

Some tips in doing math

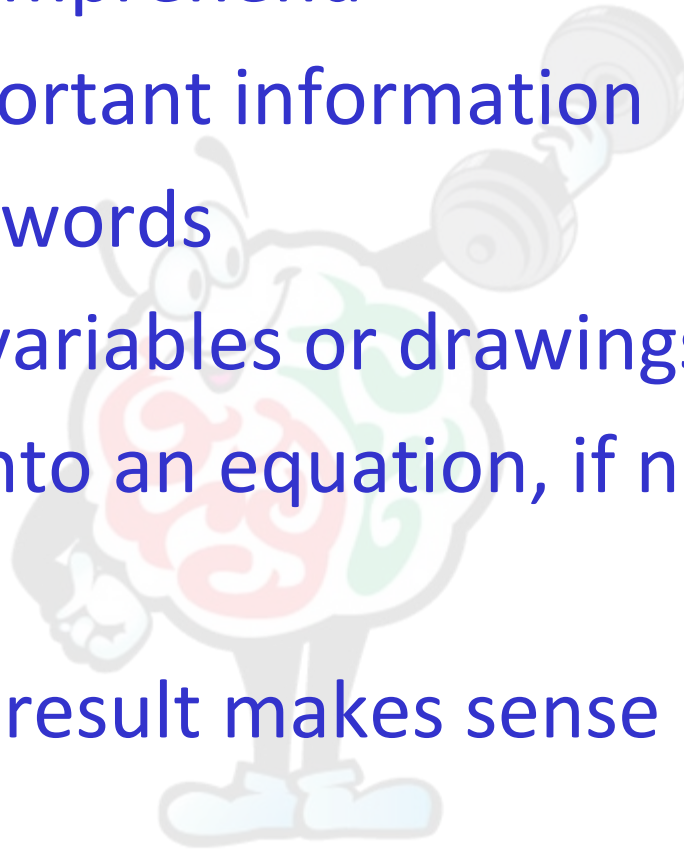

I love math

- No “one way” to solve in math
- Know what works for **you!**
- Math is **not memorization.**
- Focus should be on **understanding, not mastering procedure.**
- We unconsciously do math and are **good** at it.

Solving word problems

- Read and comprehend
- Identify important information
- Look for keywords
- Represent: variables or drawings
- Transform into an equation, if needed
- Solve
- Check if the result makes sense

Know your calculator

Perform these operations:

$$29^2$$

$$\frac{46.94 + 25.06}{3.2 \times 4.5}$$

$$\sqrt{144}$$

$$1.4^2$$

$$3\frac{1}{8} + 21\frac{4}{5}$$

$$4 \times (3 \div 8)$$

$$\frac{6.8 \times 3.25}{12.25 \div 49}$$
