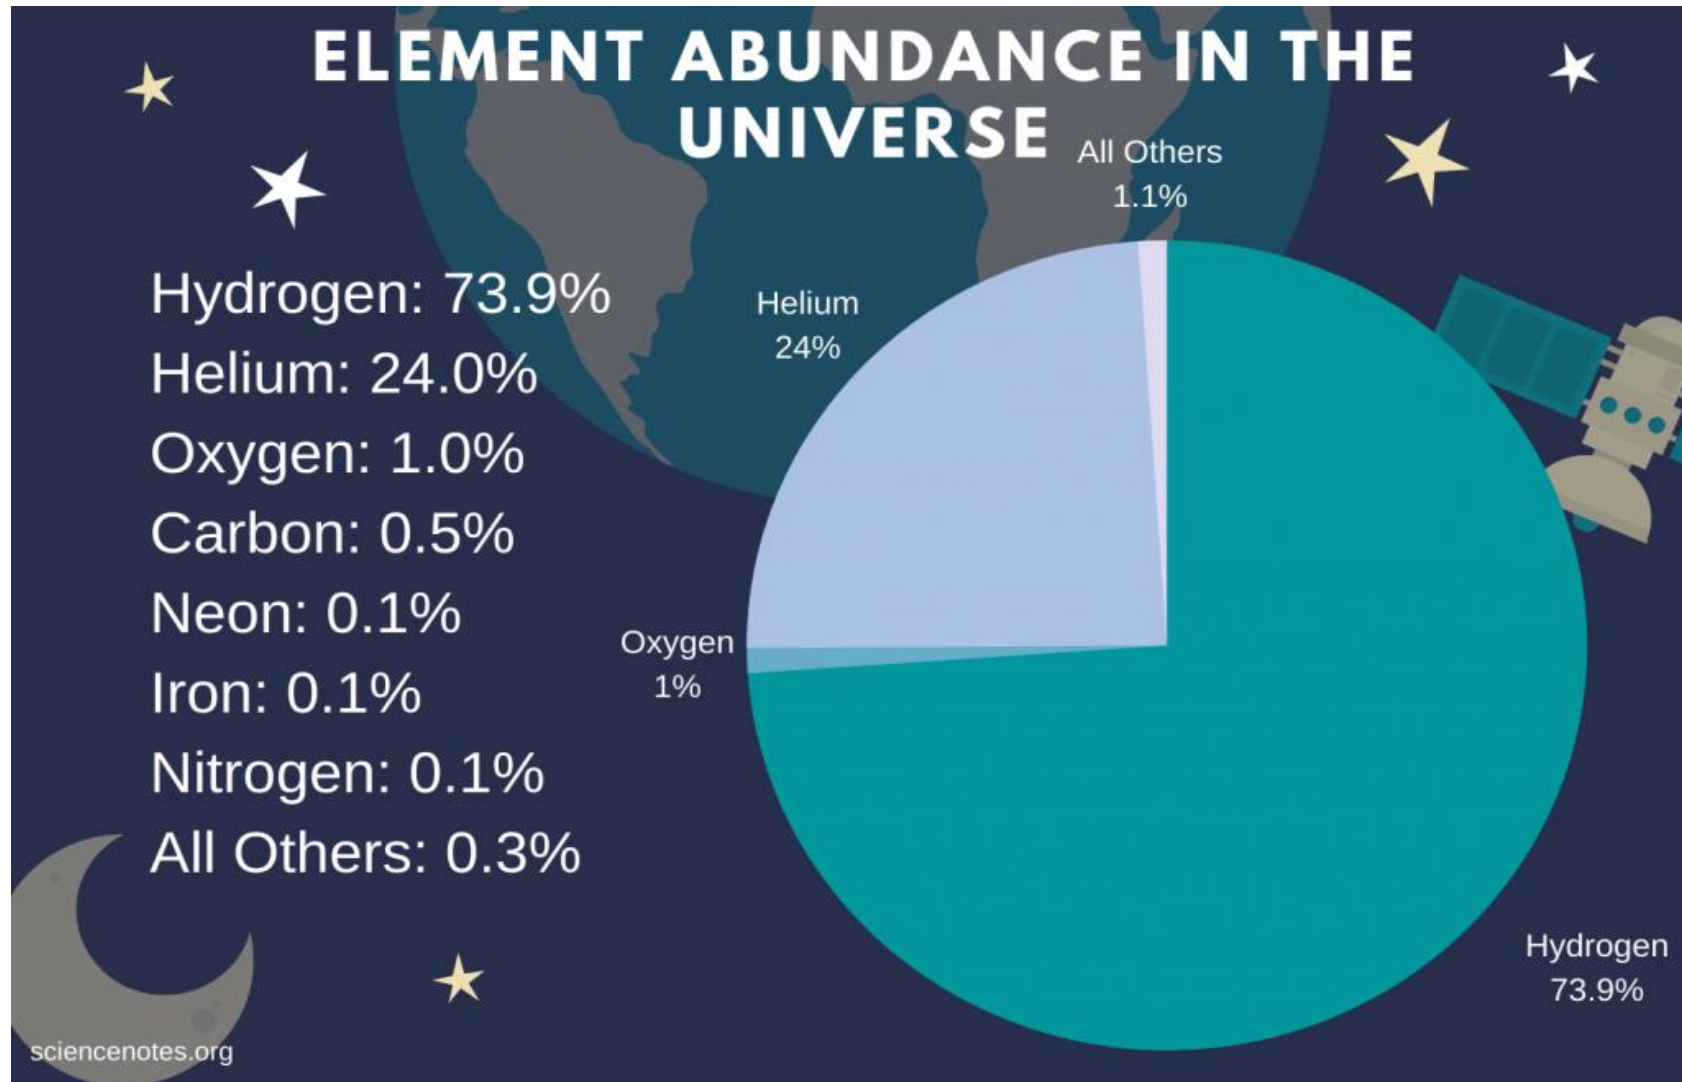

Question #33

What is the most abundant gas in the universe?

- A. Hydrogen**
- B. Helium
- C. Oxygen
- D. Carbon

Question #35

Which scientist is often called the "Father of Modern Genetics"?

- A. Gregor Mendel – modern genetics**
- B. Louis Pasteur – pasteurization
- C. Nikola Tesla – Tesla coil and alternating current (AC)
- D. Alexander Graham Bell - telephone

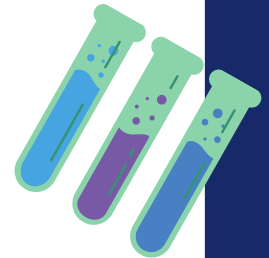

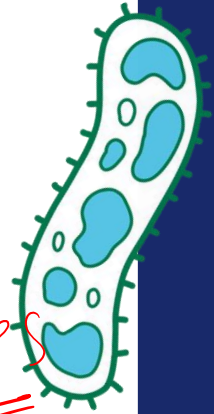

Question #36

What is the name of the boundary between two tectonic plates that are sliding past each other?

- A. Divergent boundary
- B. Convergent boundary
- C. Transform boundary
- D. Subduction zone

plate boundaries

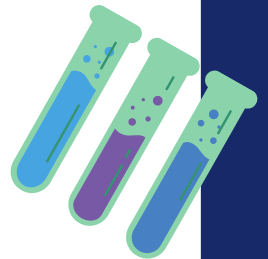

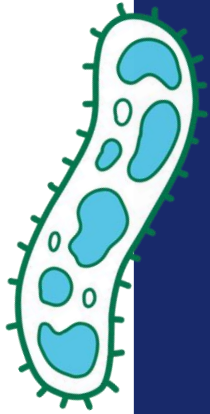

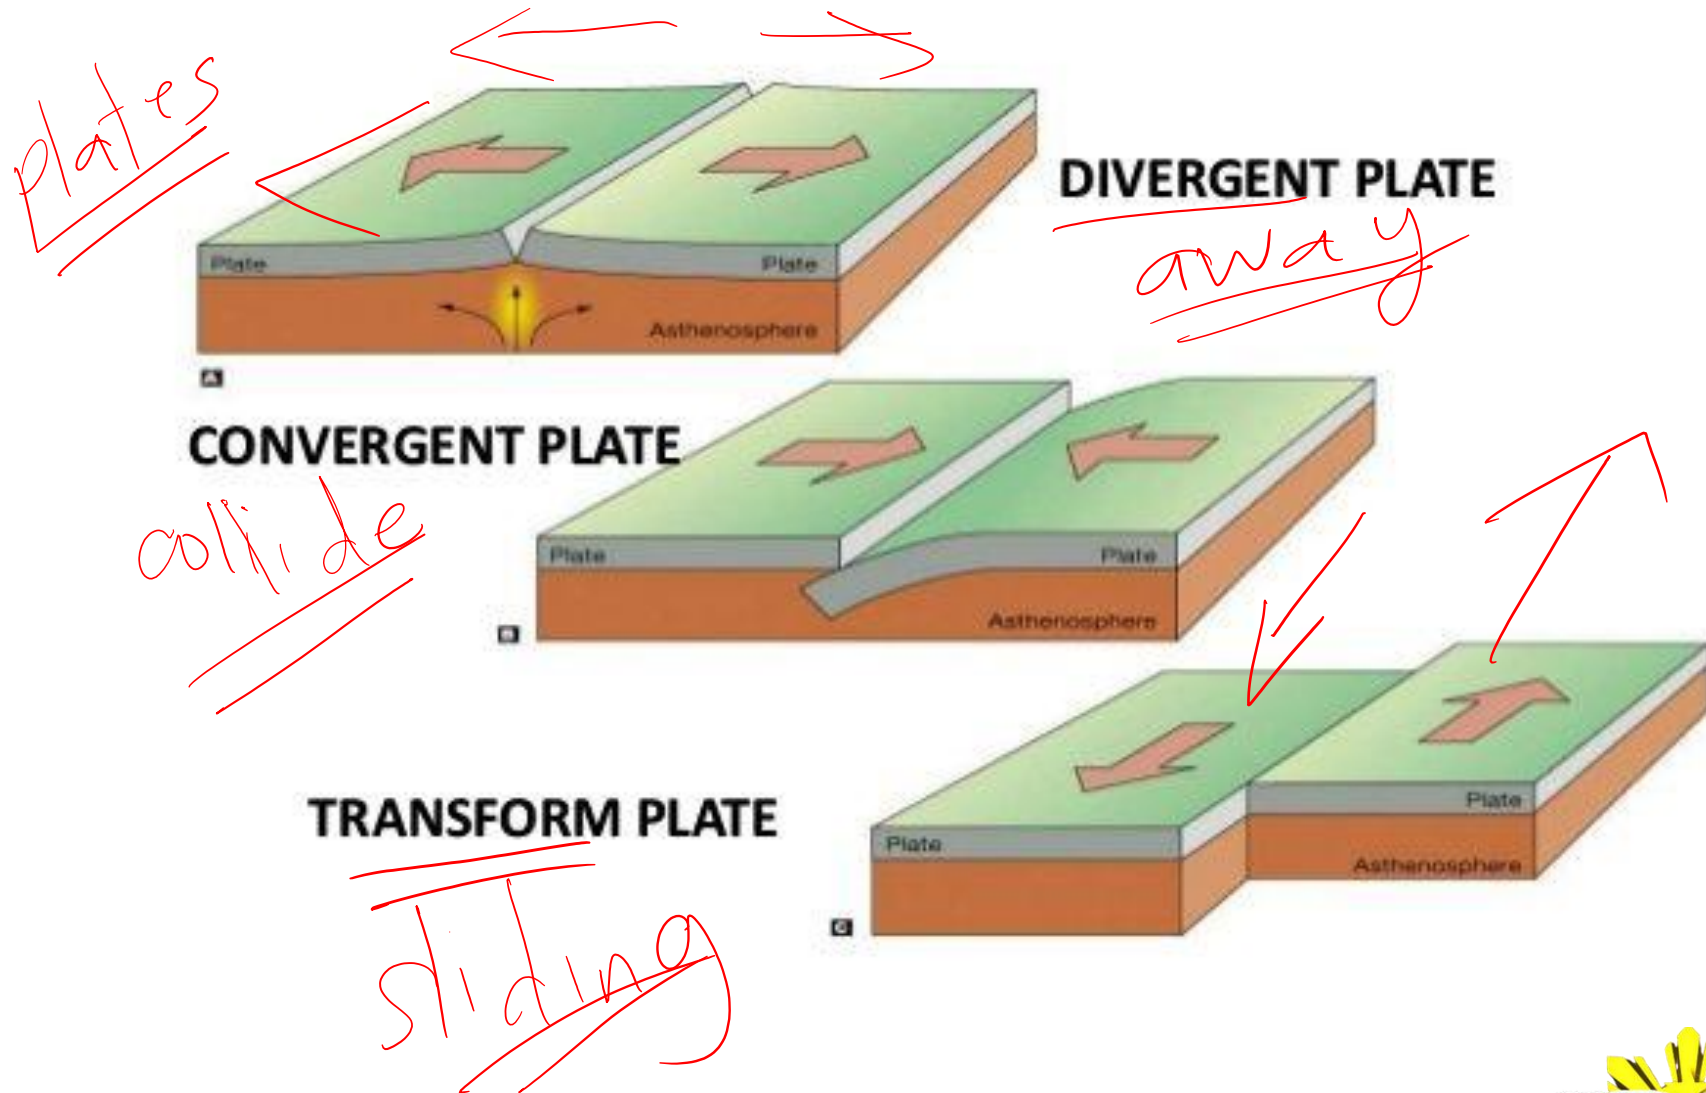

Question #36

What is the name of the boundary between two tectonic plates that are sliding past each other?

- A. Divergent boundary
- B. Convergent boundary
- C. Transform boundary**
- D. Subduction zone

Question #38

What is the SI unit of force?

- A. Joule – energy, work, heat
- B. Pascal - pressure
- C. Watt - power
- D. Newton - force**

Question #39

Which part of the human eye controls the amount of light that enters?

- A. Retina
- B. Cornea
- C. Iris
- D. Lens

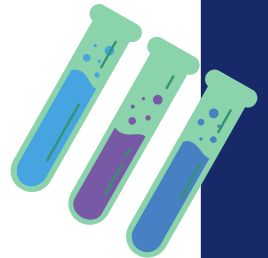

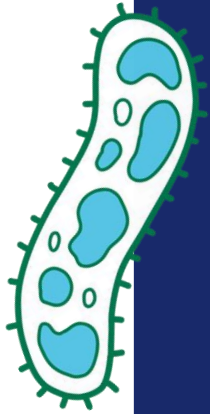

Question #39

Which part of the human eye controls the amount of light that enters?

- A. Retina – detects light
- B. Cornea – protective shield
- C. Iris – controls amount of light
- D. Lens – “focus”

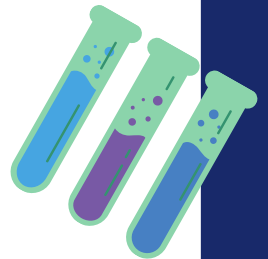

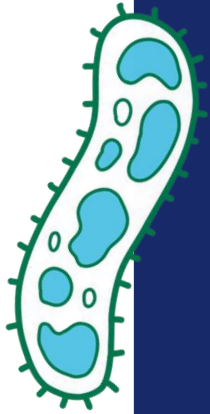

Question #40

Which layer of the atmosphere contains the **ozone layer**?

- A. Stratosphere ✓
- B. Troposphere ✓
- C. Mesosphere ✓
- D. Exosphere ✓

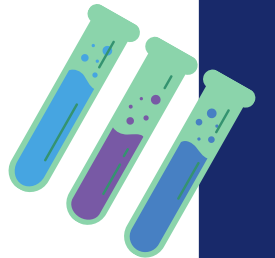

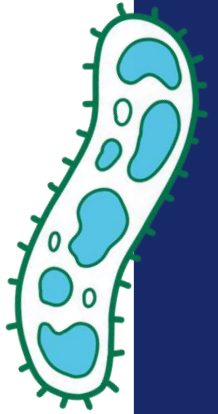

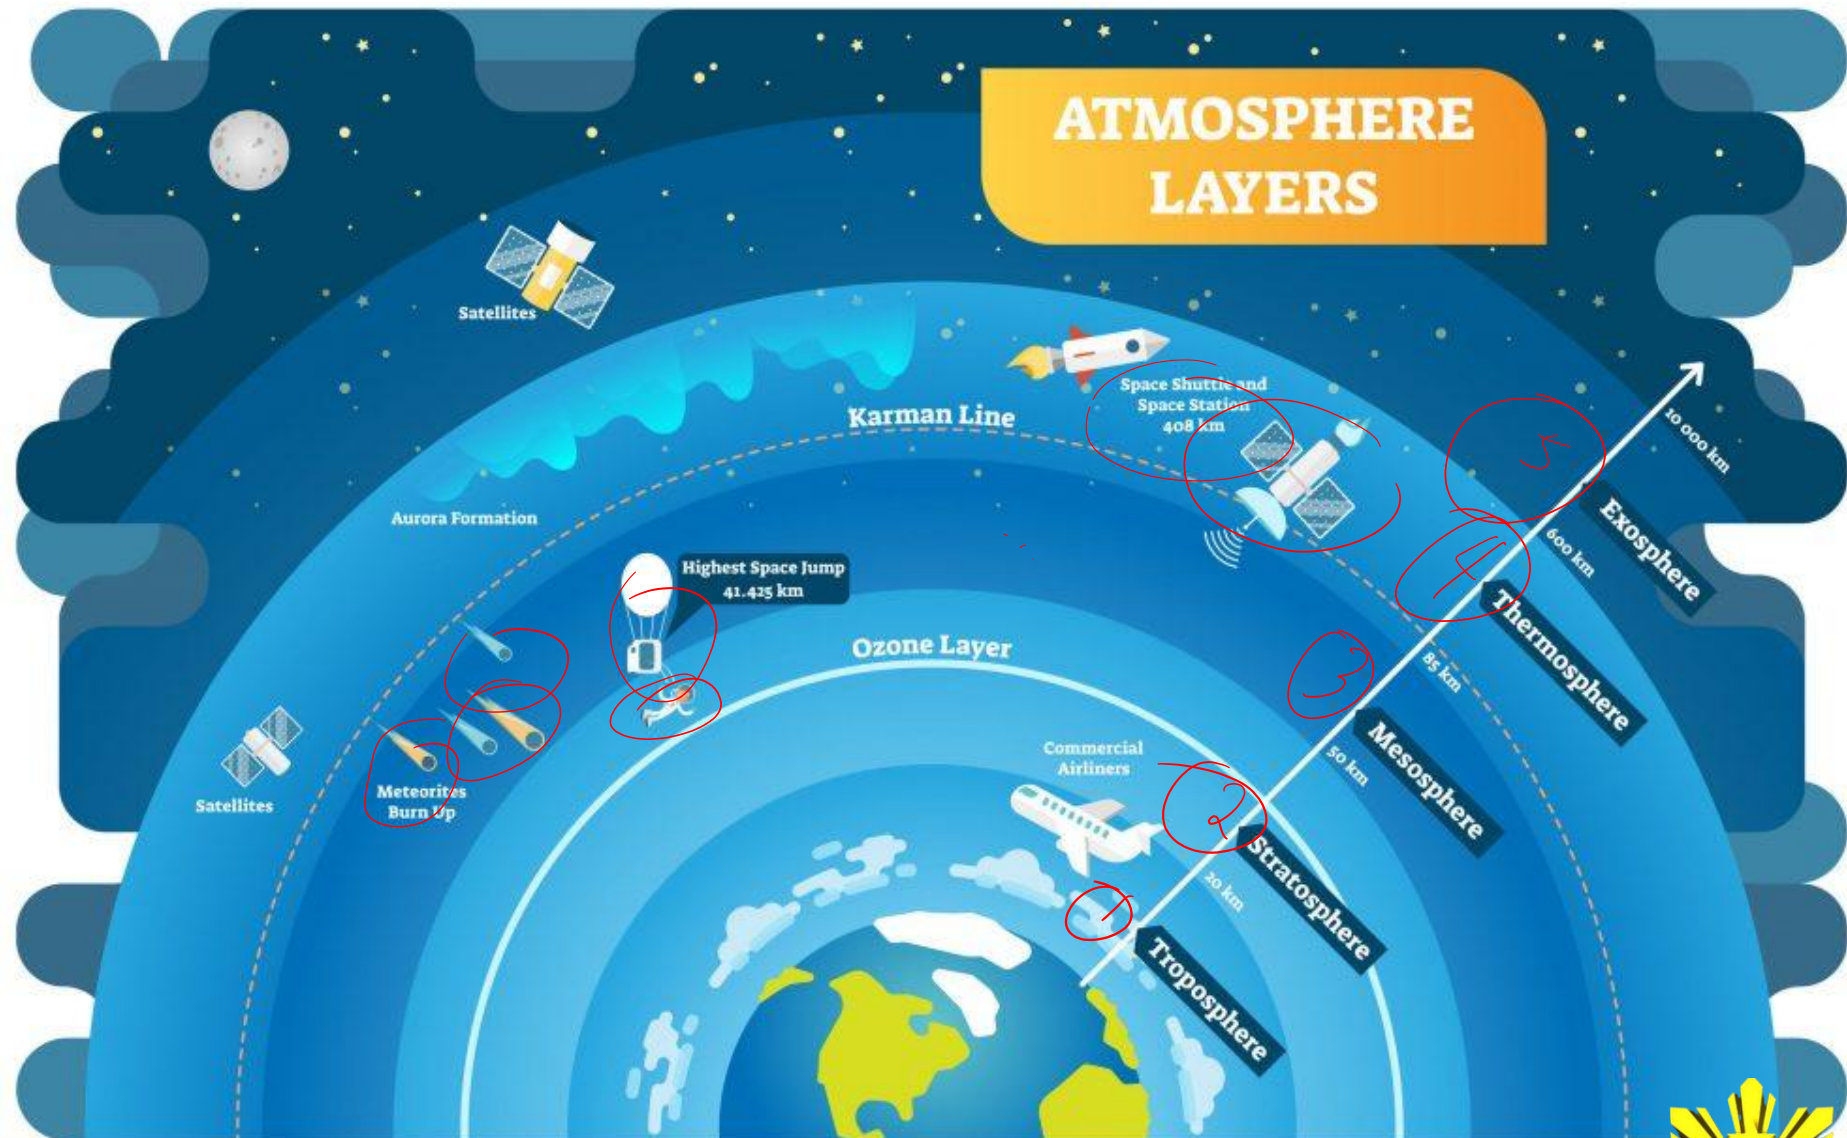

Question #40

Which layer of the atmosphere contains the ozone layer?

- A. Stratosphere**
- B. Troposphere
- C. Mesosphere
- D. Exosphere
