

Principles of Teaching

CLASSROOM MANAGEMENT

- Administration or direction of activities with special reference to problems involving discipline, democratic techniques, use of supplies and other materials, the physical features of the classroom, general housekeeping and the social relationships of the pupils and teachers.
- Operation and control of classroom activities.

PRINCIPLES

1. Teachers should plan activities that are suited to the classroom conditions.
2. Teacher's disciplinary policies must be in accordance with the school policies.
3. Teachers must observe some routinary procedures to save time and energy
4. Teachers must take into consideration the needs and conditions of their students
5. Teachers must utilize positive rather than negative approach in dealing with children.

CAUSES OF DISCIPLINARY PROBLEMS

1. Teacher's personality: lack of knowledge of the subject matter, poor decision making
2. Physical factors: health conditions of the child
3. Individual factors: individual differences due to family and community background
4. Social factors: adjustment to the group
5. Emotional factors
6. School environment

LEVELS OF QUESTIONING

LITERAL	INTERPRETATIVE	CRITICAL	INTEGRATIVE/APPLICATION
• "Right there" questions • Note or recall clearly stated facts and details • Follow directions • Associate quotation with speaker	• Think and search questions • Identify character traits, emotional reactions • Interpret figurative language • Anticipate events • Recognize sensory images • Sense implied meaning of words, phrases and sentences	• Give opinions, reactions to the selection • Discriminate between fancy and reality, fact or opinion • Identify assumptions, points of view, author's purpose and style • Determine relevance • Weigh values presented	• "Tying up" questions • Comparing and contrasting old and new ideas gained from reading • Synthesizing ideas learned • Making a different ending

TEACHING METHOD

(Ways of presenting instructional materials or conducting instructional activities)

ACTIVITY		DISCOVERY LEARNING	
	• A generic term that refers to any learning activity learners might engage in		• An inquiry-oriented learning event in which the learner discovers
COMPUTER-ASSISTED INSTRUCTION	• Interactive instructional technique in which a computer is used to present instructional material, monitor learning, and select additional instructional material in accordance with individual learner needs	BRAINSTORMING	• A learning event in which a group of learners spontaneously contribute ideas
WHOLE LANGUAGE APPROACH	• Method of integrating language arts across the	PROGRAMMED INSTRUCTION	• Instruction in which learners progress at their own rate

	curriculum that uses the real literature of various age groups and subject fields to promote literacy		using workbooks, textbooks or electromechanical devices that provide information in discrete steps, test learning at each step, and provide immediate feedback about achievement
LECTURE	• A learning event in which one person explains a topic to the rest of the group or class, and this audience takes notes and listens	MULTIMEDIA INSTRUCTION	• The integration of more than one medium in a presentation or module of instruction
DRILL AND PRACTICE	• A learning event in which a learner repeats a particular skill in order to fix in his or her mind	FIELD TRIP	• A learning event that typically takes place outside of school grounds
ASSESSMENT	• A learning event specifically designed to assess the learner's understanding of content or his or her ability to perform a skill or set of skills	PEER TUTORING	• Instruction provided by a learner, or small group of learners, by direct interaction with a peer with appropriate training or experience
PEER RESPONSE	• A learning event in which one learner gives written or verbal feedback to another learner	PEER COACHING	• A learning event in which one learner helps another learner
SIMULATION AND GAMES	• The use of role playing by the actors during the operation of a comparatively complex symbolic model of an actual or hypothetical social process; usually includes gaming and may be all-man, man-computer, or all computer operations	EXPERIENTIAL LEARNING	• Learning by doing – includes knowledge and skills acquired outside of book/lecture learning situations through work, play and other life experiences. Experiential education includes adventure education, environmental education, and service learning
GAME	• Typically a competition or contest that involves a demonstration of an understanding of content or skill	DEMONSTRATION	• A learning event in which an individual demonstrates how to do something
HANDS ON	• A learning event that engages learners in a practical application of content and skills	LABORATORY	• A learning event that involves practicing science skills and using scientific equipment
PROBLEM SOLVING	• Occurs when learners work to determine the solution to a question raised for inquiry	RESEARCH	• An activity in which learners investigate or collect information about a particular subject
KINESTHETIC	• A learning event that involves bodily movement	COMPUTER SIMULATION	• Computer based representation of real situations or systems
ROLE PLAYING	• The deliberate acting out of a role, as part of group therapy or of a	INTERVIEW/SURVEY	• A learning event in which learners interview or survey others about a particular topic

	learning session directed towards understanding that role or the situations with which occupants have to cope		
DIALOG JOURNALS	• Logs or notebooks used by more than one person for exchanging experiences, ideas or reflections – used most often in education as a means of sustained writing interaction between students and teachers at all educational levels and in second language and other types of instruction	VISUAL INSTRUCTION	• Instruction with a great variety of illustrative materials such as visual slides, films, models and specimens may be utilized as aids in pupil understanding or appreciation; not to be confused by sight saving
THEMATIC APPROACH	• Teaching approach that organizes subject matter around unifying themes	REINFORCEMENT	• Refers to learning that is practiced in order to remember or otherwise embed the content or skill in the mind
REVIEW	• To study the material again; to reexamine the learning that occurred during a unit of study	PROJECT BASED LEARNING	• A task or problem, engaged in by a learner or group of learners to supplement and apply classroom studies
INTRODUCTION	• A learning event in which a topic is presented for the first time	INTERDISCIPLINARY	• Participation or cooperation of two or more disciplines
