EDUCATION AND

EDUCATING THE TEACHER

Quick look at contents

- Historical, Sociological, Anthropological Component
- Philosophical Component
- Western Philosophy
- Social Dimensions and Legal Bases

Terms	Definition
Education	Any act or experience that has a formative effect on the mind, character or physical ability of an individual. In its technical sense, education is the process by which society deliberately transmits its accumulated knowledge, skills and values from one generation to another
Learning	Acquiring new knowledge, behaviors, skills, values, preferences or understanding, and may involve synthesizing different types of information.
Learner	Someone (especially a child) who learns (as from a teacher) or takes up knowledge or beliefs
Teacher	A person who provides schooling for others. One who facilitates education for an individual student or for a group of students
Teaching	The activities of educating or instructing or teaching; activities that impart knowledge or skill

Dr. Carl E. Baltz's Ultimate Learning Guide to LET Review

HISTORICAL FOUNDATIONS OF EDUCATION

Present Period (1986-
present)

New Society (1972-
1986)

Republic Period (1943-
1945)

Japanese Period
(1943-1945)

Commonwealth Period
(1935-1942)

American Period
(1898-1946)

Spanish Period (1521-
1898)

Pre-Spanish Period
(before 1521)

Dr. Carl E. Baltz's Ultimate Learning Guide to LET Review

Pre-Spanish Period		
Focus/Aim/Goal of Education	Method of Education (Delivery Mode)	Other Features
Promote education for survival, conformity and enculturation 	• Informal education (tell me/show me; trial and error) • Practical training • Theoretical training	Evidence of early education: • Ceramic industry • Syllabary writing among Tagbanwas and Mangyans • Megalithic structures of rice terraces

Dr. Carl E. Balita's Ultimate Learning Guide to LET Review

Spanish Period	
Focus/Aim/ Goal of Education	Propagate Christianity
Method of Education (Delivery Mode)	• Formal education • Religious education • Vocational courses/education • Education through dictation and memorization
Trends in education	Vernacular – medium of instruction
Promulgate d Laws	• 1565: Parochial schools started in Cebu by Augustinian Missionaries • Colegios: schools for boys • Beaterios: school for girls • Royal Decree 1863: establishment of overall public school system and provision for the training of teachers through normal school
Other features	Spanish friars produced the 1 st grammars and dictionaries that led to the development of Filipino languages

Dr. Carl E. Baltia's Ultimate Learning Guide to LET Review

American Period	
Focus/Aim/Goal of Education	Teach democracy as a way of life and train Filipinos for self-government
Method of Education (Delivery Mode)	• Formal education • Education is through socialized recitation and active participation of students
Trends in education	• English as common language • Reading, writing, arithmetic, language, GMRC, civics, hygiene and sanitation, gardening, domestic science, American and Philippine history were the subject areas for study
Promulgated Laws	• Education Act of 1901 (Act no. 74) ◦ Establish a department of public instruction ◦ Establish a highly centralized system ◦ Provide for the importation of teachers ◦ Create the Philippine Normal School

Dr. Carl E. Bata's Ultimate Learning Guide to LET Review

American Period	
Other features	• 1925: The Monroe Survey Commission was created to evaluate the school system • 1908: University of the Philippines was founded – the first school with University Status

Commonwealth Period	
Focus/Aim /Goal of Education	• 1935 Constitution: Develop moral character, personal discipline, civic conscience and vocational efficiency to teach the duties of citizenship • Continue the promotion of democratic ideals and ways of life
Method of Education (Delivery Mode)	Training was done through public schools or private schools (sectarian or non-sectarian)
Trends in education	• Education under the Commonwealth was to help prepare for the coming independence of a new Filipino nation • Curricular emphasis on character education and citizenship training

Dr. Carl E. Baltos's Ultimate Learning Guide to LET Review

Commonwealth Period

Promulgated Laws

- Education Act of 1940 (Commonwealth Act of 588)
- Act No. 4607: Complete abolition of matriculation fees
- EO 134 in 1936: Tagalog as the basis of national language
- EI 236 in 1940: Teaching of national language in the senior year of all high schools and all years in normal schools
- CA 117: Placed all public school teachers under civic service rules
- CA 578: Conferred the status of "persons on authority" on supervisors, principals, teachers and professors training adults
- CA 80: Provide the legal basis for adult education pursuant to the constitutional provision on citizenship training for adults
- CA 589 in 1940: Established a school ritual in all public and private elementary and high schools consisting of solemn patriotic ceremonies that include the singing of the National Anthem and recitation of Patriotic Pledge
- CA 1: National Defense Act of Dec. 21, 1935, provided for the preparatory military training
- OD 1706 of 1980: Known as the National Service Law, required all citizens to render civic welfare service, law enforcement service and military service

Japanese Period

Focus/Aim/Goal of Education	Make people understand the position of the Philippines in the Greater East Asia Co-prosperity Sphere and inspire people with the spirit to love labor
Method of Education (Delivery Mode)	Formal education focused on vocational, agricultural and technical
Trends in education	• Curricular content centered on values rooted on love of labor • Diffusing the use of Niponggo • Termination the use of English language in schools
Other features	Stressed on the dignity of manual labor

Republic Period

Focus/Aim/Goal of Education	• Promotion of equal education for all • Full realization of democratic ideals • Characteristics ✓ Democracy is predicated upon the worth of the individual ✓ Individuals realized their capacities but in social context ✓ Society is not separated from the individual ✓ Democracy thrives on change; it is dynamic and flexible
------------------------------------	--

Republic Period

Method of Education (Delivery Mode)

Formal education, formation of Presidential Commission to Survey Philippine Education (PCSPE) and restatement of National Development Goals and Educational Aims

Trends in Education

Cultural content stressed on:

- Social orientation as manifested by the conservation of the Filipino heritage
- Training for occupation
- Promotion of democratic nation building
- A new thrust on community development

Dr. Carl E. Balita's Ultimate Learning Guide to LET Review

A Teacher's Prayer

Lord, let me be just what they need. If they need someone to trust, let me be trustworthy. If they need sympathy, let me sympathize. If they need love, (and they do need love), let me love, in full measure. Let me not anger easily, Lord but let me be just. Permit my justice to be tempered in your mercy. When I stand before them, Lord, let me look strong and good and honest and loving. And let me be as strong and good and honest and loving as I look to them. Help me to counsel the anxious, crack the covering of the shy, temper the rambunctious with a gentle attitude. Permit me to teach only the truth. Help me to inspire them so that learning will not cease at the classroom door. Let the lessons they learn make their lives fruitful and happy. And, Lord, let me bring them to You. Teach them through me to love You. Finally, permit me to learn the lessons they teach.

Republic Period

Promulgated Laws

- RA 139: Board of Textbooks Law of June 14, 1947, created to screen and approve textbooks for use in all public school for a period of 6 years from the date of adoption
- RA 896 (Education Act of 1953) enacted on June 20, 1953, repealed CA 586 and provided:
 - ✓ Restoration of grade 7 (not implemented due to lack of funds)
 - ✓ Abolition of double-single sessions
 - ✓ Practice for 1 class under 1 teacher in the primary and 3 teachers to 2 classes, 5 teachers to 3 classes in the intermediate
 - ✓ Compulsory completion of elementary grades
 - ✓ Compulsory enrollment of children in the public schools upon reaching 7 years old
- RA 1979 (June 15, 1954): Made permanent civil service eligibility of teachers
- RA 1124 (June 16, 1954): Created the BNE (Board of National Education)
Tasks of BNE:
 - ✓ Formulating educational policies
 - ✓ Directing Philippine education

Note: BNE was later named as NBE (National Board of Education) by PD no. 1 and was abolished by the creation of BHE (Board of Higher Education) by Batas Pambansa Big. 232, now the task was assumed by CHED under RA 7722

Republic Period

Promulgated Laws

- RA 1265 (June 11, 1956) Daily flag ceremony shall be compulsory in all schools
- RA 1425 (June 12, 1956): Prescribed the inclusion of life, works and writings of Jose Rizal especially "Noli Me Tangere and El Filibusterismo" in the curricula of all schools in all levels.
- RA 4670 (June 18, 1966): Magna Carta for Public School Teachers
- RA 5447: Special Education Fund of 1968
- RA 6047: Barrio High School Law

Dr. Carl E. Baltas's Ultimate Learning Guide to LET Review

New Society

Focus/Aim
/Goal of
Education

- The aim of the education is for national development
- Make education relevant to the needs of the changing world

Method of
Education
(Delivery
Mode)

Curricular Changes

Elementary
Education

Secondary
Education

- Focused on 3Rs
- Integration of values in all learning areas
- Emphasis on mastery learning

- Increase in time allotment
- YDT and CAT as new courses
- Elective offerings as part of the curriculum

New Society

Trends in education 	• Project IMPACT – instructional management by parents, community and teachers • ISOSA – In School, Off School Approach • CPS – Continuous Progression Scheme • PRUDED – program for a decentralized educational development
Promulgated Laws 	• Bilingual Educational Policy – use of English and Filipino as media of instruction in specific learning areas • Proclamation on 1081 (Sept. 21, 1972): Educational Revolution • PLEDGES: Place and order, land reform, economic development, development of moral values, government reorganization, employment and manpower development and social services
Other features	• NCEE – National College Entrance Examination • NEAT – National Elementary Assessment Test • NSAT – National Secondary Assessment Test

Present Period

Focus/Aim /Goal of Education	Promote national development and values education
Method of Education (Delivery Mode)	Implementation of NESC that features: •Emphasis on mastery learning •Development of 3Rs •Development of intellectual skills •Student-centered •Multidisciplinary treatment of curriculum
Trends in education	• Cognitive-affective manipulative-based curriculum • Values education offered as separate subject area • Emphasis in science and technology • Use of bilingual policy • Emphasis on critical thinking
Promulgated Laws	
• DECS Order no. 6, 1998 – issued by DECS Sec. Lourdes K. Quisumbing ✓ Strengthening the teaching values in the NESC ✓ National budget appropriates the highest allocation for education	

Dr. Carl E. Baltis's Ultimate Learning Guide to LET Review

Present Period

Promulgated Laws

- Implementation of SEDP with features
 - ✓ Subjects are generally oriented to the development of values
 - ✓ Specific competencies
 - ✓ Concept-based subject areas
 - ✓ Uni-disciplinary treatment of curriculum content
- RA 7722 – The Higher Education Act of 1994 – created CHED (Commission on Higher Education) to be headed by a chairman under the Office of the President
- RA 7796 – TESDA Law – created TESDA (Technical Education and Skills Development Authority)
- RA 7784 – August 4, 1994 – an act to strengthen teacher education by establishing Centers of Excellence (provides for the establishment of CENTREXES in each region in the country which shall be maintained for 5 years)
- RA 7687 – Created the S & T Scholarships for indigent but deserving youth in the country under DOST
- RA 7168 – Dec. 26, 1992, converted the Philippine Normal College into Philippine Normal University

Present Period

Promulgated Laws

- RA 7736 in 1994 – Abolished the NCEE mandated by PD 146
- RA 7836 in 1994 – Revised PD 1006 which created Professional Board for Teachers and provided for LET (Licensure Examination for Teachers) administered by PRC (Professional Regulation Commission)

Dr. Carl E. Baltas's Ultimate Learning Guide to LET Review

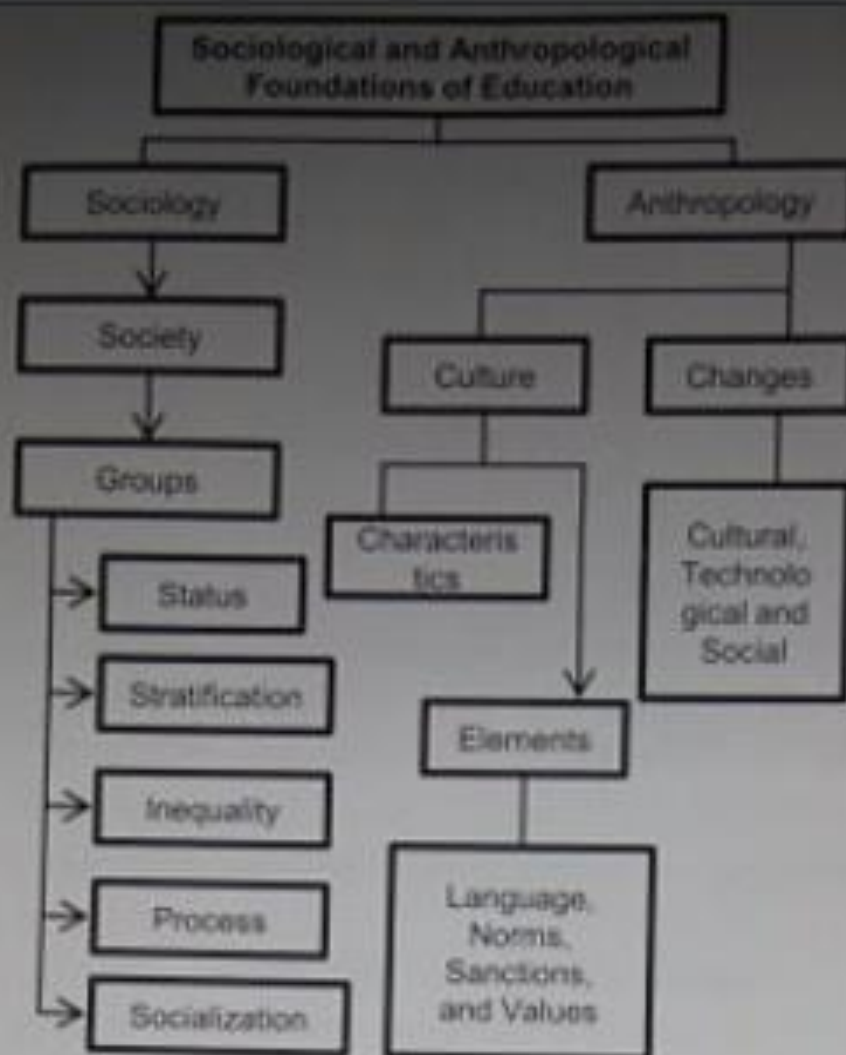

Future Direction of Philippine Education

Focus/Aim/Goal of Education	Education for All (mandated by Philippine Proclamation 480), whose vision is anchored on humanities and equalitarianism Components: • ECCD – Early Childhood Care and Development • UQPE – Universal Quality of Primary Education • EOI – Eradication of Illiteracy • CE – Continuing education
Method of Education (Delivery Mode)	Employing non-traditional means of ensuring that children stay in school and establishing the viable alternative learning system encompassing non-formal and informal education

Future Direction of Philippine Education

Trends in Education

- TEEP (Third Elementary Education Project) – DepEd's response to social reform agenda
- NEAP (National Educators Academy of the Philippines)
- ✓ Internalize EFA's goals
- ✓ Expansion of preschool service (impact of 8-week Early Childhood Experiences in Grade 1 scheme)
- ✓ Strengthening the Foundations of Education
- Improving the quality of Primary Education
- Program intervention
- Multi-level materials-assisted instruction
- Alternative learning approaches for special children
- School teaching with parent-teacher partnership and community
- Comprehensive teacher education and development program
- Upgrade teaching approaches and techniques through school-based visit by principals

Dr. Carl E. Biala's Ultimate Learning Guide to LET Review

SOCIAL CONCEPTS:

1. Values
2. Value System
3. Value Classification
4. Value Ranking
5. Value Conflict
6. Justice
7. Freedom, Right, Responsibility
8. Sense of Nationhood
9. Ethics/Moral Law
10. Nationalism

Social Concepts

Values	Generally considered as something (a principle, quality, act or entity) that is intrinsically desirable which are, in a sense, contagious
Value System 	• A system of established values, norms or goals shared in a society or group • Included primary values: ✓ Individual freedom based on facts of human diversity and genetic uniqueness ✓ Charity and compassion ✓ Valuing of the self to develop self-concept and potentials for growth ✓ Valuing of others which includes trust as the requirement for good citizenship
Value Classification	Having a clear set of values and realizing the values a person holds depending on factors such as environment, education and personality
Value Ranking	• A deliberate and conscious process by which mature person arrives at a fairly well-articulated, thoughtful ranking of his chosen values • Interrelationship of values is explored within any given individual

Social Concepts

Value Conflict

When somebody imposes a value ranking on someone else, conflict and polarization occurs

Ethics or Morals

- Based on standard in life
- To each standard corresponds a certain behavior according to which a person must live

Freedom, Rights and Responsibility

- Freedom – is not absolute, with certain restrictions or constraints to being free such as law, norm, custom or tradition or even ignorance, lack of awareness, disabilities, fears, anxieties and past experiences
- Rights – means what is just, reasonable, equitable, what ought to be, what is justifiable, something that is owned or due to offer, means straight, something that is right in contrast to wrong
- Rights and Responsibility – comes in pairs, one of more rights and freedom, have more responsibilities

Freedom, Rights and Responsibility

Things to ponder:

- Right is absurd when it interferes with the rights of others
- All individual rights and freedom should be conceived in the light of social order

Sense of Nationhood

Nationalism

Dr. Carl E. Bialik's Ultimate Learning Guide to LET Review

Role of the School

As an agent of Cultural Change

- The state implement changes through the schools
- Schools can work out and implement some programs of social and cultural change only in cooperation of government, business sector, the church & the family

As an agent of Cultural Transmission

- Enculturation
 - ✓ Process of handing down of culture from one generation to the succeeding one
 - ✓ Passing on of group's custom, beliefs and tradition to the next generation
- Acculturation
 - ✓ The process of passing culture from one who knows to somebody who does not know
 - ✓ The passing of customs, beliefs and tradition through interaction/reading/intermingling, etc.

Role of the School

As an agent of Socialization

- Children learn how to get along with other students in the school
- Social ethics is taught in school
- The curriculum of the school is towards/focused on social development

As an agent of Modernization

- Shift in economic principle
- Evolution of religious and political ideologies
- Technological changes in the Philippines
- Social change in the Philippines
- Improvement of S & T

Dr. Carl E. Balle's Ultimate Learning Guide to LET Review

Anthropology

- Derived from the Greek words "anthros" which means man and "logos" which means science
- Science that studies the origin and development of man, his works and achievements which includes the study of physical, intellectual, moral, social and cultural development of man, including customs, norms, folkways, and beliefs

Culture

- The shared products of human learning
- Set of learned behaviors, beliefs, attitudes, values, ideals that are characteristics of a particular society or population
- The complex whole which includes knowledge, beliefs, arts, laws, morals, customs, and other capabilities and habits acquired by man as a member of society
- A fabric of ideas, beliefs, skills, tools, aesthetic objects, methods of thinking, customs and institutions into which each member of society is born

Change

- An enduring force in history, inevitably taking place from time to time
- Adjustment of persons, or group to achieve relative harmony
- Takes place in culture, society and personality

Characteristics of Culture

Transferable	Continuous	Dynamic
Shared	Learned	Symbolic
Adaptive	Universal	Borrowed

Elements of Culture

Language

- An abstract system of words, meanings and symbols for all aspects of culture
- Foundation of culture
- Verbal or Non-verbal

Norms

- Established standard of behaviors maintained by a society
- These standards must be shared and understood by all members of the society

Sanctions

Penalties or rewards for conduct concerning social norms

Negative Sanctions:
firing, imprisonment,
threats, stones,
ostracizing

Positive Sanctions:
pay, promotion, medal,
words of gratitude

Values

- Collective conceptions of what is considered good, desirable and proper or bad, undesirable and improper in a particular culture
- Used to evaluate the behavior of others

Forms of Change:

1. Cultural Change
2. Technological Change
3. Social Change

Cultural Change	Technological Change	Social Change
Refers to all alteration or addition of new trait or trait complexes to change the culture content or structure	Revision that occurs in man's application of his technical knowledge and skills as he adapts himself to environment	Refers to the variation or modification in the patterns of social organizations, of such groups within a society or of the entire society

Cultural Change	Technological Change	Social Change
Elements		
• Development of oral and written communication and other means of communication • Improvement of Science and Technology in all fields • Shift in economic principles • Evolution of religious thought and political ideologies • Alteration in the forms and rules of social interaction	• Introduction of new methods of learning • Addition of vocational education and practical arts to the curriculum • Addition of computer education to the curriculum • Inclusion of IT for factory production	Revival of nationalism themes in: • Literature • Music • Arts

Sociology

- The science of man and society
- Study of patterns of human behavior
- Study of groups and societies and how they affect people

Society

- An organized group of people that occupies a territory, who interrelates and interact with one another, recruits its members by intergroup sexual reproduction and has shared comprehensive culture, sentiments, attitudes and goals
- A group of organized individuals who think of themselves as a distinct group who live together sharing the same culture, who have some things in common

Groups

- A unit of interacting personalities with an interdependence of roles and status existing between or among members
- A number of people who at a given time interrelate and interact with one another with common, shared attitudes, aspirations and goals

Properties of Groups in a Society

Socialization

- A process of adapting or conforming to the common needs and interests of a social group or of entering human groups
- A process whereby people learn the attitudes, values and actions appropriate to individuals as members of a group learns and internalizes norms and standards of the other members among who she/he lives

Agents

• Church • Government • Mass media • Workplace • Economy • Non-governmental agencies	• School/Education • For enculturation of the group and teaching students to value oneself and others • For the basic function of teaching and learning	• Family – smallest, social institution; whose function is for transmission of culture and providing opportunities for growth and development
--	---	---

Social Process

Refers to the patterned and recurrent form of competition, conflict, cooperation, accommodation, assimilation and acculturation

Social Stratification

Classification of people based on their socioeconomic strata

Social Mobility

Refers to movement of individuals/groups from one position of a society's stratification to another

Types of Social Mobility

Horizontal Mobility	• Movement of a person from one social position to another of the same rank • Example: Teacher in a barangay school was transferred as a teacher to a school in town
Vertical Mobility	• Movement of a person from one social position to another of different rank • Example: Teacher is promoted as a supervisor
Intergenerational Mobility	• Involves changes in the social position of children relative to their parents • Example: Parent who are rich but their children became poor
Intragenerational Mobility	• Involves change in person's social position within her/his adult life • Example: A poor boy who struggled to be a successful teacher

Social Inequality

Describes a condition in which members of the society have different amounts of wealth, prestige and power

Status

Refers to the position assigned by a person in a group or organization

Philosophy in Education

Philosophy

Comes from the Greek words "philo" which means love and "sophia" which means wisdom – "Love of Wisdom"

Eastern Philosophy

R - Religion

I - Institution

M - Mysticism

E - Eastern

Philosophy

Western Philosophy

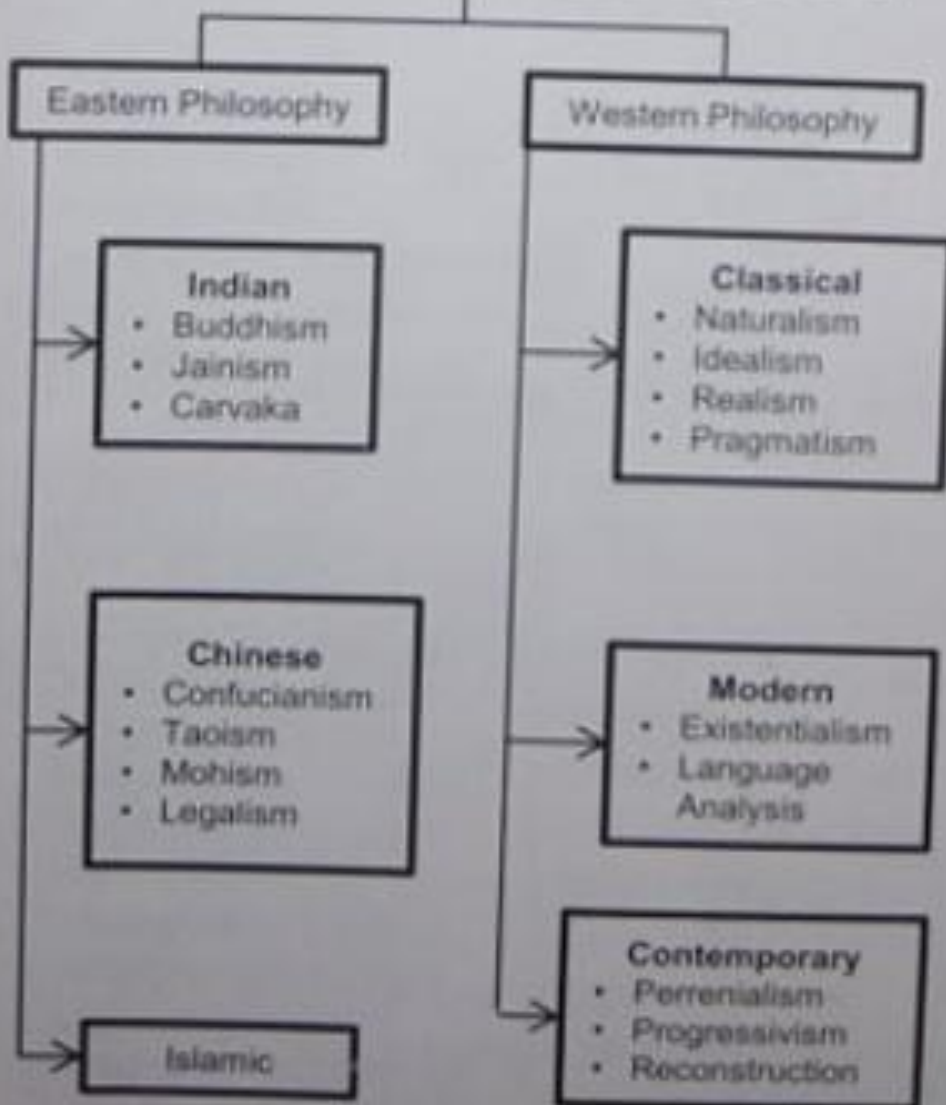

S - Science

Lo - Logic

We - Western
Philosophy

R - Reason

Philosophy in Education

Indian Philosophy

Buddhism (Gautama Siddharta)

Description	Characteristics
• A religion and philosophy based on the teachings of the Buddha • The aim of buddhist practices is to become free of suffering (dukkha) and achieve enlightenment and Nirvana • Underpinned by the principles of harmlessness and moderation • Mental training focuses on moral discipline (sila) and meditative concentration	Four Noble Truths • Life is pain and suffering (dukkha) • The cause of pain and suffering is selfish craving • The cause of pain can be eliminated • The way towards the end of suffering is through the eightfold path

The Eightfold Path

1. Right Faith or Belief
2. Right Resolve or Aspiration
3. Right Speech
4. Right Action
5. Right Living
6. Right Effort
7. Right Thought
8. Right Concentration

Indian Philosophy

Jainism or Jinism (Jina)

Description	Characteristics
• Core belief is ahimsa, or non-injury to all living things • Has no belief in a creator god, though there are a number of lesser deities for various aspects of life	Doctrines of Jainism: • Knowledge is relative • Jaina cosmology regards the universe as a living organism animated by life monads • Its ethics is non-violence • Jainism is pessimistic

Carvaka (Carvaka)

Description	Characteristics
• Came from the root word "chaari" which means sweet and vaak which means speaking • Equivalent to extreme hedonism	Doctrines of Carvaka: • Only the material world exists • Ritual as a livelihood • Pleasure and pain • Hell as mundane • Intelligence resides in the body

Chinese Philosophy

Confucianism (Confucius or Kung Fu Tzu)

Description	Characteristics
- Scholarly tradition and a way of life focused on becoming human - Confucian thoughts: ✓ Life: Life is a gift that must be treasured ✓ Golden Rule: Do not do unto others what you would not like others to do unto you ✓ Government: Sufficient food, weapons and the confidence of the people make a good government ✓ Mourning: The period of mourning for a parent is three years	Three Dimensions of Human Condition: - Self Cultivation Four Visions of Community ✓ Ability to respond to the world in a poetic sense ✓ Social sense of ritual as means for verbal and non-verbal communication within the "human community" ✓ Historical ability to relate to the collective memory ✓ Politics as responsive and responsible whole community - Traditions ✓ Male-centered society ✓ Yin and Yang interact harmoniously ✓ Family filial piety ✓ Ideal woman: retiring, serving and fertile

Dr. Carl E. Bales's Ultimate Learning Guide to LET Review

Chinese Philosophy

Mohism (Mo Di or Mozi)

Description	Characteristics
Influential philosophical, social and religious movement that flourished during the Warring States era (479-221 BCE) in ancient China	10 Mohist Doctrines • Elevating the Worthy and Conforming Upward • Inclusive Care and Rejecting Aggression • Thrift in Utilization and Thrift in Funerals • Heaven's Intention and Elucidating Ghosts • Rejecting Music and Rejecting Fatalism

Taoism (Lao Tzu and Chuang Tzu)

Description
• Symbolized by yin-yang which represents balance in the universe • Tao (pronounced "Dow") refers to a power which envelops, surrounds and flows through all things, living and non-living
Characteristics
• Tao is a force that flows through all life • The goal of a Taoist is to be in harmony with the Tao • The priesthood views the many gods as manifestations of the one Dao, "which could not be represented as an image or a particular thing."

Chinese Philosophy

Mohism (Mo Di or Mozi)

Characteristics

- Taoist seeks answers to life's problems through inner meditation and outer observation
- Time is cyclical, not linear
- Taoists strongly promote health and vitality
- Five main organs and orifices of the body corresponds to the five parts of the sky: water, fire, wood, metal and earth
- Development of virtue is one's chief task; The Three Jewels to be sought are compassion, moderation and humility
- A Taoists is kind to other individuals, in part because such actions tends to be reciprocated

Legalism (Kuan Chung and Shang Yang)

Description

- Political philosophy that does not address higher questions pertaining to the nature and purpose of existence
- It is concerned with the most effective way of governing society

Characteristics

- The Book of Lord Shang teaches that laws are designed to maintain the stability of the state from the people, who are innately selfish and ignorant
- There is no such thing as objective goodness or virtue
- It is obedience that is of paramount importance

Islam Philosophy

Muslim Philosophy (Prophet Mohammad)

Description

- Submission to Allah
- One of the three monotheistic religions of the world (others are Christianity and Judaism)

Characteristics

Five Pillars of Islam

- Shahada (confession of faith): There is no other God than Allah and Muhammad is the prophet
- Salat (prayer): Muslim prays 5 x daily facing the Mecca (daybreak, noon, mid-afternoon, after sunset and early in the night)
- Zakat (Alms giving): Give 2 ½ percent of their income to charity
- Ramadan (fasting): Do not eat, drink, smoke or engage in sex between dawn and sunset
- Haji (pilgrimage): Muslims are required to go to Mecca at least once in his lifetime

Western Philosophies

Classical Philosophy

Naturalism

Proponent	Description
• Thales • Anaximander • Democritus • Epicurus • Herbert Spencer	Oldest philosophy that believes that nature is the aggregate of physical objects
Key Words	Application to education
• Harmony with nature • Discovery • Self-activity • Teacher as guide • Physical and behavioral sciences	• Loco parentis principle • Education is a natural process • Aim of education is complete living • Educative process should be inductive\ • Punishment be constituted as consequences of wrong deeds

Dr. Carl E. Baltz's Ultimate Learning Guide to LET Review

Classical Philosophy

Idealism

Proponent	Description
• Plato • Descartes • Spinoza • Leibniz • Kant • Berkely • Hegel	• Ultimate reality is spiritual or mental • Knowledge is independent of sense experience • Act of knowing takes place in the mind • Man can now intuitively and through reasons • Values are eternal • Every stimulus is derived from God
Key Words	Application to education
Values, Religion, Intelligence, Rethinking, Latent Ideas, 3Rs, Socratic & lecture method, discssion	• School is ideal centered • Teacher-centered • Curriculum: Universe Division, civilization, culture division, and personality division • DECS Order No. 13 1998 – Revised rules on teaching religion • DO No.33 s. 1996 – Implementation of RA1425

Classical Philosophy

Realism

Proponent

- Aristotle
- Aquinas
- Descartes
- John Locke
- Friedrich Herbert
- William James

Description

- Believes that objects exist independent of the mind
- All knowledge is derived from experience
- Reflection upon the mind as well as sense perception
- Natural laws determine and regulate one's existence
- Standards of value are determined and regulate one's existence
- Standards of value are determined by reason
- Gave birth to empiricism

Key Words

- True existence
- Material Objects

Dr. Carl E. Balala's Ultimate Learning Guide to LET Review

Classical Philosophy

Realism

Application to education

The educative process are:

- Transmission of information
- Conditioning of the pupil
- The use of discipline
- Problem-centered curriculum and habit formation

Teaching methods:

- Socratic Method
- Disputation and Discussion
- Lecture
- Memorization
- Use of visuals and problem-solving

Classical Philosophy

Pragmatism

Proponent	Description
• Heraclitus • Protagoras • Francis Bacon • Charles Pierce • William James • John Dewey	• The essence of an idea comes from the consequences of its test or practice • Experimentalism (Piere) • Practicalism (James) • Instrumentalism (Dewey)

-Classical Philosophy

Pragmatism

Keywords

Practical, Experimental,
Inductive thinking, Problem
solving, Democracy, Learning
to learn, Teacher facilitator,
Research, Projects,
Citizenship

Application to education

- Student-centered
- Education is a social institutions
- Education is a continuous reconstruction of experience
- Experimental method
- Focus on hands-on activities
- Teacher facilitator
- Curriculum: Real-life situation, personal and social experiences of the learner
- DO no. 91, s 1998 – changes in the Technology and Home Economics of the New Secondary Education Curriculum (NSEC)
- DO no. 67, s 1997 – Implementation of Revitalized Homeroom Guidance Program (RHGP)

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Contemporary Philosophy

Perennialism

Proponent	Description
• Aristotle • Aquinas • Mortimer Adler • Robert Hutchin	• Root: Classical Realism supported by some idealist • The basic principles of education are changeless and permanent

Key Words

- Education should be the same for everyone
- Education is the tool in which one prepares for life
- Basic subjects should and must be taught
- Great emphasis to be placed upon the great classic-literature, history, philosophy and science

Application to education

- Role of Teacher – Socratic Method: Continually pursuing truth; emphasis in classics; omnipotent (teacher-centered)
- Role of Student – Passive Listener; Active Thinker/Learner
- Teaching Tools – Lectures; Standardized Tests; Spelling Bees; Teacher-made Tests; Memorization
- Classroom Management – Orderly rows; Neat/Clean Room; Rules (1. Strict but not without mercy or grace, 2. Punishment and rewards); Always seeking rational people; DO No. 40 s 1996 – Promoting culture and arts

Contemporary Philosophy

Progressivism

Proponent

Francis Parker, John Childs,
Boyd Bode

Description

- Accepts the pragmatists' view that **CHANGE** is the essence of reality
- Declares that education is always in the process of development
- The essence of education is a continual reconstruction of experience

Key Words

Practical, Experimental, inductive thinking, Problem solving, Democracy, Learning to learn, Teacher Facilitator, Research, Projects, Citizenship

Application to education

- Learning should take place through problem solving
- Learning is through reconstruction of experiences
- Teacher is a facilitator
- The school should encourage cooperation rather than competition

Essentialism

Proponent

William Bagely, Henry Morrison,
Thomas Briggs

Description

A theory that states that children should learn the traditional basic subjects and that these should be learned thoroughly and rigorously

Dr. Carl E. Bulma's Ultimate Learning Guide to LET Review

Contemporary Philosophy

Essentialism

Key Words	Traditional, Back to basics
-----------	-----------------------------

Application to education

- Aim: To promote the intellectual growth of the learners
- Curriculum: Emphasis on the essential (3Rs) and essential subjects
- Teaching-Learning Process: School returns to the essentials of the basic skills of reading, writing, arithmetic, history and English
- Subject-centered
- DO 40, s 1995 – Promoting culture and arts in schools
- Frowns upon vocational subjects
- Teacher focuses heavily on achievement test

Reconstructionism

Proponent	Theodore Brameld, George Counts, Isaac Berskon
-----------	--

Description

- Also known as social reconstructionism
- True successor of progressivism
- Believes that man to a significant degree plan and control his society, that in a democratic society this should be done in the public interest
- Focus on curriculum that highlights social reform as the aim of education

Keywords	Critical thinking skills, genuine democracy, focus on significant socioeconomic problems and to challenge the status quo, critical analysis
----------	---

Contemporary Philosophy

Essentialism

Application to Education

- Curriculum focuses on student experience and taking social action on real problems, such as violence, hunger, international terrorism, inflation and inequality
- Community-based learning and bringing the world into the classroom
- Emphasis on social sciences and social research methods; examination of social, economic and political problems; focus on present and future trends as well as on national and international issues

Modern Philosophy

Essentialism

Proponent	Soren Keirkegaard, Jean Paul Sarte, Blaise Pascal, Martin Bubber
Keywords	Personal, own choice, real answers come from within, personal journey, make own meaning
Description	
Individuals are responsible for determining for themselves what is true, beautiful, false, right or wrong	

Description

Modern Philosophy

Essentialism

Application to Education

- Emphasis on social sciences and social research methods; examination of social, economic political problems, focus on present and future trends as well as on national and international issues
- School assists students in knowing themselves and learning their place in society
- Assisting students in their personal learning journeys
- DECS Order No 70, s. 1998 – revised system of rating and reporting of students

Language Analysis

Proponent	Bertrand Russell, Gilbert Ryle, WV Quine
Description	Focus on accuracy of language
Application	Educational discourse should be done in specific terms with their meanings clear

Social Dimensions and Developments In Education

Trends, Issues and Developments

- Global and National Development Trends and Direction in the 21st Century
- Characteristics of Education for 21st century
- Major Paradigm shift
- Current Trends in Social Science Education for Global Citizenship

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Cultural and Political Dimensions of Learning

Globalization

Broadening, deepening, speeding up of world-wide interconnectedness in all aspects of life, from the cultural to the criminal, the financial to the environmental

Multicultural Education

A field of study whose major aim is to provide equal educational opportunities for students from diverse racial, ethnic, social class and cultural groups

Multicultural Education	
Two Types	
Liberal Multiculturalism	Critical Multiculturalism
Focuses on cultural diversity, celebrating ethnic variety, and teaching tolerance	Sees multiculturalism as concerning 'majorities' as much as 'minorities' and is concerned with the institution and practices forming the whole society
Gender Education	
Gender	Different roles, responsibilities, and expectation of women in societies and culture; socially assigned labels and personal definition as male or female including the corresponding socially defined rights and responsibilities
Gender Education	
Sex	Biological difference between male and female
Patriarchy	Set beliefs and values which lay down the supposedly "proper relation" between men and women, between men and men, between women and women
Gender Equality	Means that male and female have equal opportunities to realize their full human rights and, contribute to and benefit from economic, social, cultural and political development
Four Main Dimensions	
Equality in access	Equality in learning process
Equality of educational outcome	Equality of external result

Human Rights Education

Legal rights, safely enshrined the Universal Declaration of Human Rights

- Human Rights are comprehensive and apply everywhere to everyone without distinction
- Human Rights are based on Universal Values: Dignity, Freedom, Equality, Justice

Typology

Civil and Political Rights

Right to: life, prohibition of torture, prohibition of slavery and forced labor, liberty and security, privacy, marry and find a family, nationality, poverty, recognition as a person

Law

- Equality before the law
- Freedom of thought, conscience and religion
- Freedom of opinion and expression
- Freedom of assembly and association
- Freedom of movement
- Freedom to participate in public affairs

Economic

Right to: adequate standard of living, social security, work, just and favorable condition of work, form and join trade union

Cultural Right

Right to: participate in cultural life, education and training, information

Education and Right to Development and a Balanced Environment

Right to: development, ecologically balanced environment and free access to natural and cultural patrimony

Dr. Carl E. Biala's Ultimate Learning Guide to LET Review

Education for Sustainable Development

The vision of education for sustainable development is a world where everyone has the opportunity to benefit for quality education and learn the values, behavior, and lifestyle required for a sustainable future and for positive societal transformation

Core Values in Promoting ESD (Education for Sustainable Development)

Reverence for all life	Inter-Generational Equity
Concept of Universal Harm	Solidarity (Communion)

Trends and Development in Philippine Education

Trifocalization on Educational System

Basic Education	Technical Education	Higher Education
Elementary and Secondary is managed by DepEd through RA 9155	Vocational and Technical Training is under TESDA (RA 7796) – 08/25/94	Involving community colleges, universities and specialized college under CHED (RA 7722)

2002 BEC

Envisions an ideal Filipino learner as one who is empowered for lifelong learning, an active maker of meaning and can learn whatever he/she needs to know in any new context

MAKABAYAN

- Curriculum that aims to cultivate a health personal and national self-concept
- Promotes the mission of BEC to achieve interdisciplinary, integrated and holistic learning

Alternative Education

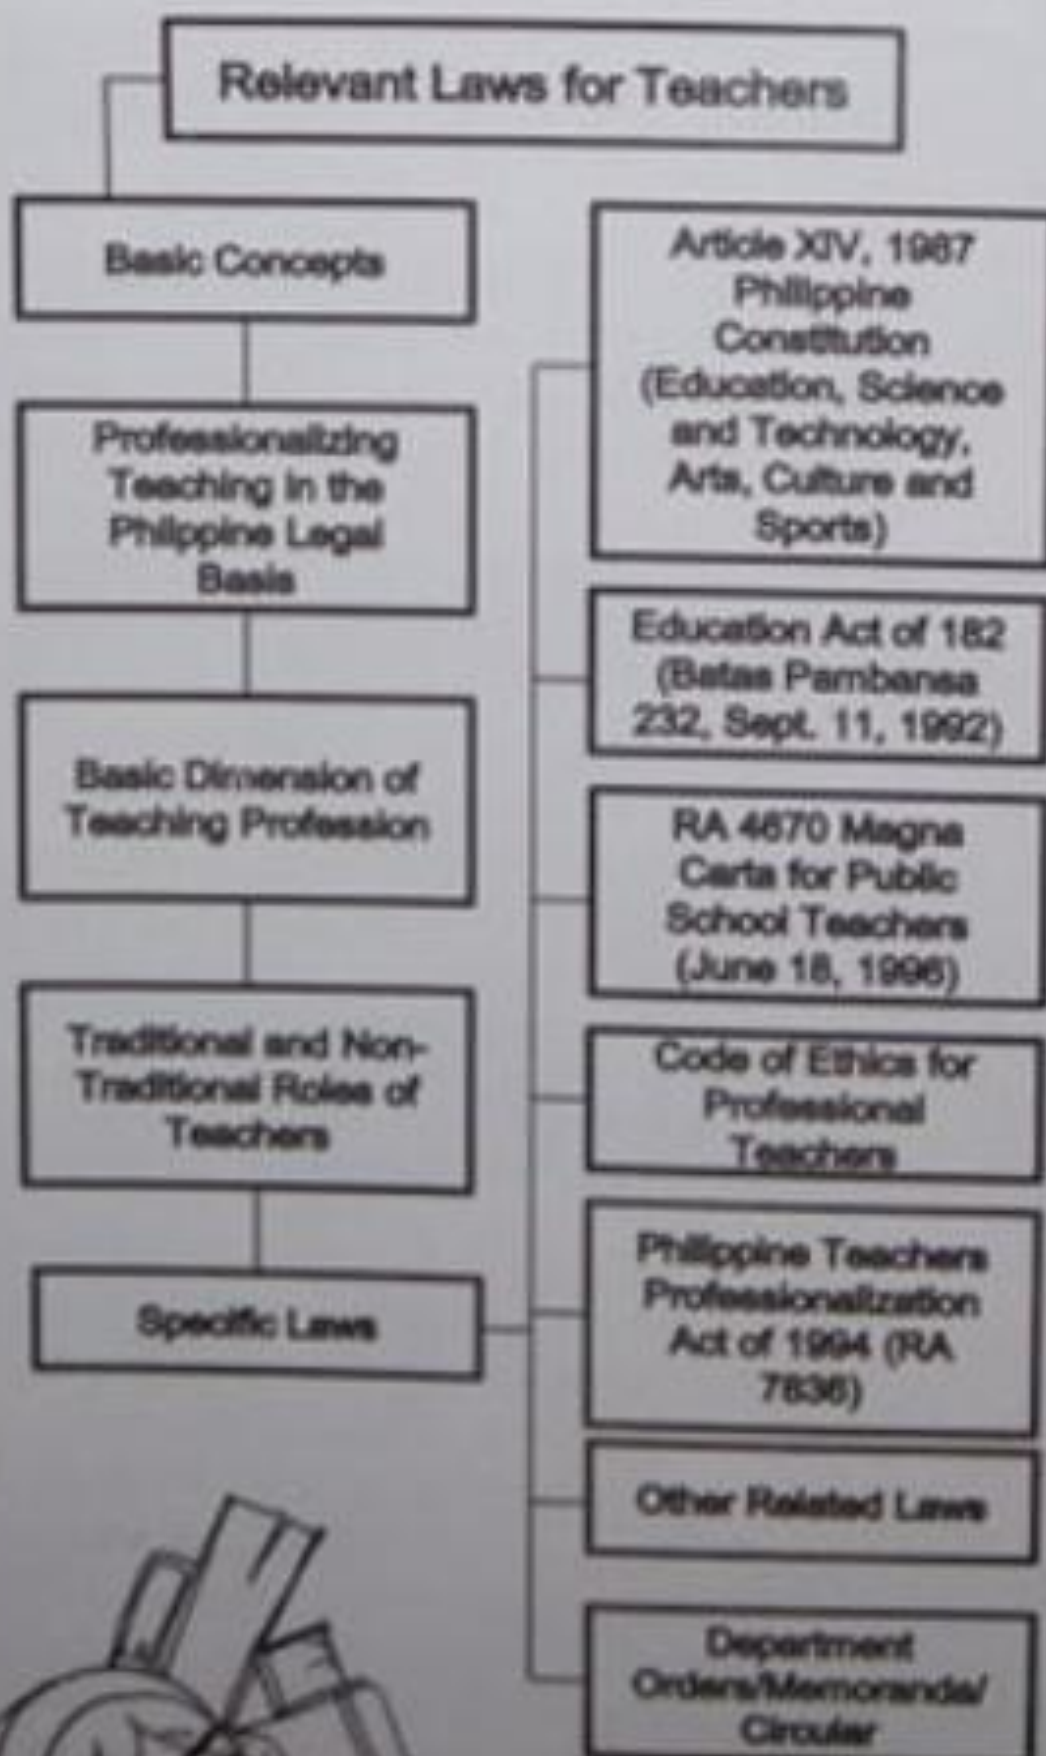

Characteristics: Nationalist, Scientific, Pro-people, Democratic

K-12 Basic Education Program

- Official launched in April 2012
- In this curriculum, the students will undergo 6 years in elementary (grade 1-6); 4 years in junior high (grade 7-10) and two years in senior high school (grade 11-12)
- Changes made:
 - ✓ Native dialect of students will be taught via the Mother Tongue-Based Multi-Lingual education subject
 - ✓ English for grade 1 students will only be taught during the second half of the year
 - ✓ Grade 1 students will take 6 subjects for a year, maximum of 40 minutes each
- Addition of exploratory TLE during grade 7-8 and Specialized TLE during grade 9-10
- During senior high school, students will have core subjects with applied track subjects on academics, sports, arts and design and technical, vocational and livelihood

Dr. Carl E. Baltan's Ultimate Learning Guide to LET Review

Dr. Carl E. Baltis's Ultimate Learning Guide to LET Review

Basic Concepts

Teaching – refers to the profession concerned with classroom instructions at the elementary and secondary level in accordance with the curriculum prescribed by DepEd (private or public schools)

Teachers – refers to all persons engaged at the elementary and secondary level including industrial arts or vocational teachers and all other persons performing supervisory and administrative functions in all schools

Relevant Laws – refers to legal acts, decrees, ordinances, orders, memoranda, circulars and the like that were approved by proper authorities and have become legal bases in the conduct of educational process in the Philippine setting

Professionalizing Teaching in the Philippines-Legal Bases

Presidential Decree 1006 (January 6, 1977)

- Decree professionalizing teaching in the Philippines is implemented to:
 - ✓ To provide the teachers an incentive and motivation
 - ✓ To recognize the fact that teaching also requires a number of years of higher education studies

Philippine Teachers Professionalization Act of 1994 (RA 7836)

An act of strengthening the regulation supervision of the Practice of Teaching in the Philippines and prescribing a Licensure Examination for Teachers

Basic Dimensions of the Teaching Profession

Knowledge Dimensions (communicator, guide, facilitator)	Ethical Dimensions (model and true of humanist)
Social Dimensions (mediator and transmitter of culture)	Profession Dimensions

Traditional and Non-Traditional Roles of Teachers

As a director of learning	As a counselor
As an information processor	As a moralist
As a knower	As a model for the youth
As a pioneer in the world of idea	As a person of culture
As a decision maker	As a communication link
As a judge of achievement	As a mediator of culture

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Specific Laws

Article XIV, 1987 Philippine Constitution (Education, Science and Technology, Arts, Culture and Sports)

- Right of all citizen to quality education at all levels
- Free public education in the elementary and secondary level

**Article XIV, 1987 Philippine Constitution
(Education, Science and Technology, Arts,
Culture and Sports)**

- Availability of scholarship grants, loans, programs, and subsidies in public and private schools
- Provisions for non-formal, informal and indigenous learning system
- Emphasis on nationalism and patriotism
- Tax exceptions for non-stock and non-profit educational constitution
- Academic freedom
- Highest budgetary allocation
- Filipino as the national language
- Filipino and English as official languages for use in communication and instruction
- Creation of national language commission
- Promotion of Science and Technology
- Preservation of national culture

**Education Act of 1982 (Batas Pambansa
232, September 11, 1992)**

An act of providing for the establishment and maintenance of an Integrated System of Education which declares:

- The aims of Philippine education
- Right, duties and responsibilities of parents and students in school
- Rights of all school personnel
- Special rights and privileges of Teaching or Academic Staff
- Special rights of school administrator
- Right of schools
- Educational system

RA 4670 Magna Carta for Public School Teachers (June 18, 1996)

- Study Leave
- Salary Increase Upon Retirement
- Freedom of teachers to join or establish organizations
- Consultation of National Teachers Organizations in the formulation of national education policies and professional standards, and in the formulation of national policies in governing the social security of teachers
- Formulation and preparation of the necessary rules and regulations to implement the provisions of this act that shall take effect thirty days after publication in a news paper of general circulation, by the Secretary of Education
- Annual submission to Congress of necessary budgetary estimates to implement the provisions of this act by the Secretary of Education
- Any person who shall willfully interfere with, restrain or coerce any teacher in the exercise of the rights guaranteed by this Act, or who shall in any other manner, commit any act to defeat any of the provisions of this Act, shall upon conviction, be punished by a fine of not less than one hundred pesos nor more than one hundred thousand pesos, or by imprisonment, in the discretion of the court

Code of Ethics for Professional Teachers

- Adopted pursuant to the provisions of paragraph (e), Article II RA 7836, otherwise known as the Philippine Teachers Professionalization Act of 1994, and paragraph (a), section 6 PD no 223, as amended
- The code spells out very clearly the ideals and standards of teacher's relationships with various education stakeholders

Teacher and the State (Article II)

- As a trustee of the cultural and educational heritage of the nation, the teacher is duty bound to transmit to learners such heritage and must exert the best effort possible to promote obedience to the laws of the state
- Help carry out the declared policies of the state
- Demonstrate full commitment and devotion to duty
- Refrain from engaging in the promotion of any political, religious or other partisan interest
- Exercise his right of suffrage and all the other constitutional rights
- Refrain from using his position or official authority to influence or coerce the political actions or behaviors of other persons
- Enjoy academic freedom and be responsible in taking the privilege of expounding the product of his researchers and investigation in the interests of the nation

Code of Ethics for Professional Teachers

Teacher and the Community (Article III)

- Provide an environment conducive to learning and youth development
- Provide leadership and initiative for the betterment of the community
- Refrain from engaging in the all sorts of immoral activities
- Study, understand and promote local customs and traditions
- Keep the community informed about the school's works, activities and accomplishments
- Establish and maintain harmonious relationships with other professional, government officials and practically, all people
- Attend freely one's church and worships as appropriate without using his positions to influence

Teacher and the Profession (Article IV)

- Manifest pride in the nobility of the teaching profession
- Always at his best in the practice of the profession
- Avoid improper misrepresentations in the process of seeking support for the school
- Engage actively and continuously in one's professional growth and advancement
- Live up to the nobility and integrity of the teaching profession

Code of Ethics for Professional Teachers
Teacher and the Teaching Community
(Article V)

- Be imbued with the spirit of professional loyalty, faithfulness and cooperativeness with others in the teaching profession
- Sincerely acknowledge/recognize assistance received from colleagues
- Organize and turn over records and other data to his/her successor
- Keep information confidential until after it has been formally released
- Seek correctives for unprofessional/unethical conduct of an associate

Teacher and the Teaching Community
(Article V)

- Apply for a vacant position for which he is qualified provided that all qualified candidates are given opportunities to be considered

Teacher and the Higher Authorities in the Profession (Article VI)

- Support the legitimate policies of the school and the administration regardless of personal feelings or private opinions
- Make no any false and anonymous accusations or charges against superiors
- Observe proper protocol in transacting
- Consider the welfare and interest of the learners when seeking redress against all forms of injustice and in raising grievances to the administration
- Recognize the principle that appointments, promotions and transfers are only made on the basis of merit and are needed in the interest of service
- Live up to his contract (employment terms and condition)

Dr. Carl E. Baltz's Ultimate Learning Guide to LET Review

Code of Ethics for Professional Teachers

The School Officials, Teachers and Other Personnel (Article VII)

- Show professional courtesy, helpfulness and sympathy towards teachers and other personnel
- Consider policy formulation and change innovations as cooperative responsibility
- Attend to the professional growth of teachers (promotion, recognition, attendance to in-service trainings)
- Never dismiss or recommend for dismissal a teacher or other subordinates except for a just cause
- Ensure that public school teachers are employed in accordance with pertinent civil service rules and private school teachers, in accordance with the contracts

Teacher and the Learners (Article VIII)

- Determine the academic marks and promotion of the learners in accordance with generally accepted procedures of measurement and evaluation
- Recognize that the first and foremost concern of the teachers is the interest and welfare of the learners
- Make no prejudice or discrimination against any learner
- Avoid accepting favors and gifts from learners, their parents or others in exchange for requested concessions

Code of Ethics for Professional Teachers

Teacher and the Learners (Article VIII)

- Refrain from accepting any remuneration from tutorials rendered to their own students
- Evaluate learner's work only on merit and quality of academic performance
- Exercise utmost professional discretion in a situation on matters pertaining to personal, relationship with the learner
- Desist from inflicting any form of corporal punishment or offending pupils/students; make no deductions from the learner's scholastic grade as a punishment for student offense
- Extend needed assistance to ensure maximum development of learners and prevent solve learner's problems and difficulties

Teacher and the Parents (Article IX)

- Establish and maintain harmonious relationships with parents and treat them with utmost respect
- Inform parents of the progress of all sorts of deficiencies of their children
- Be tactful in dealing with parents regarding the children's deficiencies
- Seek parents' cooperation for the proper guidance and improvement of the learners
- Discourage the parents from making ill remarks and unfounded criticisms about the school as a whole
- Hear parents complaints with sympathy and understanding

Dr. Carl E. Baltis's Ultimate Learning Guide to LET Review

Code of Ethics for Professional Teachers

Teacher and the Business (Article X)

- Engage in legitimate income generating activities
- Maintain a good reputation with respect to financial matters
- Settle promptly all debts and/or make satisfactory arrangement on his private financial affairs
- Avoid acting as agent of any business venture engaged in furnishing textbooks and other school commodities, of which, he can possibly exercise influence in their purchase or distribution

Teacher as a Person (Article XI)

- Live with dignity at all times wherever he/she is
- Place premium upon self-respect and self-discipline
- Serve as a model of worthy of emulation
- Recognize God as Guide of his own destiny and of others

Disciplinary Action (Article XI)

- Revocation of the Certificate of Registration and License as a Professional Teacher
- Suspension from the practice of teaching profession
- Reprimand or cancellation of temporary or special permit

Philippine Teachers Professionalization Act of 1994 (RA 7836)

An Act to Strengthen the Regulation and Supervision of the Practice of Teaching in the Philippines and Prescribing a Licensure Examination for Teachers and for Other Purposes such as:

- Objectives (Article I, Section 3)
 - ✓ The promotion, development and professionalization of teachers and the teaching profession; and
 - ✓ The supervision and regulation of the licensure examination
- Scope of Examination (Article II, Section 14)
 - ✓ For elementary level, there are two parts namely: professional education and general education
 - ✓ For secondary level, there are three parts, namely: professional education, general education and field of specialization

Principles and Strategies in Teaching

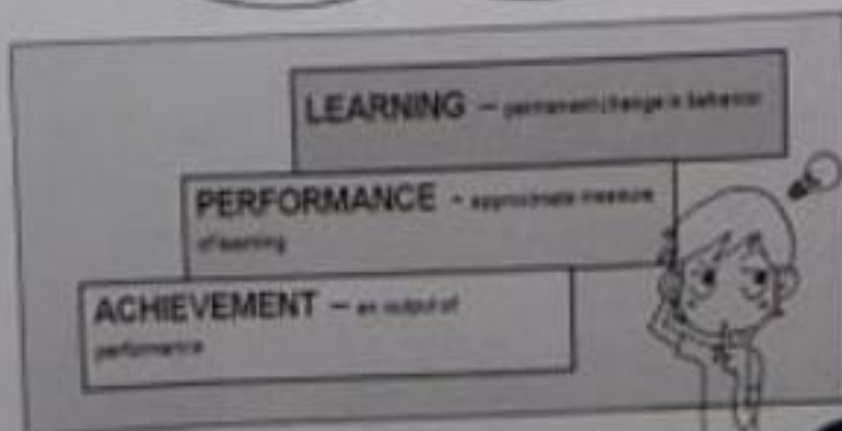

My Learning:

- What makes me think?
- How do I learn?
- What is the best learning style for me?
- How do I know that I learned something?
- Did I enjoy while I was learning?

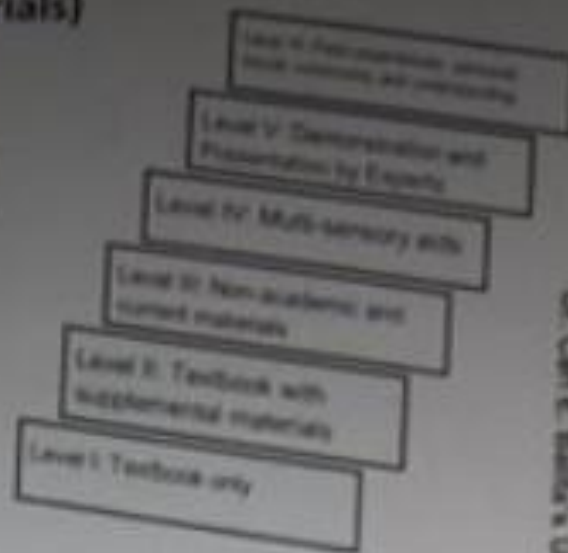

Dr. Carl E. Butler's Ultimate Learning Guide to LET Review

LEARNING IS AN ACTIVE PROCESS

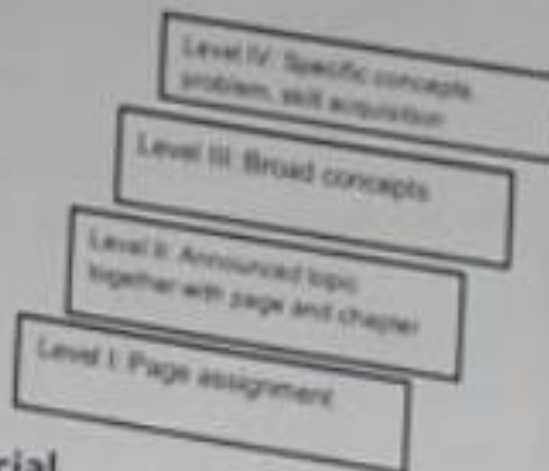

Principles and Strategies in Teaching

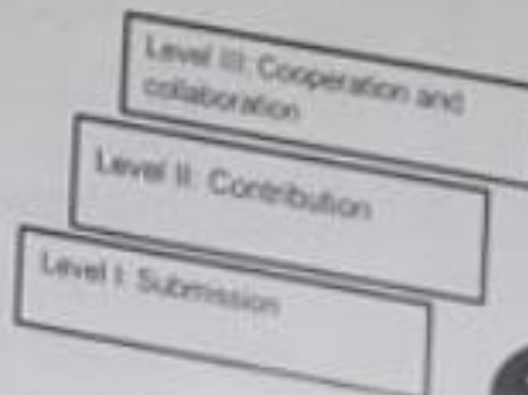

Context (materials)

Focus (subject matter)

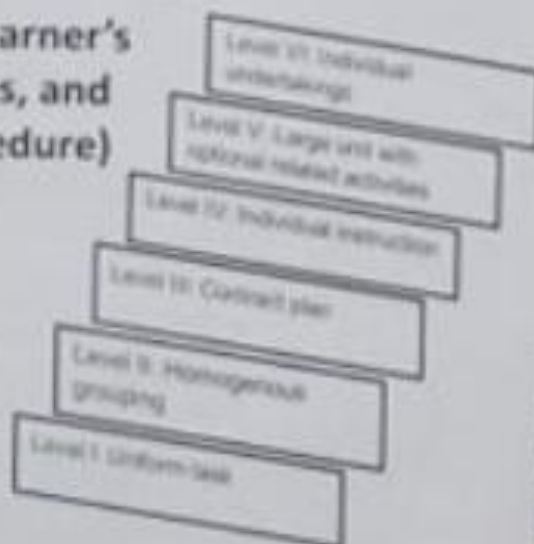

Socialization (social setting)

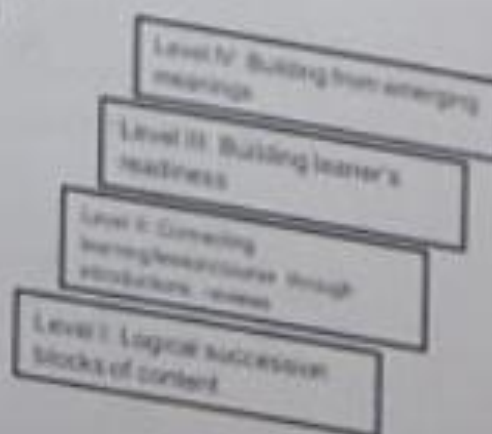

Dr. Carl E. Butler's Ultimate Learning Guide to LET Review

Principles and Strategies in Teaching

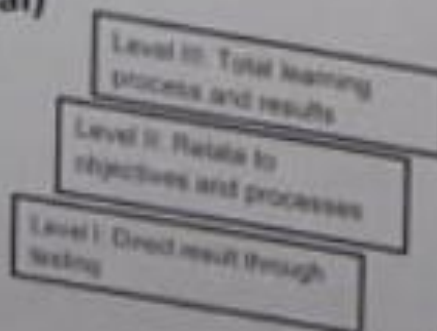

Individualization (learner's purposes, aptitudes, and experimental procedure)

Sequence (ordering of learning tasks)

Evaluation (appraisal)

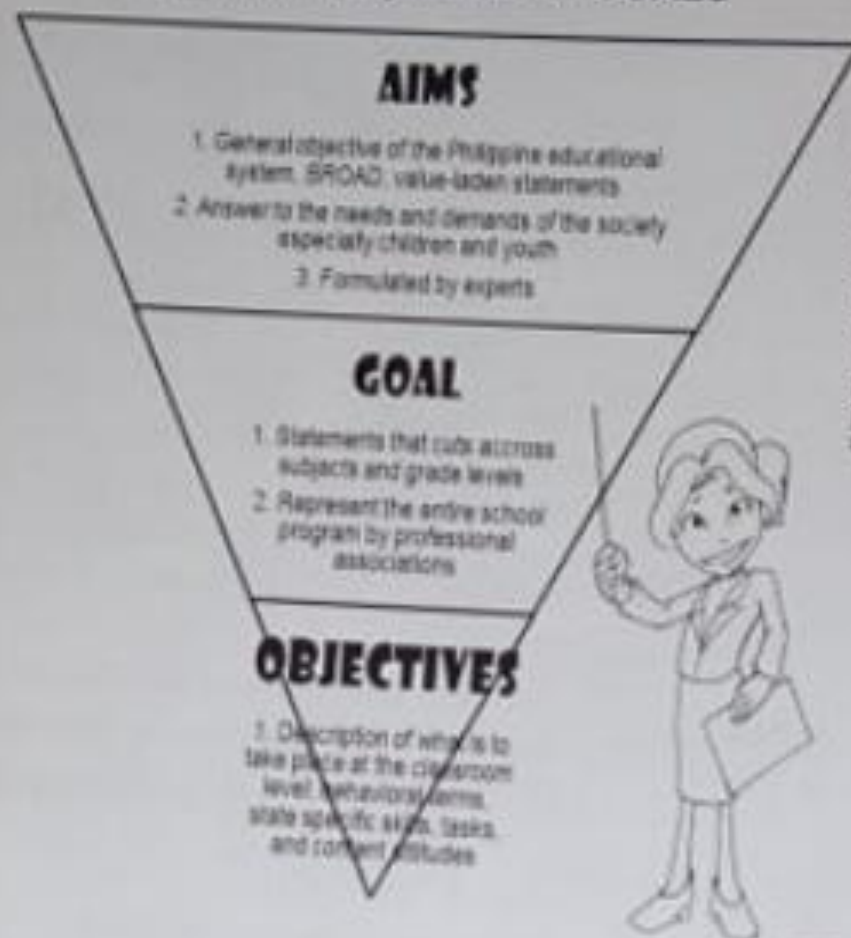

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Components of Teaching

Instructional Objectives or GOALS

Dr. Carl E. Busby's Ultimate Learning Guide to LET Review

Goals and Objectives should be **BADASS!**

B	Begin with the end in mind
A	Aligned with the aims of education as embodied in the Philippine constitution
D	Domains are reflected: CAP (Cognitive, Affective, Psychomotor)
A	Always significant and relevant
S	Shared with students
S	SMART (Specific, Measurable, Attainable, Result-oriented, Time-bound)

Seven Principles of Teaching

Principle 1	Learning is an active process. • What I hear, I forget. • What I see, I remember. • What I do, I understand
Principle 2	The more sense are involved in learning, the more effective is the learning. • Sight: 75% • Hearing 13% • Touch 6% • Taste 3% • Smell 3%
Principle 3	A non-threatening atmosphere enhances learning.
Principle 4	Emotion has the power to increase retention and learning.

Seven Principles of Teaching

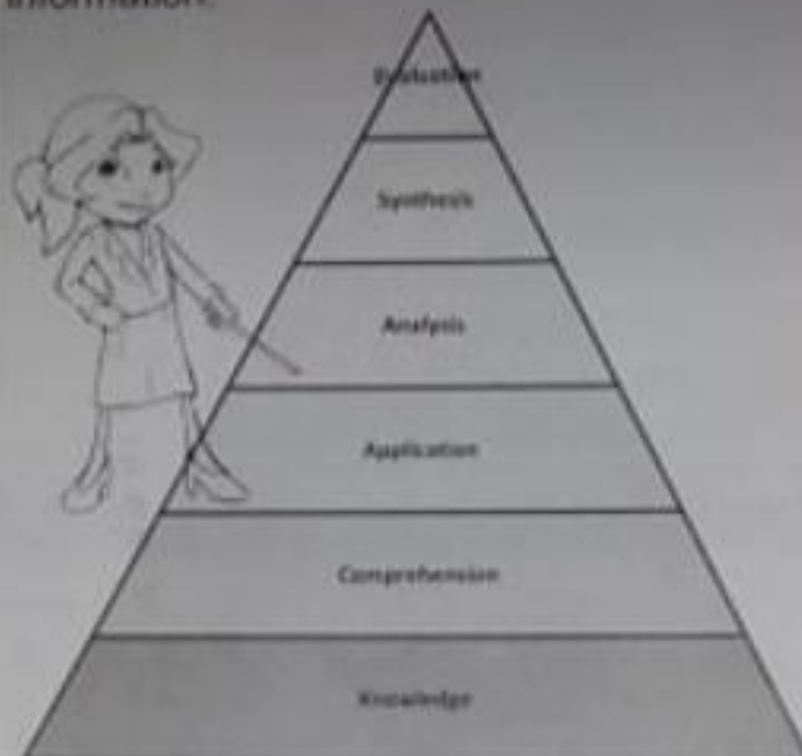

Principle 5

Learning is meaningful when it is connected to students' everyday life.

- PSP
- PS3
- Cartoons and Animations

Principle 6

Good teaching goes beyond recall of information.

Principle 7

Good teaching considers learner's varied learning style and learner's multiple intelligence.

8 Multiple Intelligences: Verbal-linguistic, Logical-Mathematical, Spatial, Musical, Bodily-Kinesthetic, Intrapersonal, Interpersonal, Naturalist

Dr. Carl E. Baltis's Ultimate Learning Guide to LET Review

Formulating Goals	
Tyler	Gonlund
Interprets philosophical concerns in arriving at instructional objectives	Recommends that teachers start with general objectives
Mager	Gagne
Relies on three major characteristics as behavior, condition and proficiency level in his formulation of objectives	Relies on three major characteristics as behavior, condition and proficiency level in his formulation of objectives

Different Domains and Level of Objectives		
Cognitive	Affective	Psychomotor
Knowledge Emphasis on remembering information	Receiving Emphasis on becoming aware of some communication or phenomenon from the environment	Perception Uses the sense organs to obtain cues that guide motor activity; ranges from sensory stimulation (awareness) through cue selection to translation.

Dr. Carl E. Butler's Ultimate Learning Guide to LET Review

Different Domains and Level of Objectives

Cognitive	Affective	Psychomotor
Compre-hension Emphasis on understanding and organizing previously learned information	Responding Emphasis on reacting to a communication or phenomenon through participation	Set Readiness to take a particular action includes mental, physical, and emotional set. Perception is an important prerequisite
Application Emphasis on using information in pertinent situations	Valuing Emphasis on attaching worth to something from the environment	Guided response Concerned with early stages of learning a complex skill. Includes imitation, trial and error

Dr. Carl E. Baltz's Ultimate Learning Guide to LET Review

Different Domains and Level of Objectives		
Cognitive	Affective	Psychomotor
Analysis Emphasis on thinking critically about information by studying its parts 	Organization Organizing the values in relation to each other 	Mechanism Concerned with habitual responses that can be performed with some confidence and proficiency (less complex).
Synthesis Emphasis on original thinking about information by putting its parts into a new whole	Characterization Acts in accordance with the accepted value and becomes part of personality	Complex Overt response Skillfully performs acts that require complex movement patterns, like the highly coordinated motor activities

Dr. Carl E. Baltz's Ultimate Learning Guide to LET Review

Different Domains and Level of Objectives

Cognitive

Evaluation

Emphasis on making judgments about information based on identified standards

Psychomotor

Adaptation

Concerned with skills so well learned that they are modified to fit special requirements or meet a problem situation

Origination

Creates new movement patterns to fit a particular situation or problem

Methods or Strategies in Teaching

Reflective Teaching

Involves a thoughtful analysis of the teacher's action, discussions and results of teaching

Cooperative Learning Approach

Involves strategies and procedures for helping small group solve their own problems at the same time learn democratic principles from their day-to-day interaction

Cooperative Learning Approach

Components

- Cooperative incentive structure
- Cooperative task structure

Features:

- Teamwork
- Group-oriented
- For Social interaction

Approaches:

- STAD (Student Teams Achievement Discussion)
- Jigsaw
- Group Investigation
- Think-Pair-Share

Experiential Learning

A way of acquiring knowledge or skills through direct and keen observation followed by an analysis of what has been sensed and understood

Requirement

- Hands-on
- Discovery
- Objectives must be clearly understood

Skills needed

- A listener
- A keen observer
- Ability to analyze

Direct Instruction

A teaching model aimed at helping students master basic skills and knowledge that can be taught in a step- by-step fashion

Steps to be followed

- Provide rationale
- Demonstrate the skill
- Provide guided practice
- Check for understanding and feedback
- Provide extended

Procedure

- Pre-instructional
- Conducting Lesson
- Post-Instructional Task

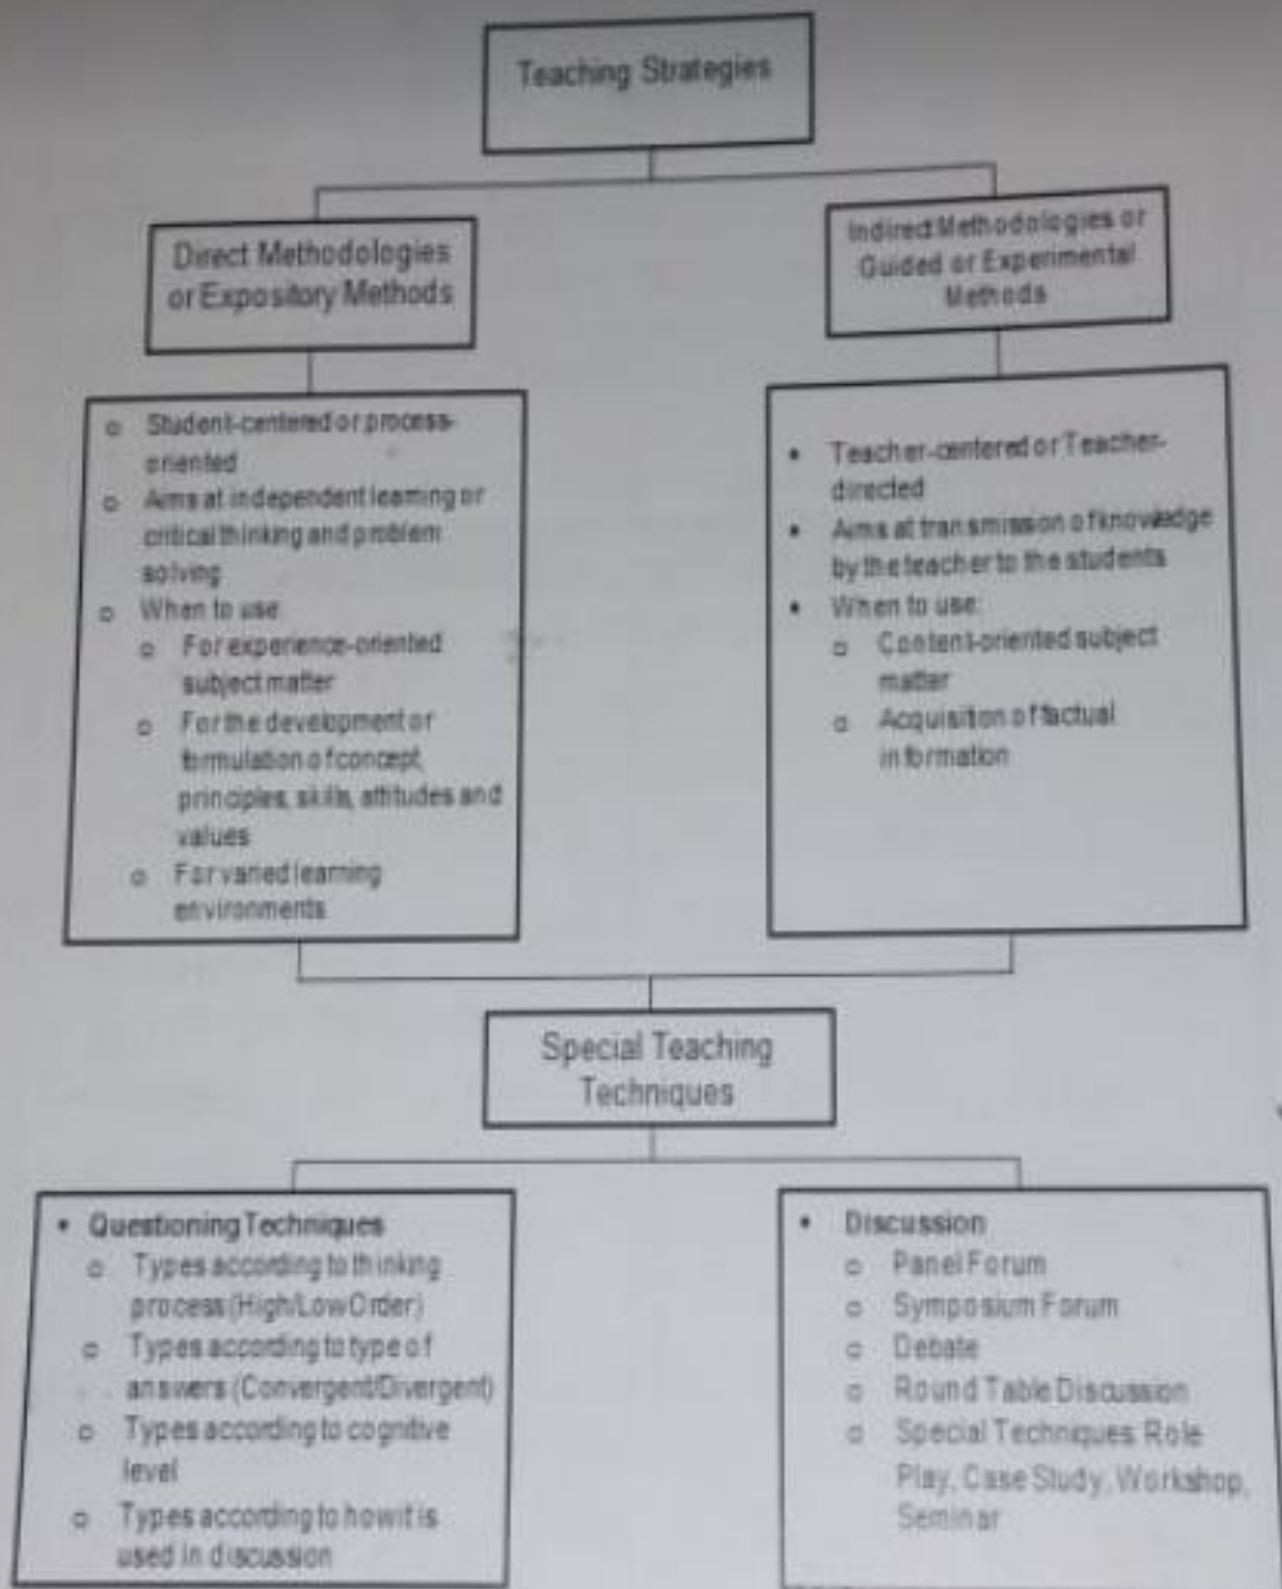

The Constructivists' Approach

Interaction with the prior knowledge

Reconstruction

Inquiry Teaching

Offers the greatest promise in directing learning activities towards scientific literacy

Direct Methodologies

Expository/Didactic Method (Arends, 1994)

A telling method where facts, concepts, principles and generalizations are stated, presented, defined and interpreted by the teacher and which are then applied by the learners

When is it used

- when knowledge of specific information is essential for learning of a lesson
- when information is not available or source is not accessible to students
- when an idea/principle is best learned by explanation

Expository/Didactic Method (Arends, 1994)

Aims	Steps/Method
• acquire, assimilate, and retain information • build and expand conceptual structures • develop specific habits for thinking about information	• Present objectives/establish set • Present advance organizer • Present learning materials • Extend and strengthen students' thinking

Dr. Carl E. Gaffa's Ultimate Learning Guide to LET Review

Deductive Teaching (Lardizabal, 1996)

Reasoning approach from whole to part or general to particular or from the universal to individual

When is it used

- when testing a rule
- when answering questions or solving problems with reference to certain laws, principles and theories
- to further develop a generalization

Aims

- presents rules
- clarifies terms
- provides examples
- provides practice

Steps/Method

- State the problem
- State the generalization
- Apply the rule
- Verify the rule

Concept Teaching (Direct presentation) (Arends, 1994)

A process of teaching students how to think

When is it used

Concept development

Steps/Method

- State the problem
- State the generalization
- Apply the rule
- Verify the rule

Aims

To develop concepts and organize information

Direct Instruction or Demonstration (Arends, 1994)

Also known as active teaching, mastery teaching/explicit instruction; A systematic way of promoting the acquisition of basic skills and information

Direct Instruction or Demonstration (Arends, 1994)

When is it used

- for performance-oriented subjects (e.g. reading, writing, physical education)
- for skill components of information-oriented subjects (e.g. history, science)
- for teaching aspects of subjects in which information or skill is well-structured and can be taught in a step-by-step manner

Aims	help students learn basic skills and knowledge
-------------	--

Direct Instruction or Demonstration (Arends, 1994)

Steps/Method

- Provide objectives and establish set
- Demonstrate knowledge and skill
- Provide guided practice
- Check for understanding and feedback
- Provide extended practice and transfer

Indirect Methodologies

Inquiry or Discovery Teaching

A process of reaching that helps learners become "constructionists" or builders of their own knowledge through the process of questioning and seeking answers to questions

When is it used

- For sciences, social science, history subject
- For discussion of topics requiring high-level thinking

Aims	Steps/Method
• To develop intellectual skills • Acquiring inquiry process skills associated with various domains of learning • Help students become independent and capable of learning on their own	• Providing objective, establishing set and explaining the inquiry problems • Presenting the puzzling situation • Data gathering and experimentation by students • Hypothesizing and explaining • Analyzing the inquiry process

Inductive Teaching

An reasoning approach from part to whole from particular to general, or specific cases or examples to a generalization truth, fact of principles

When is it used

- When formulating thinking skills
- For situations/lessons which expose learners to specific problems to be solved

Dr. Carl E. Baile's Ultimate Learning Guide to LET Review

Inductive Teaching	
Aims	Steps/Method
• Make meanings, explanations, and relationships of ideas clear independent research works	• Preparation • Presentation • Comparison and abstraction • Generalization • Application
Problem Solving Method	
A purposeful activity intending to remove a problem (question/doubt/uncertainty/difficulty) through reflect of the process of reasoning	
When is it used	
• For developing thinking skills • For situations/lessons which expose learners to specific problems to be solved	
Aims	Steps/Method
• Sharpen thinking, reasoning and creativity • Help learners act appropriately in difficult times	• Recognition and statement of the problem • Statement of hypothesis • Data gathering and interpretation • Critical evaluation of suggested solution • Verification of accepted solution

Dr. Carl E. Barth's Ultimate Learning Guide to LET Review

Project Method

A purposeful and constructive activity needing both intellectual and physical solutions

When is it used

- For real-life problems/situations
- For self-initiated/imposed task
- When time and materials are available

Aims

- Engage in self-initiated, purposeful activity

Steps/Method

- Purposing
- Planning
- Executing
- Evaluating

Laboratory/Research Method

Deals with firsthand experiences regarding materials or facts obtained from investigation or experiments

When is it used

- Promote information acquisition through observation, experimental solutions to problems guided by reflective thinking and acquisition of skill in manipulation
- For physical and biological sciences, English, Mathematics, vocational and commercial subjects

Aims

- Give firsthand experience in the laboratory to increase interest
- Provide student participation in original research
- Develop skill in using laboratory equipment and instruments to enhance high-order thinking skills

Steps/Method

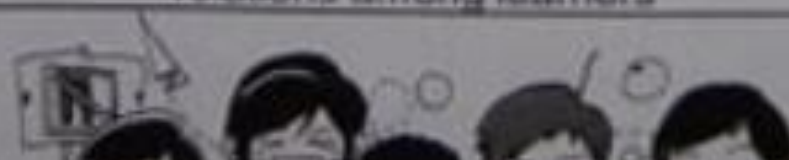

Orientati
on

Supervised
work

Culmination
activities

Metacognitive	
When is it used	For monitoring learning
Aims	Steps/Method
• Enable learner to engage in active learning • Develop metacognitive awareness (knowing about knowing)	• Planning • Deciding • Monitoring • Evaluating • Terminating
Concept Attainment	
When is it used	For concept development
Aims	Steps/Method
• At helping learners attain and develop basic concepts needed for further learning and higher level thinking	• Presenting examples and non-examples • Determining critical attributes • Defining the rules/generalization
Cooperative Learning	
A metacognitive strategy which addresses social goals and objectives; learners independently help each other promote learning through the teacher's guidance	
When is it used	
Promote greater independence and better relations among learners	

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Cooperative Learning

Aims	Steps/Method
• Improve objectives and set • Improve race relations • Improve social skills 	• Provide objectives and set • Present information • Organize learners in learning teams • Assist teamwork and study • Test • Recognize achievement

Cooperative Learning Variations

Jigsaw (3-6 members/group) (Leus, 2001)

- Assignment of student to home teams
- Provide academic material (topic/theme to be studied)
- Provide time to master academic material – specific students serve as “experts”
- Splitting into specialist groups “experts” from different groups meet to help each other master the topic
- “Experts” return to home teams to teach other members
- After discussion, learning is assessed individually

Student Teams Achievement Division (4-5 members/group) (Jacobsen, 1998)

- Pre-testing
- Ranking
- Dividing students so each team will have high-, low-, medium-ability students
- Presenting academic material

Cooperative Learning Variations

Student Teams Achievement Division (4-5 members/group) (Jacobsen, 1998)

- Distributing prepared worksheets focusing on content to be learned
- Monitoring groups for learning progress
- Administering individual quizzes
- Assigning scores based on individually gained scores

Group Investigation (3-6 members) - (Sampson, 1995 & Farris, 1993)

- Identify major topic of study as well as subtopics through brainstorming and group discussion; assign research/investigation groups for the subtopics
- Research/Investigation groups meet and determine job responsibilities (what/who will research specific (parts, deadlines and other decisions)
- Topic investigation and monitoring (progress and revisions)
- Organize/prepare for final report
- Evaluation of process and product investigation

Group Investigation (3-6 members) - (Sampson, 1995 & Farris, 1993)

- Presentation of final report to the class and solicitation of reactions
- Self-evaluation and group evaluation

Special Teaching Techniques

Questioning Techniques

- Arouse interest and curiosity
- Review content already learned
- Stimulate learners to ask questions
- Promote thought and the understanding of ideas
- Change the mood/tempo, direction of the discussion
- Encourage reflection and self-evaluation
- Allow expressions of feelings

Types of Question

According to thinking process	According to type of answers
• Low-Order (LOTS) • Higher Order (HOTS)	• Convergent (fact questions, answers, what, when, where, who) • Divergent (concept questions, answers why and how)

According to Cognitive Level

- Knowledge (memorize, recall, label, specify)
- Comprehension (describe, discuss, explain, summarize translate)
- Application (solve, employ, demonstrate, operate experiment)
- Analysis (interpret, differentiate, compare, invent, develop, generalize)
- Synthesis (invent, develop, generalize)
- Evaluation (criticize, judge, interpret)

Dr. Carl E. Butler's Ultimate Learning Guide to LET Review

Types of Question

According to how it is used in discussions

- Eliciting questions (these are used to:)
 - ✓ Encourage an initial response
 - ✓ Encourage more students to participate in the discussion
 - ✓ Rekindle a discussion that is lagging or dying out
- Probing questions – expand, justify or classify ideas
- Closure-seeking questions – used to help students form conclusions, solutions or plans for investigating problems.

Guidelines in Asking Questions

Wait Time	The interval between asking a question and the student response. This is a 3-4 second think-time.
Prompting	Uses hints and techniques to assist students to come up with a response successfully
Redirection	Involves asking of a single question for which there are several answers; used in a high level questioning
Probing	A qualitative technique used for the promotion of effective thought and critical thinking; provides the students a chance to support or defend a stand or point of view
Commenting and Prompting	Used to increase achievement and motivation

Tips in Asking Questions

- | | |
|--|--|
| <ul style="list-style-type: none"> • Stimulating/thought-provoking • Within student's level of abilities • Relevant to students' daily life situation • Sequential – a stepping stone to the next • Clear and easily understood • Encourage active participation • Phrase questions clearly | <ul style="list-style-type: none"> • Vary in length and difficulty of questions • Have sufficient time for deliberation • Follow-up incorrect answers • Call on volunteers or non-volunteers • Call on disruptive students • Move around the room for rapport and socialization • Ask as many learner as possible to answer certain questions |
|--|--|

Discussion

Panel Forum

- A direct, conversational, interactional discussion among a small group of experts or well-informed lay persons
- Success depends on the preparations done before the meeting, the wise selection of participants and the discussant leader

Symposium Forum

- More formal than the panel discussion
- Persons with special competence deliver uninterrupted speeches on different aspects of a problem, and these are followed by a forum period

Discussion

Debate

- A discussion that occurs when people with different beliefs study the same problem and arrive at different conclusions
- Debaters are usually allotted equal time to speak and to present an analysis of a problem and fair presentation of the arguments for or against it

Round Table Discussion

- A small discussion group seated face to face around a table, without a larger audience; a small conference by another name and has the nature of an informal semi-social gathering

Special Techniques

Role Play

Spontaneous acting out of problems or situations

Case-Study

Another group centered procedure which presents specific situations or problems to stimulate discussions

Buzz Session

Involves groups not exceeding six persons

Workshop

Involves the use of group process in attacking and solving problems

Seminar

Attempts to develop a policy or solution that is better than what is in existence

Discussion Guidelines

Panel Forum

The leader or chairperson

- Emphasizes tactfully the purpose and philosophy of the discussion
- Keeps the conversation moving from point to point
- Makes sure that each panel member has a chance to express his/her views
- To ask questions intended to clarify points for the audience
- Maintains an impartial position by refraining from participating as a member of the panel
- Must be group-oriented rather than self-centered, and
- Summarizes discussion briefly and invites comments or questions from the audience

The participants in the panel

- Talk in a formal manner
- Contribute to the method of public conversation meeting by giving brief remarks to each other but should be heard by the audience

Dr. Carl E. Baltus's Ultimate Learning Guide to LET Review

Discussion Guidelines

Symposium Forum

- Deciding the purpose of the meeting
- Choosing and framing the topics to arouse interest
- Choosing speakers (the number of speakers depends on the number of significant sources of information or points of view that should be considered)
- Choosing a chairman
- Briefing the chairman and the speakers on the objective of the symposium and in the procedures to be followed
- Speakers should not forget that discussions mean "thought in process," that its purpose is to help listeners analyze the problem and not to make conclusions for them
- In the discussion process, the chairman or the moderator should help bring together the thoughts of the speakers as the program unfolds. The chairperson also makes a proper transition to the forum period.
- The chairperson or moderator sees to it that the important questions about the issues presented are not neglected before the adjournment of the forum

Discussion Guidelines

Debate

- Attitude in debate is properly adjusted in relation to the subject, the opponents, and the listening audience
- Arguments are directed toward the person. A proper attitude includes keeping one's perspective, temper and sense of humor
- Refutation, or the answering of opponents' arguments, should be woven throughout the main speeches in a debate

There are a number of ways of answering an argument that is to be refuted, including:

- ✓ Pointing out that it is not relevant or important to the question
 - ✓ Showing that it is not supported by the facts or that insufficient evidence has been given
 - ✓ Indicating fallacies in reasoning
 - ✓ Arriving at a contrary argument by sound reasoning
 - ✓ Supplying more and better evidence to support one's side of the argument
 - ✓ Turning the argument so that it actually helps one's side
- Make each point consistent with those made by colleagues who are also upholding a similar view

Dr. Carl E. Baltus's Ultimate Learning Guide to LET Review

Discussion Guidelines

Debate

- Make each point consistent with those made by colleagues who are also upholding a similar view
- In answering point of the other side, it is well to have a large supply of evidence that can be drawn from to support one's position
- A knowledge of the audience on the question will be helpful in determining whether the audience is favorably or unfavorably disposed to what is being said
- A card-index file of all points and evidence that may be used should be kept; with some system worked out, so that the members of the team can quickly draw on the on the material they want to include at any given stage in the debate

Round Table

- All members should have a precise understanding of what is to be delivered
- A leader whom the group likes and respects is chosen to lead and prepare for the meeting
- Procedure in conducting the session of a round table conference is summarized below:
 - ✓ Introducing remarks, stating the question to be discussed in as interesting a manner as possible
 - ✓ Statements of the facts or a brief story of a real or fictitious case
 - ✓ Presentation of agenda
 - ✓ Group discussion of each of the issues in the agenda
 - ✓ Summary of the discussion
 - ✓ Consideration of what action to take as a result of the discussion

Classroom Management		
Purposes		
Minimize the occurrences of discipline problems	Increase the proportion of classroom time devoted to constructive and productive activity	
3 C's or 3 M's of Classroom Management		
Content	Man	
Conduct	Material	
Context	Moment	
CONTENT Facilitate the delivery of instruction	CONDUCT Promotion of orderly and safe learning environment	CONTEXT Emphasis is on communication rather than physical elements associated with classroom setting

Dr. Carl E. Baltz's Ultimate Learning Guide to LET Review

Types of Control		
Preventive Control	Supportive Control	Corrective Control
- Aimed at minimizing the onset of anticipated discipline problems through planning - Preventive Discipline	- Aimed at directing students behavior before it becomes a full blown problem - Behavior modification	- Seeks discipline student's behavior before it becomes a full standard of good conduct - Punishment

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Techniques in Classroom Management

Content Management

Physical Set-up/Setting of Routines

- Teach pupils to form various groupings and return to standard arrangement with minimum confusion
- Identify traffic routes and clear the way
- Organize supplies and materials for activities that occur frequently
- Rules must go with territory and insist on respect for them
- Do not use the first few minutes of a class session for collection
- "Overlapping" techniques is useful for collection and distribution of materials
- Prepare for transition by planning distinct types and sequences of teacher, pupil activity (e.g. checking home works, presentation of new materials, giving assignment, monitoring network)
- Arrange furniture that will facilitate overall monitoring, making visual sweep of the room and detecting work problems or social distraction
- Employ low profile classroom controls
- Arrange the physical setting to maximize visibility and accessibility
- Develop the use of nonverbal signals to express impatience and disapproval (e.g. eye contact, hand gestures, clearing one's throat, facial frown)
- Teach and model self-management skills

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Content Management

Instructional Management

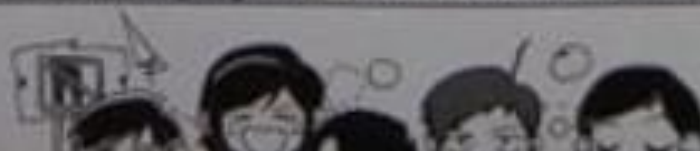

- Involves gaining and maintaining the cooperation of students in activities that make use of full classroom time
- Analyze instructional activities, duration, space required, type and number of student, resources needed, and expected behavior for management requirement
- Arouse students behavior to become active participants and sustain pupil involvement through thoughtful and system planning

Content Management

Instructional Management

- Develop the three cluster of instructional management skills
- Movement Management – refers to the maintenance momentum and making transition from one topic to another
- Group Focus – ability to maintain group alertness and sustain a concerted effort
- Avoidance of satiation, minimize impediments to progress through
 - ✓ Restructuring of the program
 - ✓ Variety for interesting encouragement
 - ✓ Challenging to test intellectual abilities

Dr. Carl E. Barks's Ultimate Learning Guide to LET Review

Conduct Management

Assertive Management Style

Remember **CREASES!**

C	Consequences of enforced rules are managed
R	Recognition
E	Establish a conduct code
A	A verbal reprimand is bad while a verbal praise is good
S	Seek the support of principal and parents
E	Encourage self-discipline with positive feedback to sustain the process
S	Set limits to conduct inside and outside the classroom

Context Management

- Respect students as human beings than valuing them for what they can do
- Perceive disturbance rather than controlling your purpose in teaching
- Tend to be more concerned with larger or smaller issues
- Be self-revealing than self-concealing
- Tend to be personally involved rather than alienated

Context Management

- Capitalize an interpersonal relationship of trust and confidence as solution to discipline problem
- Utilize eight step in problem solving as a solution to discipline problem

Steps

- Get involved with students: become friends; express concern for the students as a person
- Deal with the students' present behavior, avoid being a historian
- Get students to make a value-judgment about what they are doing
- Help students develop a plan to change their behavior
- Get commitment from the students to stick to the plan
- If the students fail to keep the plan, don't ask or accept any excuses
- Don't punish and don't criticize the student for broken plans, but don't interfere with reasonable consequences
- Never give up: go back to step 3 and start over again

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Media & Materials

Utilization Guide for Media and Materials

C	Check all parts if it is working
H	Have an activity sheet
I	Introduce, explain objectives
L	Learn how to use it
E	Environment

Types of Media and Instructional Materials

Printed Material

Advantages

- Provides an outline that the teacher can use in planning courses, units and lesson
- Summarizes a great deal of pertinent information
- Enables the students to take home in convenient form most of the material they need to learn from the course

Disadvantages

Usually written for a national audience so they do not consider local issues or community problems

Examples

- Pictures
- Graphs
- Maps
- Other illustrative material which facilitates understanding

Dr. Carl E. Patton's Ultimate Learning Guide to LET Review

Types of Media and Instructional Materials

Workbooks

Advantages

- Exercises are interesting and maintain student's interest
- Students can perform or do majority of the exercise
- Teacher provides needed direction and guided practice to help students learn the necessary skills and strategies for workbook comprehension and performance

Disadvantages

The workbook is sometimes used as a form of "busywork" to keep students occupied even a course as a substitute for teaching

Examples

Workbook in different subjects

Chalkboards or Display Boards

Advantages

- Allows spontaneity, speed and change
- Can be used for displaying pictures
- Valuable for emphasizing the major points of a lesson and working out problems for the whole class

Disadvantages

Sometimes overused

Examples

Flannel boards, Bulletin boards

Multimedia and Audio-Visuals

Advantages

- Easy to prepare
- Easy to operate and portable
- Economical and easy to duplicate
- Enhance learning communication

Types of Media and Instructional Materials

Multimedia and Audio-Visuals

Advantages

- Capture real sound and visuals
- Interesting

Disadvantages

Have a tendency for overuse

Examples

- **Projected Media**
 - ✓ Slides, filmstrips, overhead transparencies, computer projections
- **Audio media**
 - ✓ Cassettes, compact disks
- **Motion media**
 - ✓ Video compact disk, digital video disk
- **Computer**
 - ✓ Computer-mediated instruction
- **Media**
 - ✓ Radio, television used distance learning

Selection of Instructional Materials

Meaningfulness	Appropriateness
Usefulness	Cost effectiveness
Authenticity	Interest

Instructional Planning Concepts

Instructional Planning

- The ability to visualize into the future – creating, arranging, organizing and designing events in the mind that may occur in the classroom
- Accurate time management and related instances
- Teacher's ability to make decisions about the how and what of teaching

Importance and Functions

- Provides an overview of instruction
- Facilitates good management and instruction
- Makes learning purposeful
- Provides for sequencing and pacing
- Economize time
- Makes learners' success more measurable which assists in re-teaching
- Provides for a variety of instructional objectives

Dr. Carl E. Baltz's Ultimate Learning Guide to LET Review

Importance and Functions

- Creates opportunity for higher level questioning
- Assists in ordering supplies
- Guides substitute teachers

Principles

- Understand the rationale of the course in the context of the goals of the school or district
- Determine what content to incorporate into the course in view of your objective
- Clarify the focus of the course
- Decide how much time to spend for the course (special learners and instructional program)
- Identify the important components of the lesson; see if they:
 - ✓ Meet the objectives of the course
 - ✓ Foster critical or higher-order thinking
 - ✓ Match student's abilities
 - ✓ Stimulate student's interest
 - ✓ Realistic in terms of the school resources
 - ✓ Balance in terms of the scope and sequence
 - ✓ Determine the necessary approach in view of the goals

Dr. Carl E. Bauck's Ultimate Learning Guide to LET Review

Types and Components

Unit Plan

- Reflects long-range course goals and are the means of organizing a discrete aspect of the course of study
- Serves as the basis for developing a set of related daily teaching plans

Components of Unit Plan

Objectives	Content
• General objectives and specific objectives • Behavioral objectives and non behavioral objectives	• Knowledge (concepts, critical thinking, problem solving) • Skill (cognitive, affective, psychomotor) • Values
Resource and Materials	Skills
Learning Activities	Evaluation Procedure
• Lectures and explanation • Practice and drill • Grouping activities (buzz sessions, panel, etc.) • Role playing, stimulation • Research and writing • Experiments	• Demonstrations • Quizzes, examination • Re-teaching • Remediation

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

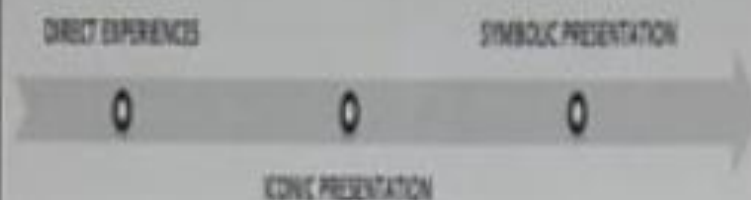

Lesson Plan

- Sets forth proposed program or instructional activities for each day
- A daily plan
- A step-by-step approach to learning

Components of a Lesson Plan

Objectives	Subject Matter
Learning activities	Evaluation
Review, drills, motivation (intrinsic/extrinsic), presentation of the lesson, generalization, application	Assignment (for enrichment, extension or remedial)

The Concrete-Abstract Continuum

- Learning is facilitated when instruction follows a sequence from actual experiences to iconic representation (e.g. pictures, films) to symbolic or abstract representation (e.g. use of words).
- Instructional media incorporating concrete experiences help students integrate past experiences and facilitate learning of abstract concepts.

Curriculum Development

Concepts	
As a Fact	As a Practice
As a means to attain Self-actualization	As a Cognitive Process
As a Technology-oriented concept	As Socially Relevant

Foundations of Curriculum

Historical Foundations	
Pre-Spanish Curriculum	Spanish-devised Curriculum
American-devised Curriculum	Japanese-devised Curriculum
Curriculum under Commonwealth	Curriculum under Philippine Republic
Curriculum under the New Society	Curriculum under the Fourth Republic

Philosophical Foundations

Metaphysics	Pragmatism	Realism
Existentialism	Idealism	

Educational Foundations

Logics	Perennialism	Essentialism
Epistemology	Reconstructionism	

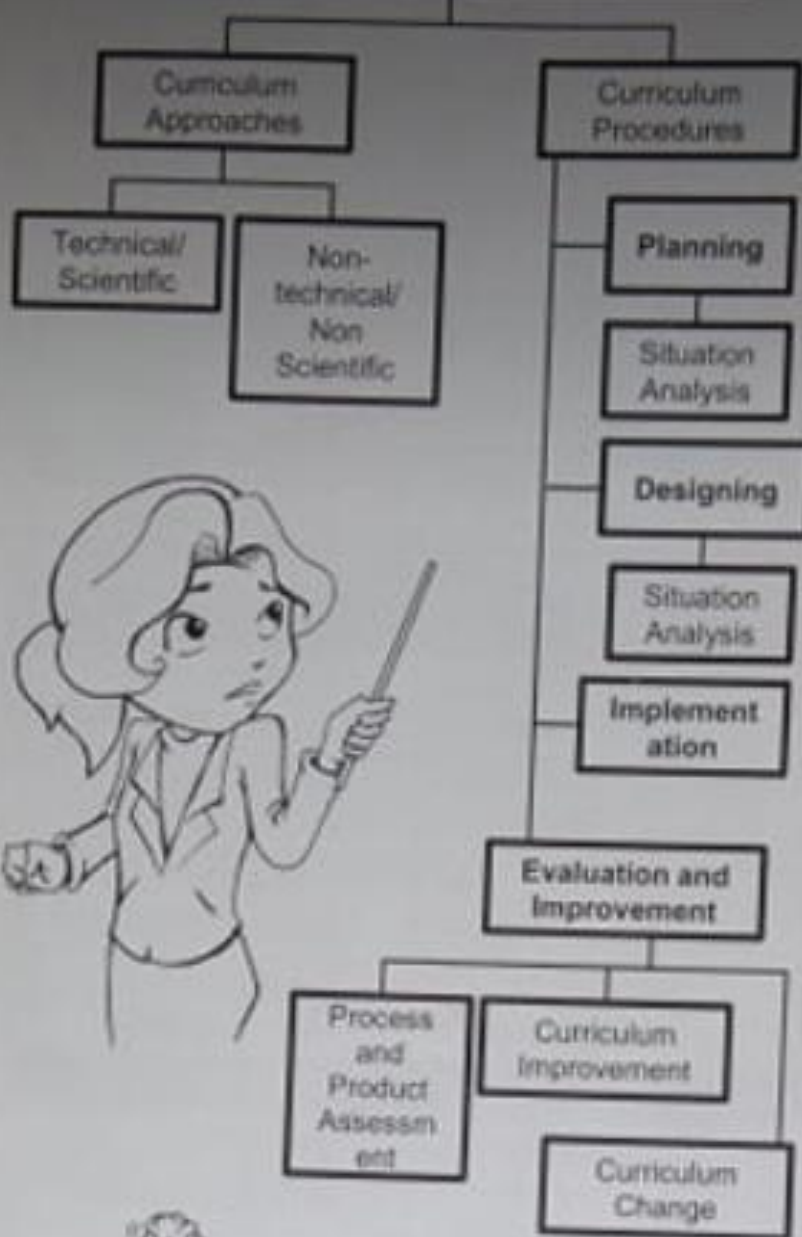

Social/Cultural Foundations

Societal Changes/Forces that affects the school	Development among the learners through societal influence
---	---

Psychological Foundations

Psychological Bases	Conditions and Principles of Learning	Teaching and Learning Styles
---------------------	---------------------------------------	------------------------------

Curriculum Development

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Definition of Terms	
Term	Definition
Curriculum	- Traditional schools defined curriculum as a group of subjects arranged in a certain sequence peculiar to the subject field itself for the purpose of instruction - Modern schools defined curriculum as a dimension composed of the actual experiences and activities of learners inside and outside the classroom under the guidance of the teacher and for which the school accepts responsibility
Curriculum Plan	The advance arrangement of learning opportunities for a particular population of learners

Dr. Carl E. Baltz's Ultimate Learning Guide to LET Review

Definition of Terms

Term	Definition
Curriculum Planning 	• The process whereby the arrangements of curriculum plans or learning opportunities are created • The process of preparing for the duties of teaching, deciding upon the goals and emphases, determining curriculum content, selecting learning resources and classroom procedures, evaluating progress and looking toward next steps
Curriculum Development 	• The process of selecting, organizing, executing and evaluating learning experiences on the basis of the needs, abilities and interests of learners and the nature of the society or community • A series of activities that contribute to the growth of consensus among staff, faculty, administration and students (Brown) • The range of planning and implementation processes involved in developing or renewing a curriculum (Richard)

Curriculum Development

As a Fact

- Curriculum as an organized knowledge which focuses on the subject matter
- Focuses on the process by which a teacher transmits to students knowledge, skills and values to prepare them for the challenging society

As a Practice

- Focuses on the acquisition of knowledge with emphasis on the discovery approach that the teachers and pupils produced
- Matching of school subjects and students' abilities

As a means to attain Self-actualization

Basing curriculum content largely on the needs, interests and abilities of the student which results to the development of the student to the fullest extent

As a Cognitive Process

- Aims to develop and improve the intellectual process and cognitive skills of the student
- Subject matter is used to teach inferring, speculating, deducing and analyzing as skills even after the content is forgotten
- Focuses on the students' learning process rather than the social context

As a Technology-oriented concept

Aims to develop learning into a systematic and efficient process

As Socially Relevant

- States that social reconstruction is necessary to face social issues such as conflicts, poverty, hunger, racial discrimination
- Emphasizes on teaching learners how to face the changing society

Dr. Carl E. Bula's Ultimate Learning Guide to LET Review

Curriculum Levels

Experiential Level

Students are now able to use and experience the curriculum that may or may not fit the learner's abilities due to individual differences

Instructional Level

- Involves instructional strategies and materials by teachers
- Involves the teachers' use of the curriculum developed in the societal level and modified in the institutional level

Institutional Level

- Includes standards, philosophies, lesson plans and teaching guides
- Includes local educators or lay people in modifying the curriculum from the societal level
- Organization according to subjects and includes topics to be studied

Societal Level

Participation of the public stakeholders (politicians, administrators, professional specialists) in identifying goals, topics to be studied, time frame and instructional material

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Designs and Patterns of Curriculum

Subject-Centered
Separate/Single Subject
• Subjects independent in content and time • Based on one of the academic disciplines
Correlated Subjects
• Subjects in two or more areas are related in content and time • Maybe factual, descriptive, normative, but the subject identities remain
Fused Subjects
Similar to correlated subjects but the individual identity of each subject is lost
Broad-Fields Curriculum
• Broadening and integration/fusion of several subjects on longer time blocks • May integrate through: ✓ Principles or themes ✓ Historical integration of subjects
Spinal Curriculum
• Concept learning depends on level of development and maturity and experiences • Wide horizontal organization of scope, integration and knowledge

Dr. Carl E. Baile's Ultimate Learning Guide to LET Review

Subject-Centered

Mastery Curriculum

Opportunity for students to succeed through providing enough time to be able to master objectives with the use of remediation and formative evaluation

Open Education Curriculum

- Open classroom
- Allows students to discover important knowledge by themselves
- Teachers are major curriculum developers

Problem-Solving Curriculum

- Learning-centered
- Students are guided to discover answers

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Experience/Learner-Centered

Activity-based

- Based on child's needs but there is no advance planning
- May necessitate special subjects for specialized interest
- Use of problem-solving method
- Cooperative learning

Child-centered

- Focuses on normal, "custom-made" activities for children with no advance planning made
- Use of experiential rather than rote learning
- Research-based
- Large use of motivation

Social Process and Life Functions-focused

- Centers around major cultural life activity of mankind based on analysis of life activities
- Based on analysis of life activities
- Relates learners and society
- Uses experiential learning and social process approach
- Structured around the various aspects of problems and processes of community

Process-oriented

- Focuses on personal attributes and skills of individual learner in ever-widening circles of self, others and society (working well with judgment, decision-making, planning, etc)
- Emphasizes development of skills and traits that will sense the learner for life
- With better balance between affective and cognitive consideration

Types of Pattern of Curriculum

Subject-centered

- Mastery of subject matter
- Learning sequence in a step-by-step pattern
- Primary instructional tool is textbook
- Teacher has control of the flow lesson
- Focused on teaching knowledge content
- Provided with well-defined scope and sequence
- Habits and skills are taught as separate aspects of learning
- Emphasis on improving teaching of subject matter and on uniformity of exposures
- Lacks consideration for the learner's capacity for growth
- Closure activities means cessation of movement

Experience-centered

- Learner-centered
- Emphasis on a holistic development of the learner
- Interests and needs of the learner as basis for the selection of subject matter
- Self-learning and discovery
- Promotes integration of subjects but with scope and sequence not well-defined
- Habits and skills are integrated in learning experiences

Types of Pattern of Curriculum

Experience-centered

- Emphasize understanding and improving through native, dynamic process
- High level of cooperative interaction
- Closure activities mean a well-rounded summation

Social/Cultural-based

- Based on the needs of the society and culture
- Focus is on problem-solving processes and skills on human and social relations
- Relates to the student and society the subject matter taught
- Content strongly relevant to learners but has weak scope and sequence of subjects

Dr. Carl E. Baltis's Ultimate Learning Guide to LET Review

Curriculum Development

Essentialist School

- It considers all learners as much the same and it aims to fit the learner into existing social order and thereby maintain the status quo

Progressivist School

- Includes pragmatists, experimentalists, reconstructivists, materialists and existentialists conceives of the curriculum as something flexible based on areas of interests

Curriculum Development

Essentialist School	Progressivist School
• Its major motivation is discipline and considers freedom as an outcome and not as means of education • Its approach is authoritative and the teacher's role is to assign lessons and recite recitations • It is book-centered and the methods recommend are memory work, mastery of facts and skills and development of abstract intelligence • Measurement of outcome and achievement are standard tests based on subject matter mastery	• Learner-centered, • No two person are alike • Factor of motivation is individual achievement • The role of the teacher is to stimulate direct learning process for most effective individual expression of the learner • Emphasizes individual spontaneity, problem-solving and development of creative responsibility • Uses life experiences approach to fit student for future social action • Major emphasis is on individual life experiences

Dr. Carl E. Baltz's Ultimate Learning Guide to LET Review

Designs and Patterns of Curriculum

Philosophical Foundations

PRIME

**PRAGMATISM / REALISM / IDEALISM /
METAPHYSICS / EXISTENTIALISM**

Realism

- Truth can be tested/proven
- Curriculum is subject-centered

Metaphysics

- Study what is beyond the natural
- Curriculum must go beyond its content; must consider what the students can become

Idealism

- Importance of mind and spirit and of developing them in the learner
- Subject-matter or content-focused, believing that this is essential to mental and oral development

Pragmatism

- The world is a world of change; man can know anything within his experience
- Provisions for direct experiences
- Activity/learner-centered
- Basis: problems of democratic society focus on problem-solving inquiry

Existentialism

- Reality is a matter of individual existence
- Meaning of life is a person's goal
- Curriculum stresses activity recognition of individual differences; opportunities for making choices and awareness of consequences

Dr. Carl E. Banta's Ultimate Learning Guide to LET Review

Educational Foundations

PeELER

**PERENNIALISM / EPISTEMOLOGY / LOGIC /
ESSENTIALISM / RECONSTRUCTIONISM**

Epistemology

- Truth about the nature of knowledge
- Curriculum revolves around teaching-learning process

Logic

- Focus on logical and accurate thought patterns
- The goal of all curricula must be the development of the students' logical thinking

Essentialism

- There are certain ideas that men should know for social stability
- Curriculum focused on assimilation of prescribed basic subject matter: 3Rs, History, Science, Math, Language

Reconstructionism

- Societal reform needed towards experiencing the good life now and in the future
- Curriculum should include subjects that deal with social and cultural crises to prepare students to become analyzers and ensure that democratic principles are followed

PeELER

**PERENNIALISM / EPISTEMOLOGY / LOGIC /
ESSENTIALISM / RECONSTRUCTIONISM**

Perennialism

- Human beings are rational and their existence remain the same throughout differing environments
- Subject matter consists of perennial basic education of rational men, history, language, math, logic, classical literature, science

Dr. Carl E. Baile's Ultimate Learning Guide to LET Review

NOTES:

Curriculum Development in the Philippine History

Pre-Spanish Curriculum	
Goals / Aim / Motive of Curriculum	Curriculum Content and Organization
• To learn basic skills like hunting, fishing, etc. • To teach Filipinos how to interact with foreign people	• Unplanned and unsystematic • Informal education was the way to learn which early Filipino received as a result of his interaction with other groups
Method of Instruction/Materials	
• Ideas and facts are acquired through suggestions, observations, examples and imitations • Youngsters of the basic habits, patterns of culture, ideals and new knowledge was through observation and experience	

Dr. Carl E. Baltis's Ultimate Learning Guide to LET Review

NOTES:

Spanish-devised Curriculum

Goals / Aim / Motive of Curriculum	Curriculum Content and Organization
- Curriculum was aimed to teach the acceptance of Catholicism and acceptance of Spanish rule - Aimed to teach young boys and girls how to love God, to discover what is good and proper for one's self, and to enable them to get along with others	- Schools were ungraded and the curriculum organization was separately subject organization - Curriculum consisted of three Rs – Reading, wRiting, and Religion, with emphasis on the last as a tool for perpetuating the colonial order

Method of Instruction or Materials

- Method of instruction was predominantly individual memorization
- The main reading materials were the cartilla, the caton, and the catecismo

American-devised Curriculum

Goals / Aim / Motive of Curriculum

- Dominated with the motive of conquering the Filipinos not only physically but intellectually
- To train the Filipinos after the American culture and way of life

American-devised Curriculum	
Method of Instruction/Materials	Other Features
• English was the medium of instruction • Group method of teaching was adopted	Prohibition of compulsory religious instruction in public schools
Curriculum Content and Organization	
• Curriculum was based on the ideals and traditions of America and her hierarchy of values • The curriculum for primary education consisted of: ✓ Body training – singing, drawing, handwork and physical education ✓ Mental training – English (reading, writing, conversation, phonetics and spelling) • The curriculum for the intermediate level consisted of: ✓ Arithmetic ✓ Geography ✓ Science – plant life, physiology and sanitation • The curriculum organization remained separate-subject	

Japanese-devised Curriculum	
Goal / Aim / Motive of the Curriculum	
To promote the East Asia Co. – prosperity sphere educational objective	
Curriculum Content and Organization	
• Vocational program has been introduced • Fostering of new Filipino culture-based on the awareness that Filipinos are Orientals • Diffusion of elementary education with the promotion of vocational organization	
Method of Instruction/Materials	
• Including Niponggo in the curriculum and abolishing English as medium of instruction • All textbooks are censored and revised	
Curriculum under the Philippine Republic	
Goal / Aim / Motive of the Curriculum	
• Improvement of pupil and community life • Transmission of values of society to succeeding generations • Developing each citizen's self-realization to promote the common welfare of the nation	
Curriculum Content and Organization	
• Use of vernacular in the first two grades of the primary school as a medium of instruction • Utilizing Philippine-oriented Materials: books on Character Education, Philippine Literature, Science and Nationalism • Use of media such as television, radio, and filmstrips in teaching helped in the attainment of instructional purposes and enrichment programs	

Curriculum under the Philippine Republic

Curriculum Content and Organization

- Hands-on activities and actual work experiences are used as a tool for learning
- Student-centered, subject matter centered and community life-centered

Other Features

- Department Memorandum no. 30, 1966
 - ✓ Purchase of books for use in schools as Philippine-oriented instructional material
- Article XIV, Section 5 of the 1935 Philippine Constitution, emphasized the important role of the curriculum in transmitting the values of society to succeeding generation

Curriculum under the New Society

Goal / Aim / Motive of the Curriculum

- To provide for a broad general education that will assist each individual in his development as a whole human being useful to his fellowmen and his country
- Redirection of education towards what is relevant to national development

Curriculum under the New Society

Method of Instruction/Materials

- Teaching of land and agrarian reform and cooperative as individual subjects for study
- Requirement of Family Planning and Philippine Constitution as compulsory subjects in the collegiate level
- Emphasis of the curriculum is on moral values, relevance, proper methods of teaching, retraining of teachers, vocational and technical education, bilingualism, national consciousness and cultural values

Curriculum Content and Organization

- Inquiry-and-problem oriented was adopted in order to develop the ability to think, rationalize and make proper decisions
- Testing in actual practice of theories learned in the classroom
- Out-of-classroom learning
- Examinations to measure ability to use knowledge
- Incentive in the form of scholarship was provided for students to take technical vocational courses

Dr. Carl E. Baltis's Ultimate Learning Guide to LET Review

Curriculum under the New Society

Other Features

- Proclamation no 1081, September 29, 1972, Decree no 6 Educational Development Act of 1972 – to guarantee that the educational system would be relevant and responsive to the challenge and requirements of national, provincial and local development
- PD no 176 – Obliging alien schools to follow basic curriculum by the Department of Education
- Letter of Instruction no 47 – integration of Family Planning in the curricula
- Department Order no 16, s 1972 – Adoption of a work-oriented curriculum in schools
- DO no 15 s 1973 – revised PE and health, preparatory military training and scouting program in secondary schools
- DO no 16, s 1973 – reorienting education in the new society
- DO no 20, s 1973 – revised secondary education program

Dr. Carl E. Baltis's Ultimate Learning Guide to LET Review

Curriculum under the Fourth Republic**Goal / Aim / Motive of the Curriculum**

To promote the rights of all citizens to quality education

Method of Instruction/Materials

Strengthening of the teaching values; return to the basics in then new elementary and secondary schools curriculum

Psychological Bases**The Learner's**

- Level of development
- Nature/Characteristics
- Needs/interests/ability levels
- Motivation to learn

Conditions and Principles of Learning

Motivation	Reinforcement	Socialization
Transfer	Practice	Effect
Retention	Feedback	Use of Social Media
Exercise	Active participation	

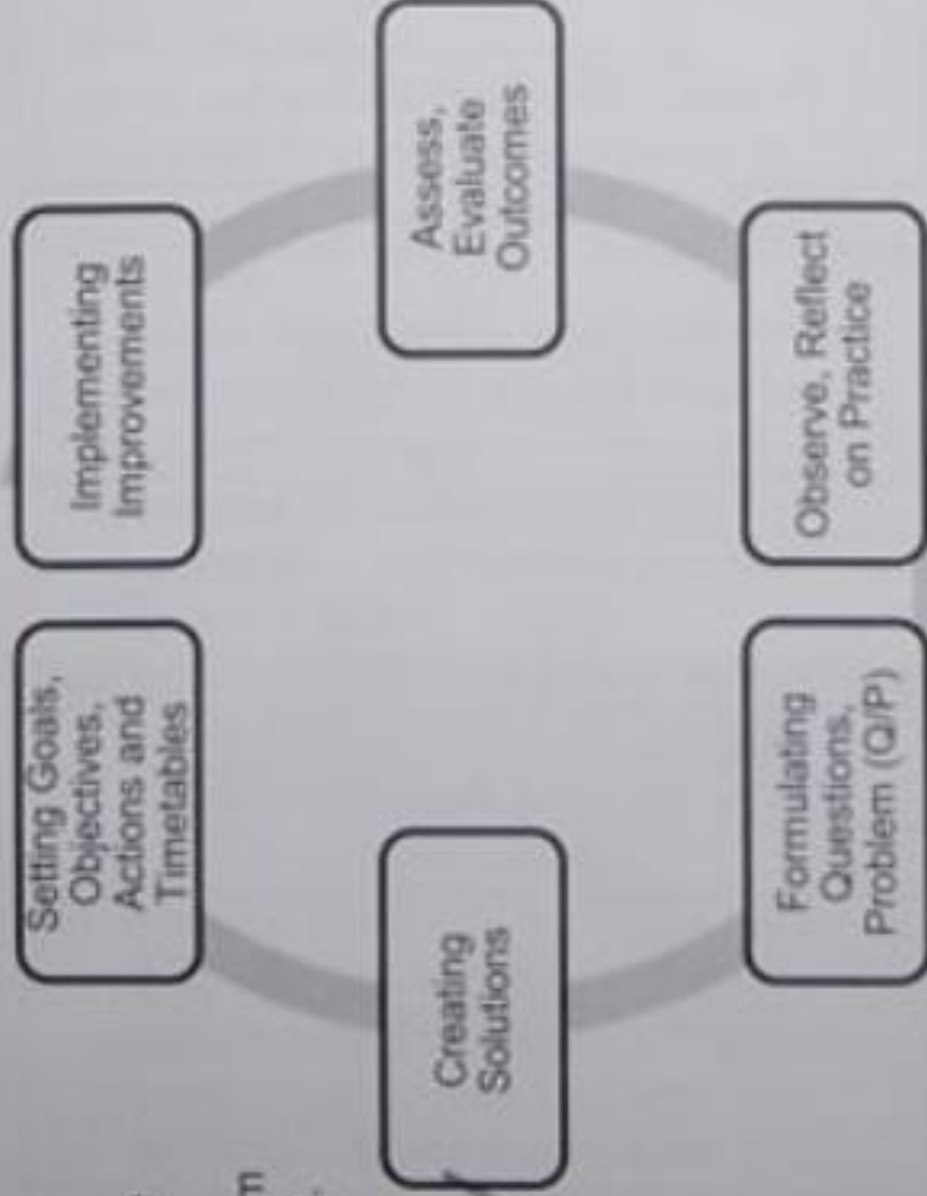

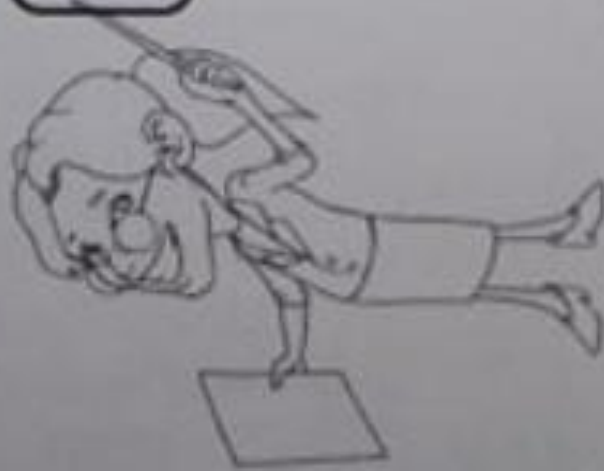

Teaching and Learning Styles

Traditional (prescriptive)	Subject-centered
Task-oriented	Problem-focused
Cooperative	Inquiry-based
Child/learner-centered	Humane/humanistic
Conducive-to-learning atmosphere	

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

The Curriculum Development Cycle

The process of curriculum development is iterative.

Dr. Carl E. Baltus's Ultimate Learning Guide to LET Review

Assessment of Learning

TEAM

Team / Evaluation / Assessment / Measurement

Test

- An instrument designed to measure any characteristic, ability or knowledge
- Comprised of test items on the area it intends to measure

Evaluation

- A process of systematic collection and analysis of both qualitative and quantitative data in order to make some judgment or decision

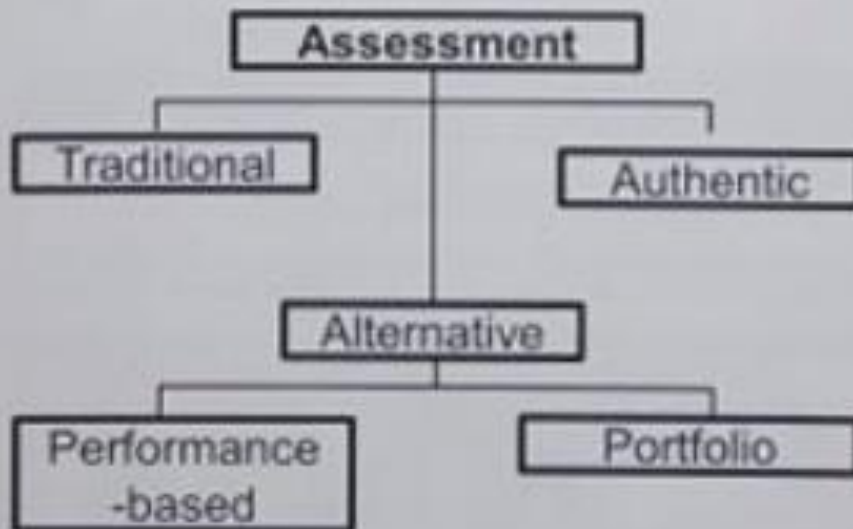

Assessment

- A process of gathering and organizing quantitative or qualitative data into an interpretable form to have a basis for judgment or decision –making
- A broader term than measurement and involves interpreting or placing such information in context
- A prerequisite to evaluation as it provides the information which enables evaluation to take place

Measurement

- A process of quantifying the degree to which someone or something possess a given trait
- A broader term than test because of a variety of measuring tool like checklist, observation, etc.

There are different modes of assessment

Different Modes of Assessment	
Traditional	
Pen and paper mode of assessing any quality, skill or knowledge	
Examples	Standardized and teacher-made tests
Advantages and Disadvantages	
• Scoring is objective • Students take management at the same time so management is easy • Time-consuming and prone to guessing and cheating	
Performance-based	
Requires the students to perform a significant and relevant task	
Examples	Projects, practical test, oral and aural tests

Different Modes of Assessment

Performance-based

Advantages and Disadvantages

- Relatively easy to prepare
- Measures behavior which cannot be faked
- Scoring tends to be subjective
- Time-consuming

Portfolio

Dynamically and collaboratively gathers multiple indicators of student progress to support course goals

Examples

Working portfolios, show portfolios, documentary portfolios

Advantages and Disadvantages

- Measures student's growth and development
- Intelligence-fair
- Time-consuming
- Rating tends to be subjective

Authentic

Stimulates situations that is true-to-life

Examples

Could be objective or alternative methods that are close to what we experience in real life

Dr. Carl E. Baltix's Ultimate Learning Guide to LET Review

What is assessment for? What are the usual purposes of assessment?

Purposes of Assessment

For Learning	
Placement	Done before instruction
	Determines mastery of prerequisites
Formative	Done before instruction
	Reinforce successful learning
Diagnostic	Done after instruction
	Certifies mastery of learning outcomes
Of Learning	
Summative	Done after instruction
	Certifies mastery of learning outcomes
As Learning	
For teachers to understand and perform well their role in assessment	

Principles of High Quality Assessment	
Reliability	Validity
Ethics	
Should free students from misuse of assessment procedures	
Positive consequences	
Should motivate both students and teachers to improve	
Authenticity	
Meaningful task, clear standards, transferable learning	
Communication	
Targets, standards and results should be communicated to students	
Fairness	
Should provide students with equal opportunity to demonstrate achievement	
Balance	
Should set targets in all learning and intelligence domains	
Appropriate and clear learning targets	
Learning targets should be clearly stated and centers on what is important	
Practicality and efficiency	
The information should be worth the resources and time required to obtain it	
Appropriate methods	
Good match between learning targets and assessment methods	
Continuous process	
Takes place prior, during and after instruction	

Dr. Carl E. Buehler's Ultimate Learning Guide to LET Review

Assessment Methods

Objective	Self-Report
• Multiple choice • TRUE/FALSE • Matching • Short answer • Completion Test	• Questionnaires • Attitude survey • Sociometric devices
Oral Questions	Performance-based
• Oral examination • Interview	• Projects • Presentations • Portfolios
Observation	Essay
• Informal observation • Formal observation	• Restricted response • Extended Response

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Rubric

A rubric is a measuring instrument used in rating performance-based tasks. It is a cross between a checklist and a rating scale.

Checklist

Contains characteristic
s of a
desirable
performance;
rater checks
observed
performance

Rating Scale

Measures
degree to
which a trait
was achieved;
at least 3
levels

Types of Rubric

Holistic Rubric

Describes the overall quality of a performance or produce; there is only one rating given to the entire work or performance

Advantages

- Allows fast assessment
- Single score is provided to describe quality of performance
- Can indicate strengths and weaknesses of the work or performance

Disadvantages

- Criteria satisfied is not clearly stated
- Does not permit differential weighting of performances

Analytic Rubric

Describes the quality of performance or product in terms of the identified dimensions and/or criteria which are rated independently to give a better picture of the quality of work or performance

Advantages

- Clearly describes the degree of the criterion satisfied by the performance or product
- Permits differential weighting of the qualities of a product or a performance
- Helps raters pinpoint specific areas of strengths and weaknesses

Disadvantages

- More time consuming to use
- More difficult to construct

Elements of a Rubric

- Performance levels (minimum of 3)
- Qualitative and quantitative description of each performance level
- Evaluation which should specify criteria for each standard
- Task which should be feasible and authentic
- Competency to be tested

Test

A test is a measuring tool consist of a set of question. It measures characteristic, quality, ability, sill or knowledge.

Different Types of Test

Types according to Scope and Content

Survey	Mastery Test
• Covers a wide range of objectives • Measures general achievement in a specific subject • Constructed by trained professionals	• Covers specific learning objectives • Measures fundamental skills and abilities • Constructed by a teacher

Types according to Time Limit and Level of Difficulty

Power	Speed
• Questions are arranged according to increasing level of difficulty but students are given ample time to answer • Measures ability to answer difficult questions	• Questions have the same level of difficulty but taken with time limit • Measures speed and accuracy in answering questions

Types according to Language Mode

Verbal	Non-Verbal
Words are used in answering questions	Pictures and symbols are used in answering questions

Types according to Effect of Biases

Objective	Subjective
• Bias do not affect scoring • Only one answer satisfies the question • Little or no disagreement on the correct answer	• Affected by personal bias • Multiple answers to one question • Possible disagreement on what is the correct answer

Dr. Carl E. Banta's Ultimate Learning Guide to LET Review

• **Types according to Interpretation**

Norm-Referenced Test	Criterion-Referenced Test
• Interpretation is based on comparison of students • Describes performance based on other's performance • Competition for limited percentage of high scores	• Interpretation based on comparison of students' performance against criteria • All or none may pass • No competition • Describe student's mastery of objectives

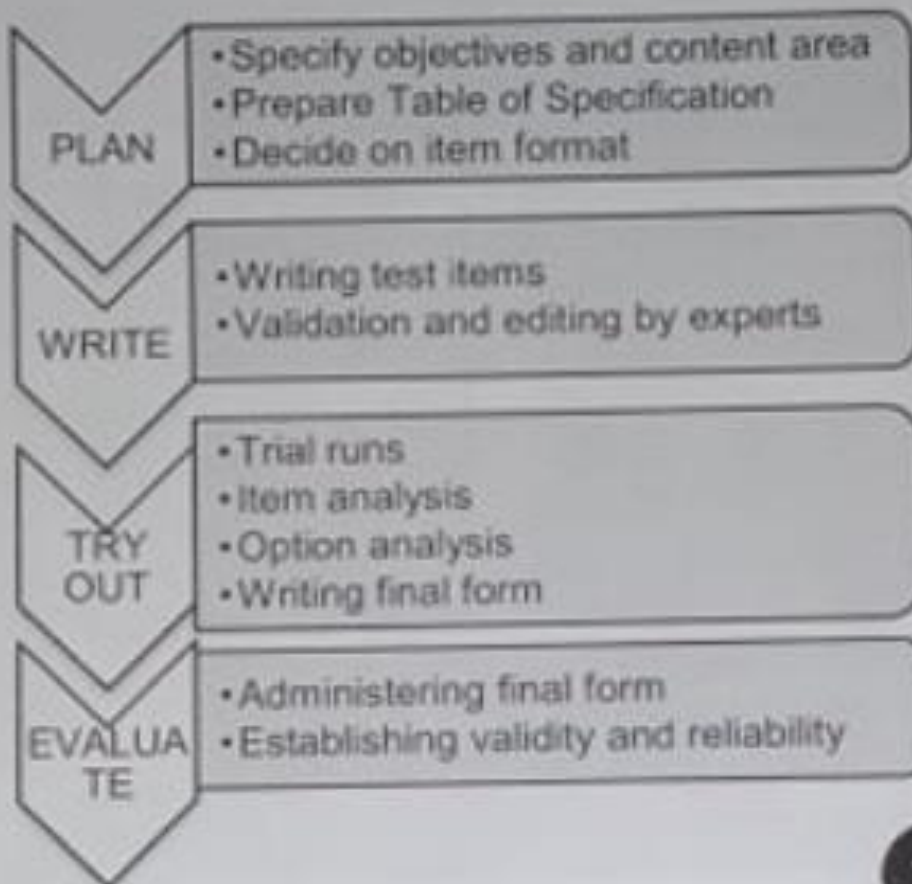

Types according to Purpose

Educational Test	Psychological Test
Measures the result of teaching; given after the lesson	Measures intelligence or mental ability without reference to what has been learned; given before the lesson
Achievement Test – measures what the student has learned at the end of instruction	Aptitude test – areas where students are likely to succeed; measures mental processes Personality test – measures student's personal traits Intelligence test – measures mental ability or the innate capacity of mind without background training

Types according to Manner of Administration

Individual	Group
• Given one student at a time • Usually through oral or skill demonstration • Teacher has more opportunities for observation • Chance for follow-up	• Given to many students at the same time • Usually through paper or pencil test • Lack of insights about examinee • Efficient

Developing and Validating Test

Difficulty and Discrimination Indices	
Difficulty Index	Interpretation
0.00 – 0.20	Very Difficult item
0.21 – 0.40	Difficult item
0.41-0.60	Moderately difficult item
0.61-0.80	Easy item
0.81 - above	Very easy item
Discrimination Index	Interpretation
-1.00 - -0.60	Questionable item
-0.59 - -0.20	Not discriminating item
-0.19 – 0.20	Moderately discriminating item
0.21 – 0.60	Discriminating item
0.61 – 1.00	Very Discriminating item

The smaller the Difficulty Index is, the more difficult the item.

The larger the Discrimination Index is, the more Discriminating the item.

General Suggestions in Test Writing:

- Items must be in appropriate reading and difficulty level
- Items must not give a clue to succeeding items
- Write more items than required
- Use table of specifications as guide
- Task to be performed is clearly defined
- Items are agreed upon by experts
- Recheck relevance if the test is revised

Suggestions for Writing Selective Type Tests

Matching Type

- Stem should be meaningful and the problem presented is definite
- Item should include as much information and should be free of irrelevant materials
- Use negatively stated item only if required
- All alternatives are grammatically consistent with the stem
- Only one correct and clearly best answer
- Distracters indicated are plausible
- Verbal association between the stem and the correct answers should be avoided
- Use of 'none of the above' or all 'all of the above' are done sparingly
- Always have the stem and alternatives on the same page

Alternative Response

- Avoid the use of negative statements especially double negatives
- Avoid long and complex sentences
- Avoid two ideas in one statement unless cause and effect relationship is being measured
- True and false statements are equal in length

Multiple Choice

- Use only homogenous materials
- Include unequal number of responses
- Keep the list of items brief
- Logical order of choices
- Place items and list on the same page

Suggestions for Writing Supply Type Test

- Word the item (s) so that the required answer is both brief and specific
- Do not take statements directly from books
- Direct question are more desirable than an incomplete statement
- Indicate type of answers wanted (i.e numerical)
- Blanks for answers are equal in length
- Answers are written before the item number for easy checking

Suggestion for Writing Essay Type Tests

- Restrict the use to outcomes which cannot be measured objectively
- Indicate maximum points for each question
- Prepare a rubric for essay questions

Validity and Reliability

Validity is the degree to which the test measures what it intended to measure.

Reliability is the consistency of scores obtained when retested with the same instrument or a parallel instrument.

Types of Validity

- Content Validity
- Criterion-related validity
 - ✓ Concurrent validity
 - ✓ Predictive validity
- Construct validity
 - ✓ Convergent validity
 - ✓ Divergent validity

Factors affecting Validity

- Appropriateness of the test
- Directions
- Reading vocabulary and sentence structures
- Difficulty of items
- Construction of items
- Length of test
- Arrangement of items
- Patterns of answer

Methods of measuring Reliability

- Test-Retest
- Equivalent/Parallel Forms
- Test-Retest with Equivalent Forms
- Split-Half
- Kuder Richardson

Factors Affecting Reliability of Tests

- Length of the test
- Difficulty
- Objectivity
- Administrability
- Scorability
- Economy
- Adequacy
- Authenticity

Assessing Affective and Other Non-Cognitive Learning Outcomes

Affective Learning Outcomes

Social attitudes	Appreciations
Interests	Adjustment
Academic self-concept	Scientific attitude

Types of Non-Cognitive Test

Closed-Item or Forced-Choice Instrument

- Have one or specific answer
- Selection for answers are provided
- Examples: Checklist, scales

Open-Ended Instruments

- Open to more than one answer
- No provisions for choices of answers
- Examples: sentence completion, survey, essay

Tools/Procedures for Affective Assessment

Observational Techniques	Personality Assessments
Anecdotal records, peer appraisal, self-report technique, attitude scale	Personality inventories, creativity tests, interest inventories

Dr. Carl E. Baliga's Ultimate Learning Guide to LIT Review

Measurement

Measurement Scales

Nominal Scales

- Merely classifies object or individuals
- Order is unimportant
- Example: Civil Status (1-Single, 2-Married, 3-Widowed)

Ordinal Scales

- Order of categories is important
- Distance between categories are not necessarily equal
- Example: (grade: 1-grade 1, 2-grade 2, 3-grade 3...)

Interval Scale

- Equal units of measurement
- Do not have a true zero (true zero – none of the characteristics is present)
- Examples: Test scores, temperature

Ratio Scale

- Has a true zero
- Examples: height, weight

Data and Data Measures

Measures of Central Location

- Any measure indicating the center of a set of data, arranged in an increasing or decreasing magnitude
- Mean, Media, Mode

Measures of Variability

- How large the differences between individual scores
- Range, standard deviation, quartiles

Guidelines in Grading Students

- Explain your grading system to the students early in the course and remind them of the grading policy regularly
- Base grades on predetermined and reasonable set of standards
- Base grades on as much objective evidence as possible
- Base grades on the student's relative standing compared to classmates
- Base grades on a variety of sources
- When failing a student, closely follow school procedures
- Record grades on report cards and cumulative records

Guidelines on Conducting Parent-Teacher Conferences

- Plan for the conference
- Start the conference in a positive manner
- Present the student's strong points before identifying areas needing improvement
- Encourage parents to share information
- Plan a course of action cooperatively
- End the conference on a positive note

Data and Data Measures

Measures of Central Location

- Any measure indicating the center of a set of data, arranged in an increasing or decreasing magnitude
- Mean, Media, Mode

Measures of Variability

- How large the differences between individual scores
- Range, standard deviation, quartiles

Measures of Position

- Location of a score in relation to others
- Percentiles, standard scores, stanines, t-score

Measures of Shape

- Describes the peakedness or flatness of deviation from normality of the distribution
- Skewness, kurtosis

Measures of Central Location

Example data set: 2, 3, 4, 4, 6

Mean	• Add the data values and divide by the total number of values • Mean = $(2+3+4+4+6)/5 = 3.8$
Media n	• Arrange in order of magnitude and get the middle value of the two middle values • Media = 4
Mode	• Get the value with the highest frequency • Mode = 4

For Grouped Data

Mean

The formula for mean is $\bar{x} = \frac{\sum fx}{\sum f}$.

$X_1 \dots k$ = class midpoints

$F_1 \dots k$ = corresponding the class frequencies

Median

The formula for the median is

$$\text{Median} = l + \frac{h}{f} \left(\frac{N}{2} - c \right)$$

Where

l = lower class boundary of the median class

h = Size of the median class interval

f = Frequency corresponding to the median class

N = Total number of observations i.e. sum of the frequencies

c = Cumulative frequency preceding median class.

Mode

$$\text{Mode} = l + \left(\frac{f_s}{f_p + f_s} \right) \times i$$

where

l = Lower limit of the modal class.

f_s = the frequency of the class succeeding the modal class.

f_p = the frequency of the class preceding the modal class

i = Width of the class interval.

Example:

No of Employees: 22 / 28 / 41 / 35 / 28

Ages: 15-24 / 25-34 / 35-44 / 45-54 / 55-64

Mean = 40.73 / Median = 41.09 / Mode = 41.34

Interpretation of Measures of Central Tendency

- The mean (or media or mode) is the point on the scale around which scores tend to group
- It is the average or typical score which represents a given group of subjects
- Given two or more values of central tendency, one can define who performed poor, good, better or best

Measures of Variability

Range, Standard Deviation and Quartile Deviation

- Difference between the largest and smallest number in the set
- Range = HS - LS + 1
- If the range is small, values are close together and if the range is large, scores are more spread out.

$$\text{Sample Standard Deviation: } s = \sqrt{\frac{\sum(x - \bar{x})^2}{n - 1}}$$

$$\text{Population Standard Deviation: } \sigma = \sqrt{\frac{\sum(x - \bar{x})^2}{n}}$$

$$\text{Quartile Deviation} = \frac{\text{Third Quartile} - \text{First Quartile}}{2}$$

$$\text{Quartile Deviation (Q.D)} = \frac{Q_3 - Q_1}{2}$$

For Grouped Data

Range, Standard Deviation and Quartile Deviation

- Range = Upper boundary of the highest interval – Lower boundary of the lowest interval
- Standard deviation

$$\sigma = \sqrt{\frac{\sum \{f(x - \bar{x})^2\}}{\sum f}} \quad s = \sqrt{\frac{\sum \{f(x - \bar{x})^2\}}{\sum f}}$$

Interpretation of Standard Deviation

- The computed value indicates how spread the scores are. One SD below and above the mean includes around 68.26% of the cases; two SD units on each side of the mean includes approximately 95% of the cases; three SD units includes around 99%
- The larger the measure of variability, the more spread the scores, and the group is said to be heterogeneous
- The smaller the measure of variability, the less spread the scores, and the group is said to be homogenous

Measures of Relative Position

Percentiles

- Percentiles divide the distribution into 100 groups
- Finding the value corresponding to a given percentile
 - ✓ Let p be the percentile and n the sample size
 - ✓ Arrange the data in order
 - ✓ Compute $c = p / 100 \times n$
 - ✓ If c is not a whole number, round up to the next whole number. If c is a whole number, use the value halfway between c and $c+1$
 - ✓ The value of c is the position value of the required percentile
- Example: Find the value of the 25th percentile for the following data set: 2, 3, 5, 6, 7, 10, 12, 15, 18, 20
 - ✓ $p=25$, $n=10$, so $c = (25)/100 \times 10 = 2.5$. Hence round up to $c=3$
 - ✓ Thus, the value of the 25th percentile or P_{25} is the value $x=5$.
- Example Find P_{80} in the preceding data set.
 - ✓ $c = (80) / 100 \times 10 = 8$. Thus the value of the 80th percentile is the average of the 8th and 9th values
 - ✓ The 80th percentile for the data set is $(15+18) / 2 = 16.5$

Measures of Relative Position

Percentiles

- Deciles divide the data set into 10 groups. Deciles are denoted by $D_1, D_2, \dots, D_9$ with the corresponding percentiles being $P_{10}, P_{20}, \dots, P_{90}$.
- Quartiles divide the set into 4 groups. Quartiles are denoted by Q_1, Q_2 and Q_3 with the corresponding percentiles being P_{25}, P_{50} and P_{75} .

Standard Scores

- The standard score or z-score represents the number of standard deviations a data value falls above or below the mean.
- **Example:** A student scored 65 on a statistics exam that had a mean of 50 and a standard deviation of 10. Compute the z-score

$$z = \frac{x - \mu}{\sigma} = \frac{65 - 50}{10} = 1.5$$

μ = Mean

σ = Standard Deviation

Stanines

- Standard scores that tell the location of a raw score in a specific segment in a normal distribution which is divided into 9 segments, numbered from a low of 1 through a high of 9.
- Scores are falling within the boundaries of these segments are assigned one of these 9 numbers (standard 9)

Measures of Relative Position

T-score

Tells the location of a score in a normal distribution having a mean of 50 and a standard deviation of 10

Measures of Shape

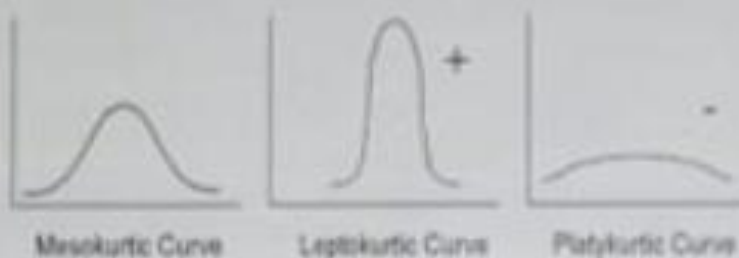

Skewness

Deviation from normality of a distribution

- Positively skewed – most scores are low, there are extremely high scores and the mean is greater than the mode
- Negatively skewed

- Kurtosis – the peakedness or flatness of the distribution
 - ✓ Mesokurtic – moderate peakedness
 - ✓ Leptokurtic – more peaked or steeper than a normal distribution
 - ✓ Platykurtic – flatter than a normal distribution

Measures of Shape

Other Shapes

- **Bimodal** – curves with two peaks or mode
- **Polymodal** – curve with three or more modes

Measures of Shape

Other Shapes

- **Bimodal** – curves with two peaks or mode
- **Polymodal** – curve with three or more modes

Grading

Could be in

- Percent, Letters, Numbers, Descriptive expression

Could represent

- Norm-referenced grading, Criterion-referenced grading, Grading based on teacher's judgment

Could be for

- Certification, selection, direction and motivation

Could be based on

- Test data, observation, recitation, Homework, reports and papers, Portfolios and projects, Attitudes

Could be assigned using

- Norm-referenced grading, criterion-referenced grading, point or percentage grading, contract grading

DOs	DONTs
Be friendly and informal	Don't argue or get angry
Be positive in your approach	Don't pretend that you know certain information
Be willing to listen	Don't reject parents' suggestions
Be willing to accept patients' feelings	Don't ask embarrassing question
Be willing to explain in understandable terms	Don't talk about other students, teachers or parents
Be careful about giving advice	Don't be a know-it-all person

Dr. Carl E. Butler's Ultimate Learning Guide to LET Review

NOTES:

Human Growth, Learning and Development

Components of Human Development

Social Development	Emotional Development
• Sociocultural influence • Family and socialization • Non-nuclear families • Development of Peer Relationships • Television as a Socializing Influence • The Development of Gender Roles	• Attachment • Development of Trust and Security • Development of emotions • Differences in Temperament • Development of Self Autonomy, Self-concept, and self-esteem
Physical Development	Moral Development
• Physical growth • Motor growth • Perceptual development • Nutrition • Sleep • Healthcare • Sexual Development	• Moral of constraint • Moral of cooperation
	Cognitive Development
	• Cognitive Learning Theory

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Physical Development

Physical Growth

Body Height and Weight

- Pattern 1: (Birth to 1) very rapid but decelerating growth
- Pattern 2: (1 to before the onset of puberty) shows a more linear and steadier annual increment
- Rapid growth until age one then gradual slowing until age 10 for girls and age 12 for boys

Individual Differences

Growth depends upon heredity, nutrition and eating habits and total health care

Body Proportions

2 Principles:

- Cephalocaudal principles – proceeds from the head to feet
- Proximodistal principles – from the center of the body outward to extremities

Organ System

Three organic systems do not follow the general pattern of growth of the rest of the body or organ:

- Lymphoid system – rapid growth during childhood and recedes after puberty
- Reproductive system – little growth until puberty
- Central nervous system – most of the growth occur during the early years of life

Physical Growth	
Brain Growth and Nerve Maturation	
• Myelinization – the process by which nervous system become coated with an insulating substance called myelin • Cerebral Cortex – two large hemisphere of the forebrain • Lateralization – the preference for using one side of the body more than the other in performing task	
Teeth Eruption Times	
• Teeth eruption can be delayed by hypothyroidism • Deciduous (baby) teeth eruption is similar in both sexes; permanent teeth appear earlier in girls	
Motor Growth	
Gross Motor Skills and Locomotion During Infancy	
Children's motor development is dependent on physical maturation specifically neuromuscular and musculoskeletal development; Also influenced by opportunity for exercise and practice	
Fine Motor Skills During Infancy	
Involves the use of the smaller muscles of the body	
Gross Motor Skills of Preschool Children	
Preschool children between 2-5 years old make major advances in motor development	

Motor Growth

Fine Motor Skills of Preschoolers

- Involves a high degree of small-muscle and eye-hand coordination
- With small muscles under control, children gain a sense of competence and independence because they can do a lot of things such as eating or dressing

Handedness

Preference of using one hand over the other

Changes during the School Years

- Elementary school-age children gradually increase in motor ability as their bodies continue to grow
- There are inconsistent gender difference in motor development between boy and girls during middle childhood

Physical Fitness

Today's children are less physically fit than they were in the 1960's (National Children and Youth Fitness Study, 1984)

Perceptual Development

- Depth Perception - ability to see things in three dimensions
- Perception of Form of Motion
- Perception of Human Face
- Auditory Perception – frequencies, sound localization

Nutrition

Breastfeeding vs bottle-feeding

Dietary requirements

Malnutrition

Obesity

Food safety

Sleep
• Needs, habits and disturbances • Sleeping with Parents
Health Care
Health supervision of the Well Child Health Education
Sexual Development
Infancy
The infant's capacity for sexual response begins early
Early Childhood
Preschool children are curious about everything
Middle Childhood
Because society becomes less accepting to children's sexual interests during middle childhoods, sexual activities take place more covertly than during the preschool years
• Parents as Sex Educators • Sex education can help children understand the process of the physical development of their own bodies and to prepare for the bodily changes at puberty • Sex Education also helps children accept their own sexuality
Social Development
Sociocultural Influence
• Microsystem – child's immediate contact • Mesosystem – social influences involving reciprocal relationship

Dr. Carl E. Balin's Ultimate Learning Guide to LET Review

Social Development

Sociocultural Influence

- Exosystem – includes those setting in which the child usually does not have an active role as a participant but that influence the child indirectly through their effects on the microsystem
- Macrosystem – includes the ideologies, values, attitudes, more, and customs of a particular culture

Non-nuclear Families

One-parent Family	Female-headed Family	
Male-headed Family	Homosexual Family	Divorce and Children

Television as a Socializing Influence

Viewing habits	Factual vs. Fictional	Violence and aggression
Cognitive development	Positive effects	Family Interaction Commercials

The Development of Gender Roles

- Gender – our biological sex; male or female
- Gender Roles – outward expression of masculinity or femininity in social setting
- Influences on Gender Roles: Biological, Cognitive and Environmental
- Age and Gender Role Development
- Gender Stereotypes – common concepts and characteristics of what boys and girls, or men and women, are supposed to be like in the context or the culture in which they live
- Androgyny – mixing of male and female traits and role

Family and Socialization

- Family
 - ✓ Any group of persons united by the bond of marriage, blood, or adoption or any sexual expression in which,
 - The people are committed to one another in an intimate, interpersonal relationship
 - The members see their identity importantly attached to the group and the group has an identity of its own
- Different Group of Families
 - ✓ Single-parent family – consist of a single parent (mother/father) and has one or more children
 - ✓ Nuclear family – consists of a father, mother, and their children
 - ✓ Extended family – consists of one parent, a possible mate, any children they might have and other relatives
 - ✓ Blended or reconstituted family – a widowed or divorced person, with or without children, remarries another person with or without children
 - ✓ Binuclear family – an original family divided in two by divorce
 - ✓ Communal family – consists of a group of people who live together and share various aspects of their lives

Family and Socialization

- Different Group of Families
 - ✓ Homosexual family – consists of adults of the same sex who live together, with their children, and who share sexual expression and commitment
 - ✓ Cohabiting family – consists of two people of the opposite sex who live together, with or without children and who share sexual expression and commitment to their relationship without formal legal marriage
- Socialization
 - Process by which persons learn the ways of society or social groups so that they can function within it

Development of Peer Relationship

Psychosocial Development

- Autosociality
 - ✓ A stage of psychological development during the first year or so of life, during which infants' interests, pleasures and satisfactions are themselves
- Childhood Heterosociality
 - ✓ A stage when children seek the companionship of others regardless of sex
- Homosociality
 - ✓ A stage during which the children prefer to play with others of the same sex
- Adolescent and Adult Heterosociality
 - ✓ A stage of psychosocial development during which companionship and friendship is found with those of both sexes

Development of Peer Relationship		
Infants and Toddler		
Babies' first social experiences are usually with parents and siblings. They interact with one another from about 5 months onward.		
Early Childhood		
• Two-year olds: Children playing alongside one another, rather than with one another; since cooperative play not very evident • Three-year olds: They in fewer solitary activities, do less passive watching of other children, and become less inclined toward isolated play • Four and Five-year olds: They gradually develop more socially competent interactions		
Preschooler's Play		
• Cooperative Play – organized groups of children engage in play • Associative play – children interact with others, borrowing or lending toys, following or leading one another in similar activities • Parallel play – children play alongside, not with each other • Onlooker play – children watch others play and are talking to them but is not involve • Solitary play – playing with toys by themselves		
Middle Childhood		
Popularity	Least Popular	Peer Rejection
Conflicts	Competition	Loneliness
Gangs and Clubs		Social maladjustment
Social Cognition		Family Influences

Piaget's Moral Judgment

Moral of Constraint
(conducted coerced by rules or by authority)

Moral of Cooperation
(conducted regulated by mutual respect and consent)

Morality of Cooperation

Expiatory Punishment
(punishment that results from the externally imposed regulation: associated with morality of constraint.)

Punishment of Reciprocity
(self-imposed punishment; associated with morality of cooperation)

Punishment of Reciprocity

Objective Judgments
(judgment based on the consequences of wrongdoing)

Subjective Judgments
(take into account intention or motives)

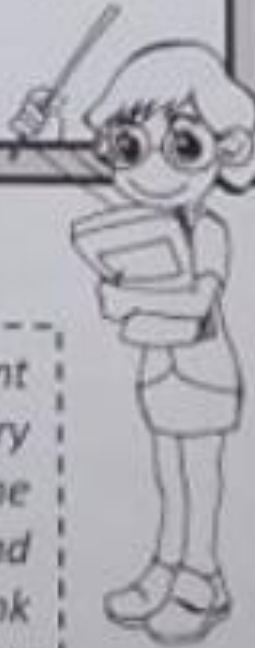

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Emotional Development

Concerned with the development of their feelings and expression of them in relation to others

Attachment

Attachment theory is the joint work of John Bowlby and Mary Ainsworth. Attachment means the feeling that binds a parent and child together, the emotional link between them and the desire to maintain contact through physical closeness, touching, looking, smiling, listening or talking. Attachments give security, a developing sense of self and make to socialization of the individual possible

Dr. Carl E. Baltis's Ultimate Learning Guide to LET Review

Attachment	
Multiple Attachments	
• Children can develop attachments to more than one person • Children can and do become equally attached to their mother and father	
Specific Attachments	
• This develops until 6-7 months of age • Children below 6 months old may be comforted by anyone rather than a specific person	
Maturation	
• Before attachment to parents can take place these three things must occur • Infants must learn to distinguish human beings from inanimate objects in the environment (3-6 weeks of age) • Infants must learn to distinguish between different human beings so that they can recognize their parents as familiar and strangers as unfamiliar (some infants – 1 month, 81% - 3months, all normal infants – 5 months)	
Decreases in Attachment Behavior	
• From 12-18 months of age is probably the most vulnerable time when specific attachments are at their maximum • At 2 years old there is an increasing independence and maturity • At 3 years old, children want contact by looking and talking across a distance	

Attachment

Non-attached Children and Insecure Attachment

- Non-attached children may make no distinction between their own parents and other members of the household or a caretaker
- Insecurely attached children won't let their parents go out of their sight. Example: Signs of insecurity include screaming and clinging to parents

Separation Anxiety

- Symptoms: A baby crying when a parent leaves the room; their play may cease after a parent leaves them, they creep or walk or try to follow

Effects of Repeated or Long-term Separation

- Children become quiet, apathetic, listless, unhappy and unresponsive to a smile
- If separation continues, children enters a period of detachment or withdrawal; in extreme cases, they became uninterested with everything going on around them, their activities become retarded

Age Factors

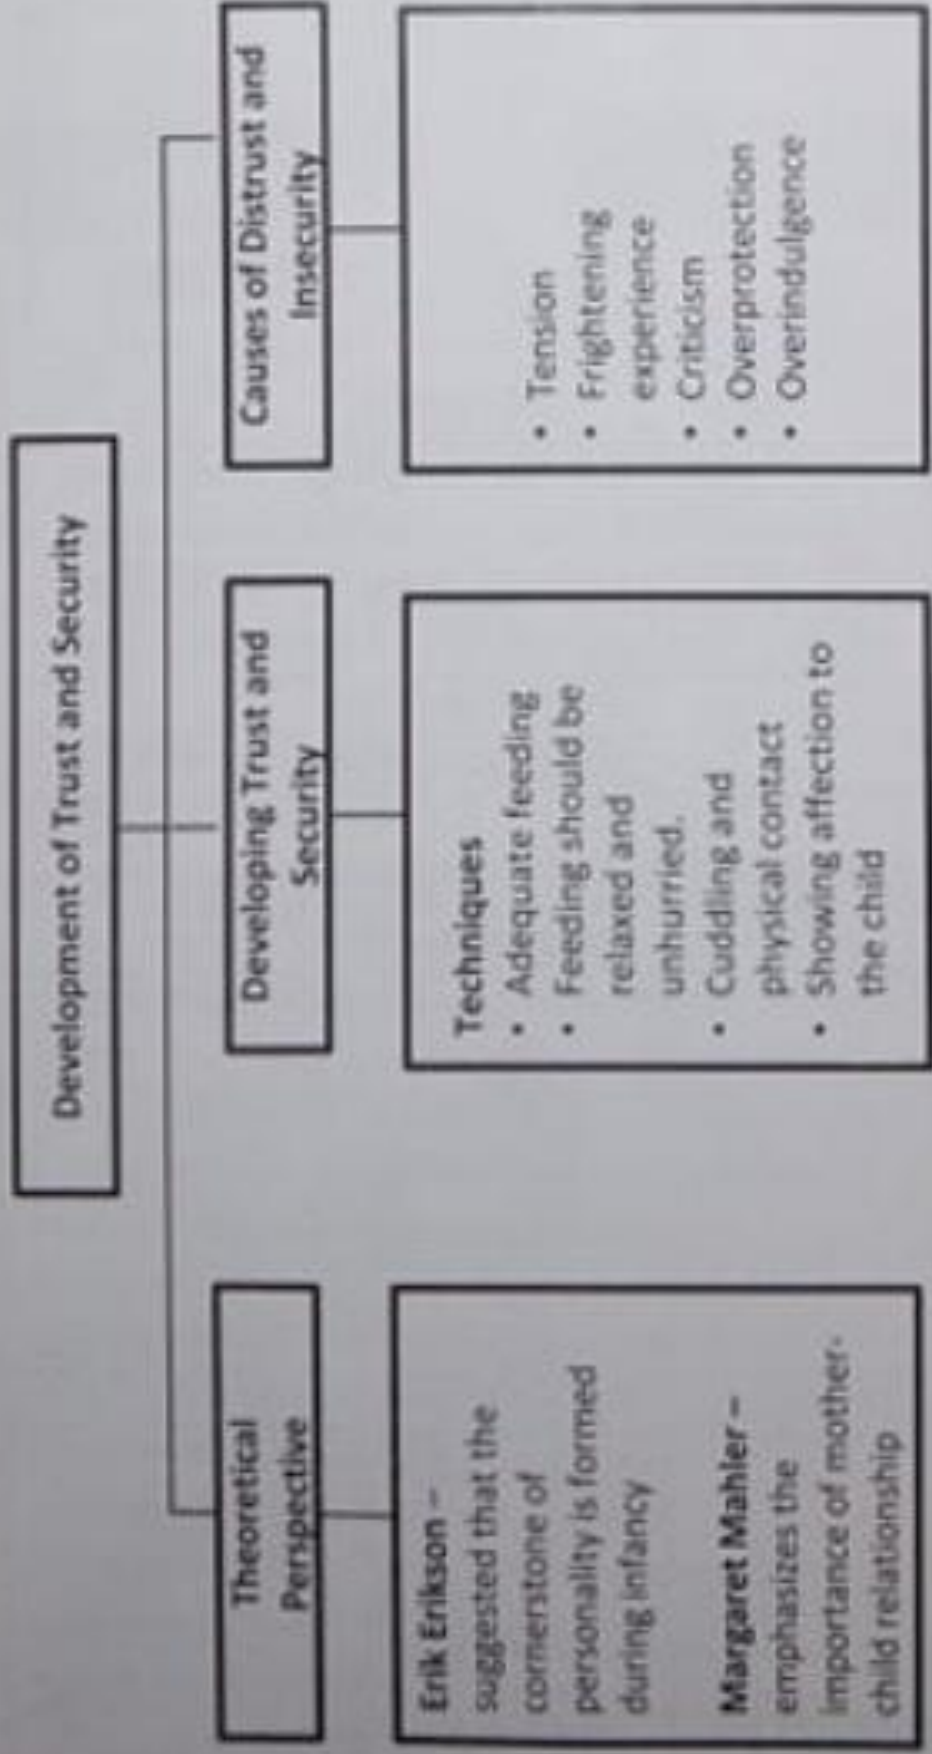

- Sorrow/pain during separation is greatest after 6 months until 3 years of age
- The older the children, the less they become upset

Attachment
Homesickness
• A possible manifestation of separation anxiety • Younger boys have greater risk
Reunion Behavior
Children become very dependent and possessive and give unusual demands on their parents
Strangers
• Begins at about 6 or 7 months until 2 years • Children are more frightened when they are alone

Dr. Carl E. Burt's Ultimate Learning Guide to LET Review

NOTES:

Dr. Carl E. Balfanz's Ultimate Learning Guide to LET Review

Development of Emotions

Components

- The provoking stimuli
- Behavioral response to emotion
- Feelings – positive or negative conscious experiences of which we become aware
- Physiological arousal

Environmental and Biological Influences

Parent's important role in the development of emotions:

- Help children to exercise control
- Help children to dissipate anger through physical activity, verbalization and directed play
- Be a positive model

Other emotions

- Children's fears
- Children's worries
- Aggression (verbal or physical)

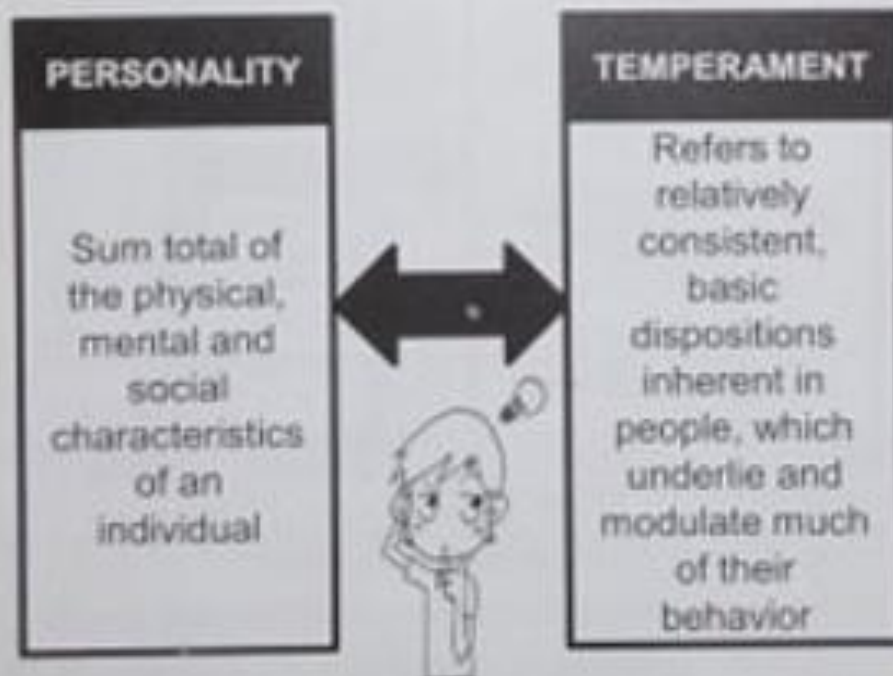

Basic emotions

- Happiness, sadness, anger, surprise, disgust and fear are the basic emotions
- Correct interpretation of other's emotions is essential in interpersonal relationships

Dr. Carl E. Balfanz's Ultimate Learning Guide to LET Review

NOTES:

Temperament

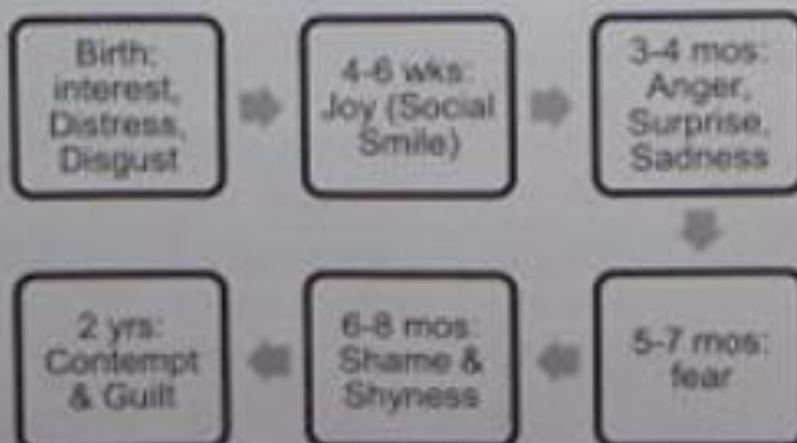

Dr. Carl E. Bialik's Ultimate Learning Guide to LET Review

Components and Patterns of Temperament

Rhythmicity	Activity Level	Adaptability
Distractibility	Approach or withdraw from new stimuli	
Sensory threshold	Intensity of Mood	Persistency and attention span
Predominant Quality of Mood		

Time Table of Development of Emotions

Development of Self-Autonomy, Self-Concept & Self-Esteem

Autonomy (Independence, Self-Rule)

- Children has an innate desire for autonomy
- Reasonable and respectful control helps the child achieved disciplined autonomy

Separation -Individualization

A period when the child develop his own sense of self apart from the mother

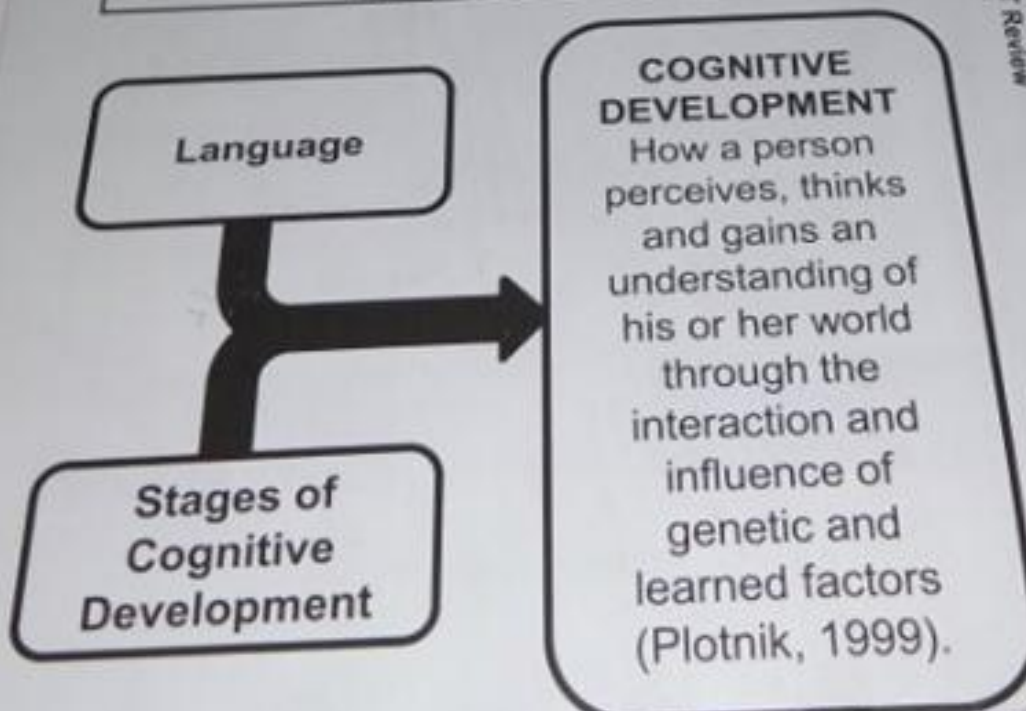

Self-definition & Self-concept

Increasing awareness helps the child define self and eventually develop his own concept of self or identity

Self-Reference and Self-Efficacy

Self-reference has to do with ourselves, our estimates of our abilities and how capable and effective we are in dealing with others and the world. Estimates of our effectiveness have been termed as self-efficacy.

Dr. Carl E. Smith's Ultimate Learning Guide to LET Review

Language

- Infant's initial mode of communication is through sucking and eating
- Language represents only one method of communication
- Language enables human to pass on the knowledge and enables humans to transcend time and space

Elements and Rules of Language

Phonemes

Came from the Greek word meaning "Sound"; it is the smallest unit of sound

Morphemes

Smallest units of meaning in language; e.g. help, mama, papa

Syntax

System of rules by which phonemes are combined in morphemes, and morphemes are combined in words and words are combined in phrases and sentences

Semantics

Deals with the meanings of words and sentences. It assures proper word usage.

Pragmatics

Refers to the practical use of language to communicate with others in a variety of social contexts

Dr. Carl E. Biala's Ultimate Learning Guide to LET Review

Theories of Language Development

Learning Theory

Suggest that language is learned

Cognitive Theory

Language is a product of the mental processes in one person

Biological Theory

Children are born with an innate capacity to learn language

Interaction Theory

Language is a product of both biological maturation and the interaction of a person with his/her environment

Other Theories and Concepts

Grammar

Description of structure and rules that a language uses to communicate meanings

Pragmatics

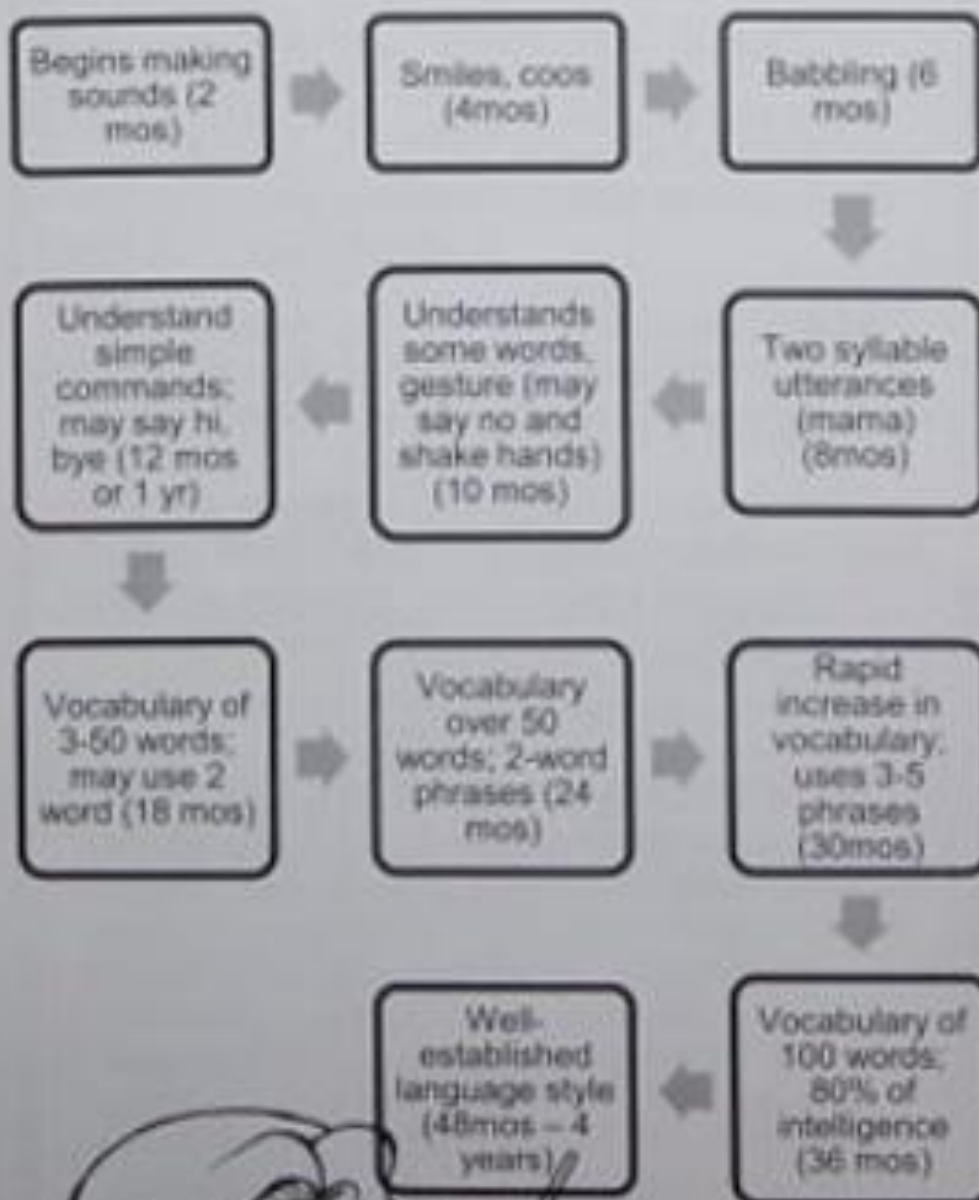

Ability to use language to communicate with others in a variety of social settings

Bilingualism

A development of a second language known as subtractive language aside from the mother language

Dr. Carl E. Baltis's Ultimate Learning Guide to LET Review

Sequence of Language Development

Dr. Carl E. Biala's Ultimate Learning Guide to LET Review

Stages of Cognitive Development

SENSORIMOTOR Infancy

Stage 1 (0-1 month)

Exercising reflexes

Stage 2 (1-4 mos.)

Primary circular actions

Stage 3 (4-8 mos.)

Secondary schemes

Stage 4 (8-12 mos.)

Coordination of reactions

Stage 5 (12-18 mos.)

Tertiary circular actions

Stage 6 (18-24 mos.)

Mental solutions

PREOPERATIONAL Toddler/Early Childhood

Symbolic Play – using
one object to represent
another play

**Transductive
Reasoning** – processing
them together to form
conclusion

Syncretism – linking
unrelated ideas together

Egocentrism – inability
to take other's point of
view

FORMAL OPERATIONAL Adolescence and Adulthood

Initially, there will be a
return of egocentric
thought

*Only 35% of high school
graduates reach formal
operation*

CONCRETE OPERATIONAL Elementary and Early Adolescence

Characterized by 7 types
of conservation: number,
length, liquid, mass,
weight, area and volume

Operational thinking
develops (mental actions
that are reversible)

Egocentric thought
diminishes: number,
length, liquid, mass,
weight, are and volume

Dr. Carl E. Bialer's Ultimate Learning Guide to LET Review

Stages of Human Growth	
Zygote (Fertilization to 14 days)	• Cell division • Implantation in the uterine walls
Embryo (14-16 days)	• Occasional heart contraction at 2 weeks; becomes normal by 4-5th week • Some brain activity by end of 6th week • Normal heart functioning at the end of 7th week
Fetus (60 days to birth)	• Develops fingernails, vocal chords, taste buds and salivary glands and begin to urinate (3rd month)
Parturate (Birth to cutting of umbilical cord)	• Spontaneous movement, between the 13th and 20th week
Neonate (Birth to 30 days)	• Develops hair and eyelashes (5th month)
Infant (Birth to 2 years)	• Rudimentary shape concepts • Self-motivated activity

Dr. Carl E. Balita's Ultimate Learning Guide to LET Review

Stages of Human Growth	
Child (2-10/12 years)	• Capacity to communicate • Presence of self-concepts and self-awareness • Reasoning
Adolescent (Girls: 11-21 years) (Boys: 13-21 years)	• Complete puberty, transition from childhood to adulthood • Reach nearly adult height especially females • Seek increased independence • Influenced by peers

Dr. Carl E. Butler's Ultimate Learning Guide to LET Review

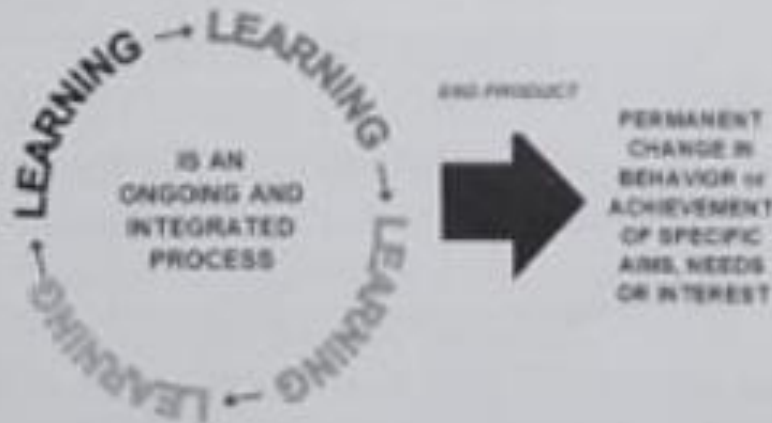

Food for the Thought:

If you keep good food in your fridge, you will eat good food.

(Erich McAdams)

Phases and Theories of Learning

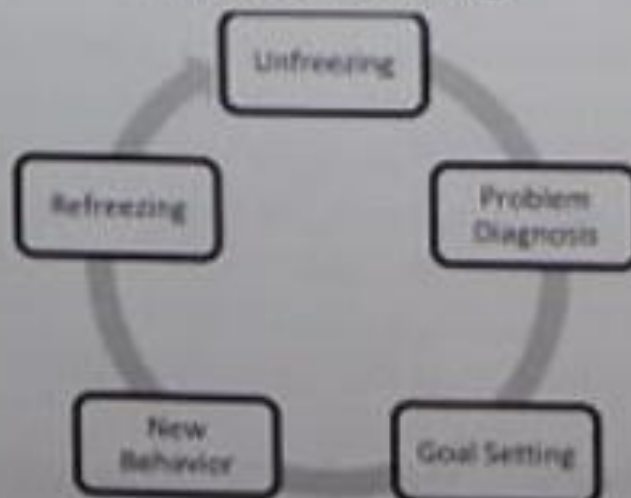

Learning is an integrated, ongoing process occurring within the individual enabling him to meet the specific aims, fulfil his needs and interests and with the living process.

Learning maybe defined a relatively permanent change in behavior potentiality that occurs due to experience and reinforced practice.

Characteristics: Developmental, Interactive, Basic

Phases of Learning

Dr. Carl E. Biala's Ultimate Learning Guide to LET Review

Principles of Learning
10 Major Principles
Learning by doing is a good advice.
One learns what one does.
The amount of reinforcement necessary for learning is relative to the students' needs and abilities.
The principle of readiness is related to the learners' state of development and their previous learning.
The student's self-concept and beliefs about their abilities are extremely important.
Teachers should provide opportunities for meaningful and appropriate practice (rehearsal).
Transfer of learning to new situations can be horizontal (across subject matter) or vertical (increase complexity of same subjects). Learning should be learning-directed and focused.
Positive feedback, realistic praise, and encouragement are motivating in the teaching and learning process.
Metacognition is an advanced cognitive process whereby students acquire specific learning strategies and also sense when they are not learning or having trouble learning.
Learning by doing is a good advice.

Dr. Carl E. Burtis's Ultimate Learning Guide to LET Review

Principles of Learning

7 Thinking Skills

Analysis (sometimes called field dependence-independence) the ability to breakdown complex information into part for the purpose of identification and organization.

Focusing (Scanning) is the ability to select relevant or important information without being distracted or confused by irrelevant or secondary information.

Comparative Analysis (Reflective-impulsivity) is the ability to select a correct item from among several alternatives and to compare information and make proper choices.

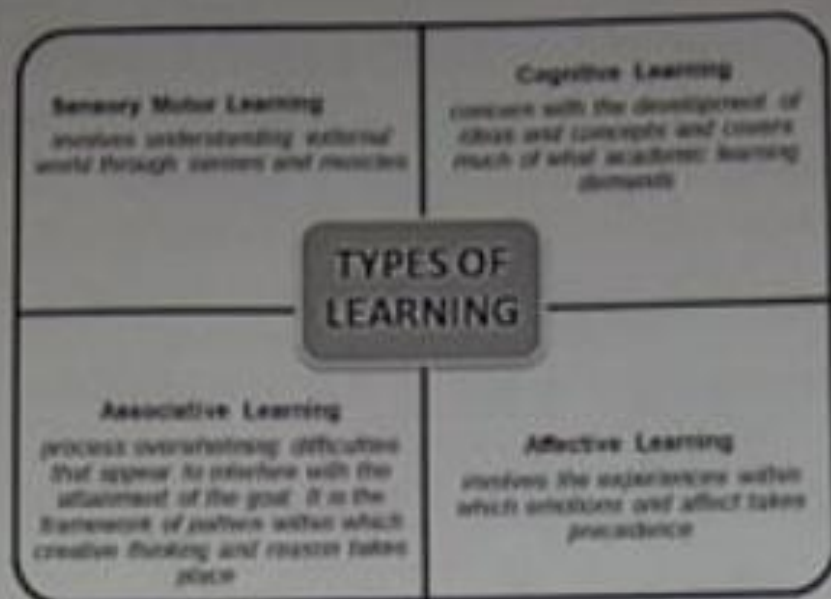

Narrowing (Breadth of categorization) is the ability to identify and place new information into categories through its attributes (physical characteristics, principles or functions).

Complex Cognitive (Complexity-simplicity) is the ability to integrate complex information into existing cognitive structures (long-term memory).

Sharpening (Sharpening-leveling) is the ability to maintain distinctions between cognitive structures (including old new information) and to avoid confusion or overlap.

Tolerance (tolerant-intolerant) is the ability to monitor and modify thinking. The ability to deal with ambiguous or unclear information without getting frustrated.

Four Orientations to Learning (Mernam and Caffarella 1991:138)	
Learning Theories	
<i>Behaviorist</i>	<i>Cognitivist</i>
Thorndike, Pavlov, Watson, Guthrie, Hull, Tolman, Skinner	Koffka, Kohler, Lewin, Piaget, Ausubel, Bruner, Gagne
<i>Humanist</i>	<i>Social and Situational</i>
Maslow, Rogers	Bandura, Lave and Wenger, Salomon
Process of Learning	
<i>Social and Situational</i>	<i>Cognitivist</i>
Interaction and observation in social context	Internal mental process (including insight, information, processing, memory, perception)
<i>Humanist</i>	<i>Behaviorist</i>
A personal act to fulfill potential	Change in behavior

**Four Orientations to Learning
(Merriam and Caffarella 1991:138)**

Focus of Learning	
<i>Behaviorist</i>	<i>Cognitivist</i>
Stimuli in external environment	Internal cognitive structuring
<i>Humanist</i>	<i>Social and Situational</i>
Affective and cognitive needs	Learning is in relationship between people and environment
Purpose in Education	
<i>Behaviorist</i>	<i>Cognitivist</i>
Produce behavioral change in desired direction	Develop capacity and skills to learn better
<i>Humanist</i>	<i>Social and Situational</i>
Become self-actualized, autonomous	Full participation in communities of practice and utilization
Teacher's role	
<i>Behaviorist</i>	<i>Cognitivist</i>
Arranges environment to elicit desired response	Structures content of learning activity
<i>Humanist</i>	<i>Social and Situational</i>
Facilitates development of the whole person	Works to establish communities of practice

**Four Orientations to Learning
(Merriam and Caffarella 1991:138)**

Outcomes or products of Learning

<i>Behaviorist</i>	<i>Cognitivist</i>
Competency-based education / skills development and training	Cognitive development / Intelligence, learning and memory as function of age / Learning how to learn
<i>Humanist</i>	<i>Social and Situational</i>
Andragogy / Self-directed learning	Socialization / Social participation / Associationalism / Conversation

Dr. Carl E. Bailey's Ultimate Learning Guide to LET Review

Behavioral	Cognitive Constructivism	Social Constructivism
Knowledge is constructed through interaction with the environment.	Knowledge systems of cognitive structures are actively constructed by learners based on existing structures.	Knowledge is socially constructed.
Learning is the acquisition of knowledge through the interaction of the learner with the environment. Learning is an active process where the learner constructs meaning from the information they receive.	Active assimilation and accommodation of new information to existing cognitive structures by learners. Structures are modified or new ones are created based on new information.	Integration of students into knowledge community. Collaborative assimilation and accommodation of new information.
Learning is a process where the learner constructs meaning from the information they receive. Learning is an active process where the learner constructs meaning from the information they receive.	Learners set their own goals and learn by solving problems and constructing meaning from the information they receive.	Learners and educators are both active participants in the learning process. Learning is a social process where learners learn from each other.
Learning is a process where the learner constructs meaning from the information they receive. Learning is an active process where the learner constructs meaning from the information they receive.	The teacher facilitates learning by providing a supportive environment where learners can explore and construct meaning from the information they receive.	Collaborative learning is facilitated and guided by the teacher. Group work is encouraged.

Dr. Carl E. Bialik's Ultimate Learning Guide to L&T Review

Theories in Personality Development

Psychoanalysis (Psych -sexual) Sigmund Freud

Stages

- **Oral Stage (0-1 y/o)**
 - ✓ Center of pleasure is mouth
 - ✓ Examples: sucking, chewing, biting
- **Anal Stage (1-3 y/o)**
 - ✓ Attention is focused on anal region
 - ✓ Example: Toilet training
- **Phallic Stage (3-6 y/o)**
 - ✓ Pleasure from sex organs
- **Latency Stage (6-12 y/o)**
 - ✓ Focus is school work; sexual instincts are calm
- **Genital Stage (12 y/o and onwards)**
 - ✓ Oedipus/Electra complexes are reactivated
 - ✓ Independence

Freud's Structural Model Sigmund Freud

- Personality is consists of three elements: id, ego and superego

Stages

- **ID** – present from birth; focus is on pleasure
- **Ego** – reality oriented
- **Superego** – internalized moral standards and ideals; guide in making judgments
 - ✓ Ego ideal – rules and standards for good behavior
 - ✓ Conscience – information about things viewed as bad

Psychosocial Theory Erik Erikson

- More on socio-cultural aspect
- Extension of Freud's model

Stages

- **Trust vs Mistrust (Birth to 1 y/o)**
 - ✓ Acquisition of such traits is dependent on the child's early experiences
- **Autonomy vs Shame and Doubt (1-3 y/o)**
 - ✓ Conflicting points are presented as children venture on different tasks
- **Initiative vs Guilt (3-6 y/o)**
 - ✓ Parents and environment are the major contributors to the development of such traits
- **Industry vs Inferiority (6-12 y/o)**
 - ✓ Children are molded to be industrious or otherwise
- **Identity vs Role Confusion (12-20 y/o)**
 - ✓ Child seek to answer: "Who am I?"
- **Intimacy vs Isolation (20-40 y/o)**
 - ✓ Intimacy is capacity to reach out and make contact with people
- **Generativity vs Stagnation (40-65 y/o)**
 - ✓ Able to work actively, productively and creatively
- **Ego Integrity and Despair (60y/o-death)**
 - ✓ Facing and accepting the reality of aging

Cognitive Theory (Jean Piaget)

- Focused on the intellectual aspect

Stages

- **Sensorimotor (Birth – 2y/o)** – focus on the use of sense organ
- **Pre-operational (2-7 y/o)** – symbolism and egocentricity
- **Concrete operational (7-11 y/o)** – able to solve concrete problem in logical manner
- **Formal Operational (11y/o-onwards)** – scientific thinking

Sociohistoric-Cognitive/Linguistic Lev Semanovich Vygotsky)

- Cognitive development is the construction of thought processing
- Children are dependent in the beginning and become independent in the future
- **ZPD or Zone of Proximal Development** – child find it difficult to complete a task without assistance from an adult

Learning Theory John Watson

- Children are Tabula Rasa or clean slate at birth
- Heredity and maturation plays a role in development
- Development is a continuous process

Moral Development Lawrence Kohlberg

Stages

- **Preconventional (0-9 y/o)**
 - ✓ Stage 1: Punishment-Obedience Orientation (2-4 y/o)
 - ✓ Stage 2: Instrumental Relativist Orientation (5-9 y/o)
- **Conventional (9-20 y/o)**
 - ✓ Stage 3: Conforms to conventions (Nice girl/boy)
 - ✓ Stage 4: Law and Order Orientation (maintains social order)
- **Postconventional (after 20 y/o)**
 - ✓ Stage 5: Social orientation (Rules are needed to maintain the social agreement at the same time the rights of the individuals are understood)
 - ✓ Stage 6: Universal Ethical Principle (Moral decisions should be made in terms of self-chosen principles)

Dr. Carl E. Bialik's Ultimate Learning Guide to LET Review

Other Theories of Development

Psychosocial

Peek

Adult development during old age:

- Ego differentiation vs work rule
- Body transcendence vs work rule
- Ego transcendence vs ego pre-occupation

Moral

Carol Gilligan

- Researched with women subjects
- 3 stages in process of developing care ethics
- Best known for: work with and against Kohlberg (ethical community/relationships, and subject-problem on ethics)

Spiritual

Rev. John Westerhoff

Stages of Christian faith development

- Experience faith – customs and rituals participation
- Affiliative faith – belonging/being with an accepting Christian faith
- Searching faith – questioning and internalizing of faith
- Owned faith –rarely appears before young adulthood (due to struggle with self-doubt); may appear as great illumination or enlightenment

Dr. Carl E. Bialik's Ultimate Learning Guide to LET Review

Behavioral Learning

Classical Conditioning Ivan Pavlov

Description & Stages

- Stimulus-Response
- Concept Basic to Classical Conditioning:
 - ✓ Unconditioned stimulus (US) – stimulus that elicits an unconditioned response
 - ✓ Unconditioned Response (UCR) – response to unconditioned stimulus
 - ✓ Conditioned stimulus – stimulus that can generate a conditioned response
 - ✓ Conditioned response – a response elicited after a conditioning process
 - ✓ Contingency – a situation in which one event happens only after another event has happened

Connectivism Edmund Thorndike

- Learning is by bond and connection
- Law of effect – states that a satisfying state of affairs following the response strengthens the connection between the stimulus and the behavior, whereas an annoying state weakens the connection
- Law of Exercise – describes the conditions implied in the adage "Practice makes perfect"
- Law of Readiness – describes the condition that refers to "annoying or satisfying states"

Social Cognitive Learning

Albert Bandura

Description & Stages

- Observation Learning – consists of four phases: attentional, retention, reproduction and motivation
- Vicarious learning – learning acquired from observing; the consequences of others' behavior
- Self-regulated learning – occurs when individuals observe, assess and judge their own behavior against their own standards and subsequently reward or punish themselves

Models

- Real life – exemplified by teachers and parents
- Symbolic – presented through oral or written symbols, e.g. books
- Representational – presented through audio-visual means, e.g. films

Components of Successful Modeling (Omrod)

- Attention
- Retention
- Motor reproduction
- Motivation
- Self-management: goal setting, recording and evaluating, self-reinforcement

Dr. Carl E. Butler's Ultimate Learning Guide to LET Review

Reinforcement and Operant Conditioning Burrhus Skinner

Description

- Learning as a consequence of behavior
- Basic Concepts in Operant Conditioning:
 - ✓ Operant conditioning - using pleasant or unpleasant activity to control behavior
 - ✓ Reinforces – any consequence which strengthens behavior
 - Primary reinforcers – related to basic need
 - Secondary – value of something is acquired when associated with primary reinforcer
 - Positive – strengthen behavior
 - Negative – release from an unpleasant situation to strengthen behavior
 - ✓ Schedule of Reinforcement – sequence of reinforcement following a performance
 - Continuous reinforcement – occurring at every occurrence of a behavior
 - Intermittent reinforcement – given every now and then
 - Ratio Schedule – given after a set number of responses
 - Interval schedule – follow a predetermined period of elapsed time
 - ✓ Punishment – unpleasant consequence to weaken behavior
 - ✓ Aversive stimulus – consequence that a person avoids

Reinforcement and Operant Conditioning Burrhus Skinner

Description

- Learning as a consequence of behavior
- Basic Concepts in Operant Conditioning:
 - ✓ Shaping- teaching of new skills or behavior by reinforcing learner to help him reach goals
 - ✓ Extinction – eliminating or decreasing a behavior by withdrawing the reinforcement
 - ✓ Cue-signal – as to what behavior(s) will be reinforced or punished
 - ✓ Prompt – a reminder that follows a cue to make sure that a person reacts to the cue
 - ✓ Discrimination – response to differences in stimuli
 - ✓ Generalization – behavior learned under one set of conditions can be carried over to other situations

Principles of Learning in Operant Conditioning

- Principle of consequence – behavior changes according to its immediate consequences
- Principle of Reinforcement – any action taken following a response that increases the likelihood that the response will occur again
- Premack Principle or "Grandma Rule" – less desired activities can be increase by doing a less desirable activity

Principles of Learning in Operant Conditioning

- Principles of Extinction – when reinforcement for a previously learned behavior is withdrawn, the behavior fades away

Cognitive Learning Theory

Field Theory (Kurt Lewins)

- Learning takes place when individuals achieve insight
- Concept of life space

Problem-Solving Theory (Wolfgang Kohler)

- Humans are capable of seeing relationships and can solve problems not by trial and error

Meaningful Learning (Constructivism) David Ausubel

- An individual learns relating newly acquired information to what s/he already knows

Basic Concepts in Meaningful Learning Theory

- Meaningful learning set – the attitude that one can make sense out of the information to be learned
- Relevant prior knowledge – contains information to which a new idea can be related
- Organization – finding connections among the various pieces of information one needs to learn

Meaningful Learning (Constructivism)
David Ausubel

Basic Concepts in Meaningful Learning Theory

- Elaboration – expanding on new information based on what one already knows
- Visual imagery – forming a mental picture of information
- Advance organizers – initial statements, activities and techniques that provide a structure for the new information and related it to information student possess
- Cognitive structure – refers to the stability, clarity and organization of a learner's subject matter knowledge in a given discipline

Theory of Instruction (Jerome Bruner)

- Focused on the problem of what people can do with information to achieve generalized insights and understanding
- Three simultaneous processes:
 - ✓ Acquisition – process of obtaining new information that can either replace or refine something previously known
 - ✓ Transformation – the manipulation of information to fit new situation
 - ✓ Evaluation – the checking whether or not the learned material has been manipulated appropriately

Dr. Carl E. Bauer's Ultimate Learning Guide to LET Review

Gestalt Theory (Wolfgang, Marx Wertheimer)

The primary focus is perception:

- Law of Closure – states that incomplete figures tend to be seen as complete
- Law of Continuity – states that the perceptual organization tends to preserve smooth continuities rather than abrupt changes
- Law of Proximity – hold the things close together and grouped together in perception
- Law of Similarity – refers to perception of similar objects that tends to be related

Cumulative Learning (Rober Gagner)

- Learning occurs as the individual develops higher level skills that build successively on lower skills (Klausmeier)
- Types of Learning according to level of skills/capabilities:
 - ✓ Signal learning – occurs when two stimuli are nearly simultaneously presented and the response previously elicited only by the unconditioned stimulus is also elicited by the newly conditioned stimulus
 - ✓ Stimulus – Response Learning – response to specific stimuli that has been discriminated from other stimuli
 - ✓ Motor chains/Verbal Chains Learning – two or more separate motor/verbal responses may be combined or chained to develop a more complex skill

Dr. Carl E. Bailis's Ultimate Learning Guide to LET Review

Cumulative Learning (Rober Gagner)

- Types of Learning according to level of skills/capabilities:
 - ✓ Discrimination Learning – discriminating a specific stimulus from other stimuli
 - ✓ Concept learning – making a common response to stimuli that are different or dissimilar in various ways
 - ✓ Rule learning – learning of two more concepts
 - ✓ Problem solving – learning to recall and apply rules

Types of Learning Outcomes

Achieving Cognitive Learning

TEACHING FACTS, FACTUAL INFORMATION, AND KNOWLEDGE

BASIC CONCEPTS

- Fact - something that has happened, an event or an actual state of affairs
- Factual Information - information discriminated by many individuals who share the same cultural background and accepted as correct or appropriate
- Information - anything that is discriminated by an individual
- Knowledge - factual information that is learned initially and then remembered

Types of Learning Outcomes

Achieving Cognitive Learning

TYPES OF KNOWLEDGE

- General - knowledge that applies to many different situations
- Domain- specific knowledge that pertains to a particular task or subject
- Declarative - knowledge of verbal information: facts, beliefs, opinions
- Procedural - knowledge on how a task is performed
- Conditional - knowing when and why the need to use declarative and procedural knowledge

TEACHING CONCEPTS AND PRINCIPLES

BASIC IDEAS

Concept

- an idea or an understanding of what something is
- a category used to group similar events, ideas, objects, or people organized information about the properties of one or more things
 - ✓ Attributes of Concept
 - ✓ Learnability
 - ✓ Usability
 - ✓ Validity
 - ✓ Generality
 - ✓ Power
 - ✓ Structure
 - ✓ Instance perceptibility
 - ✓ Instance numerousness

Types of Learning Outcomes
Achieving Cognitive Learning

Principles

- Relationship among two or more concepts
- Classification of Principles
 - ✓ Cause and effect
 - ✓ Probability
 - ✓ Correlation
 - ✓ Axioms

DEVELOPING PROBLEM SOLVING SKILLS

- **Problem:** a felt difficulty or a question for which a solution may be found only by a process of thinking.
- **Thinking:** the recall and reorganization of facts and theories that occur at a time when the individual is faced with obstacles and problems.
- **Reasoning:** productive thinking in which previous experiences are organized or combined in new ways to solve a problem.
- **Problem Solving:** creating new solutions to remove felt difficulty.

DEVELOPING CREATIVITY

- **Restructuring:** conceiving of a problem in new or different way
- **Incubation:** unconscious work toward a solution while one is away from the problem
- **Divergent thinking:** coming up with many possible solutions
- **Convergent:** narrowing possibilities to the single answer
- **Creativity:** occurrence of uncommon or unusual but appropriate responses: imaginative, original thinking

Types of Learning Outcomes
Achieving Psychomotor Learning

BASIC CONCEPTS

- Capacity – individual's potential power to do a certain task
- Ability – actual power to perform an act physically and mentally
- Skill – level of proficiency attained in carrying out sequences of action in a consistent way.

Characteristic of Skilled Performance

- Less attention to the specific movement (voluntary or involuntary)
- Better differentiation of cues
- More rapid feedback and correction of movements
- Greater speed and coordination
- Greater stability under a variety of environmental conditions

Phases of Motor Skills Learning

- Cognitive Phase – understanding the task
- Organizing phase – associating responses with particular cues and integrating responses
- Perfecting phase – executing performance in automatic fashion

Achieving Affective Learning

Development Attitudes and Values

- Affective – pertains to emotions or feeling rather than thought.
- Affective Learning – consist of responses acquired as one evaluates the meaning of an ideas, object, person, or event in terms of his view of the world.

Types of Learning Outcomes

Achieving Affective Learning

Main Elements

- Taste – like or dislike of a particular animal, color, or flavor.
- Attitudes – learned, emotionally toned predisposition to react in a consistent way, favorable or unfavorable toward a person, object, or idea.
- Values – inner core belief and internalized standards as norm of behavior.

Defining Attributes of Attitudes

- Learnability – all attitudes are learned.
- Stability – learned attitudes become stronger and enduring
- Personal – societal significance – attitudes are of high importance to the individual and society.
- Affective – cognitive contents – attitudes have both factual information and emotions associated with an object

Dr. Carl E. Bailis's Ultimate Learning Guide to LET Review

Learning Conditions

Motivation

A number of ideas that direct an individual to act or to do something

Extrinsic Motivation - promoted by factors external to the individual and unrelated to the task of being performed such as recognition or high grade

Intrinsic Motivation - an individual's internal desire to perform a particular task

Retention

occurs when learning have been incorporated into learner's behavioral pattern, retained, and remembered

Three Strategies

- Rehearsal - to rehearse is to repeat
- Elaboration - to expand or add to, forming mental images or relating new material to material that has already been learned
- Organization - to arrange according to some system (chunking - placing what has been learned to instinct

Dr. Carl E. Baltz's Ultimate Learning Guide to LET Review

Learning Conditions	
Transfer	
Application of knowledge learned in one situation to new or different situation	
Lateral Transfer	Vertical Transfer
occurs when the individual is able to perform a new task about the same level	occurs when the individual is able to learn more advance/complex skills

Theories

Theories of Motivation
• Instinct Theory/Genetic Pattern - motivation is built in to everyone through here duty • Association Theory (Thorndike)- deprivation of need will cause the individual to act to satisfy the need • Psycho – Analytic or Drive Theory (Freud)- individuals behave as they do because their early experience drive them instinctively to do so • Humanistic or need gratification theory (Maslow) - an individual does something to satisfy deficiency needs • Cognitive Theory (Hunt) - man is rational and consciously decides what he will and will not do. Motives, curiosity, intention, motive to achieve success and goals activate and direct the individual to action • Attribution Theory (Heidereck) - people seek to understand why they succeed or fail

Theories of Motivation

- Self-efficacy Theory (Bandura) - the key to individual achievement lies with the learner's own belief in his ability to organize and execute actions required for a successful performance
- Self-determination Theory (Deci) - an attitude of determination is foundation for motivated behavior

Theories of Retention

- Fading Theory (Disuse)- whatever traces or changes learning leaves behind becomes less distinct as time passes
- Distortion Theory (Reorganization) – when one searches his memory, what he remembers are main ideas, which are abstractions. Later, he regenerates and creates the details
- Repression Theory- Individuals sometimes repress (that is unconsciously forget) experiences that are anxiety-provoking or traumatic
- Interference Theory- Two Forms
 - ✓ Retroactive – new learning can interfere with the recall of old learning
 - ✓ Proactive- old learning can interfere with the recall of new learning
- Retrieval cue Failure- inability to remember because of the unavailability of appropriate cues

Theories of Transfer

- Formal – discipline theory
 - ✓ faculties of the mind such as memory, reason, will, and imagination could be strengthened through practice
