NOTES

Subject-verb agreement

The rules of the subject-verb agreement **are** used to properly determine whether the singular or plural form should be use in a sentence.

- 1) An intervening phrase or clause between subject and verb does not change the number of the subject.
*Margarita, together with her brothers, **likes** to party.*
*The **gentlemen** who attended the meeting **are** very punctual.*
- 2) Singular indefinite pronouns take singular verbs. Plural indefinite pronouns take plural verbs.
*Each **student** in this school does not pay for his tuition.*
***Many** students **perform** well in surprise quizzes.*
- 3) Compound subjects joined by *and* are always plural.
***Miguel and Monica spend** their free time at the gym*
***Chona and Fernan set** aside a small percentage of their income for their children's educational plan.*
- 4) With a compound subjects joined by *or/nor*, the verb agrees with the subject nearer to it.
*Either **alice** or her badminton **buddies are** bringing the deserts.*
*Neither the students nor the **teacher recognizes** the strange markings.*
- 5) Inverted subjects must agree with the verb.
*There **are** 15 students in my class.*
*How **is** Maria handling a news of her grandfather's death..*
- 6) Collective nouns (group, jury, crowd, team, etc.) are always singular.
*The jury **decides** that you are guilty of the crime.*
*The **jury** have been arguing for 5 days regarding the case.*

- 7) Titles of single entities (*books, organizations, countries*, etc.) are always singular.
The *grapes of wrath* by John Steinbeck **takes** quite some time to read.
The *Philippines* **strengthens** its diplomatic ties with ASEAN nation.
- 8) Plural form subjects with a singular meaning take with a singular verb. (E.g. *news, measles, mumps, physics*). Plural form subjects with a plural meaning take a plural verb. (E.g. *scissors, trousers*).
Measles **is** a contagious disease that spread among school children.
Scissors **are** used to cut the props for the stage play.
- 9) With subject and subjective verb complement of different number, the verb always agree with the subject.
My favourite *topic* **is** short stories by Edgar Allan Poe.
Short stories by Edgar Allan Poe **are** my favourite topic.
- 10) With *one of those* _____ *who*, use a plural verb. With the *only one of those* _____ *who*, use a singular verb.
Pocholo is *one of those people who* **like** to watch DVDs.
Patricia is *the only one of those people who* **likes** to read novels.
- 11) With the *number of* _____, use a singular verb. With a *number of* _____ use a plural verb.
The *number* of students who fail the exam **increases** at an alarming rate.
A *number* of students **continue** to fail the exam.
- 12) With *every* _____ and *many a* _____, use a singular verb.
Every driver **knows** his way around Makati.
Many a Filipino **dreams** of winning the lottery

NOTES

LITERARY DEVICES

Proper interpretation and understanding of literature requires familiarity with literary devices, idioms and figure of speech. **Literary devices** are also called literary techniques, literary methods or literary motifs. This pertains to identifiable rules of thumb, conventions or structures employed in literature and storytelling. Some common literary devices are presented in the table below.

Literary Device	Description
Aphorism	Concise statement that contains a cleverly stated subjective truth or observation.
Chekhov's gun	Insertion of an apparently irrelevant object early in a narrative for a purpose only revealed later
Cliffhanger	The narrative ends unresolved, to draw the audience back to a future episode for the resolution
Defamiliarization	Forcing the reader to recognize common things in an unfamiliar or strange way, to enhance perception of the familiar
Dramatic	Representing an object or character with abundant descriptive
Visualization	Detail, or mimetically rendering gestures and dialogue to make a scene more visual and imaginatively present to an audience
Epiphany	A sudden revelation or an insight-usually with a symbolic role in the narrative
Flashback	General term for altering time sequences, taking characters back to the beginning of the tale, for instance
Flashforward	Also called prolepsis, an interjected scene t5hat temporarily jumps the narrative forward in time
Foreshadowing	Hinting an events to occur later
Juxtaposition	Using two themes, characters, phrases, words, or situatuaions together for comparison, contrast, or rhetoric
paradox	A phrase that describes an idea composed of concepts that conflict
Parody	Ridicule by overstated imitation, usually humorous
Poetic License	Distortion of facts, alteration of the conventions of grammar or language, or rewording of pre-existing text made by a writer to improve a piece of art
Stream of consciousness	Technique where the author writes down their thoughts as fast as they come, typically to create an interior monologue characterized by leaps in syntax and punctuation that trace a character's fragmentary thoughts and sensory feelings
Symbolism	Applied use in symbols: iconic presentations that carry particular conventional meaning
Ticking Clock	Threat of impending disaster-often used in thrillers scenario where salvation and escape are essential elements

Idioms are expressions, words, or phrases that have figurative meaning. They are comprehended in regard to a common use of that expression that is separate from the literal meaning or definition of the words of which it is made up of. Some common idioms are presented in the column below.

Idiom	Meaning
Lend a hand	To help
In hot water	In trouble
Put a lid on it	Be quiet
Lose your shirt	To lose all of or most of your money
Lose touch	To fail to keep in contact/communication
Get the ball rolling	Start
Once in a blue moon	Once in a while, occasionally
Blow one's own horn	When a person boasts about how great he/she is
Hit the books	To study, prepare for class
Poker face	A face with no expression
A dime dozen	Very common, easy to find
Curiosity killed the cat	It's not good to be too curious
The cat's out of the bag	The secret is not a secret anymore
It's raining cats and dogs	It's raining hard
A penny for your thoughts	Friendly way to say "what are you thinking about?"
Money talks	Money has power/influence
Born with a silver spoon	Born rich

Figures of speech are moods of expression in which words are used out of their literal meaning or out of their ordinary use in order to add beauty or emotional intensity. They transfer the writer's sense impressions by comparing or identifying one thing with another that has a meaning familiar to the reader.

Figure of speech	Meaning
Alliteration	The repetition of an initial consonant word.
Apostrophe	Breaking off discourse to address some absent person or thing, some abstract quality, an inanimate object, or a no existing character.
Assonance	Identity or similarity of the sound between internal vowels in neighboring words.
Euphemism	The substitution of an inoffensive term for one considered offensively explicit.
Hyperbole	An extravagant statement; the use of exaggerate terms for the purpose of emphasis or heightened effect.

Irony	The use of words to convey the opposite of their literal meaning.
Metaphor	An implied comparison between two unlike things that actually have something important in common.
Metonymy	One word or phrase is substituted for another with which it is closely associated.
Onomatopoeia	Use of words that imitate the sounds associated with the objects or actions they refer to.
Oxymoron	Incongruous or contradictory terms appear side by side.
Personification	Inanimate object or abstraction is endowed with human qualities or abilities.
Rhetorical question	Question posed for its persuasive effect without the expectation of a reply.
Simile	A stated comparison (usually form with “like” or “as”) between two fundamentally dissimilar things that certain qualities in common.
synecdoche	A part is use to represent the whole (for example, ABCs for alphabet) or the whole for a part (“England Won the World Cup in 1996”)

1.1 use English language correctly an appropriately

For numbers 1-10, select the letter of the pronoun which best completes each sentence.

- For numbers 11-15, select the most appropriate words to complete its sentence.**

11. Igor's nipa hut was destroyed ____ by typhoon Peping.
A. altogether C. altogether
B. all together D. at all

12. The buttered wife is seeking ____ separation from her husband.
A. judiciary C. judicious
B. morale D. juridical
13. The ____ of the story is not to count your eggs until they are hatched.
A. moral C. moralism
B. morale D. morality
14. The ancient people made a ____ that the end of the world is near.
A. Prophecy C. prophet
B. Prophesy D. prophetic
15. ____ wiring is the cause of the sudden blackout.
A. lose C. losing
B. lost D. loose

For numbers 16-20, select the word which means the SAME as the underlined word in each sentence.

16. Your findings are impertinent to the results of this investigation.
A. malicious C. important
B. violent D. irrelevant
17. Several elements must be transmuted to see the real implications of this event.
A. surpassed C. changed
B. estimated D. summed
18. You should be ashamed of yourself for having such carnal desires.
A. Spiritual C. worldly
B. Bold D. guilty
19. The president showed great aplomb while dealing with the reporters.
A. agitation C. composure
B. nervousness D. perturbation
20. Thank you for your candor, Mr. Secretary.
A. honesty C. shyness
B. frankness D. courage

For numbers 21-30, select the most appropriate form of the verb to complete the sentence. Be guided by rule subject-verb agreement.

21. The price of this sneakers ____ reasonable.
A. Is C. seem
B. are D. aren't
22. Bread and butter ____ our daily food.
A. is C. were
B. are D. am

23. The famous singer and composer ____ arrived.
A. have C. will
B. has D. is
24. Collecting stamps ____ one of his favorite pastimes.
A. are C. has
B. were D. is
25. Neither his father nor his sister ____ mahjong.
A. play C. are play
B. was D. are plays
26. Neither parent ____ fond of playing cards.
A. is C. am
B. are D. were
27. Some of my friends ____ here.
A. are C. will
B. was D. were
28. Many a man ____ to be rich and famous.
A. desire C. is desiring
B. desires D. desiring
29. The pair of scissors ____ on the table.
A. was left C. was leaving
B. were left D. is leaving
30. Mathematics ____ the most difficult subject in the board exam.
A. remain C. remaining
B. remains D. has remain

For numbers 31-35, select the best preposition to complete each sentence.

31. Joan lives ____ Santillan road.
A. in C. at
B. on D. to
32. Maggie will be ready to leave ____ about thirty minutes.
A. in C. on
B. at D. where
33. Mince he met his new girlfriend, Mico never seems to be ____ home.
A. on C. in
B. at D. towards
34. Jeremy responded to his mother's demands ____ throwing a tantrum.
A. with C. from
B. by D. through

35. I think Carmen spent the entire afternoon ____ the phone.
- | | |
|-------|---------|
| A. on | C. at |
| B. in | D. with |

For numbers 36-40, choose the letter of the correct answer.

36. The nearest post office is on ____.
- | | |
|-------------------------|-------------------------|
| A. Twenty-second street | C. Twenty Second Street |
| B. Twenty second Street | D. Twenty-second Street |
37. Have you ever been to my ____?
- | |
|--|
| A. Brothers-in-law's repair shop, Gus's Garage |
| B. Brother-in-laws repair shop, Gus' Garage |
| C. Brother's-in-law repair shop, Gus' Garage |
| D. Brother-in-law repair shop, Gus's Garage |
38. Please the chapter ____.
- | |
|--------------------------------------|
| A. Filing your Income Tax Returns. |
| B. Filing Your Income Tax Returns. |
| C. "Filing your Income Tax Returns." |
| D. "Filing Your Income Tax Returns." |
39. New students at the shop should bring ____.
- | |
|---|
| A. Hammers wrenches and screwdrivers. |
| B. Hammers, wrenches, and screwdrivers. |
| C. Hammers, wrenches and screwdrivers. |
| D. Hammers wrenches, and screwdrivers. |
40. Mrs. Navarro said that ____.
- | |
|--|
| A. "The Chemistry II exam will be next wednesday." |
| B. the Chemistry II will be next Wednesday. |
| C. the chemistry II exam will be next Wednbesday. |
| D. "The chemistry II exam will be next Wednesday |
41. The test was hard for Paul and ____.
- | | |
|-------|------------|
| A. me | C. myself |
| B. I | D. himself |
42. The flower smells ____.
- | | |
|------------|------------|
| A. sweetly | C. sweeter |
| B. sweet | D. himself |
43. The suggestion of the employees ____ appropriate.
- | | |
|----------|------------|
| A. seems | C. is |
| B. seem | D. is very |
44. He is the ____ of the two brothers.
- | | |
|--------------|--------------|
| A. most tall | C. very tall |
| B. tallest | D. taller |

45. After _____ all day, she finally see the lake.
A. walking C. having walked
B. had walked D. have walked
46. We had the _____ news when he came.
A. latest C. very last
B. last D. last of all
47. I _____ gone with you.
A. have C. had
B. should D. am
48. I _____ walked two kilometers by the time you catch up with me.
A. have C. will have
B. would have D. had
49. If I _____ President, I would live in Malacañang.
A. Was C. should be
B. Am D. were
50. The means of transportation _____ dramatically since the end of the 20th century.
A. Have changed C. will change
B. Has changed D. will have changed
51. If I _____ the same problems you had as a child, I might not have succeeded in life as well as you have.
A. Should C. have
B. Had D. would have
52. If I could speak English well, I _____ next year studying in the states.
A. Has spend C. would spend
B. Would have spent D. will spent
53. We should work for the total ban _____ of pesticides.
A. With C. on the use
B. On using D. by the use
54. The Rizal Day celebration reminds us about Heroes worth _____.
A. Appreciating C. reading about
B. Emulating D. studying

1.2 Comprehend Written Text**TEXT A**

Read the selection below. Select the letter of the best answer to questions #55-59.

Medical knowledge in ancient Egypt had an excellent reputation, and rulers of other empires would ask the Egyptian pharaoh to send them their best physician to treat their loved ones. Egyptians have some knowledge of human anatomy, even though they never dissected the body. For example, in the classic mummification process, they knew how to insert a long hooked implement through a nostril, breaking the thin bone of the brain case and remove the brain. Egyptian physicians also were aware of the importance of the pulse and of the connection between pulse and heart. They developed their theory of “channels” that carried air, water and blood to the body by observing the River Nile. If the Nile became blocked, crops became unhealthy. They applied this theory to the body – if a person is unwell, they would use laxatives to unlock the channels.

55. What is the main idea of this selection?
- A. Ancient Egyptian physicians
 - B. Medical knowledge in ancient Egypt
 - C. The Nile river in Egyptian medical knowledge
 - D. Infection in ancient Egypt
56. What would happen if the Nile River was blocked?
- A. Egyptians would have problems washing their clothes.
 - B. Fermentation and molds became problem.
 - C. The diet of Egyptian would drastically change.
 - D. Crops would wither and die.
57. Why did Egyptians practiced brain removal?
- A. To aid in mummification
 - B. To unblocked “channels” in the body
 - C. To purge the body of infection
 - D. To free the dead of the burdens of the human mind
58. Which of the following is an evidence that Egyptians were masters of human anatomy even if they did not perform dissection of human bodies?
- A. They have detailed drawing of the anatomy of the human body.
 - B. They knew how to remove brains during mummification.
 - C. Egyptians physicians prescribed laxatives to cleanse the body of infections.
 - D. They correlated the human body with the behavior of the Nile River.
59. Who did the Egyptians plead to when their loved ones had grave illness?
- A. Best Egyptian physician
 - B. Prime Minister
 - C. Moses
 - D. Pharaoh

TEXT B

Read the selection below. Select the letter of the best answer to question # 60-64.

Orville and Wilbur Wright built their own wind tunnel to test airfoils and measure how to lift a flying machine into the sky. They were the first to discover that a long, narrow wing shape is ideal for flight. They figured out how to move the vehicle freely, not just across land but up and down on a cushion of air. They built the movable part of the tail to control the pitch of their craft as it nosed up and down. They fashioned a pair of twin rudders in back to control its tendency to swerve off course. They devised a pulley system that warped the shape of the wings in midflight to turn the plane and to stop it from rolling from side-to-side. They used the data from wind-tunnel experiments to design the first effective airplane propellers. When they discovered that a light-weight gas powered engine did not exist, they design and built their own.

60. What is the main idea of the text?
- A. Wright brothers and the first airplane
 - B. How the Wright brothers thought
 - C. Wright brothers' knowledge
 - D. The genius of the Wright brothers
61. What does **pitch** mean in the context of this text?
- A. plunge forward
 - B. move abruptly
 - C. deviation from the horizontal
 - D. throw or toss horizontally
62. What are airfoils?
- A. the surfaces of an airplane
 - B. the force of air on an airplane
 - C. blades that turn
 - D. parts that react against the air
63. A major problem that the article mentions is an airplane's tendency to _____.
- A. be unsteady
 - B. be too heavy
 - C. lack power
 - D. break part
64. Which of these terms best describes the best shape for an airplane?
- A. Long, curved
 - B. Long, narrow
 - C. Short, narrow
 - D. Long, circular

TEXT C

Read the text carefully then choose the correct answer for questions #65-67.

Many factors play a role in determining a student's learning style. Among those most often cited in the research literature in learning style are Environmental, Emotional, Sociological, Physiological, Psychological factors. Environmental factors include students' reactions to research stimuli as sound, light, temperature and room design.

Emotional factors include motivation, persistence, responsibility, and structure. Some students are motivated intrinsically; they undertake and complete tasks because they see the value of doing so. Sociological factors include whether or not students are social learners-preferring to work in pairs or in groups-or whether they are independent learners-preferring to work alone.

Physiological factors include student's preferences for food or drink, what time of day they learn best, and their mobility needs.

Physiological factors include identifying student's perceptual strengths like learning modalities such as they are visual, auditory, tactile, or kinesthetic learners.

65. What factor is involved in learning situation when students prefer indirect lighting than bright?
- A. Physiological
 - B. Emotional
 - C. Psychological
 - D. Environmental
66. When students are observed to be non-conforming and doing the unexpected what factor is involved?
- A. Psychological
 - B. Physiological
 - C. Sociological
 - D. Emotional
67. Some students learn best by seeing, hearing, and doing. When they perform a task well on what they have read, what is their perceptual strength?
- A. Tactile
 - B. Visual
 - C. Auditory
 - D. Kinesthetic

TEXT D

Read the text then answer questions #68-69.

Measures of learning outcomes have a special significance as indicators of quality in education, as a basis for setting targets for improvement, and in monitoring progress towards educational goals. From the point of view of classroom teachers, systematically-collected information on student learning can be useful both for classroom decision making and for wider reporting purposes.

All teachers, especially beginning teachers, are capable of benefiting from the reliable information about what is being expected of, and achieved by students of a given age. When teachers have access to explicit frame of reference in the form of achievement targets at particular grade levels, and receive feedback on how their classes are performing in comparison with students in other schools, they have a powerful basis for structuring and evaluating individual and classroom learning.

68. What is the importance of measuring learning outcomes?
- A. As factor for planning future programs and projects
 - B. As the reference for the implementation of programs and projects
 - C. As the basis of defining the vision, mission, and objectives set
 - D. As basis for setting targets for improvement and monitoring progress of goals set
69. How may a teacher use the information on learning outcomes?
- A. Reporting to the parents and redesigning instructional plan
 - B. Restructuring the classroom environment
 - C. Redesigning the classroom environment
 - D. Making classroom decision and for reporting to stakeholders

TEXT E

Read the text then answer questions #70-73.

An international education initiative, known as global competence, was first noted in 1988 in a report published by the Council on International Education Exchange.

Higher education institutions were enjoined to send students in exchange programs to universities abroad where Americans are not the majority population and where English is not a dominant language.

*Educational scholars have proposed definitions for the term **global competence** and postulates regarding the required knowledge, skills, attitudes, and experience necessary to become globally competitive. Cross-cultural awareness and interaction, familiarity with an environment, intercultural facility, effective two-way communication, interconnectedness of people and systems, acceptance of people and of their different cultural values, and attitudes are integral components of **global competence***

70. Which publish a pioneer report on the concept of global competence?
 - A. Council on International Scholars Exchange
 - B. Council on International Educators
 - C. Council on International Educationists
 - D. Council on International Education exchange
71. Are all overseas Filipino Workers globally competitive?
 - A. Yes
 - B. No
 - C. No, partially
 - D. Yes, partially
72. What are the integral concepts/components of global competence?
 - A. Communication knowledge skills, experiences and cultural awareness
 - B. Two-way communication, intercultural facility, cross cultural awareness and systems
 - C. Cultural values, interconnectedness with people, cultural awareness and systems
 - D. Acceptance of peoples' values, attitudes, language, culture and environment.
73. Which country pioneered in conducting research on global competence?
 - A. United Arab Emirates
 - B. United States of America
 - C. United Kingdom
 - D. United Republic

TEXT F

Read the text then answer the questions # 74-79

Water

The most important source of sediment is Earth and Rock material carried to the sea by the rivers and streams; the same materials may also have been transported by the glaciers and winds. Other sources are volcanic ash and lava, shells and skeletons, of organisms, chemicals precipitates formed in seawater, and particles from outer space.

Water is the most unusual substance because it exists on the surface on the Earth in its three physical states: ice, water, and water vapor. There are other substances that might exist in solid and liquid or gaseous state at temperatures normally found at the Earth's surface, but there are no other substances which occur in all three states.

Water is odorless, tasteless, and colorless. It is the only substance known to exist in a natural state as a solid, liquid, or gas on the surface of the Earth. It is a universal solvent. Water does not

corrode, rust, burn, or separates to its components easily. It is chemically indestructible. It can corrode almost in metal and erode in the most solid rock. A unique property of water is that it expands and floats in water when frozen or in the solid state. Water has freezing point of 0 degree Celsius and a boiling point of 100 degree Celsius. Water has the capacity for absorbing great quantities of heat with relatively little increase in temperature. When distilled, water is a poor conductor of electricity but when salt is added, it is a good conductor of electricity.

Sunlight is the source of energy for temperature change, evaporation, and currents for water movement through the atmosphere. Sunlight controls the rate of photosynthesis for all marine plants, which are directly or indirectly the source of foods for all marine animals. Migration, breeding, and other behaviors of marine animals are affected by light.

Water as the ocean or sea, is blue because of the molecular scattering of the sunlight. Blue light, being of short wavelength, is scattered more effectively than light of longer wavelengths. Variations in color may be caused by particles suspended in the water, water depth, cloud cover, temperature and other variable factors. Heavy concentrations of dissolved materials cause a yellowish hue, while algae cause the water to look green. Heavy of plant and animal materials will cause the water to brown.

74. Which of the topics best organizes the information in the text?
- A. Properties of seawater, photosynthesis oceans and seas
 - B. Water as substance water and plants
 - C. State of water as a vapor, ice, solid
 - D. Properties of water, its physical states, effects of the sun in water
75. According to the passage, what is the most unique property of water?
- A. Water is a poor conductor of electricity.
 - B. Water is odorless, tasteless, and colorless.
 - C. Water exists on the surface of the Earth in three physical states.
 - D. Water is chemically indestructible.
76. Which of the following best defines the word distilled as it used in the last sentence of the third paragraph?
- A. Dehydrated soil
 - B. Free of salt content
 - C. Free of electrical energy
 - D. Containing wine
77. The writer's main purpose of this selection is to ____.
- A. Define the properties of water
 - B. Explain the colors of water
 - C. Examine the effects of the sun on water
 - D. Describe the physical states of liquids
78. Which of the following statements summarizes best the text?
- A. Water is too unpredictable for most scientists.
 - B. Water may be used to serve many different functions.
 - C. Water should not be consumed in its most natural state.
 - D. Water may be found in most other liquids in this planet.
79. What is the unique property of soil?
- A. It is odorless and colorless.
 - B. It expands in solid state.
 - C. It is chemically indestructible.
 - D. It can absorb great quantities of heat.

TEXT G

Read the text then answer questions # 80-84.

Building an institution, not just one individual is involved. An institution is perceived in terms of the people who infuse it with life and ideas. In fact, an institution is the product of an evolutionary process, shaped and transformed in complex and subtle ways by the collaboration of several minds working under a common vision.

Those who are very much involved in building an institution, like true founding fathers, understand too well the pains of birth. They create a foundation not so much for themselves but for the generations who will follow them.

It takes a tremendous amount of dedication, patience and energy to build an institution. It is bigger than any person or group of individuals. Like an edifice, it is created by brick by brick, day after day. Persons come and go. But the institution, for the sake of the greater good, must remain.

80. The writer's main purpose of the text is to _____.
A. Underscore the lifespan of an institution
B. Emphasize that an institution is a product of a common vision
C. Lay the foundation of a structure
D. Perpetuate an institution
81. That an institution is the product of an evolutionary process means it is the result of _____.
A. Instant change
B. revolutionary process
C. abrupt decision
D. serious study
82. What is the reason for the institution to remain and not to be faded?
A. For the sake of the donors
B. For the sake of the founders
C. For the sake of the greater good and benefits
D. For the sake of progress
83. What institution is referred to in the passage/text?
A. Industrial
B. Educational
C. Entrepreneurial
D. Political
84. Which statement best expresses the effort involved in building an institution?
A. It takes a tremendous amount of dedication, patience and energy to build an institution.
B. It is created brick by brick, day by day.
C. It is not created not so much for themselves but for the generations who will follow them.
D. It is perceived in terms of the people who infuse it with life and ideals.

Read the statement and answers questions # 85-87.

85. "You can't make children grow faster by pushing them, just as you can't make flowers bloom faster by pulling them." What message does the statement have for teachers?
- A. Just look at the flowers when you are tempted to hurry up the development of a child.
 - B. Games will help develop children naturally.
 - C. Avoid comparing a child with other children.
 - D. Provide children with developmentally appropriate practices.
86. What is/are the best ways to a child's development according to the statement?
- I. Meet the child where the child is.
 - II. Allow the child develop according to his/her pace
 - III. Compare a child to another to motivate her/him to "hurry up" to catch up with other children's development
- A. I and III
 - B. I, II and III
 - C. I and II
 - D. II and II
87. Which statement is in support to the given text?
- A. Each child is unique and vastly different from one another.
 - B. We can't make the child learn an abstract concept by pulling them along to complete the right text.
 - C. It is the early childhood educator who has the responsibility of creating the learning environment that will intrigue stimulate the whole child.
 - D. A teacher's moment-by-moment actions and interactions by children are the most powerful determinant of learning outcomes and development.

Situation –read the short paragraph and answers # 88-90.

Too much reliance on concrete experience may actually obstruct the process of meaningful generalization. The best will be striking a balance between concrete and abstract, direct participation and symbolic expression for the learning that will continue throughout life.

88. Which idea is NOT expressed by the paragraph?
- A. Direct and symbolic experiences are important for lifelong learning.
 - B. Concrete and abstract experiences are necessary for lifelong experiences
 - C. Do away with concrete experience because it is a stumbling block to the development of generalization skill.
 - D. There is such a thing in learning that lasts for life.

4.1 Apply knowledge gained from local literary pieces

PRACTICE TEST: choose the letter that corresponds to the best answer.

Read the excerpt below. Select the letter that corresponds to the best answer to questions # 204-208.

Exerpt from Like the Molave

*Not you alone , Rizal. O souls
 And spirits of the martyred brave, arised!
 Arise and scour the land! Shed once again
 Your willing blood! Infuse the vibrant red
 Into your thin anemic veins; until
 We pick up your Promethean tools and, strong,
 Out of depthless matrix of your of your faith
 In us, and on the silent cliffs of freedom,
 We carved for all time your marmoreal dream!
Until our people, seeing, are become
 Like the Molave, firm, resilient, staunch,
 Rising on the hillside, unafraid,
 Strong in its own fibre, yes, like the Molave!*

- Rafael Zulueta Da Acosta

204. Which of the following best describes the form of literature employed in the excerpt?

- D. Filipinos should stop illegal logging and plant more Molave trees.

Read the poem below. Select the letter that corresponds to the best answer to questions # 209-213.

Trees

I think that I shall never see
A poem lovely as a tree
A tree whose hungry mouth is rest
Against the sweet earth's flowing breast;
A tree that looks at God all day,
And lifts her leafy arms to pray;
A tree that may in summer wear
A nest of robins in her hair;
Upon whose bosom snow has lain;
Who intimately lives with rain.
Poems are made by fools like me,
But only God can make a tree
- Joyce Kilmer

209. What is the predominant figure of speech employed by the author of this poem?

- A. Simile
- B. Metaphor
- C. Personification
- D. Hyperbole

210. Which literary device is exemplified by this poem?

- A. Defamiliarization
- B. Dramatic visualization
- C. Stream of consciousness
- D. Parody

211. What part of a tree does the underlined portion of the poem pertain to?

- A. Roots
- B. Stems
- C. Leaves
- D. Fruits

- A. His life is determined by his honor.
- B. He values honor as much as his life.
- C. He prefers honor instead of life.
- D. He values life before honor.

4.2 Manifest comprehension to extract elements in major literary genres

Read the excerpt below. Select the letter that corresponds to the best answer to questions # 216-220.

Excerpt from I am looking for a Filipino

Is it so hard to believe that we can remain Filipinos and still march onward, ever onward to our national destiny? Are our minds so narrow, is our intelligence is so limited that we cannot realize this truth? Can we not see that we can adopt foreign ways and yet retain the enduring, the admirable qualities that make the Filipino great? Have we been so westernized that we find the Filipino way alien to our mode of living?

The Filipino way is our legacy. It is found in the determination and fortitude, the determination that made it possible for our brothers in the mountains to build breath-taking rice terraces. It is found in our courage that sustained us at Mactan, at Tirad pass, in Bataan. It is found in our simplicity and modesty, in the beauty of Angelus at twilight, and in the sincerity of our devotion to our god and our country.

These qualities are still in us – in all of us. They are still in our minds and in our hearts. We can still dig them out if we would only forget about our obsessions with brown Americanism. We can still dig out if we would only dig hard enough.

I am looking for a Filipino. I cannot find him among those who shout self-righteously about nationalism and nationalization. I cannot see him among those who preach about Filipinism but whose preachings are empty and meaningless.

Will my search be long and vain? It will be. I am afraid unless we make in time. It will never and unless we realize the sacredness of our heritage, unless we see the richness and the beauty, the glory and the wonder, the promise and the fulfillment of the Filipino vision.

- Professor Felix Bautista

216. This narrative mentions about the bravery of Filipinos in battles of the past. Which among the following is a site of a historic battle NOT mentioned in this poem?

- | | |
|-----------|---------------|
| A. Cebu | C. Cordillera |

4.3 relate insights to given situations

Read the excerpt below. Select the letter that corresponds to the best answer to questions # 221-225.

Boys: In our veins, pulses blood with traces of Chinese and Spanish and American, but it does not stop being a Filipino, because of this.

Girls: Our culture is tinged with foreign influences, but it has become rich thereby.

All: This mingling, in fact could speed us on the road, to national greatness. Look at America, it is a great country, and yet it is the melting pot of Italian, and German, British, an French, or Irish and Swedish.

Boy: Filipinism after all, is in the heart.

All: If that heart beats faster, because the Philippines making progress, If it fills, with its compassion because its people suffering, then it belongs to a true Filipino, And if it throbs, with pride in our past, if it pulses with awareness of the present, if it beats with a faith in the future, then we could ask, for nothing more, all other things are unimportant.

Boys: I have an American first name.

Girls: And I have a Chinese last name.

All: And I am proud, very, very proud, because underneath these names beats a Filipino heart.

221. Which of the following could be a possible name of the person speaking in this piece?
- | | |
|-------------------|-------------------|
| A. Pedro Sandoval | C. China Anderson |
| B. Chona Shih | D. Pamela Go |

B. poverty D. total submission to God

5. Literature 2- Master works of the world

5.1 Interpret passages from master works of the world

Read the excerpt below. Select the letter that corresponds to the best answer to questions # 233-237.

Excerpt from the Cask of Amontillado

The thousand injuries of Fortunato I had borne as I best could, but when he ventured upon insult I vowed revenge. You, who so well know the nature of my soul, will not suppose, however, that gave utterance to a threat. At length I would be avenged; this was a point definitely, settled –but the very definitiveness with which it was resolve precluded the idea of risks. I must not only punish but punish with impunity. A wrong is unredressed when retribution overtakes its redresser. It is equally unredressed when the avenger fails to make himself felt as such to hi who has done the wrong.

It must be understood that neither the word nor deed had I given Fortunato cause to doubt my good will. I continued, as was my wont, to smile in his face, and he did not perceive that my smile now was at the thought of his immolation.

He had a weak point – this Fortunato – although in other regards he was a man to be respected and even feared. He prided himself in of his connoisseurship in wine. Few Italians have the true virtuoso spirit. For the most part their enthusiasm is adopted to suit the time and opportunity, to practise impostures upon the British and Australian millionaires. In painting in gemmery, Fortunato, like his countrymen, was a quack, but in the matter of old wines he was sincere. In this respect I did not differ from him materially; --I was skillful in the Italian vintages myself, and bought largely whenever I could.

- Edgar Allan Poe

233. For which of the following statements best describes the theme of this literary piece?

- A. Good never triumph over evil.
- B. The ends must justify the means.
- C. Getting even only counts if you get away with it.
- D. Revenge drives human beings to great lengths.

234. From which viewpoint is this story conveyed?

- A. From the murderer's
- B. From the victim's
- C. from a third party
- D. From an unknown narrator's

235. Why did narrator use to bait Fortunato into his plan for retribution?

- A. Expensive European jewelry
- B. Rare Italian vintage drugs
- C. Millions of British and Australian money
- D. A pipe of a rare old wine

236. What did the author mean with "A wrong is unredressed when retribution overtakes its redresser. It is equally unredressed when the avenger fails to make himself felt as such to him who has done the wrong.?"

- A. Might makes right. The ends must justify the means.
- B. If you rectify something, you should not get in trouble for doing so.
- C. We should learn to forgive and forget and not be concerned about revenge.
- D. Performing acts of revenge can justify a wrongful act.

237. What is the figure of speech used in this selection?

- A. Metonymy
- B. Irony
- C. Oxymoron
- D. synecdoche

Read the excerpt below. Select the letter that corresponds to the best answer to questions # 238-232.

Excerpt from the divine comedy

*And lo! Almost where the ascent began,
A panther light and swift exceedingly
Which with a spotted skin was covered o'er?*

*And never moved she from before my face,
Nay, rather did impede so much my way,
That many times I to return had turned.*

*The time was the beginning of morning,
And up the sun was mounting with those stars
That with him were, what time the Love Divine*

*At first in motion set those beauteous things;
So were to me occasion of good hope,
The variegated skin of that wild beast,*

*The hour of time, and the delicious season;
But not so much, that did not give me fear
A lion's aspect, which appeared to me.*

- Dante Alighieri

238. What do you think is the main character of this literary piece?
- A. Dante C. Panther
B. Virgil D. She-wolf
239. Which of the following wild beasts blocked the main character's ascent to the top of the hill?
- A. Leopard C. Lion
B. Panther D. She-wolf

FILIPINO	15%
COMPETENCIES	
1. FILIPINO 1 – KOMUNIKASYON SA AKADEMIKONG FILIPINO	6%
1.1 Nagagamit nang may lalong mataas na antas ng kasanayan at kahusayan ang Filipino sa akademikong larangan	6%
2. FILIPINO 2 – PAGBASA AT PAGSULAT TUNGO SA PANANALIKSIK	5%
2.1 Nababasa nang may wastong pag-unawa ang mga teksto sa iba't ibang disiplina	5%
3. FILIPINO 3 – MASINING NA PAMAMAHAYAG	4%
3.1 Nagagamit nang mau husay ang Filipino sa pagbuo ng isang sulating pananaliksik	2%
3.2 Nagagamit ang angkop na repertwal (repertoire) ng wika sa pagpapahayag ng kaalaman, karanasan at saloobin	2%

NOTES

PASAWIKAIN ang pananalita kung ito’y nagpapahayag ng kahulugang iba, di-tuwiran o higit sa karaniwang kahulugan ng bawat salita. Narito ang ilang mga halimbawa:

Pasawikain	Kahulugan
agaw-buhay	naghihingalo o malapit nang mamatay
balat-sibuyas	maramdamin, medaling magtampo
bugtong na anak	nag-iisang anak
utak-biya	bobo
taingang-kawali	nagbingi-bingihan
di-mahulugang-karayom	masikip na masikip
di-maliparang-uwak	napakalawak
kumapit sa patalim	mapasubo sa mahigpit na sitwasyon
nagbuhat ng sariling bangko	mayabang
namamangka sa dalawang ilog	pagigigng salawahan o dalawang kasintahan
kumukulo ang dugo	galit na galit
namuti ang mata	nainip sa paghhihintay
tulog-mantika	mahirap gisingin
sumakabilang buhay	namatay

PRACTICE TEST: Subukin ang iyong pagkakaunawa sa mga kompetensya. Piliin ang titik ng tamang sagot.

FILIPNO 1 KOMUNIKASYON SA AKADEMIKONG FILIPINO

1.1. Nagagamit nang may lalong mataas na antas ng kasanayan at kahusayan ang Filipino sa akademikong larangan.
--

1. Sa Noche Buena, kami ay maghahanda ng _____ at keso de bola.
A. hamón C. homán
B. hámon D. hóman
2. Hinipan ng pulis ang kanyang _____.
A. píto C. pítu-pito
B. pitó D. píto-pito
3. Si Heneral Gregorio Del Pilar ay nagapi sa _____ Tirad.
A. Pasóng C. Pásong
B. Pasòng D. Pasông
4. Kapag lumaki na ang mga tanim mo, ilipit mo na sila sa malaking _____.
A. pasó C. pásong
B. pasò D. pasô
5. Naku ! tumutulo na naman ang mga _____ ng NAWASA.
A. tubó C. tubô
B. túbo D. tubò
6. Magkano ang _____ mo sa lotto kahapon?
A. tayá C. tayà
B. tayâ D. táya
7. Nanligaw ang makisig na _____ sa marikit na dalagita.
A. bináta C. binatà
B. binatá D. binatâ
8. Ano ang _____ wika sa Cordillera?
A. katutubòng C. Katutubóng
B. katutubông d. Katutúbong
9. Pinatawad na kita dahil wala ka namang _____.
A. salâ C. Salá
B. salà D. Sála
10. Kailangang _____ ang mga nakatira sa paanan ng bulkang Bulusan.
A. ilíkas C. Ilikás
B. ilìkas D. Ilikâs

11. Pinandirihan ni Mico ang aso niyang _____.
A. ma-galis C. magalis
B. mag-alis D. galis-aso

12. Hag laki ko, gusto gusto kong maging _____ ng Pilipinas.
A. pang-ulo C. panggulo
B. pangulo D. pa-ngulo

13. Hanapin mo ako sa _____ ng mga sasakyan.
A. pag-abangan C. bantayan
B. hintayin D. abangan
14. Gagawin mo lang yan _____ mo ako mahal.
A. kung di C. kungdi
B. kundi D. kun di
15. _____ ka na sa ilog. Nangigninig ka na.
A. Lumusong C. Umahon
B. Sumuong D. Humango
16. Kinakailangang _____ ang damit sa Huwebes.
A. may-ari C. yariin
B. mayari D. magyari
17. limang oras na pero hindi ko par in _____ ang nawawalang aklat.
A. mahanap C. hanapin
B. makita D. kitain
18. Nag-aaral ako _____ mabuti upang makakuha ako ng iskolarship.
A. nang C. mas
B. ng D. lalong
19. _____ natin ng mapa si Kenny para hindi sya maligaw.
A. Iwan C. Iwanan
B. Mag-iwan D. Pag-iwan
20. Tandaan mo na lahat ng paghihirap ni Luis ay _____ sa iyong magandang kinabukasan.
A. tungkol C. sanhi
B. upang D. ukol

Para sa bilang 21-30, Piliin ang titik ng pinaka-angkop na bigkas ng salita para sa bawat pangungusap.

21. _____ mo kay Luisito na may pasalubong ako sa kanya.
A. Sabihin C. Pakisabi
B. Sabihan D. Pakisabihan
22. Huwag mong _____ ng kalat ang kama ko.
A. ipatong C. patungan
B. magpatong D. pagpatungan
23. Ang pagdadasal at pananlig ay _____ sa tao at mapalapit siya sa Diyos.
A. nakakatulong C. nakakatulungan
B. nakatutulong D. mag-tulungan
24. Nawawala ang alahas na _____ mo sa akin.
A. pinatago C. ipinapatago
B. pinagtago D. ipinatago

25. _____ ni Penelope ang kanyang damit nang hindi niya sinasadya.
A. Nasira C. Masira
B. sinira D. Sinisira
26. _____ na ng magaling na barbero ang buhok ni felix.
A. Gugupitin C. Maggugupit
B. Gugupitin D. Hahagupitin
27. Marumi ang baso. Huwag mong _____ yan!
A. inumin C. uminom
B. inuman D. pag-inuman
28. _____ mo sana kay Ronald kung kailan siya uuwi ng Pilipinas.
A. Ipagtanong C. Tinanong
B. Ipagtatanong D. Itinanong
29. Kailan nga ba _____ si Mayor dahil sa pangungurakot ?
A. kinulong C. ikinulong
B. kinukulong D. ikinulong
30. _____ namin ang inyong pagdating dito sa Villa Escudero.
A. IKinakagalak C. Gagalakin
B. Ikinagagalak D. ikinukulog

Para sa bilang 31-34, Piliin ang titik ng pinaka-angkop sa puwang ng pangungusap.

31. Pinag-aaralan ng mabuti ng bawat abugado ang _____ ng 1987.
A. batas pambansa C. batas-militar
B. saligang-batas D. saklawang-batas
32. Ang paniniwala sa Diyos ay susi upang matamo natin ang _____.
A. kadakilaan C. kaligtasan
B. salvasyon D. kabutihan
33. Tapos na ang klase kapag tumunog na ang _____.
A. agunyas C. kampana
B. batingting D. kampanilya
34. Upang hindi madala ng agos ang barko, ibinaba ng mga mandaragat ang _____.
A. pang-angkla C. angkora
B. salung-alon D. timplan.
35. Ang aklat ni Dr. Tinsley Harrison ang _____ sa pag-aaral na medisina.
A. saligan C. batayan
B. sandigan D. pundasyon
36. Winasak ng _____ Katrina ang maraming bahay sa new Orleans.
A. bagyong. C. buhawi
B. sagwan D. ipu-ipo

37. Ang pagbibigay ng diploma ay nasa huling bahagi ng _____.
A. programa C. palabas
B. palatuntunan D. bilada
38. Inaabangan ng mga tao ang _____ sa simbahan.
A. agunyas C. kalampag
B. batingting D. kolambeng
39. Patapos na ang taon. Kailangan ko nang kumunsulta sa aking _____.
A. kalihim C. tagatuos
B. ingat-yaman D. bukkiper
40. Mahigpit na ipinagbabawal ang pagmamaniupala sa mga _____ ng MERALCO.
A. metro C. kuntador
B. mekanismo D. makina
41. Dalawang oras na kaming naghintay. _____.
A. Kunitid ang noo. C. Namuti ang aming mata.
B. Kumati ang kamay. D. Kumulo ang dugo.

Para sa bilang 42-50, Piliin ang titik ng pinaka-angkop na pasawikaing panghalili sa mga salitang may salungguhit.

42. MAhimbing ang tulog ni Miguel kaya hindi niya napansin na limilindol.
A. Tulog-mantika C. Tulo-away
B. Taingang-kawali D. Utak-biya
43. Humihingi ako ng tawad. May mga sinabi akong di nararapat.
A. Nabilog ang ulo C. Nagdilim ang paningin
B. Matalas ang dila D. Nadulas ang dila
44. Nawala ang lahat kay Ryan nang mamatay ang kanyang mga magulang.
A. Pinagtampuhan ng langit at lupa C. Naglubid ng buhangin
B. Pinagtakluban ng langit at lupa D. Namangka sa dalawang ilog
45. Malimit magsinungaling ang mga batang hindi pinalaki ng tama.
A. Nagdilang kuneho C. Nagbuhat ng sariling bangko
B. Naglubid ng buhangin D. Namuti ang uwak
46. Galit na galit ako sa taong nagnakaw ng aking tanghalian.
A. mabigat ang dugo C. Matalas ang ulo
B. Mkitid ang noo D. Kumukulo ang dugo
47. Madaling lokohin si Anna.
A. Makitid ang noo C. Matuwid at paniwalain
B. Utak-biya D. Nagmurang-kamatis
48. Punong-puno ng tao ang Dallas Stadium kung saan ginawa ang laban ni Manny Pacquiao.
A. Di mahulugang karayom C. Di makabasag pinggan
B. Di mahapayang gating D. Di maliparang uwak

49. Sa wakas, nagpakasal na si Crisostomo kay Leonora.
A. Namangka sa dalawang ilog
B. Nagmahabang dula
C. Nagpalapad ng papel
D. Nagsampay-bakod
50. Kapag naniwala ka kay Greg, para ka na ring umasa sa wala.
A. Pumuti anguwak
B. Umitim ang tagak
C. Tumaga sa tubig
D. kumindat sa dilim
51. Ang salin sa blangko para sa blank ay halimbawa ng pagtutumbas na _____.
A. Panghiram sa Espanyol at pagbaybay sa Filipino
B. Kung ano ang bigkas siyang sulat
C. Paggamit ng leksikong Filipino
D. panghihiram ng salitang katutubo
52. “Mahal kita, mahal kita hindi ‘to bola/ Ngumiti ka man lang sana ako’y nasa langit na“. Ang salitang pampanitkang ginamit sa linya ng kanta nangangahulugang _____.
A. napakasaya
B. pakikipagkaibigan
C. sinisinta
D. laruan
53. “Heto na, heto na, /wahh! doo bidoo bidoo, bidoo, bidoo”. Alin ang naboung salita o tunog sa linya na nabou ayon sa toeryang pooh-pooh ?
A. wahh
B. Heto
C. Na
D. Doo bidoo
54. “pinutol mo/ dagkung kahoy/ dahil dito/ gumulong ang mga bato/ ania na, ania na, aniana...” Ang linya ng awit ay nagpapatunay ng _____.
A. diglossic na kalagayan ng wika
B. paggamit ng lalawiganing antas
C. code-switching
D. intelektwalisasyon
55. “Ang babae huwag mong tingnang isang bagayna libangan lamangkundi isang katuwang at karamay sa mga kahirapan nitong kabuhayan“. (E. Jacinto) Ang tungkulin ng wika sa linya ay _____.
A. pangheuristiko
B. pang-interaksyonal
C. panregulatori
D. pang-instrumental
56. Pen pen de sarapen/ de cuchillo de almasen/ haw haw de carabao batuten”. pinatutunayan ng linya ang paglaganap ng wika dahil sa _____.
A. heaograpiya
B. pananakop
C. pakikipagkalakalan
D. modernisasyon

“... Kung kinakailangan ang lakas upang maigupo ang isang mapaniil na pamahalaan o ang isang hari-hariang pinuno, wika ang tumbuling tagapukaw sa mga anak ng lahi. Patay ang isang tao kapag walang kaluluwa. Mahigit pa sa patay ang isang bayan kapag walang iisang wika.” (Rufino Alejandro)

57. Alin sa mga sumusunod na malalim ang salitang ginamit sa talata ang may kasalungat na pares ?
- | | |
|---------------------------|----------------------------|
| A. Tagapukaw – tagagising | C. Maigupo – matalo |
| B. Tambuli – trumpita | D. Mapaniil – mapagkandali |
58. May mga sasakyan sa Pilipinas na kababasahan ng ganito, “Katas ng Saudi” o kayo katas, ako utang ’’. Anong katangian ng wika ang tinutukoy dito ?
- | | |
|----------------|--------------|
| A. Arbitrario | C. Nagbabago |
| B. May sistema | D. Ginagamit |

59. Alin ang may wastong baybay ?
A. Iba't-iba
B. Paru-paro
C. Gamugamo
D. kurokuro
60. Alin ang wastong paraan ng pagsulat ng dayuhang salitang inuunlapan?
A. nag-ba-ballet
B. rugby-han
C. magtext
D. mag-shampoo
61. Alin sa m sumusunod ang salitang Pambansa ?
A. Mapagkumbaba
B. kamusta
C. Pinoy
D. Nagdadalanta
62. "Katulad ng wika ang isang samahan. Sa matabang lupa kusang lalago ito kung may sapat na tubig at liwanag." Ang pahayag na ito ni Tengelciang ay umaayon sa _____.
A. puristang paniniwala
B. intelektwalisasyon
C. Taglish
D. dekolonisasyon
63. Alin ang naganap na pagbabagong morpoponemiko sa salitang Tagalog ?
A. Metatesi
B. Asimilasyon
C. Pag-aangkop
D. Pagpapalit
64. Ano ang salitang ugat sa Kanluran ?
A. Kalan
B. Kanlong
C. Lunan
D. Lunod
65. Ano ang tuntunin natin ngayon na susundin sa pagtutumbas sa Filipinong rice terraces ?
A. Gamitin ang katutubong katumbas.
B. Tumbasan sa Espanyol at baybayin sa Filipino.
C. hiram naging ganap.
D. Kung ano ang bigkas siyang sulat.
66. Ilang ponema ang bumubou sa salitang gusali?
A. 6
B. 7
C. 5
D. 4
67. Kung sa pakikinig ang may layuning malibang ay mauuri bilang apresyati, mauuri naman sa pagbasa bilang _____.
A. ekstensibo
B. intensibo
C. papel
D. makahulugan
68. kung ang encoder ay sa decoder, ang manunulat kung sa gayon ay sa _____.
A. mambabasa
B. Tagahatid
C. papel
D. panulat
69. Ang pagkautal ay matawag na _____ na sagabal sa salita.
A. semantiko
B. pisyolohikal
C. pisikal
D. saykolohikal
70. Tukuyin ang sugnay na makag-iisa.
A. Kung magkakasundo tayo
B. Ako naman
C. Ang magiging tagasunod
D. Ikaw ang mamumuno

Filipino 2 Pagbasa at Pagsulat tungo sa Pananaliksik**2.1 Nababasa nang may wastong pag-unawang mga teksto sa iba't-ibang disiplina**

Para sa bilang 71-75, basahin ang seleksyon. Piliin ang titik ng tamang sagot sa mga katanungang sumusunod

Sa mga magulang, ang edukasyon ay isang obligasyon sa mga anak bilang paghahanda sa isang magandang buhay, lalo na sa mga panahong ang mga magulang ay wala na. Ang edukasyon para sa mga kabataan ay isang karapatang dapat ipagkaloobng kanilang mga magulang tungo sa isang magandang kinabukasan. Samantala, para naman sa mga guro, ang isang edukasyon ay isang larangang dapat bigyan ng ibayong pagpapahalaga at pagtingin lalo na ng pamahalaan at mga magulang sapagkat ditto nakasalalayang magandang kinabukasan ng mga kabataan at mamayan ng bayan.

71. Anong uri ng pamamahayag ang ipinamalas sa seleksyon?
 - A. Paglalahad
 - B. Pagsasalaysay
 - C. Pangangatwiran
 - D. Paglalarawan
72. Alin sa sumusunod na pananaw ukol sa edukasyon ang HINDI ipinakita sa seleksyon?
 - A. Edukasyon bilang obligasyon
 - B. Edukasyon bilang karapatan
 - C. Edukasyon bilang serbisyo sa bayan
 - D. Edukasyon bilang isang larangan
73. Paano binigyang katuturan ng may-akda ang paksa?
 - A. Pagbibigay ng halimbawa
 - B. Paghahambing at pagtatambis
 - C. Pagslungat
 - D. Pag-uulit
74. Ayon sa seleksyon, alin sa sumusunod ang kahalagahan ng pagkakaroon ng mabuting edukasyon?
 - A. Upang matumbasan ang halagang ginastos ng magulang pambayad ng tuition
 - B. Upang makamit ang isang magandang kinabukasan
 - C. Upang makabou ng mas maraming propesyonal na mangingibang-bansa
 - D. Upang matamo ang natatagong talent ng indibidwal
75. Ayon sa seleksyon, ano ang pinakamagandang maipapamana ng isang magulang sa kanyang anak?
 - A. Wastong edukasyon
 - B. Mabuting asal
 - C. Limang milyong piso
 - D. Pagpapahalaga sa kapwa at sa bayan

Para sa bilang 76-80, basahin ang seleksyon. Piliin ang titik ng tamang sagot sa mga katanungang sumusunod.

Naglipan ang mga mamayanang mahirap sa lungsod. Umaatungal at nagdarasal sa mga panginoon na sana'y palayain mula sa kuko ng pagdarahop. Isang kagyat ng alinlangan sa buhay – isang kahig isang tuka – simbolo ng isang pagkamaralita. Wala akong magawa kundi itistis sa mga salita ang nakikitang anyo n gaming buhay. Kapalaran o sandigan ng pagasa? Kung basal naman ang aking tinig sapagka't birhe akong nagnulila upang lumaya. Subali't ang sagot ay kung ang pawis ko'y kapalit ng hinaing at sigaw ng pagdurusa. Saan nga ba tutungo ang buhay kung sa tagpi-tagping dampa naroon ang ulam na toyu at idinidildil sa asin upang bigyang-lasa ang kaning isinusubo? Wala akong karapatang magsalita. Ang tinig ko ay paos. Ngunit ang ungol ko'y pumaimbulog sa langit at sa libingan ng mga buhay doon ko dinaranas ang misteryo ng buhay.

76. Anong uri ng pamamahayag ang ipinamalas sa seleksyon?
 A. Paglalahad C. Pagsasalaysay
 B. Paglalarawan D. Pangangatwiran
77. Anong uri ng tayutay ang ipinahiwatig ng naka-salungguhit na pangungusap?
 A. Tanong pagtutulad C. Pagtatawag
 B. Pagwawangis D. Tanong retorikal
78. Ano ang ibig sabihin ng, “isang kahig, isang tuka”?
 A. Matinging pagdarahop C. Lubhang karukhaan
 B. Mariwasang pamumuhay D. Pamumuhay tulad ng mga manok
79. Ano ang ibig sabihin ng, “basal angaking tinig”?
 A. Busilak C. Malakas
 B. Hindi marinig D. Maytakip ang bibig
80. Alin sa mga sumusunod ang angkop na pamagat ng seleksyon?
 A. Misteryo ng buhay C. Sigaw ng kahirapan
 B. Buhay lansangan D. Pag-asan g maralita

Para sa bilang 81-85, basahin ang seleksyon. Piliin ang titik ng tamang sagot sa mga katanungang sumusunod.

Alam mo, noong nasa restawran kami at kumakain, pinagmasdan ko siyang mabuti. Lalo siyang gumaganda habang tinitigan. Pino ang kanyang kilos; kitang-kita ito habang kumakain. Maya-maya, may nakita akong kakaibang kilos sa kanya. Nag-iba ang ekspresyon ng kanyang mukha. Parang nahihirapan ngunit pilit pa rin siyang ngumingiti na parang may itinatagong kung ano at pasulyap-aulyapsa kanyang inumin. Nahalata ko na lamang na nahihirapan siyang lumunok dahil nabulunan. Nilapitan ko siya at binatukan, sabay abot sa softdrinks at winikaan kong, “MAGPAKATOTOO KA, SISTER!”

81. Anong uri ng pamamahayag ang ipinamalas sa seleksyon?
 A. Paglalahad C. pagsasalaysay
 B. Paglalarawan D. Pangangatwiran
82. Saan naganapang mga pangyayari sa seleksyon ?
 A. Simbahan C. Kusina
 B. Opisina D. Restawran
83. Anong emosyon ng pangunahing tauhan sa pagsisimula ng seleksyon?
 A. Pagkabighani C. Pagkainis
 B. Pag-ibig D. Pagkakatotoo
84. Sa pagtatapos ng seleksyon, ano ang napagtanto ng pangunahing tauhan tungkol sa babaeng kanyang napapanood?
 A. Totoosa sarili ng babae C. Maganang kumain ang babae
 B. Ubod ng hinhin ang babae D. Mayaman ang babae
85. Bakit nag-iba ang ekspresyon sa mukha ng babae sa seleksyon?
 A. Pangit ang lasa ng kanyang kinakain.
 B. Siya ay nabulunan at hindi makalunok.

- C. Masakit ang kanyang tiyan.
- D. Nahalata niyang pinapanood siya ng pangunahing tauhan.

Para sa bilang 86-89, basahin ang seleksyon. Piliin ang titik ng tamang sagot sa mga katanungang sumusunod.

Sa panahon ngayon, may mga taong nalulukuban ng makahayop na damdaminat nakagagama ng kasamaan sa kapwa. Isa na rito ang pangahalay ng ama ng sarili niyang anak dahil sa matindingpagnanasa sa kamunduhan at kawalan ng katinoan sa pag-iisip. Ang mga ganitong uri ng tao ay

86. Anong uri ng pamamahayag ang ipinamalas sa seleksyon?
- A. Paglalahad
 - B. Paglalarawan
 - C. Pagsasalaysay
 - D. Pangangatwiran
87. Paano binigyang-katuturan ng may-akda ang paksa ng seleksyon?
- A. Paghahambing at pagtatambis
 - B. Paglalarawan
 - C. Paghahalimbawa
 - D. Pagkilalasa anhi at bunga
88. Ano ang parusa para sa kreming nabanggit sa seleksyon ?
- A. Pagkakataon
 - B. Lethal injection
 - C. Pagkulong sa mental Hospital
 - D. Pagkakakulong ng habang buhay
89. Alin sa mga sumusunod ang tumutukoy sa kreming nabanggit sa seleksyon ?
- A. Concubinage
 - B. Incest
 - C. Acts of lasciviousness
 - D. Marital rape

Para sa bilang 90-94, basahin ang seleksyon. Piliin ang titik ng tamang sagot sa mga katanungang sumusunod

PARAAN NG PAGLULUTO

- 1) Pagsamahin sa kaserola ang manok, suka, isang kutsara ng bawang, laurel, toyo, asin at paminta.
- 2) Pakuluin, pagkatapos ay hinaan ang apoy at lutuin hanggang lumambot.
- 3) Kapag natuyuan ay magdagdag ng tubig.
- 4) Kapag malambot na ang manok ay alisin na ito sa sarsa.
- 5) Sa isang kawali, igisa ang natitirang bawang.
- 6) Idagdag ang itinabing manok at lutuin hanggang matusta.
- 7) Ibuhos ang sarsa o pinaglutuan ng manok, pakuluin.
- 8) Maari ding dagdagan ng $\frac{1}{2}$ kutsarang asukal para bawasanang asim ng suka.

90. Anong uri ng pamamahayag ang ipinamalas sa seleksyon?
- A. Paglalahad
 - B. Paglalarawan
 - C. Pagsasalaysay
 - D. Pangangatuwiran
91. Paano binigyang -katuturan ng may-akda ang paksa ng seleksyon ?
- A. Paghahambing at pagtatambis
 - B. Paghahalimbawa
 - C. Pagbibigay patnubay
 - D. Pagkilala sa sanhi at bunga

92. Bakit kailangang hinaan ang apoy pagkatapos pakuluan ang manok?
- Upang kumapit ang lasa ng tuyo
 - Upang maalis ang lasa ng manok
 - Upang lumambot ang manok
 - Upang maging tuyo ang manok
93. Ano ang karagdagang pakinabang ng paglalagay ng suka sa pagkaing iniluluto?
- Bilang pampaalat
 - Bilang pantanggal ng lansa
 - Upang maghiwalay ang mantika at toyo
 - Upang hindi ma-panis ang iniluluto
94. Ano ang pagkaing iniluluto ng may-akda?
- Adobong manok
 - Kalderetang manok
 - Nilagang manok
 - Pocherong manok

Basahin ang seleksyon at sagutin ang # 95-97.

Ang tunay na pag-ibig ay walang ibinubungakung hindi tunay na ligaya at kaginhawaan. Kalian pa ma't sapin-sapin ang dusang pinapasan ng bayani, at ang kanyang biuhay ay nalipos ng karukhaan at lungkot, ang dahilan ay sapagkat hindi ang tunay na pag-ibig ang naghahari kunng hindiang taksil na pita sa yama't bulaang karangalan.

95. Ang paghihirap ng bayan ay sanhi ng _____.
 - pagkamakasari
 - kahinaan ng bayani
 - kawalang malay
 - digmaan
96. alin ang bunga batay sa talata ?
 - Hindi tunay na karangalan
 - Hindi tunay na ligaya
 - Totoong karangalan
 - Totoong kalungkutan
97. Kung gagamitan ng paghihibla sa mga konsepto sa talata, alin ang pinakagitna?
 - Pag-ibig
 - Ligaya
 - Kaginhawaan
 - Kabayanihan
98. Ano ang kahulugan ng pangungusap na ito?
Ilista mo na lamang sa tubig ang aking utang.
 - Kalimutan na ang utang
 - Magbabayad din ng utang
 - Tubig ang listahan
 - Nasa tubig ang utang
99. Alin sa mga sumusunod ang pangungusap na may paksa?
 - May pasok bha bukas?
 - Kay ganda ng paglubog ng araw.
 - Nagbabasa sila sa aklatan.
 - Mainit ngayon
100. Sa taas ng bilingin ngayon kahit kahig ka nang kahig ay wala pa ring maiipon.
 Ano ang ibig sabihin nito?
 - Hanap ng hanap
 - Tago ng tago
 - Gastos ng gastos
 - Trabaho ng trabaho

101. Ang pahayagan ay hindi dapat maglathala ng anumang uri ng pagbibintangna makakasira sa reputasyon na di muna nagbibigay ng pagkakataon sa nasasakdal na marnig ang kanyang panig. Ito ay?
- A. walang kinikilingan
B. kalayaan ng pagpapahayag
C. makatarungan pakikitungo
D. Maaasahan mo ako
102. "You can count on me," Ang pinakmalapit na salin nito ay _____?
- A. bilangin mo kami
B. bilangin mo ako
C. Ibilang mo ako
D. Maaasahan mo ako
103. Anong uri ng tayutay ang pahayag na ito? "Ang kabutihan mo sa buhay ang magiging hakbang sa pag-unlad"
- A. Pagwawangis
B. Pagpapalit-tawag
C. Pagtutulad
D. Personipikasyon
104. "Malalim ang bulsa," ng kanyang nanay. Ang ibig sabihin nito ay _____.
- A. walang pera
B. mapera
C. mapagbigay
D. kuripot
105. Siya ay may kutsarang pilak ng ipinanganak. Ito ay nangangahulugang _____.
A. tahimik
B. masalita
C. mayaman
D. mahirap
106. Alin ang pinakamalapit na salin ng "you are the apple of my eye."
A. Ikaw ay kasing ganda ng mansanas.
B. Ikaw ay maganda sa paningin.
C. Ibibili kita ng mansanas.
D. Ikaw ang paborito ko.
107. "Pare-pareho kayo. Wala akong mapagpipilian," wika ng isang gurong puno ng galit sa mga lalaking mag-aaral.
A. Walang gana sa pagtuturo.
B. Nawalan ng tiwala sa mga lalaki.
C. Walang pagtingin sa mga lalaki.
D. Hindi pare-pareho ang mga lalaki
108. Ang pagtama sa lotto ay parang isang "Suntok sa buwan" Ano ang kahulugan nito?
A. Maaari
B. Pangarap
C. Impossible
D. Maaabot
109. "Panahon na upang magdilat ng mata at makisangkot sa usapin." Itoy nagpapahiwatig na _____.
A. kalimutan ang usapin
B. magising sa katotohanan
C. idilat ang mga mata
D. umiwas sa usapin
110. Ang lumalakad ng mabilis, kung matinik ay malalim".
ano ang ibig sabihin nito?
A. Mag-isip na mabuti sa paglalakad.
B. Mag-isip ng malalim kung paglalakad.
C. Ang nagmamadali ay madalas nagkakamali.
D. Ang naglalakad ng mabilis ay hindi makapag-isip.
111. Mahusay "maglubid ng buhangin" ang taong gipit. Ano ang ibig sabihin?
A. Magyabang
B. Magsinungaling
C. Magpaikot-ikot
D. Magtali

112. Huwag “pagbuhatan ng kamay” ang batang walang kalaban-laban. Ano ang ibig sabihin?
 A. Itali ang kamay C. Pagbuhatan ng mabigat
 B. pagtrabahuin D. Saktan
113. Iyon lamang nakakaranas ng mga lihim na kalungkutan ang maaaring makakilalang lihim na kaligayahan. ang mga pahayag na ito ay nagsasaad ng _____.
 A. paghihikahos sa buhay C. kapangitan ng buhay
 B. kalungkutan sa buhay D. kagandahan ng buhay
114. Mahusay magtago ng lihim ang mga taong “mabigat ang bibig.” Ano ang ibig sabihin nito?
 A. Hindi madaldal C. Malaki ang bibig
 B. Mahiyain D. Tahimik
115. “Kung ang sa langit ay nabubuhay ang sa lupa ay namamatay ano’t kinatatakutan ang oras ng kamatayan.” Anong damdamin ang ipinapahayag nito?
 A. Maging matapang C. Mapagbigay
 B. Maging mapagpasensiya D. Matatag sa buhay

FILIPINO 3 – MASINING NA PAGPAPAHAYAG

- 3.1 Nagagamit ng may husay ang Filipino sa pagbou ng isang sulating pananaliksik
 3.2 Nagagamit ang angkop na repertwal (repertoire) ng wika sa pagpapahayag ng kaalaman, karanasan at saloobin

119. Alin ang pinakamalakas ang dating na pahayag kapag kabataan ang nag-uusap sa isang kwento?
 A. Ang ganda ng kanyang kasuotan!
 B. Astig talaga ang ayos niya!
 C. Katulad niya ang isang Bathala!
 D. Ang porma niya talaga.
120. Alin dito ang pinakawastong salin sa pangungusap na: “I am sure he didn’t say that.”
 A. Ang tiyak ko’y hindi niya sinabi iyon.
 B. Ako ay tiyak na hindi niya sinabi iyon.
 C. Ako ay nakatitiyak na na iyon ay hindi niya sinabi.
 D. Natitiyak kong hindi niya sinabi iyon.
121. Alin sa sumusunod ang waston pagkakasulat ng bibliograpiya?
 A. Antonio, Lila F., et al. (1975-76) *retorikang pangkolehiyo*. Quezon City: Unibersidad ng Pilipinas
 B. Retorikang pangkolehiyo. Antonio, Lila F., et al. Quezon City: Unibersidad ng Pilipinas
 C. Unibersidad ng Pilipinas, Antonio, Lila F. et al, Retorikang pangkolehiyo, Quezon City, (1975-76)
 D. Quezon City: Unibersidad ng Pilipinas, 1975-76, Retorikang pangkolehiyo, Antonio, Lila F., et al
122. Ano ang salin ng “Bring home the bacon”?
 A. Mag-uwi ng bacon. C. Bumili ng panalo.
 B. Mag-uwi ng panalo. D. Dalhin ang bacon.

NOTES

Read, analyze and reflect on these NOTES.

1. When evaluating mathematical expressions, always be guided by the order of operations:

- Simplify all operations inside parenthesis.
- Simplify all exponents
- Perform all multiplications and divisions, working from left to right.
- Perform all additions and subtractions, working from left to right.

Remember the mnemonic **P-E-M-D-A-S** (**P**arenthesis-**E**xponents- **M**ultiplications/**D**ivisions-**S**ubtractions-**A**dditions).

2. Numbers may be classified as prime, composite and natural denominate:

- A *prime numbers* is a positive number which may only divided by 1 or itself.
- A *composite number* is a positive number which has a positive divisor other 1 or itself. All even numbers are composite except the number 2.
- A *natural number* like 0 or 1 is neither prime nor composite.
- A *denominate number* is a number with an attached unit of measurement.

3. Prime factorization is the process of finding which prime numbers you need to multiply together to get the original number. There are 2 methods of Prime factorization.

- In the *factor tree* method, we use a pictorial method of finding factors, where the number to be factorized is placed at the top and all its factors branch out one by one till we get all prime factors, just like a tree.

$$3 \times 2 \times 2 \times 2 = 24$$

- In the *continuous division method*, we perform repeated divisions using prime factors as divisor until the last dividend becomes 1.

2	24
2	12
2	6
3	3
	1

4. The least common multiple (LCM) is the smallest multiple that 2 numbers have in common. The *greatest common factor* (GCF) is the largest multiple that can exactly divide 2 numbers. To obtain the LCM or the GCF, perform prime factorization of the 2 numbers and compare their prime factors.

- For LCM, after you list down the 2 factors, mark similar prime factors as one pair. After you have done so, multiply together the paired and unpaired prime factors.

$$24 = \begin{array}{|c|} \hline 2 \\ \hline 2 \\ \hline \end{array} \begin{array}{|c|} \hline 2 \\ \hline 2 \\ \hline \end{array} 2 \begin{array}{|c|} \hline 2 \\ \hline 2 \\ \hline \end{array}$$

$$36 = \begin{array}{|c|} \hline 2 \\ \hline 2 \\ \hline \end{array} \begin{array}{|c|} \hline 2 \\ \hline 2 \\ \hline \end{array} 2 \begin{array}{|c|} \hline 2 \\ \hline 2 \\ \hline \end{array}$$

$$\text{LCM} = \underbrace{2 \times 2 \times 3}_{\text{paired factors}} \times \underbrace{2 \times 3}_{\text{unpaired factors}} = 72$$

- b. For GCF, after you list down the prime factors, mark similar prime factors as one pair. After you have done so, multiply together the paired prime factors ONLY.

$$24 = \begin{array}{|c|} \hline 2 \\ \hline 2 \\ \hline \end{array} \begin{array}{|c|} \hline 2 \\ \hline 2 \\ \hline \end{array} 2 \begin{array}{|c|} \hline 2 \\ \hline 2 \\ \hline \end{array}$$

$$36 = \begin{array}{|c|} \hline 2 \\ \hline 2 \\ \hline \end{array} \begin{array}{|c|} \hline 2 \\ \hline 2 \\ \hline \end{array} 2 \begin{array}{|c|} \hline 2 \\ \hline 2 \\ \hline \end{array}$$

$$\text{GCF} = \underbrace{2 \times 2 \times 3}_{\text{paired factors}} \times = 12$$

1. Please be guided by the divisibility rules.

Divisor	Divisibility condition	Examples
2	The last digit is even (0, 2, 4, 6, or 8).	1294: 4 is even.
3	Sum of the digits is clearly divisible by 3.	405 $\Rightarrow 4 + 0 + 5 = 9$
4	The last two digits are divisible by 4.	40832: 32 is divisible by 4.
5	The last digit is 0 or 5.	495: the last digit is 5.
6	It is divisible by 2 or by 3. by 3 and the last digit is even, hence the	1,458: $1 + 4 + 5 + 8 = 18$, so it is divisible number is divided by 6.
	Subtract two times the last digit from the rest. The result should be divisible by 7	483: $48 - (3 \times 2) = 42$: 42 is divisible by 7.
8	The last three digits are divisible by 8. Ad four times the hundreds digit to twice the tens digit to the ones digit. The result should be divisible by 8.	34152: 152 is divisible by 8. $34152: (4 \times 1) + (2 \times 5) + 2 = 16$
9	Sum of the digits is divisible by 9.	2,880: $2 + 8 + 8 + 0 = 18$
10	The last digit 0.	130: the last digit is 0.

2. Recall the concepts of ratio and proportion.

- a. A *ratio* is an expression of the relative size of two quantities; it is usually expressed as the quotient of one number divided by the other. The ratio of 1 to 2 is written as 1:2 or $1/2$.
- b. A *proportion* is a statement of equality between two ratios. The ratio of 1:2 to 3:6 forms of the proportion $1:2 = 3:6$ or $1/2 = 3/6$.

3. Recall the concept of percentage, base and rate.

- a. The *percentage* is the fraction of the original number that is obtained by multiplying the rate and the base. In problems, it is the number that comes before the word is.
- b. The *base* is the number or quantity which represents the original number. It also represents the total. It is obtained by dividing the percentage by the rate. In problems, it is the number that comes after the word of.
- c. The rate is the number represents the percent. It is obtained by dividing the percentage by the base. In problems, is the number that is attached to the word percent or to a % sign.
- d. To facilitate recall of the formulae for percentage, base and rate, draw a PBR triangle.

4. *Measurement* is the process or result of determining the magnitude of a quantity.

a. *Perimeter* is the total distance around any 2 dimensional shape. The formulae for for perimeter as follows:

i. perimeter of triangle = $a + b + c$, where a , b and c represents the lengths of the three sides of the triangle

ii. perimeter of a rectangle = $2l = 2w$, where l and w represents the length and the width respectively

iii. perimeter of a square = $4s$, where s represents the length of one side of a square

iv. perimeter of circle = $2\pi r$, where π represents the constant equal to 3.1416 and r represents the radius of the circle

b. *Area* is the total amount of space that a 2 dimensional object occupies. It is measured in square units (ie, square meters, square centimeters).

i. area of a triangle = $\frac{1}{2} \times b \times h$, where b represents the base and h represents the perpendicular height.

- ii. area of a rectangle = $l \times w$, where l and w represents the length and the width respectively

- iii. area of a square = s^2 , where s represents the length of one side of a square

- iv. area of a circle = πr^2 , where π represents the constant equal to 3.1416 and r represents the radius of a circle

- v. area of an isosceles trapezoid = $\frac{1}{2} (b_1 + b_2) \times h$, where b_1 and b_2 represent the length of the 2 parallel bases and h is the perpendicular height

- c. *volume* is the total amount of space occupied by a three dimensional object. It is measured in cubic units (ie, cubic meters, cubic centimeters).

- i. volume of a cube = s^3 , where s is length of 1 side of the cube.

- ii. volume of a rectangular prism = $l \times w \times h$, where l is the length, w is the width and h is the height.

- iii. volume of a cylinder = $\pi r^2 h$, where π represents the constant equal to 3.1416, r represents the radius of the circular base and h represents the height of the cylinder.

- iv. volume of a cone = $(1/3) \times \pi r^2 h$, where π represents the constant equal to 3.1416, r represents the radius of the circular base and h represents the height of the cone

- v. volume of a pyramid = $(1/3) \times B \times h$, where B is the area of the base and h is the height

- vi. volume of sphere = $(4/3) \times \pi r^3$, where π represents the constant equal to 3.1416, r represents the radius

- d. *Capacity* is the total amount of fluid that a 3-dimensional container can hold. It is used hand in hand with volume and is calculated using the same formulae.
- e. Weight is a measure of the amount of gravitational pull exerted on a mass. Beyond the realm of physics, weight and mass are used interchangeably. Conventional units include kilograms and pounds.
5. The standard system of measurement in the present day is the metric or SI system. The alternative system used in European countries is the English system.
- a. Conversion of units in the SI system requires awareness of various key prefixes signifying powers of ten.

SI Prefixes for Multiples

Name	deca	hecto	kilo	mega	giga	tera	peta	exa	zetta	yotta
Symbol	Da	H	k	M	G	T	P	E	Z	Y
Factor	10^1	10^2	10^3	10^6	10^9	10^{12}	10^{15}	10^{18}	10^{21}	10^{24}

SI Prefixes for Fractions

Name	deci	centi	milli	micro	nano	pico	femto	atto	zepto	yocto
Symbol	d	C	m	μ	n	p	f	a	z	y
Factor	10^{-1}	10^{-2}	10^{-3}	10^{-6}	10^{-9}	10^{-12}	10^{-15}	10^{-18}	10^{-21}	10^{-24}

Dimensional analysis is done to determine equivalent SI units using different prefixes. For example, to convert 8 kilometers into centimeters.

$$8 \text{ km} \left(\frac{10 \text{ m}^3}{1 \text{ km}} \right) \left(\frac{1 \text{ cm}}{1 \text{ km}} \right) = 8 \times 10^{3-(-2)} \text{ cm} = 8 \times 10^5 \text{ cm}$$

- b. Conversion of units from English system to the SI system requires memorization of *conversion factors*.

1 kilogram	=	2.2 pounds 1(lbs)
2.54 centimeters	=	1 inch
12 inches	=	1 foot
1 meter	=	3.28 feet
3 feet	=	1 yard
1 mile	=	5,280 feet
1 kilometer	=	0.62 mile

6. Recall the following concepts in plane trigonometry.
- A *line* is a series of points that extends in two opposite directions without end. Two points are needed to define a line. It has no fixed length or width. It is considered infinitely long.
 - The *point of intersection* is the point where two lines meet or come together.
 - Perpendicular lines* form right angles to the point of their intersection. They will never intersect with each other.
 - A *curve line* is a line that represents a mathematical equation. It may be two-dimensional or three-dimensional.
 - An *angle* is the figure formed by two rays sharing a common endpoint, called the *vertex of the angle*. Angles are measured in degrees ($^{\circ}$).
 - A *right angle* is an angle whose measure is exactly 90 degrees.
 - An *acute angle* is an angle whose measure is less than 90 degrees.
 - An *obtuse angle* is an angle whose measure is more than 90 degrees but less than 180 degrees.
 - A *straight angle* is an angle whose measure is exactly 180 degrees.
 - A *reflex angle* is an angle whose measure is more than 180 degrees but less than 360 degrees.
 - Two angles are *complementary* if their sum is 90 degrees.
 - Two angles are *supplementary* if their sum is 180 degrees.
 - A *triangle* is a plane geometric figure with three vertices and three sides. The sum of three *internal angles* of a triangle is always equal to 180 degrees.
 - Triangles may be classified on the *length of sides*:
 - An *equilateral triangle* has three sides of equal length. It is also called equiangular triangles because all three angles measure exactly 60 degrees.
 - An *isosceles triangle* has two sides of equal length. The two angles opposite the two equal sides are also equal in measure.
 - A *scalene triangle* has three sides of unequal length. All three angles are also of unequal measure.
 - Triangles may also be classified based on the *measure of internal angles*:
 - A *right triangle* has exactly one right angle among its internal angles.
 - An *acute triangle* is composed of three acute internal angles.
 - An *obtuse triangle* has exactly one obtuse angle among its internal angles.
 - Special triangles* have properties that allow us to compute algebraically the lengths of their corresponding sides.
 - The dimension of the *right triangle* follows the *Pythagorean theorem*.

- a. The side opposite the right angle is called the hypotenuse (c).
 - b. The two other sides are called the legs (a, b).
 - c. For any right triangle, $a^2 + b^2 = c^2$.
- For a 45-45-90 right triangle:

- a. The length of the hypotenuse is equal to the length of one the legs multiplied by $\sqrt{2}$.

3. For a 30-60-90 *right triangle*:

- a. The length of the hypotenuse is two time the length of the shorter leg.
- b. The length of the longer leg is equal to the length of the shorter leg multiplied by $\sqrt{3}$.

4. For *equilateral triangle*:

- a. The height is defined by the following formula:

$$height = a^2 \frac{\sqrt{3}}{2}$$

The area is defined by the following formula:

$$area = a^2 \frac{\sqrt{3}}{4}$$

5. *Heron's theorem* may be used to calculate the area of any triangle given the length of the three sides.
 - a. First, calculate the semiperimeter:

$$s = \frac{a+b+c}{2}$$

- b. Use the semiperimeter to calculate the area using Heron's theorem:

$$area = \sqrt{s(s-a)(s-b)(s-c)}$$

- c. A quadrilateral is a plane geometric figure with exactly four sides and four vertices. The sum of the measures of the interior angles of a quadrilateral is exactly 360° .
- i. A *parallelogram* is a quadrilateral with two pairs of parallel sides.
 1. The opposite angles of a parallelogram are equal in measure.
 2. The adjacent angles of a parallelogram are supplementary.
 3. The diagonals of a parallelogram bisect each other.
 - ii. A *rectangle* is a quadrilateral with four right internal angles.
 1. The diagonals are equal in length and bisect each other.
 2. The length of each diagonal is equal to $\sqrt{l^2 + w^2}$
 - iii. A *square* is a quadrilateral with four equal sides and four right internal angles.
 1. The diagonals of a square bisect each other and meet at 90° .
 2. The diagonals of a square bisect its angles.
 3. The diagonals of a square are perpendicular.
 - iv. A *rhombus* is a quadrilateral with four equal sides.
 1. Opposite angles of a rhombus are equal.
 2. The two diagonals of a rhombus are perpendicular.
- d. A *polygon* is a plane geometric figure bounded by a closed path or circuit, composed of a finite sequence of straight line segments.
- i. The segments are called its *sides*, and the points where two edges meet are the polygon's *vertices*.
 - ii. Polygons are named based on the number of sides:

# of sides	Name of polygon	# of sides	Name of polygon
3	Triangle	12	Dodecagon
4	Quadrilateral	13	Triskaidecagon
5	Pentagon	14	Tetradecagon
6	Hexagon	15	Pentadecagon
7	Heptagon	16	Hexadecagon
8	Octagon	17	Heptadecagon
9	Nonagon	18	Octadecagon
10	Decagon	19	Nonadecagon
11	Undecagon	20	Icosagon

- iii. A *regular polygon* has equal length of all sides and equal measure of all interior angles.
- iv. The sum of all the interior angle of a regular polygon is equal to $(n - 2) \times 180$.
- v. The measure of each interior angle of a regular polygon is equal to $\frac{(n-2 \times 180)}{n}$

7. Recall the following basic concepts in Elementary algebra:
- a. An *algebraic expression* is a mathematical expression made up of the signs and symbols of algebra. These symbols include the Arabic numerals, literal numbers, the signs of operation, and so forth.
 - b. The components of algebraic expression are called *terms*. Based on the number of terms, special designation is given to algebraic expressions:
 - i. An expression containing only one term (ie, $2x$) is called a *monomial*.
 - ii. A *binomial* contains two terms (ie, $2x + 1$).
 - iii. A *trinomial* consist of three terms (ie, $2x^2 + 3x + 4$).
 - iv. Any expressions containing two or more terms may also be called by the general name, *polynomial*.

8. A polynomial expression is a monomial or a sum of monomials.
 - a. The degree of a polynomial expression with one variable is the value of the largest exponent of the variable that appears in any term. For example, the degree of the binomial $x^2 + 4$ is 2.
 - b. A functional relationship between quantities that can be described by an equation where y equals a polynomial expression of x is a *polynomial function*.
 - i. A *linear function* is a polynomial function with a degree equal to 1 (ie, $y = 5x + 3$).
 1. The graph of a linear function is a straight line.
 - ii. A *Quadratic function* is a polynomial function with a degree equal to 2 (ie, $y = 5x^2 + 3x + 3$).
 1. The graph of a quadratic function is a parabola.
 - iii. A *cubic function* is a polynomial function with a degree equal to 3 (ie, $y = 5x^3 + 3x^2 + x + 3$).
 1. The graph of a cubic function is a curve.
9. Recall the principles in evaluation of polynomial expressions.
 - a. Group like terms using commutative and associative properties.
 - b. Combine like terms using distributive property.
 - c. Simplifying powers can also help you multiply monomials.
 - i. multiplying powers with like bases: $a^m \times a^n = a^{m+n}$.
 - ii. Raising a power to a power: $(a^m)^n = a^{mn}$.
 - iii. Raising a product to a power: $(ab)^n = a^n \times b^n$.
 - iv. Zero power: $a^0 = 1$.
 - v. Negative power $a^{-n} = \frac{1}{a^n}$
 - vi. Dividing powers with like bases: $\frac{a^m}{a^n} = a^{(m-n)}$.
 - vii. Raising a quotient to a power: $\left(\frac{a}{b}\right)^n = \frac{a^n}{b^n}$
10. Factoring a polynomial means writing it as a product of 2 or more monomials.
 - a. *Common monomial factor*:
 - i. Consider the trinomial $2x^3 - 10x^2 + 6x$. The common monomial factor is $2x$. So using the distributive property in reverse, we factor this expression as: $2x(x^2 + 5x + 3)$.
 - b. *Grouping*:
 - i. Consider $x^3 - x^2 + x - 1 = 0$.

$$\begin{array}{rcl} x^3 - x^2 + x - 1 & & = 0 \\ (x^3 - x^2) + (x - 1) & & = 0 \\ x^2(x - 1) + (x - 1) & & = 0 \\ (x - 1)(x^2 + 1) & & = 0 \end{array}$$
 - c. *square of a binomial (perfect square trinomial)*:
 - i. $(a + b)^2 = a^2 + 2ab + b^2$.
 - ii. $(a - b)^2 = a^2 - 2ab + b^2$.
 - d. *Difference of two squares*:
 - ii. $(a + b)(a - b) = a^2 - b^2$.
 - e. *Completing the square*:
 - i. Consider $x^2 + 6x + 5 = 0$.

$$\begin{array}{rcl} (x^2 + 6x + 5 + 4) - 4 & & = 0 \\ (x^2 + 6x + 9) - 4 & & = 0 \\ (x + 3)^2 - 4 & & = 0 \\ (x + 3 + 2)(x + 3 - 2) & & = 0 \\ (x + 5)(x + 1) & & = 0 \end{array}$$

- f. Sum of two cubes:
i. $(a+b)^3 = (a+b)(a^2 - ab + b^2)$.
- g. Difference of two cubes:
i. $(a-b)^3 = (a-b)(a^2 + ab + b^2)$
15. A *linear equation* is an algebraic equation in which each term is either a constant or a product of a constant and (the first power of) a single variable.
These may be expressed in the following forms:
- a. *Standard form*: $Ax + By + C = 0$, where,
i. the x-intercept is $(-C/A, 0)$.
ii. the y-intercept is $(0, -C/B)$.
iii. the slope of a line is $-A/B$.
- b. *Slope intercept form*: $y = mx + b$, where, m is the slope and $(0, b)$ is the y-intercept.
- c. *Two point form*: $y - y_1 = \frac{y_2 - y_1}{x_2 - x_1} (x - x_1)$ where, where (x_1, y_1) and (x_2, y_2) are two different points on the line.
- d. *Point slope form*: $y - y_1 = m(x - x_1)$, where m is the slope of the line and (x_1, y_1) is any point on the line.
- e. *Intercept form*: $\frac{x}{a} + \frac{y}{b} = 1$, where $(a, 0)$ is the x-intercept and $(0, b)$ is the y-intercept.
16. A *linear inequality* is an inequality which involves a linear function. The solution to a linear inequality is obtained by shading the corresponding half-space in the Cartesian plane after graphing the expression as a linear equation.
17. Recall the various *counting techniques*:
- a. *Fundamental Principle of Counting*: In a sequence of events, the total possible number of ways all events can be performed is the product of the possible number of ways each individual event can be performed.
- b. *Factorial*: $n! = (n-1)(n-2) \dots (3)(2)(1)$; for example, $5! = 5 \times 4 \times 3 \times 2 \times 1$.
- c. *Permutation*: A permutation is an arrangement of objects without repetition where order is important. A permutation of n objects, arranged in groups of size r , without repetition, and order being important is: $nPr = \frac{n!}{(n-r)!}$
- d. *Combination*: A combination is an arrangement of objects without repetition where order is not important. A combination of n objects, arranged in groups of size r , without repetition, and order not being important is: $nCr = \frac{n!}{(n-r)! r!}$
18. *Probability* is a measure of certainty or uncertainty that an event will happen.
It ranges from 0 to 1.
- a. The probability of an impossible event (an event that will never occur) is 0.
- b. The probability of a certain event (an event that will surely happen) is 1.
- c. The probability (P) of an event (E) is expressed mathematically as:
$$P(E) = \frac{(\text{number of wanted outcomes})}{(\text{number of possible outcomes})}$$

19. *Measures of central tendency* are numerical descriptive measures which indicate or locate the center of distribution or data set.
- The *mean* of a set of values or measurements is the sum of all the measurements divided by the number of measurements in the set.
 - The *median* is the middle value of a given set of measurements, provided that the values or measurements are arranged in an array. An array is an arrangement of values in increasing or decreasing values.
 - The *mode* is the value occurs most frequently in a set of measurements or values.
- d. Measures of variability are measures of the average distance of each observation from the center of distribution. They measure homogeneity or heterogeneity of a particular group.
- The *range* is the difference between the highest and the lowest values. This is the simplest and most unreliable measure of variability since it uses only two values in the distribution.
 - the *mean absolute deviation* is the average of summation of the absolute deviation of each observation from the mean. The formula for the mean absolute deviation is:

$$\text{mean absolute deviation} = \frac{\sum x - \bar{x}}{n}$$

where, x is a value or score from the raw data, $\bar{x}$ is the mean and n is the total number of cases.

- Variance* (s^2) is the average of the squared deviation from the mean. The formula for finding the variance is shown below: $s^2 = \frac{\sum (x - \bar{x})^2}{n}$
where, x is a value or score from the raw data, $\bar{x}$ is the mean and n is the total number of cases.

- The *standard deviation* is the square root of the average deviation from the mean. It is mathematically equal to the square root of the variance.

$$s = \sqrt{\frac{\sum (x - \bar{x})^2}{n}}$$

where, x is a value or score from the raw data, $\bar{x}$ is the mean and n is the total number of cases.

PRACTICE TEST: Test your mastery of competencies. Choose the letter that correspond to the best answer.

I Math 1-Fundamentals of math

1. Use of four fundamental operations in problem solving involving:

1.1 Operation with whole numbers, decimals, Fractions, and integers

1.2 Prime, composite, denominate numbers

1.3 Prime factorization

1.4 LCM, GCM

1.5 Divisibility rules

1. Evaluate the following expression: $5 + 3(42 + 7) - 7(2 + 32 \times 8)0$
 - A. 0
 - B. 152
 - C. 72
 - D. -444
2. Evaluate the following mathematical expression: $\frac{3+4(5-2 \times 6)+12(2+4)+1}{1+(3 \times 6)-\frac{80}{5}}$
 - A. 16
 - B. 24
 - C. 36
 - D. 12
3. Which among the following is NOT a prime number?
 - A. 31
 - B. 41
 - C. 51
 - D. 61
4. How many prime numbers are there between 1 and 100?
 - A. 23
 - B. 24
 - C. 25
 - D. 26
5. What is the largest prime number less than 100?
 - A. 91
 - B. 93
 - C. 95
 - D. 97
6. What are the prime factors of 128?
 - A. $1 \times 2 \times 8$
 - B. $2 \times 2 \times 2 \times 2 \times 2 \times 2 \times 2$
 - C. $2 \times 2 \times 2 \times 4 \times 4$
 - D. $2 \times 3 \times 2 \times 2 \times 2 \times 2 \times 2$
7. What are the prime factors of 153?
 - A. $3 \times 3 \times 17$
 - B. $3 \times 3 \times 7 \times 9$
 - C. 153×1
 - D. $3 \times 7 \times 13$
8. What are the prime factors of 273?
 - A. $3 \times 3 \times 7 \times 7$
 - B. $3 \times 17 \times 11$
 - C. $3 \times 6 \times 9 \times 11$
 - D. $3 \times 7 \times 13$
9. What is the least common multiple of 24 and 80?
 - A. 360
 - B. 80
 - C. 240
 - D. 480

10. One trip around a running track is 440 yards. One jogger can complete one lap in 8 minutes, the other can complete it in 6 minutes. How long will it take for both joggers to arrive at their starting point together if they start at the same time and maintain their jogging pace?
- A. 12 minutes C. 36 minutes
B. 24 minutes D. 48 minutes
11. Josefa is making bead necklaces. She has 90 green beads and 180 blue beads. What is the greatest number of identical necklaces she can make if she wants to use all of this beads?
- A. 12 C. 16
B. 15 D. 18
12. Lisa bought a big bag of candy at a warehouse store. There are 102 pieces of candy in a bag. Lisa needs to divide the candy up into smaller bags. She wants to put the same number of pices in each small bag. How many small bags could lacey use?
- A. 17 C.19
B. 18 D. 20
13. A dish company needs to ship an order of 117 glass bowls. The company will put the bowl into several boxes. Each box contains the same number of bowls. How many boxes could the company use for the order?
- A. 11 C. 13
B. 12 D. 17
14. The number, 212115273999132, is NOT divisible by which of the following factors?
- A. 2 C. 4
B. 3 d. 8
15. When 2,000 pounds of paper are recycled, 17 trees are saved. How many trees are saved if 5,000 pounds of paper is recycled?
- A. 41 C. 45
B. 42.5 D. 63
16. A recipe calls for 2 eggs for every 5 cups of flour. A local chief will use 35 cups of flour, how many eggs must be have?
- A. 12 C. 14
B. 13 D. 16
17. Five out of every seven households have cable TV. If 42,000 households in a certain city hyave a TV, how many do not have cable TV?
- A. 12,000 C. 30,000
B. 21,000 D. 32,000
18. Our school has 8 male teachers who comprise 25% of all our teachers. How many teachers do we have?
- A. 24 C. 32
B. 28 D. 40
19. Miss Santiago's class has 20 boys and 15 girls in her English class. What percent of the students are girls?
- A. 28% C. 44%
B. 43% D. 50%

20. Jerome answered 80% of the 50 items correctly in math test. How many items did he answer correctly?
- A. 40
B. 44
C. 45
D. 50
21. A business man had incurred the following expenses in his trips to the Visayanislands: P5100.00, P4600.00, P3800.00, and P3200.00. What was his total for his trip?
- A. P16000
B. 16700
C. P17000
D. P17500
22. Ms. Tonelada weighed 60 kg. She lost 4 kg on her first week of exercise, gained 2 kg on her second week, lost 6kg on her 3rd week and and remained her weight on 4th week. What was her weight on the 4th week?
- A. 52 kg
B. 58 kg
C. 68 kg
D. 72 kg
23. A group of young people from four countries gathered together for an international conference: 40 from Manila, 60 from Japan, 35 from Thailand and 45 from Singapore. The participants will form discussiongroups with equal number of members from each country in each group. What is the greatest number of discussion groups that can be formed?
- A. 5
B. 15
C. 20
D. 25
24. During summer, a lady visits Baguio 6 days, and his best friend every 4 days. If they visited Baguio last April 11, what does the earliest date did both of them visit Baguio again
- A. April 21
B. April 23
C. May 5
D. May 11
25. A recipe calls a $\frac{3}{4}$ of sugar. How much sugar should be used if only $\frac{1}{2}$ of the quantities given in the recipe is to be prepared?
- A. $\frac{3}{4}$
B. $\frac{2}{3}$
C. $\frac{1}{2}$
D. $\frac{3}{8}$
26. In a bundle of new 100 bils, The bills are consecutively numbered RTC3432260 to RTC3432280. How much is the total amount of the bills?
- A. 3200
B. 3300
C. 3400
D. 3500
27. The sum of three consecutive integers is 96. What are the integers?
- A. 31, 32, 33
B. 32, 33, 34
C. 30, 32, 34
D. 33, 34, 35
28. A farmer can plow $\frac{2}{3}$ of a hectare in 1 hr. At this rate, in how many hours will 5 farmers plow the same fields?
- A. $\frac{1}{5}$
B. $\frac{10}{3}$
C. $\frac{15}{2}$
D. 10

29. If the exchange rate of the US dollars to pesos is \$1 = Php47.90 what is the value of Php1 in American cents?
- A. 02
B. 479
C. 2
D. 4.79
30. In a card game, a player got the following scores: 35, -60, -40, 80, -100, 25, -25. What is his final score?
- A. -115
B. -85
C. 85
D. 115
31. The first 5 numbers in a sequence are 2, 3, 5, 8, and 12. What is the 7th number in the sequence?
- A. 15
B. 19
C. 23
D. 25
32. A teacher wants to group his pupils into groups of 3 or 5 or 6. However, if she found out that if she do that there will always be 1 pupil left. What is the least possible number of pupils in the class?
- A. 81
b. 31
C. 21
d. 11
33. Twelve pesos more than twice Mico's allowance is at most 600 pesos. What is her maximum allowance?
- A. 300 pesos
B. 634 pesos
C. 588 pesos
D. 294 pesos
34. What integer should be added to 11 to get the sum of at least 37?
- A. At least 15
B. At least 25
C. At least 26
D. At least 32
35. What are the largest two consecutive odd integers whose sum is at most 60?
- A. 25, 27
B. 27, 29
C. 29, 31
D. 31, 33
36. Two numbers are in ratio of 3:4. If their sum is 84, what is the smallest number?
- A. 24
B. 36
C. 48
D. 54
37. The numerator of a fraction is 3 less than the denominator. If the numerator and denominator are each increased by 1, the value of the fraction becomes $\frac{3}{4}$. What is the original fraction?
- A. $\frac{7}{12}$
B. $\frac{8}{12}$
C. $\frac{8}{11}$
D. $\frac{6}{13}$
38. Mr. Lucido deposited 225 pesos in the bank. If his deposit consisted of 29 bills, consisting of 5 peso and 10 peso bills, how many 10 peso bills did he deposit?
- A. 13
B. 14
C. 15
D. 16
39. Brenda has saved 300 coins, consisting of 25 centavo and 10 centavo coins. If the total value of her savings is 4 pesos, how many 10 centavo coins did she save?
- A. 100
B. 200
C. 300
D. 400

40. Julia can finish a project in 10 hours while Elenita can do the same project in 8 hours. How will it take them to finish the project together?
- A. 3.44 hours
B. 4.00 hours
C. 4.44 hours
D. 18 hours
41. If a liter of chemical X is 95% pure, how many liters of water must be added to make a 50% solution?
- A. 0.80% L
B. 0.90 L
C. 0.94% L
D. 0.09 L
42. Arthur has blended coffee worth 95 pesos per kilogram with coffee worth 115 pesos per kilogram to make 50 kilograms of coffee that will be sold at 107 pesos per kilogram. How many kilograms of each kind did he blend?
- A. 20 kilos of 95/kg and 30 kilos of 115kg
B. 30 kilos of 95/kg and 30 kilos of 115kg
C. 30 kilos of 95/kg and 50 kilos of 115kg
D. 60 kilos of 95/kg and 30 kilos of 115kg
43. A Victory liner bus traveling at a rate 70 km/h leaves the station after a freight truck has left and overtakes it in 5 hours. At what rate was the freight truck traveling?
- A. 20km/h
B. 30 km/h
C. 40km/h
D. 50 km/h
44. Don Antonio invested part of 30,000 pesos at 5% interest and the remaining interest at 6% interest at BPI. If his investment yields annual income of 1,620 pesos, how much did he invest at 6% interest?
- A. 12,000 pesos
B. 14, 000 pesos
C. 16,000 pesos
D. 18,000 pesos
45. The units digit of a two-digit number exceeds the tens digit by 2. Find the number if it 4 times the sum of its digits.
- A. 24
B. 42
C. 48
D. 82
46. Using the integers 4, 7, 9, 8 and 5, how many two digit numbers can be formed if repetition is NOT allowed.
- A. 20
B. 23
C. 25
D. 28
47. In how many ways can 5 boys be seated in a row of 5 seats?
- A. 72
B. 9
C. 102
D. 120
48. In how many ways can a team of 10 basketball players be chosen from 12 players?
- A. 62
B. 64
C. 66
D. 72

MATH 1-1.6 Ratio and proportion

49. If a picture frame is 27 cm long and 18 cm wide, what is the ratio of its length to its width?
- A. 3:2
B. 2:3
C. 3:5
D. 5:3

50. Five bananas weigh as much as 3 star apples. In this rate, how many star apples will weigh as much as 45 bananas?
- A. 27
B. 30
C. 33
D. 36
51. It takes 20 men to build a building for 60 days. Assuming that all men work at this rate, how many men will be needed to build the same building in 15 days?
- A. 5
B. 80
C. 100
D. 120
52. The ratio of the numbers of carabaos, goats and cows in a farm is 5:1:2. If there are 48 animals of these kinds in his backyard, how many of them are goats?
- A. 2
B. 4
C. 6
D. 8
53. The ratio of the numbers of red, green and blue balls in a box is 2:5:6. How many green marbles are there if there are 52 marbles in all?
- A. 4
B. 8
C. 20
D. 24
54. In a university, the ration of the female professors to the male professors 8:5. If there are 75 male professors, how many are female professors?
- A. 120
B. 180
C. 225
D. $375/8$
55. A meter stick is cut into 2 at the 25 cm mark. What is the ratio of the smaller piece to the larger pice?
- A. 1:3
B. 2:5
C. 3:4
D. 4:5

MATH 1-1.7 Percentage, Base and Rate

56. In a survey to determine the reaction of people about having a new GSIS card, 80% of the 2,400 people voted in favor of the new card. How many of the voters did not vote for the new card?
- A. 1920
B. 1600
C. 800
D. 480
57. Lulu spends 15% of her monthly income for house rental, 10% for electric bill and 25% for food and other miscellaneous expenses, she still has P6,000 left. How much does she earn every month?
- A. P15,000.00
B. P12,000.00
C. P9,000.00
D. P8,000.00
58. If 500 or 25% of a graduating class are girls, how many are graduating?
- A. 2,000
B. 5,000
C. 10,000
D. 20,000
59. At 25% discount, Ms. Barat paid P150.75 for a bag. What was the original price of the bag?
- A. P37.69
B. P150.75
C. P201.00
D. P603.00

60. A man accepts a position at P14,250 basic salary with an agreement that he will receive a 2% increase every year for 3 years. What will his salary be at the end of 3 years?
- A. P14,950.00
B. P15,105.00
C. P15,122.21
D. P16,500.00
61. A man invested Php 100000. He put part of it in a bank at 5% interest. On the other hand, he invested the remainder in bonds with a 9% yearly return. How much did he put in a bank if his yearly income from the two investments was Php 7,400?
- A. Php40,000.00
B. Php50,000.00
C. Php60,000.00
D. Php 70,000.00

MATH 1-1.8 Measurement and units of measure

62. Max is planning to take a leisurely stroll around their rectangular patio, which measures 27.7 m long and 21.5 m wide. Howfar does Max have to walk?
A. 96.4 m
B. 120.4 m
C. 98.4 m
D. 88.4 m
63. Which among the following has the largest perimeter?
A. Square pizza with perimeter of 80 cm
B. Circular pizza with radius of 13 cm
C. Rectangular pizza with dimension 10 cm x 14 cm
D. Circular pizza with radius 8.5 cm
64. You own a small rectangular box measuring 3 cm x 2 cm. If the dimensions of this box are increased by 10%, what is the area of resulting box?
A. 6.26 cm²
B. 6.22 cm²
C. 7.12 cm²
D. 7.26 cm²
65. What is the area of the rhombus whose diagonals measures 10 m and 12 m respectively?
A. 120 m²
B. 100 m²
C. 60 m²
D. 360 m²
66. Find the volume of a toy ball whose radius is 2 cm.
A. 33. 49 cm³
B. 48.56 cm³
C. 51.76 cm³
D. 50.24 cm³
67. A tin can has a radius of 6 cm and a height of 20 cm. What is the volume of milk that this container can hold?
A. 3, 00cm³
B. 2,261 cm³
C. 1,689 cm³
D. 2,200 cm³
68. The total surface area of a cubic box is 600 cm². What is the length one side of this box?
A. 6 cm
B. 8 cm
C. 9 cm
D. 10 cm
69. After a stone is dropped into a cylindrical container filled with 100 cm³ of water, the water rises and the new reading is 106.5 cm³. What is the volume of the stone?
A. 6.5 cm³
B. 60.65 cm³
C. 60.5 cm³
D. 10.65 cm³

70. Which of the following length is the longest?

- A. 555 cm
B. 5.5 m
C. .005 km
D. 5555 mm

71. One-fifth of the width and one-fourth of the length of a rectangular cardboard is cut off. What part of the original cardboard is the area of the remained piece?

- A. 30% of the original area
B. 40% of the original area
C. 50% of the original area
D. 60% of the original area

72. If the area of a triangle is 1 sq unit and its height is unit, what is the length of its base?

- A. 1 unit
B. 2 units
C. 3 units
D. 4 units

73. What is the radius of a circle whose area is 25 cm^2 ?

- A. 25 cm
B. 25 cm
C. 5 cm
D. 5 cm

74. Refer to the figure. Given: $m \angle 2 = 55^\circ$ and $m \angle 3 = 80$. What is $m \angle 4$?

- A. 90°
B. 105°
C. 115°
D. 135°

75. Mrs. Dina Ta Tandad divided her lot among her 4 children. The first got $3\frac{1}{2}$ ha, the second $3\frac{1}{3}$ ha, the third $3\frac{1}{4}$ ha and the fourth $3\frac{2}{5}$ ha.

How big is Ms. Tanda's lot?

- A. $12\frac{5}{14}$ ha
B. 13 ha
C. $13\frac{29}{60}$ ha
D. 14 ha

76. An elevator can carry a maximum load of 605 kg. How many passengers of weight 50.5 kg each can the elevator hold?

- A. 12
B. 11.9
C. 11
D. 10

77. A room is 30 ft. long, 25 ft wide and 14 ft high. If 42 balloons are inside the room, how many cubic feet of space does this allow for each balloon?

- A. 25
B. 69
C. 250
D. 690

78. What is the volume of air in an atmospheric balloon with a diameter of 24 cm?

- A. 144 cm^3
B. 240 cm^3
C. 570 cm^3
D. 2304 cm^3

79. A photograph measuring $7\frac{1}{2}$ cm by 5 cm is enlarged so that the longer side is 24 cm. What is the length (in cm) of the shorter side?
- A. 36
B. 16
C. 6
D. 1.6
80. How many cm are there in 2 m and 550 mm?
- A. 75
B. 255
C. 2055
D. 2550
81. How much liquid containing 6% boric acid should be mixed with 2 quarts of a liquid that is 15% boric acid in order to obtain a solution that is 12% boric acid?
- A. 1 quart
B. 2 quarts
C. 3 quarts
D. 5 quarts
82. A defective ruler was found found 11.5 in long. Using this ruler, Samuel was found to be 4 ft tall. What is Samul's actual height?
- A. 4 ft 2 in
B. 4 ft 4 in
C. 3 ft 11.5 in
D. 3 ft 10 in

MATH 1-1.9 Convert units in the metric system

83. How many grams are there in 1 petagram?
- A.5
B.5,000
C.1015
D.5 x 1015
84. If an apple weighs about 170grams, about how many apples are in 3.5 kilogram bags of apple?
- A. 20
B. 21
C. 22
D. 23
85. A new supercomputer measures 462 lbs in weight. How much does it weigh in grams?
- A. 21 g
B. 2,100 g
C. 21,000 g
D. 210,000 g
86. How many liters are there in 353 quarts?
- A. 353 L
B. 334 L
C. 326 L
D. 324 L
87. Paul and his son participated in a marathon. Paul traveled 3 km 50 m while his son ran 502 m 36 cm. What is the total distance that the father and tandem covered?
- A. 3,760 m
B. 5,452 m
C. 3,552 m
D. 3550 m
88. A slow moving snail traveled 4,800 mm. How far did it travel in kilometers?
- A. 0.0048 km
B. 4.8 km
C. 0.48 km
D. 0.048 km
89. For the fruit punch, 3050mL of fruit juice is needed. How much fruit juice is needed in dekaliters?
- A. 0.305 daL
B. 3.05 daL
C. 5.03 daL
D. 0.053 daL
90. The measure of an angle is 25 more than its supplement. What is the measure of the larger angle?
- A. 102.5 degrees
B. 77.5 degrees
C. 90 degrees
D. 110 degrees

2. PLANE GEOMETRY**2.1 Show mastery of basic terms and concepts in Plane Geometry****2.2 Solve problems involving basic terms and concepts in Plane Geometry**

91. If the measure of angle is twice the measure of its complement, what is the measure of the angle?

- A. 30 degrees
B. 60 degrees
C. 90 degrees
D. 120 degrees

92. Which among the following statements is ALWAYS TRUE?

- A. The supplement of an angle is acute.
B. The supplement of an angle is obtuse.
C. The supplement of any acute angle is acute.
D. Two supplementary angles are congruent.

93. Which among the following statements is ALWAYS TRUE?

- A. Two adjacent right angles are supplementary.
B. Complements of congruent angles are congruent.
C. Two intersecting lines form two pairs of vertical angles.
D. Angles that form a linear pair are complementary.

94. What is the measure of an angle if the measure of its supplements is 39 degrees more than twice the measure of its complement?

- A. 29 degrees
B. 39 degrees
C. 49 degrees
D. 59 degrees

95. Consider the triangle illustrated below. Find the measure of angle x .

- A. 57 degrees
B. 47 degrees
C. 55 degrees
D. 22 degrees

96. Consider the triangle illustrated below. Find the value of x .

- A. 55
B. 35
C. 60
D. 25

97. Two angles of a triangle measure 4 cm and 7 cm. What is the range of values for the possible lengths of the third side?

- A. $4 < x < 7$
B. $3 < x < 11$
C. $7 < x < 11$
D. $11 < x < 15$

98. Which of the following statements is TRUE?

- A. A rectangle is a square.
B. A parallelogram is a trapezoid.
C. A rhombus is a rectangle.
D. A square is a rhombus.

99. Consider the quadrilateral below. Find the value of x .

- | | |
|----------------|-----------------|
| A. 22
B. 56 | C. 112
D. 54 |
|----------------|-----------------|
100. If the sum of the interior angles of a regular polygon is 1980 degrees, how many sides does it have?
- | | |
|----------------|----------------|
| A. 11
B. 12 | C. 13
D. 14 |
|----------------|----------------|
101. What is the sum of the measures of the interior angles of an icosagon?
- | | |
|--------------------|--------------------|
| A. 3100
B. 3140 | C. 3240
D. 2850 |
|--------------------|--------------------|
102. What is the measure of an interior angle of a dodecagon?
- | | |
|----------------------------------|----------------------------------|
| A. 120 degrees
B. 130 degrees | C. 140 degrees
D. 150 degrees |
|----------------------------------|----------------------------------|
103. How many unique diagonals can be drawn in the pentagon?
- | | |
|--------------|---------------|
| A. 5
B. 6 | C. 7
D. 10 |
|--------------|---------------|
104. Nine unique diagonals can be drawn in a regular polygon. How many sides does it have??
- | | |
|--------------|--------------|
| A. 9
B. 8 | C. 7
D. 6 |
|--------------|--------------|
105. A triangle has a perimeter of 50. If 2 of its sides are equal and the third side is 5 more than the equal sides, What is the length of the third side?
- | | |
|---------------|----------------|
| A. 5
B. 10 | C. 15
D. 20 |
|---------------|----------------|
106. A rectangle is 4 times as long as it is wide. If the length is increased by 4 inches and the width is decreased by 1 inch, the area will be 60 square inches. What were the dimensions of the original rectangle?
- | | |
|------------------------|------------------------|
| A. 2 x 32
B. 4 x 16 | C. 3 x 14
D. 5 x 12 |
|------------------------|------------------------|
107. In a quadrilateral two angles are equal. The third angle is equal to the sum of the two equal angles. The fourth angle is 60° less than twice the sum of the other three angles. Find the measures of the angles in the quadrilateral.
- | | |
|---|--|
| A. 25° , 35° , 90° and 220°
B. 25° , 45° , 70° and 70° | C. 35° , 35° , 70° and 220°
D. 35° , 35° , 70° and 210° |
|---|--|
108. If one side of a square is doubled in length and the adjacent side is decreased by two centimeters, the area of the resulting rectangle is 96 square centimeters larger than that of the original square. Find the dimensions of the rectangle.
- | | |
|--------------------------|-------------------------|
| A. 17 x 24
B. 24 x 24 | C. 10 X 24
D. 6 x 16 |
|--------------------------|-------------------------|

109. The smallest angle of a triangle is two-third the size of the middle angle, and the middle angle is three-sevenths of the largest angle. Find all three angle measures.
- A. 30° , 60° , 90° C. 35° , 45° , 110°
 B. 45° , 45° , 90° D. 30° , 445° , 105°
110. If the height of a triangle is 5 inches less than the length of its base, and if the area of the triangle is 52 square inches, find the base and the height.
- A. Base = 13, height = 8 C. Base = 11, height = 7
 B. Base = 12, height = 9 D. Base = 13, height = 4
111. A wood frame for pouring concrete has an interior perimeter of 14 meters. Its length is 1 meter greater than its width. The frame is to be braced with twelve-gauge steel cross wires. Assuming an extra half meter of wire is used at either end of a cross-wire for anchoring, what length of wire should be cut for its brace?
- A. 6 m C. 8 m
 B. 7 m D. 12 m
112. Find the largest possible rectangular area you can enclose, assuming you have 128 meters of fencing.
- A. 256 m^2 C. 1024 m^2
 B. 512 m^2 D. 2048 m^2
113. In a photograph, Bianca is 9 cm tall and his brother Tristan is 10 cm tall. Bianca's actual height is 153 cm. What is Tristan's actual height?
- A. 148 cm C. 168 cm
 B. 156 cm D. 170 cm
114. The measures of the angles of a triangle are in a ratio of 2:3:4. Find the measure of the middle angle.
- A. 30° C. 60°
 B. 40° D. 80°
115. The graph shows the number of socks, belts, handkerchiefs, neckties sold by a store in one week.

The names of the items are missing on the graph. Socks were the most often sold, and fewer neckties than any other item were sold. More belts than handkerchiefs were sold. How many belts were sold?

- A. 80 C. 120
 B. 90 D. 140

116. An empty box weighs 1.3 kilos. A Math book weighs 1.5 kilos. Which expression gives the weight of the box when filled with the y Math books?
- A. $1.3y + 1.5$
- B. $1.5y - 1.3$
- C. $1.3 + 1.5y$
- D. $1.3y + 1.5y$

2.2 Solve problems involving basic terms and concepts in plane geometry

117. A building 25 m tall casts a shadow 10 m long. How long is the shadow of a 5-foot girl standing beside the building?
- A. 2 ft
B. 2.5 ft
C. 10 ft
D. 250 ft
118. What is the maximum number of books, each 1.4 cm thick that can be put vertically in a shelf which is 64 cm long?
- A. 44
B. 45
C. 46
D. 64

ELEMENTARY ALGEBRA

3.1 Show mastery of basic terms and concepts in

3.1.1 Polynomials

3.1.2 Linear equation

3.1.3 Linear inequalities

3.2 Solve, evaluate, and manipulate symbolic and numerical problems in elementary algebra by

119. Factor completely the expression: $a^2x - 5by - 5a^2y + b^2x$.
 A. $(a^2 + b^2)(x - 5y)$ C. $(a + b)(a - b)(x - 5y)$
 B. $(a^2 + b^2)(x + 4y + 3)$ D. $(a^2 + b^2)(x^2 - 5y^2)$
120. Which among the following is NOT a perfect square trinomial?
 A. $x^2 + 8x + 16$ C. $49x^2 + 70x + 36$
 B. $9x^2 + 12x + 4$ D. $x^2 + 6x + 9$
121. Factor completely the expression: $27a^3 - 54a^2b + 36ab^2 - 8b^3$.
 A. $(3a - 3b)^3$ C. $(4a - 3b)^3$
 B. $(a - 3b)^3$ D. $(3a - 2b)^3$
122. What is the greatest monomial factor of the expression: $-13abc - 39bc + 26ab$?
 A. $3b$ C. $13abc$
 B. $-13b$ D. $26b$
123. Which factoring technique will best help you to factor the expression: $x^2 + 6x - 7 = 0$?
 A. Difference of two cubes C. Grouping
 B. Common monomial factor D. Completing the square
124. Find the general equation of the line which passes through the points: $(2, -1)$ and $(-3, 5)$.
 A. $6x + 5y - 7 = 0$ C. $6x + 7y - 5 = 0$
 B. $5x - 6y - 7 = 7$ D. $6x + 6x - 5 = 0$

123. What is the equation of the line with x-intercept of 4 and y-intercept of 3?
 A. $3x + 4y = -12$ C. $6x - 8y = 12$
 B. $3x - 4y = 12$ D. $4x - 3y = 12$
124. Find the equation of the line with a slope of 4 and passing through the point (-5, 3).
 A. $x - 4y = -23$ C. $4x - y = -23$
 B. $4x - 4y = 23$ D. $x - y = -4$
125. Find the slope of the line describe by the following table of values:
- | | | | | |
|---|----|----|----|---|
| x | -2 | 0 | 2 | 4 |
| y | -7 | -4 | -1 | 2 |
- A. 1.50 C. 2.50
 B. 0.66 D. 3.50
126. What is the equation of the line whose slope is -2 and whose y-intercept is 3?
 A. $2x + 3y = 6$ C. $2x + 2y = 4$
 B. $x + 2y = 3$ D. $2x + y = 3$
129. The length of rectangle is 18 cm. What are the possible widths that will give a perimeter less than 150 cm?
 A. $3 < \text{width} < 54$ C. $18 < \text{width} < 36$
 B. $0 < \text{width} < 57$ D. $12 < \text{width} < 57$
130. What is the simplest form of the expression?
 A. $-2x + 4y - 17$ C. $2x + 4y - 17$
 B. $2x + 4y + 17$ D. $2x + 4y$
131. If $x \equiv 1$ and $y = -2$, what is the value of the expression $\frac{x^2}{2yx} \cdot 4x + \frac{3x}{y^2}$?
 A. $-\frac{9}{2}$ C. $-\frac{7}{2}$
 B. $\frac{15}{2}$ D. $-\frac{17}{4}$
132. If $-3x < 6$, which of the following statement is TRUE?
 A. $x < -2$ C. $x > 2$
 B. $x < 2$ D. $x > -2$

4. STATISTICS AND PROBABILITY

4.1 Show mastery and knowledge of basic terms and concepts in statistics and probability

4.2 Solve, evaluate, and manipulate symbolic and numerical problems in statistics and probability by applying fundamental rules, principles and processes.

133. If a die is rolled, what is the probability of getting a number divisible by 2?
 A. $\frac{1}{6}$ C. $\frac{1}{4}$
 B. $\frac{1}{2}$ D. $\frac{1}{3}$
134. Which among the measures of central tendency is NOT influenced by outliers?
 A. mean C. median
 B. weighted mean D. mode

135. Monica obtained the following results from her mathematics exams: 80, 82, 83, 91. What score must she get on the next exam so that her average score is 85?
A. 92
B. 93
C. 89
D. 8
136. In the Filipino test, eight students obtained the following scores: 10, 15, 12, 18, 16, 24, 12, 14. What is the median score?
A. 14
B. 14.5
C. 15
D. 15
137. The following table summarizes the scores of Section A on the recent periodic test in social studies. What is the median score interval?

Score	Frequency
16-23	2
24-31	4
32-39	6
40-47	12
48-55	10
56-62	8

- A. 24-31
B. 32-39
C. 40-47
D. 48-55
138. The following measurements were obtained from the caliper: 20, 15, 20, 14, 18, 15, 6. What is the mode?
A. 15
B. 20
C. 14
D. 15 and 20
139. The following are Joselito's grades for the 3rd quarter. Find his general weighted average.

Subject	Units	Grade
Math	3	89
English	2	84
Science	3	90
Filipino	2	86
HEKASI	2	84

- A. 87.08
B. 89.50
C. 86.36
D. 87.45
- For the numbers 96-100, consider the following situation. The grades in math of the students in section B are as follows: 70, 95, 60, 80, 100.
140. What is the mean absolute deviation of their group?
A. 11.7
B. 13.2
C. 14.6
D. 15.9
141. What is the population variance of their group?
A. 224
B. 250
C. 264
D. 280

142. What is the population standard deviation of their group?
A. 16.73 C. 1.58
B. 1.41 D. 14.97
143. What is the range of their group?
A. 60-95 C. 60-100
B. 70-100 D. 80-95
144. What can you infer from the measures of variability obtained from this population?
A. The population is very homogeneous.
B. The measures are very unstable.
C. The grades are very scattered.
D. The range of scores is a very reliable measure of variability.
145. What measure of central tendency can best describe the size of t-shirts commonly used by teen-agers
A. mean C. mode
B. median D. both A and C
146. The following are the results of the recent achievement test in mathematics of four divisions.

Division	Mean	Standard deviation
I	34	4.5
II	34	3.0
III	23	1.0
IV	20	2.0

- Which division performed best?
A. I C. III
B. II D. IV
147. What is the probability of getting a multiple of 3 when a die is tossed?
A. $\frac{1}{6}$ C. $\frac{1}{3}$
B. $\frac{1}{4}$ D. $\frac{1}{2}$
148. In how many ways can a 5 basketball players be chosen from a group of 9 players?
A. 126 C. 15,120
B. 212 D. 362,880

ANSWER KEY:**MATHEMATICS**

1	B	54	A	106	B

SCIENCE**20%****COMPETENCIES:****BIOLOGICAL SCIENCE (GENERAL BIOLOGY)****PHYSICAL SCIENCE (EARTH SCIENCE)**

- | | |
|--|----|
| 1. Identify scientific traits and attitudes exhibited in various situation | 3% |
| 2. Use scientific inquiry to investigate materials, events and phenomena in the natural world (designing experiments, collecting, organizing, analyzing and interpreting data, making conclusions and communicating results) | 5% |
| 3. Use scientific knowledge to explain natural phenomena and protect earth's resources | 5% |
| 4. Analyze advantages and disadvantages of different solutions to particular problems | 4% |
| 5. Analyze the impact of technology on living and non living things | 3% |

PRACTICE TEST: Test your mastery of the competencies. Choose the letter that corresponds to the best answer.

1. Identify scientific traits and attitudes exhibited in various situations

Read the text below then answer items 1 – 3.

The students were arguing about the results of their experiment. following were their comments:

Student A : “Our conclusion is wrong. It is the opposite of what we learned in the lecture.”

Students B and C: That's what came out. After we designed the experiment and observed for two weeks we should not change the result.

Student D: Maybe, it's good to find out why our findings differ from what was given in the lecture. Why not repeat the same experiment?

- Which trait of a scientist does Student A seem NOT have?

A. Open-mindedness	C. Blind obedience
B. Truthfulness	D. Objectivity
- Student B and C display which trait of a scientist?

A. Objectivity	C. Truthfulness
B. Authoritativeness	D. Critical attitude
- Why can Student D be said to have the bearing of a scientist.

A. He/She can relate to people.	C. He/She has a critical mind.
B. He/She is objective.	D. He/She is open-minded.
- Marco is always interested in asking questions. He is also very eager to find the answers to his questions. What scientific attitude is he displaying?

A. Curiosity	C. Absence of prejudice
B. Rationality	D. Wonder

5. Monica respects the ideas of her colleagues even if they are very much contrary to her own beliefs. What important scientific attitude is seen in her actions?
- A. Honesty
B. Absence of prejudice
C. Open-mindedness
D. Acceptance
6. Carlito weighs evidences dutifully before making any conclusions or decisions. He dissects the information individually before coming to a final conclusion. What scientific attitude is he displaying?
- A. Carefulness
B. Rationality
C. Precision
D. Accuracy
7. While performing an experiment, Mico expresses his opinions and tries new ideas even at the risk of failure or criticism. What scientific trait is displayed in this situation?
- A. Curiosity
B. Risk-taking
C. Diligence
D. Absence of ambiguity
8. Paul admits that he is not free from committing errors. He recognizes that there may be better ideas and realizes that there are individuals whom he may have to consult to arrive at correct observations and conclusions. What scientific trait is he displaying?
- A. Open-mindedness
B. Objectivity
C. Rationality
D. Humility
9. While performing research for a pharmaceutical company, Melanie gave a truthful report of observations. She did not withhold important information just to please herself or her company. What scientific attitude did she display?
- A. Absence of bias
B. Faith in God
C. Intellectual honesty
D. Critical mindness
10. Chona actively participates in a task and also dutifully performs tasks assigned to her. What scientific attitude is displayed in this situation?
- A. Camaraderie
B. Responsibility
C. Being a team playe
D. Unity
11. Fernan always seeks to think outside the box. He always aims to generate new and original ideas. What scientific attitude is he displaying?
- A. Inventiveness
B. Nobility
C. Indiffernce
D. Absence of prejudice
12. Adolfo does not allow his fellings and biases of influence his recording, of observations, interpretation of data, and formulation of conclusions. What scientific attitudes reflected in his action?
- A. Absence of bias
B. Concern for the environment
C. Rationality
D. Objectivity
13. Dennis bases suggestions and conclusions on evidences. When in doubt, he questions the veracity of a statement in relation to the evidences presented. What scientific attitude is seen in his actions?
- A. firm set of beliefs
B. Absence of bias
C. Critical-mindedness
D. Intellectual honesty
14. Jose believes that everything that happens in this world has cause or reason. What scientific attitude is seen in his actions?
- A. Curiosity
B. Firm set of beliefs
C. Honesty
D. Critical mindedness

15. Pepita believes that God is the ultimate source of all scientific wisdom. She also upholds that it is through God's grace she is able to discover the mysteries of God's creations. What scientific attitude is seen in his actions?
- A. Faith in god
B. Fatalism
C. Honesty
D. Concern
16. Alice does not allow her judgment to be influenced by her likes or dislikes. What scientific attitude is seen in her actions?
- A. Prejudice
B. Critical thinking
C. Honesty
D. Absence of bias
17. Miguel only creates inventions that respect and help conserve natural resources. He is an advocate against pollution and illegal logging. What scientific attitude is seen in his actions?
- A. Concern for the environment
B. Love of nature
C. Belief in evolution
D. Conservatism
18. Nicolaus Copernicus believed that the church was wrong about the Sun revolving around the Earth. Advancing his theory that the Earth revolved around the Sun eventually cost him his life. What scientific attitude is seen in his actions?
- A. Egotism
B. Selflessness
C. Revolutionary
D. Positivism

2. Use scientific inquiry to investigate materials

19. If two variables X and Y are directly related, which of these is NOT true?
- A. As X increases, Y also increases.
B. A high Y is associated with a high X.
C. When X increases, Y increases.
D. When X is low, Y also is low.

Situation: Read the following then answer questions # 20-22.

Beda wants to find out if different types of wood soak up the same amount of water when wet. She plans to do the following:

- I. Weigh a dry block of each type of wood.
- II. Put each block into a container full of water.
- III. Leave the wood in the water.
- IV. Take the wood out, dry the outside of each block and reweigh.
- V. Calculate the amount of water soaked up.

20. To be a fair test, what variables should she control?
- I. Size of each block
II. Time left in water
III. Type of wood
IV. Amount of water
- A. I and III
B. III and IV
C. I and II
D. II and IV
21. In this experiment, what is the dependent variable?
- A. Type of wood used
C. Time left in water

- B. The amount of water soaked up
D. Dry weigh of each block
22. What is the independent variable?
A. Type of wood used
B. Dry weigh of each block
C. Amount of water soaked up
D. Time left in water

Read the following, then answer questions # 23-27.

The class was asked to design an experiment to test the effect of detergent on fish. One group came up with this experimental design.

For detergent they got Tide, Surf, and Champion.

For fish, Tilapia, Fingerling, goldfish and baby janitor fish contained in different sizes and shapes of battles. To the tilapia fingerling, they put 1 tbsp of Tide. To the goldfish, they put 1 tbsp of surf and to the baby janitor fish, 1 tsbp of champion.

23. What is the control group?
A. The tilapia with 1 tbsp of Tide
B. The baby janitor fish with 1 tsbp of champion
C. The goldfish with 1 tbsp os surf
D Cannot be determined
24. What is the experimental group?
A. Cannot be determined
B. The baby janitor fish with 1 tsbp of champion
C. The goldfish with 1 tbsp os surf
D. The tilapia with 1 tbsp of Tide
25. What is the dependent variable?
A. The brand of detergent
B. The effect of detergent on fish
C. The amount of detergent
D. The amount of water
26. Is there any defect of the experimental design?
A. None, it is a simple yet perfect design.
B. Yes, not only one but several.
C. Yes, there is, but was remedied by the fact that 3 kinds of detergent were used.
D. Yes, there is but was compensated by the use of not only one type of fish but 3.
27. If you were to improve the experimental design what should you do?
I. Just focus on one independent variable at a time, e.g. brand of detergent
II. Make use of the same type of fish.
III. Increase the number of fish and reduce the number of detergent brand involved.
A. I and II
B. II only
C. I and III
D. I only
28. Printed on the label of the bottle of cough medicine is the following instructions: "Store away from light, below 30 degrees C." What can you infer about the cough medicine?
A. It should be hidden away from children.
B. It should be stored at the refrigerator.
C. It is in the dark, light-proof bottle.
D. It is affected by heat and light.

29. It is commonly observed that the most respondents to survey questionnaire checklists just check answers without really reading them. What conclusion can be derived from the common observation?
- Data gathered by way of questionnaire checklists are not very reliable.
 - Respondents need to be convinced of the importance of the research data.
 - Researchers resort to questionnaire checklists for data-gathering because it is the easiest method.
 - Good survey questionnaires are not easy to make.

30.

Teacher M showed the class the potted plants placed on the window sill. She asked them to observe the direction of their growth. The pupils observed that the plants tended to grow outward. Then teacher asked the class this question: "Why do you think they tended to grow outward?"

What was teacher M engaging to do?

- | | |
|---|---|
| <ol style="list-style-type: none"> Formulate hypothesis Draw conclusion | <ol style="list-style-type: none"> Design an experiment Observe |
|---|---|
31. The existence of extraterrestrial life may never be proven, but this idea will become more scientifically acceptable over time if _____.
- hypotheses are made related to the idea
 - no one disputes this idea in a scientific forum
 - alternative hypotheses are proposed and confirmed
 - increasing scientific evidence supports the idea
32. Which comes ahead in the scientific method-observation or defining the problem?
- Observation so that you can come up with a scientific problem.
 - Defining a problem so that your observation becomes focused.
 - No defined answer. What you observe makes you think of a problem and a problem makes you observe.
 - They happen at the same time. Both are steps of the scientific method.
33. You like to know how many of your pupils have mothers and/ mothers who are presently employed as OCWs. What is/are the most reliable way to gather data?
- Interview the pupils.
 - Give questionnaire checklist to selected pupils.
 - Study the grades of the pupils because those performing poorly usually have parents who work as OCWs.

36. Which does not belong?
- | | |
|---------------|---------------|
| A. Conclusion | C. Hypothesis |
| B. Surmise | D. Conjecture |

For numbers 37 – 41, refer to the scientific case described below. Choose the best answer to the questions that follow.

Nancy wanted to find out if virgin coconut oil can be used as a preservative for peanuts. She placed 10 peanuts each in 2 glasses. In one glass, she added enough virgin coconut oil to cover the peanuts completely. She did not put any liquid on the other glass. She then kept the two glasses on a shelf and observed them for two weeks.

37. Which among the following statements is the best problem statement in Nancy's experiment?
- | | |
|--|--|
| A. Is virgin coconut oil useful as a preservative for peanuts? | |
| B. How many peanuts can be preserved using virgin coconut oil? | |
| C. How long can virgin coconut oil act as a preservative? | |
38. Which among the following is NOT a controlled variable in this experiment?
- | | |
|-----------------------|---------------------------------|
| A. Number of peanuts | C. Amount of virgin coconut oil |
| B. Type of glass used | D. Two week observation period |
39. Which among the following is an observation that may be derived from this experiment?
- | | |
|--|--|
| I. Only four peanuts dried up in the glass without virgin coconut oil because of room temperature. | |
| II. Six peanuts did not dry up in the glass with virgin coconut oil. | |
| III. The duration of two weeks for this experiment is too long. | |
| IV. Peanuts did not wither in virgin coconut oil because of the presence of stearic acid. | |
- | | |
|-------------|--------------|
| A. I only | C. II and IV |
| B. I and II | D. IV |
40. How many manipulated variables are present in this experiment?
- | | |
|--------|----------|
| A. one | C. Three |
| B. Two | D. Four |
41. What is suitable null hypothesis for this experiment?
- | | |
|---|--|
| A. If virgin coconut oil is used, peanuts will be well-preserved. | |
| B. Virgin coconut oil is equally effective as commercial nut preservatives. | |
| C. The threshold for preservative effect is 10 peanuts only. | |
| D. Virgin coconut oil has no significant preservative effect on peanuts. | |

3. Use scientific knowledge to explain natural phenomena and protect earth's resources

42. During periods of increased global temperature, which of the following is likely to occur?
- | |
|---|
| A. An increase in atmospheric CO ₂ |
| B. A decrease in atmospheric CO ₂ |
| C. A decrease in earthquakes |
| D. An increase in earthquakes |

43. Why is the Philippines much hotter than Canada? The Philippines _____.
A. receives sun rays closer to vertical position
B. has more vegetation to absorb sunlight
C. has days with more hours of light
D. has a denser population than Canada
44. Geothermal energy, an energy resource in the country, is based on what phenomenon?
A. Earth's internal energy heats its surface more than the sun does.
B. There are concentrations of heat in some places of Earth's crust.
C. Heat energy from the sun penetrates deep into the earth.
D. human activity is the largest source energy on earth.
45. Which of these effects generally occurs as a result of warm air mass and a cooler air mass converging at earth's surface?
A. Stormy weather patterns develop.
B. The sky becomes clear
C. Winds die down
D. Cloud formation decreases
46. Why do fisherfolks catch more fish during the new moon than during the full moon?
A. Fishes are more active during the new moon because the salt content of water is just right.
B. Fishes look for mates during the new moon.
C. Fishes go near the surface during the new moon because the water is warmer.
D. Fishes attracted to the light from the fishing boat which fisherman makes use of during the new moon.
47. *Bagoong* smells because _____.
A. air and volatile particles from *bagoong* mix and get spoiled further
B. that is the natural scent of *bagoong*
C. molecules from *bagoong* spread in air
D. it uses spoiled fish ingredients
48. Every morning when the sun shines through the glass jalousie of Maria's window, she sees a rainbow on her wall. Which could explain this?
A. The glass jalousies break up the beam of sunlight into the colors of the rainbow.
B. The glass jalousies cast colored shadows.
C. In the morning, sunlight shines on the wall painted with rainbow colors.
D. There are water droplets on the glass that act like a prism
49. Which of the following is TRUE about light and seeing?
A. light hits an object, bounces, and then enters the eyes.
B. Light goes out from eyes, hits an object, and then returns to the eyes.
C. Light rays coming from an object meets light coming from a light source, and then enters the eyes.
D. Light enters the eyes enabling people to see objects.
50. Why do leaves with green color look green in the sunlight?
A. The blue and yellow bounces off from the leaves.
B. They absorb the blue and yellow object and yellow light.
C. They absorb the green light.
D. they reflect green light.

51. Why does the level of water in a beaker rise after a stone is placed in it?
- A. The stone takes the place occupied by water.
 - B. The stone has more mass than water.
 - C. The water weighs less than the stone.
52. Why do people feel their ears pop or crack when they are up in the air?
- A. There are less air particles.
 - B. There are more air particles.
 - C. Air is cooler.
 - D. Air is cleaner.
53. Which of the following activities help reduce water pollution?
- A. Cleaning of soap instead of detergent.
 - B. Treating wastewater before it is discharged.
 - C. Throwing only liquid wastes.
 - D. Using organic fertilizers in farms.
54. The manager of textile factory considers it too expensive to treat liquid wastes so he suggested digging a hole near the factory where the wastes can be stored is this environmentally safe?
- A. No, the liquid can be recycled.
 - B. No, the liquid wastes will seep to the groundwater.
 - C. Yes, the liquid will pass to the layers of soil and becomes clean.
 - D. Yes, the liquid can be recycled.
55. Why are nights cooler when the sky is clear than when it is overcast?
- A. Rain falls when water vapor condenses above freezing point.
 - B. Cooler air holds less vapor.
 - C. The sun is hidden during the night.
 - D. There is no cloud cover to prevent heat from escaping.
56. Water covers about 75% of the Earth's surface and yet some people still do not have enough water to drink. Why?
- I. Most of world's water is salty.
 - II. Most of our bodies of water are polluted by chemicals.
 - III. Most freshwater are frozen in ice caps.
- A. I and II
 - B. I, II and III
 - C. II and III
 - D. I and II
57. Children born with a deficiency of thyroxin _____ if deficiency is not checked.
- A. lose their hair
 - B. have weak bones
 - C. grow too rapidly
 - D. become mentally retarded
58. The correct way of eating fruits is when eaten _____.
- A. with an empty stomach
 - B. after meals
 - C. before sleeping at night
 - D. during snacks
59. An eclipse of the sun throws the shadow of the _____.
- A. moon on the earth
 - B. moon on the sun
 - C. earth on the sun
 - D. earth on the moon

60. The following are effects of global warming EXCEPT _____.
A. thinning of the ozone layer
B. extreme weather events
C. changes in the timing of seasonal patterns in ecosystem
D. expansion of tropical diseases.
61. John experienced a lack of growth hormone (GH) as a child. Now that John is an adult, it is likely that he _____.
A. has cognitive and emotional problems as a result of his hormone deficiency
B. has normal adult body proportions, but an extremely short stature
C. is of normal height, but has child-like body proportions
D. has developed a physique similar to that typically seen in females
62. Which among the following represents the smallest unit of life?
A. Embryo
B. Organelle
C. Cell
D. Atom
63. Which of the following statements about living things is FALSE?
A. All living things use energy to function.
B. All living things are composed of cells.
C. All living things have a nervous system.
D. All living things are capable of reproduction.
64. Which of the following best describes a group of cells that work together to perform a function?
A. Tissue
B. Organ system
C. Organ
D. Organism
65. Which among the following are duplicated during the process of mitosis?
A. Centromeres
B. Chromosomes
C. Chloroplasts
D. Centrosomes
66. Plants create their own food by absorbing and processing sunlight. The ability to produce one's own food source is a metabolic process known as _____.
A. Heterotrophy
B. Autotrophy
C. Homotrophy
D. Ditrophy
67. Fungi absorb the nutrients from dead organisms. In an ecosystem what roles do they play?
A. Producers
B. Carnivore
C. Saprophytes
D. Epiphytes
68. Which among the following cell organelles does NOT participate in cellular division?
A. Ribosomes
B. Chromosomes
C. Mitotic spindle
D. Cytoplasm
69. Which of the following is an example of a symbiotic relationship?
A. Wolves working together to hunt in a pack
B. Plants growing in the same rolling meadow
C. Humans and their pets living in the same home
D. Weeds clinging to the roots of trees in your backyard

70. Which of the following is NOT an example of a naturally-occurring sugar?
- A. Sucrose
 - B. Mitose
 - C. Glucose
 - D. Galactose
71. Which of the following is a proper example of natural selection?
- A. Human beings continue to get taller because of thousands of years of proper nutrition.
 - B. A community of lady bugs begins having offspring with darker shells, in order to hide from their predators.
 - C. Albino rodents die off quickly in a community, being more vulnerable to certain pancreatic diseases.
 - D. Seagulls begin to eat so many fish so that only those with dark blue scale color survive.
72. What is the main difference between prokaryotes and the eukaryotes?
- A. The eukaryote has a nucleus, but the prokaryote does not have.
 - B. The prokaryote has a nucleus, but the eukaryote does not have.
 - C. The eukaryote is always larger than the prokaryote.
 - D. The eukaryote is the only type of cell that is capable of photosynthesis.
73. Which of the following statements is TRUE about parasites and their relationships with their hosts?
- A. The parasite and the host enjoy a mutual relationship, where both organisms benefit.
 - B. The parasite enjoys the benefits of a relationship in which the host is harmed or killed.
 - C. The host enjoys the benefits of a relationship in which the parasite is harmed or killed.
 - D. Neither the parasites nor host is really harmed in their symbiotic relationship.
74. Vascular tissue that transports water and leaves connects directly to which of the following?
- A. Meristems in the root tip
 - B. Pistils in the flower
 - C. Root hairs in the epidermis
 - D. Xylem in the stem
75. One immediate cause of a decrease in the rate of photosynthesis is the reduction in the availability of which of the following substances?
- A. Carbon Dioxide
 - B. Carbon monoxide
 - C. Hydrogen
 - D. Oxygen
76. Which type of digestion occurs in the mouth when an individual chews a piece of bread?
- A. Mechanical digestion only
 - B. Chemical digestion only
 - C. Both mechanical chemical digestion
 - D. Neither mechanical nor chemical digestion
77. Which among the following gases is green in color?
- A. krypton
 - B. Neon
 - C. Radon
 - D. chlorine
78. What does a pH below 7 indicate?
- A. Presence of ions
 - B. Purity of the sample
 - C. Alkalinity
 - D. Acidity
79. Which of the following best describe the amount of energy required to remove an electron from a gaseous atom?
- A. Activation energy
 - B. Free energy
 - C. Ionization energy
 - D. Lattice energy

80. Which of the following has the most polar bond?
A. N₂ C. F₂
B. HF d. HCl
81. A molecule or an ion is classified as a Lewis base if it has of the following properties?
A. Donates a proton to water C. Has a resonance structure
B. Accepts a pair of electrons D. Accepts a proton from water
82. Which among the following elements can be drawn into thin wires and hammered into thin sheets?
A. Ag C. Cu
B. Na D. Sn
83. Alchemists in ancient Egypt tested gold for purity by remelting it and heating it. If the gold became whiter, it contained _____.
A. copper C. silver
B. lead D. tin
84. Salts of water of the following metals are added to fireworks to make them brilliant red?
A. Copper C. Potassium
B. Barium D. Strontium
85. What intermolecular forces do geckos and other lizards use to stick to walls and ceilings?
A. Van der Waals forces C. Hydrogen bonding
B. Static ionic attractions D. Dipole-dipole attractions
86. If no more solute can be dissolved in a solvent at a given temperature, then that solution is called _____.
A. saturated C. saturable
B. unstable d. dispersed
87. A horizontal row of elements on the periodic table is known as a(n) _____.
A. group or family C. size
B. atomic number D. period or series
88. According to the modern periodic law, the chemical property of the elements are periodic functions of their _____.
A. atomic weight C. atomic number
B. isotopic weight D. atomic mass
89. The amount of substance having 6.02×10^{23} of any kind of chemical unit is called a(n) _____.
A. mass number C. formula
B. mole D. atomic weight
90. Breaking up solid speeds dissolving in a liquid by _____.
A. raising the temperature C. increasing surface area
B. decreasing the pressure D. slowing hydration
91. Fats do not dissolve in water because fats _____.
A. are polar and water is nonpolar C. are nonpolar and water is polar
B. and water are both nonpolar D. and water are both polar

92. What is the location on the Earth's surface that is directly above the place where an earthquake originates?
- A. focus
 - B. Epicenter
 - C. Hypocenter
 - D. Fault
93. If there are several earthquakes in a row, what is the name of these earthquakes?
- A. Tertiary shock
 - B. Foreshock
 - C. Mainshock
 - D. Aftershock
94. What is the partially molten layer of the earth called?
- A. Asthenosphere
 - B. Biosphere
 - C. Hydrosphere
 - D. Lithosphere
95. What part of earth is thought to be composed of iron and nickel?
- A. Hydrosphere
 - B. Asthenosphere
 - C. Lithosphere
 - D. Core
96. What is the numerical value for the hardest mineral on the Mohs hardness scale?
- A. 10
 - B. 11
 - C. 20
 - D. 100
97. Which among the following properties is a measure of how easily a mineral can be scratched?
- A. Streak
 - B. Specific gravity
 - C. Luster
 - D. Hardness
98. Rock fragments thrown into the air during a volcanic eruption are called _____.
- A. Tephra
 - B. Extrusive
 - C. Granite
 - D. Lava
99. What is a pyroclastic flow?
- A. When lava comes out of the volcanic vent
 - B. A mixture of volcanic gas, ash, and other tephra
 - C. Poisonous gas of a volcano
 - D. Lava that is harden into a batholiths
100. What type of clouds produce thunderstorm?
- A. Cirrus
 - B. cumulonimbus
 - C. Cumulus
 - D. Stratus
101. What is an example of natural air pollution?
- A. Smoke from forest fires
 - B. Carbon monoxide from engine exhaust
 - C. Dust from desertification
 - D. Acid precipitation
102. How is oxygen released into the Earth's atmosphere?
- A. Burning forests
 - B. Photosynthetic plants
 - C. Burning fossil fuels
 - D. Volcanic eruptions

103. Which is TRUE of the earth throughout geologic time?
A. Always colder than the present
B. Warmer and colder than the present
C. Only warmer than the present
D. A steady temperature
104. Where are most asteroids located?
A. Orbiting all planets
B. Outside of Pluto's orbit
C. Between Earth and Venus
D. Between Mars and Jupiter
105. Before metamorphism, marble was what type of rock?
A. Schist
B. Rock salt
C. Silstone
D. Limestone
106. What type of lens is a magnifying glass?
A. Convex
B. Concave
C. Plane-concave
D. Plane glass
107. What is the name of the point where light rays from infinity converge after passing through a lens?
A. Parabola
B. Center
C. Focus
D. Infinity
108. Which of the following is NOT a good heat insulator?
A. Wood
B. Wool
C. Feathers
D. Iron
109. Bending of light rays when they enter a different medium is known as _____.
A. reflection
B. refraction
C. convection
D. radiation
110. When a spring is released, its potential energy is converted to _____ energy.
A. magnetic
B. mlectrical
C. light
D. kinetic
111. A car is travelling in a circle with a constant speed. Which statement is TRUE?
A. The car has a constant velocity but changing acceleration.
B. The car has a changing velocity but constant acceleration.
C. The car has a changing velocity but changing acceleration.
D. The car has a constant velocity but constant acceleration.
112. A rock is dropped out of the window of a moving car. At the same time a ball is dropped from rest from the same height. Neglecting air resistance, which will reach the ground first?
A. Rock will hit the ground first.
B. Ball will hit the ground first.
C. Both will hit t the same time.
D. Neither will hit the ground.
113. A boy and a girl riding on a merry-go-round which is turning at a constant rate. The boy is near the outer rim and the girl is closer to the centre of rotation. Hoe do magnitudes of their accelerations compare?
A. The girl's acceleration is greater.
B. The boy's acceleration is greater.
C. The boy and the girl both have zero acceleration.
D. They both the same non-zero magnitude acceleration.

114. A piece of mud flies off the rim of a bicycle wheel. In what direction will it be going immediately after leaving the wheel?
- A. On a line directly away from the center of the wheel.
 - B. On a line at a tangent to the edge of the wheel.
 - C. On a curved path moving around the wheel.
 - D. On a straight line directed somewhere between the center and the edge.
115. A golf ball is fired at a bowling ball initially at rest and bounces back elastically. Compared to the bowling ball, the golf ball after the collision has _____.
- A. lower magnitude momentum and less kinetic energy.
 - B. lower magnitude momentum but more kinetic energy.
 - C. greater magnitude momentum but less kinetic energy.
 - D. greater magnitude momentum but more kinetic energy.
116. A boy and a girl riding on a merry-go-round that is turning. The boy is twice as far as the girl from the merry go round's center. If the boy and the girl are of equal mass, which statement is true about the boy's moment of inertia with respect to the axis of rotation?
- A. It is four times the girl's.
 - B. It is twice the girl's.
 - C. It is the same for both.
 - D. The boy has a greater moment of inertia but it is hard to determine how much more than the girl's it is.
117. Some children are riding on the outside edge of a merry-go-round. At the same time, the children all move towards the center of the merry-go-round. When they do this, which among the following happens?
- A. The angular momentum of the system stays constant.
 - B. The moment of inertia of the system stays constant.
 - C. The angular velocity of the system stays constant.
 - D. The merry-go-round slows down.
118. A convex mirror has a focal length f . An object is placed between f and $2f$ from the mirror. The image form is _____.
- A. virtual and enlarged
 - B. virtual and reduced in size
 - C. real and enlarged
 - D. real and reduced in size
119. Rays that pass through a lens very close to the principle axis are more sharply focused than those that are very far from the axis. This spherical aberration helps us understand which of the following phenomena?
- A. We become more far-sighted as we become older.
 - B. We become more near-sighted as we become older.
 - C. We can only see in the black and white in dim light.
 - D. It is easier to read in bright light than it is in dim light.
120. If you lower a frequency of a wave in a string you will _____.
- A. shorten its period
 - B. lower its speed
 - C. increase its wavelength
 - D. lower its amplitude
121. Which is the method that uses organisms to clean up toxic waste?
- A. Bioremediation
 - B. Carrying capacity
 - C. Deforestation
 - D. Monoculture

122. The process of restoring mined land to its original contours and vegetation is called _____.
- A. bioremediation
B. recycling
C. reclamation
D. reforestation
123. Which is NOT an effect of increase urbanization?
- A. Increase of flooding
B. Increasing volume of solid waste.
C. Decrease of wetlands
D. Preservation of antural habitats
124. Why are ecosystems with high biodiversity more stable than those with fewer species?
- A. They have a higher carrying capacity.
B. They have a higher number of species.
C. They recover from negative events more quickly.
D. They have a higher groth rate.
125. What combine with atmospheric moisture to create acid precipitation?
- A. Carbon dioxide and sulfur oxide
B. sulfur oxide and nitrogen oxide
C. Carbon dioxide and ozone
D. nitrogen oxides and methane
126. Which one CORRECTLY explains global warming?
- A. An increase in the concentration in ozone
B. A decrease in the amount of deforestation
C. A decrease in Earth's average surface temperature
D. An increase in Earth's average surface temperature
127. Which is an example of a way to improve efficiency in transportation?
- I. se of fuel-efficient, hybrid, or electric cars
II. Carpooling
III. Use of public transportation
- A. I, II and III
B. I and II
C. II and III
D. I and III
128. What is the production of two usable forms of energy at the same time from the same process?
- A. Sustainable energy
B. Energy efficiency
C. Conservation
D. Cogeneration
129. How is biogas produced?
- A. Conversion of plant and animal waste in a digester
B. By mixing methane and oxygen
C. Using fertilizer in a digester container
D. Conversion of anaerobic bacteria to carbon dioxide gas
130. What is the process in which a heavy nucleus divides to form smaller nuclei, one or two nucleus, and a large amount of energy?
- A. Radioactive decay
B. Nuclear reaction
C. Nuclear fission
D. Nuclear fussion

131. Iodine is the mineral found in seafood and iodized salt. Which gland in the human body needs iodine for the regulation of growth?
A. Pancreas
B. Pituitary Gland
C. Kidneys
D. Thyroid gland
132. Scurvey is caused by the lack of _____.
A. Vitamin B
B. Vitamin E
C. Vitamin C
D. Vitramin A
133. Which of the following parts of the digestive system is CORRECTLY paired with its function?
A. Esophagus – Digests carbohydrates
B. Stomach – digests fats
C. Small intestine – absorbs water
D. Liver – produces bile
134. A food label on a cereal box gives you the following information: a serving size equals one cup and there are 110 Calories per serving. You measure the amount of cereal you plan to eat and find that it measures 1 1/2 cups. How many calories will you consume?
A. 110 Calories
B. 165 Calories
C. 220 Calories
D. 1,100 Calories
135. Which blood type is universal donor?
A. Type AB
B. Type A
C. Type O
D. Type
136. What is the largest organ in the human body?
A. Skin
B. Liver
C. Heart
D. Fish
137. Osteoporosis is a disease that results in weak bones. What food s would you need to eat to help prevent tyhis disease?
A. Vegetables
B. Dairy products
C. Root crops
D. Fish
138. What do you call the device used to measure the blood pressure of a person?
A. Seismograph
B. Thermometer
C. Stethoscope
D. Sphygmomanometer
139. The process that most living organisms perform to obtain energyfrom suger and oxygen is called _____.
A. breathing
B. respiration
C. digestion
D. glycolysis
140. Breathing is controlled by the part of the brain called _____.
A. cerebrum
B. pons
C. medulla oblongata
D. spinal cord
141. Why do seasons occur on Earth?
A. The sun rotates on its axis.
B. Earth revolves on its axis
C. Earth's axis tlted.
D. Earth rotates on its axis.

142. Which part of the flower develops into fruits?
 A. Ovule
 B. Ovary
 C. Petal
 D. Anther
143. Trace the energy transformation when a flashlight is on.
 A. chemical → light → electrical
 B. electrical → chemical → light
 C. chemical → electrical → light
 D. electrical → light → chemical
144. Which of the following is unit of structure in all living things?
 A. Tissue
 B. Organ
 C. Cell
 D. Musle
145. Which is the correct sequence of the stages of mitosis
 A. Telophase, Anaphase, Metaphase, Prophase
 B. Metaphase, Anaphase, Telophase, Prophase
 C. Anaphase, Prophase, Metaphase, Telophase
 D. Prophase, Metaphase, Anaphase, Telophase
146. The propulsion of jets and rockets is based on newton's law of _____.
 A. Acceleration
 B. Interaction
 C. Inertia
 D. Gravitation
147. Why are shadows formed?
 A. Light travels through opaque objects.
 B. Light is reflected.
 C. Light is refracted.
 D. Light travels in a straight line.
148. What produces tremendous energy from the sun?
 A. Nuclear disintegration
 B. Nuclear fission
 C. Nuclear Fusion
 D. Nuclear decomposition
149. Which has a higher specific heat?
 A. Sand
 B. Water
 C. Soil
 D. wood
150. Sounds travel fastest in _____.
 A. gas
 B. liquid
 C. solid
 D. air
151. Which explains the absence of weather on the moon?
 A. Moon rotates on its axis fast.
 B. Moon revolves very fast.
 C. Moon's gravity is high.
 D. Moon has no atmosphere.
152. Which law states that heat flows from the bodies at high temperature to one at low temperature?
 A. Thermodynamics
 B. Energy change
 C. Transformation of renergy
 D. Retention of energy

153. Which atomic particle determines the isotope of an element?
A. Positron C. Electron
B. Proton D. Neutron
154. Who proposed the theory of evolution that is based on natural selection?
A. Watson C. Lamarck
B. Darwin D. Mendel
155. What gas is released during photosynthesis?
A. Carbon dioxide C. Nitrogen
B. Oxygen D. Hydrogen
156. Which instrument is used to detect earthquake intensity?
A. Anenometer C. Seismograph
B. Barograph D. Clinometer
157. Which of the following radioactive emissions are arranged in the order of increasing penetrating power?
A. Alpha, Gamma, Alpha C. Gamma, Beta, Alpha
B. Alpha, Beta, Gamma D. Beta, Gamma, Alpha
158. When light falls on a soap bubbles, the band of seven colors seen is due to _____.
A. Diffraction C. Scaattering
B. Reflection D. Interference
159. Why can mirrors form clear images?
A. Light is regularly refracted.
B. Light is irregularly refracted.
C. The angle of incidence is equal to angle of reflection.
D. The angle of reflection is equal to the angle of refraction.
160. Why do we see the sun rising the east?
A. Earth rotates from west to east. C. Earth rotates from east to west
B. Earth revolves from east to west. D. Earth's axis is tilted.
161. A community of living organisms interacting with their nonliving environment constitutes a/an _____.
A. population C. species
B. ecosystem D. biosphere
162. Choose a possible food chain.
A. Corn — rat — cat C. Rice — rat — man
B. Corn — man — cat D. Rice — cat — rat
163. In the energy pyramid which is the ighest point?
A. Second order produces C. Firat order consumers
B. Produces D. Third order consumers
164. Which of the following pairs demonstrates symbiosis?
A. Man and lice C. Chick and corn plant
B. Monkey and banana D. Butterfly and bean flower

165. The zigzag to Baguio represents which kind of simple machine?
A. Lever
B. Wheel and axle
C. Wedge
D. Inclined plane
166. Why does mercury in the thermometer rise when in contact with hot water?
A. Heat increases number of molecules.
B. Heat makes molecules become bigger and farther apart.
C. Heat makes molecules move faster and farther apart.
D. Heat makes the molecules move slower.
167. Which blood type is a universal donor?
A. A
B. O
C. AB
D. B
168. Which nerve transmit message receive to the center of hearing of the brain?
A. Sensory
B. Optic
C. Olfactory
D. Auditory
169. Which affects the air sacs of the lungs and is common among cigarette smokers?
A. Asthma
B. Tuberculosis
C. Emphysema
D. Tracheal disorder
170. What type of joint is responsible for bending our arms and legs?
A. Hinge
B. Pivot
C. Ball and socket
D. Sliding
171. Which protein found in plasma is responsible for blood clotting?
A. Globulin
B. Albumin
C. Serum
D. Fibrinogen
172. Which part of the brain is responsible for memory and intelligence?
A. Cerebellum
B. Cerebrum
C. Thalamus
D. Medulla
173. The Philippines belong to a biome called _____.
A. deciduous forest
B. taiga
C. tropical rainforest
D. grassland
174. The factors that significantly contribute to an increase in human population are _____.
A. immigration and natality
B. emigration and natality
C. immigration and mortality
D. emigration and mortality
175. What is the common cause of the temporary wilting of plants at noon?
A. Increased condensation
B. Rapid respiration
C. Rapid transpiration
D. Increased oxidation
176. How can we identify a dicot leaf from a monocot leaf?
A. A dicot leaf has a smooth surface.
B. A dicot leaf has netted venation.
C. A dicot leaf has parallel venation.
D. A dicot leaf has a wide margin.

177. When the stems of vines grow around poles of fences, what kind of response is exhibited?
A. Geotropism
B. Thigmotropism
C. Hydrotropism
D. phototropism
178. Which of the following is the greatest contributor to our “greenhouse effect”?
A. Increase of Oxygen
B. Leaching of the soil
C. Increase of herbivores
D. Cutting forest trees
179. Why does a tree slowly die when its bark all around it is removed?
A. The cambium is injured.
B. The phloem vessels are cut.
C. The tree cannot manufacture food.
D. Its protective layer is cut.
180. Which is the growing vegetables and low plants in a nutrient-packed, aerated solution with no soil at all?
A. Vegetative cultivation
B. Natural farming
C. Hydroponics
D. Aerial cultivation
181. When you carry a heavy load with one arm, you tend to hold your freehand away from your body in order to _____.
A. change the weight of your body and load
B. change the mass of your body
C. be ready to grab something in case you fall
D. change the center of gravity of your body and load
182. Why are door knobs placed at the edge of a door rather than in the center?
A. To increase the lever arm
B. To increase the force on the door
C. To help give momentum to the door
D. Closer to the edge of the doorway
183. Why is a dam built wider at the bottom than at the top?
A. To withstand the greater pressure at the bottom
B. To balance the pressure at the top
C. It holds up the dam better than at the center.
D. It anchors the dam better.
184. Archimedes’ principle states that an object is buoyed up by a force that is equal to the _____.
A. volume of the fluid
B. weight of the fluid displaced
C. mass of the fluid displaced
D. mass of the object
185. When an ice cube in a glass of water melts, the water level _____.
A. falls
B. remains the same
C. rises and spills
D. varies

186. Two pots of the same size are filled with boiling water. One pot is colored white and the other is black. In which pot will water cool faster?
A. Will cool at the same rate C. In black pot
B. In white pot D. In both pots
187. You inherited tallness from your father. Physical traits are transmitted from parents to offspring through _____.
A. gametes C. alleles
B. chromosomes D. genes
188. The handle of a spoon is dipped in a cup of hot water and becomes warm. What is the method of heat transfer?
A. Condensation C. convection
B. Radiation D. Conduction
189. The force required to keep an object at a constant speed in free space is equal to _____.
A. the weight of the object C. zero
B. the mass of the object D. the force required to stop it
190. Two people pull on a rope in a tug-of-war, each pulling with a 400 N force. What is the tension of the rope?
A. 800 N C. 400 N
B. 600 N D. 200 N
191. Why does a pressure cooker cook food faster?
I. Water boils faster.
II. It raises the boiling point of water.
III. It raises the cooking temperature of food.
IV. It is tightly closed.

A. II and III C. I, II and III
B. I, II and IV D. II and IV
192. You noticed that big industries have tower-like tall stacks. What is the structure for?
A. To control emission of hazardous gases
B. To induce rain and air pressure
C. To get enough air from the atmosphere
D. To make the interior cool
193. Steam burns are more damaging than burns caused by boiling water because steam _____.
A. has a higher temperature than boiling water
B. has more energy per kilogram than boiling water
C. is vapor of water molecules during boiling
D. occupies more spaces than water during boiling
194. The removal of broken pieces of rocks from the parent rock by the action of wind or water is termed _____.
A. erosion C. weathering
B. deposition D. silting

195. The voltage across a transformer primary coil that has 100 turns is 10 V. What is the voltage across the secondary coil which has 20 V turns?
A. 100 V C. 2 V
B. 10 V D. 20 V
196. Trace the conversion of energy that occurs when plants manufacture food.
A. Radiant energy to chemical energy
B. Radiant energy to kinetic energy
C. Mechanical energy to potential energy
D. Light energy to kinetic energy
197. Riders in a bus are pushed forward during a sudden stop. Which law of motion provides an explanation?
A. Law of Inertia C. Law of Universal Gravitation
B. Law of Interaction D. Hook' Law
198. What type of eclipse occurs when the moon is directly between the sun and the earth?
A. Partial Lunar C. Stellar
B. Lunar D. Solar
199. In our daily weather forecast, the region where two tropical wing systems converge, characterized by showers and widespread thunderstorm is called?
A. warm and cold fronts C. Stellar
B. Intertropical convergent zone D. local disturbance zone
200. While travelling at a night, you lost direction. Which star would you look for and in what constellation?
I. Polaris III. Ursa Minor
II. Rigel IV. Ursa Major
A. I and IV C. II and III
B. I and III D. II and IV
201. At present, a patient figth cancer by surgery or by drug treatment called _____.
A. irradiation C. chemotherapy
B. viral treatment D. immune therapy
202. The U.S. was able to produce a test-tube baby through a process called _____.
A. gne pairing C. protoplast fusion
B. internal fertilization D. in vitro fertilization
203. Patients suffering from malfunction of the kidney are now assisted by a machine that serves as artificial kidney called _____.
A. hemoscope C. hemodializer
B. pacemaker D. homeostatic machine
204. The sun appears more reddish at sunset than at noon. Which of the following phenomena is responsible for this effect?
A. Dispersion C. Scattering
B. Reflection D. Interference

205. Why do we hear thunder some seconds after seeing lightning?
 A. Light travels faster than sound. C. Sound is released later actually
 B. Sounds travel at 1,331 m/s. D. Light appears brighter in the sky.

4. Analyze advantages and disadvantages of different solutions to particular problems

206. Which is/are (an) advantage/s of the coming of Genetically Modified Organism (GMO)?
 I. Improved resistance of plants to disease, pests and herbicides
 II. Increase maturation time of fruits
 III. Enhanced taste and quality
 A. II and III C. I and II
 B. I and III D. I only
207. Which is disadvantage of Genetically Modified Organism (GMO)?
 A. Potential human health impact like allergens
 B. Reduce maturation time
 C. Fast food production
 D. High cost of GMO food items
208. In the desire of governments to control population growth, which one is highly promoted?
 A. The use of natural birth control methods C. Early marriage
 B. The use of artificial birth control methods D. "Balik probinsya program
209. How many the establishment of housing subdivisions to address housing problem contribute to decreased food production
 A. Men get occupied with construction and leave their farms untilled.
 B. Arable lands are reduced for these are converted into housing subdivisions.
 C. Housing divisions become overcrowded.
 D. People who flocked to the center where most subdivisions are located have no skills.
210. The use of plastic bags, disposable cups, plates, spoons, diapers, etc. makes life more convenient. However, as a result what problems has/have come about?
 I. Heaps on solid garbage
 II. Floods
 III. Epidemic
 A. I and IV C. I, II and III
 B. II and III D. I and II
211. The use of pesticides may increase crop yield but _____.
 I. contributes to air pollution
 II. cause water pollution
 III. brings about pest resistance
 A. I, II and III C. I and II
 B. II and III D. II and III

5. Analyze the impact of technology on living and non-living things.

212. A nuclear power plant may solve perennial brown outs but may bring about problems like _____.
I. thermal pollution
II. water pollution
III. release of pollution
A. I only
B. II and III
C. I and II
D. I and III
213. Endangered species are species which are threatened due to _____.
A. habitat destruction
B. extinction of the species
C. mutation
D. domestication
214. If we experience greenhouse effect, we shall have _____.
I. warmer climate
II. increase in level of CO₂ in the atmosphere
III. cooler climate
IV. increase in the level of O₂ in the atmosphere
A. I
B. I and II
C. III and IV
D. II
215. One consequence of global warming is coastal flooding because of the ____ which is in turn caused by _____.
A. *el niño* phenomenon - Changed precipitation pattern
B. melting of the ice caps – the rising of the sea level
C. rising of the sea level - melting of the ice caps
D. *La niña* phenomenon - Changed precipitation pattern
216. The contributory factors to acid rain are the use of _____.
A. fossil fuels
B. pesticides
C. nuclear energy
D. refrigerants
217. The thinning down of the ozone layer is believed to cause _____.
A. Heat stroke
B. baldness
C. ulcer
D. skin cancer

For numbers 218-222, refer to the vignette that follows. Choose the letter of the best answer from the choices that follow.

At Malaya Farms, a swarm of locusts and insects has been infesting the rice fields. This has forced some local farmers to stop the Farming process until a solution has been done. Meanwhile, in the adjacent barrio, an outbreak of malaria is ongoing. With all this insect-borne problems happening in his locale, the mayor has decided to initiate a pesticide intervention to solve his town's problems. Considering their town budget, the city council is contemplating on the use of dichlorodiphenyltrichloroethane (DDT) to eradicate the insects plaguing their municipality.

218. Which among the following is an expected effect of DDT on the insects plaguing the town?
A. DDT will act as a contact poison on the swarming insects.
B. DDT will increase fertility of the soil so that plants can grow.
C. DDT will cause the insects to develop cancer and die.
D. DDT will make the insects infertile and prevent their multiplication.
219. Which among the following is an expected effect of DDT on the natural ecosystem of the town?
A. DDT has no effect on natural wildlife.
B. DDT will cause increased fertility among chickens.
C. DDT is a productive toxicant causing ecosystem disruption.
D. DDT will cause pronounced carcinogenicity among the farmers.
220. Which among the following are expected effects of DDT on the health of the people living in the town?
I. Severe kidney damage
II. Diabetes mellitus
III. Breast cancer
A. I, II and III
B. I and II
C. III only
D. I only
221. Which alternatives to pesticides may be suggested to eradicate the insects causing malaria in this region?
A. Cultivation of snails
B. Eradicating insect breeding pools
C. Use of insecticide-treated bednets
D. Vaccination against malaria
222. Which alternatives to DDT may be suggested to control the swarm of insects ravaging the rice fields?
A. Cultivation of frogs
B. Fumigation
C. Relocation of rice plantation sites
D. Use of malathion or palathion

For numbers 223-227, refer to the vignette that follows. Choose the letter of the best answer from the choices that follow.

The town of Pulang Bato is experiencing a surge in population growth. Epidemiologic has revealed that the rate of teenage pregnancies in their locality is increasing at an alarming rate. City health officials have expressed concern over this matter. They intend to launch a safe sex campaign advocating the use of artificial methods of contraception like condoms and pills. The local church is vehemently opposing this move by the city government, advocating only the use of natural contraception like the rhythm method.

223. Which among the following methods of contraception has the least success rate?
A. Birth control pills
B. Condoms
C. Rhythm method
D. Intrauterine device

224. Base on cost-benefit analysis, which of the following methods of population control would be most appropriate if the town only had limited funds?
- A. Oral contraceptive pills
 - B. Barrier contraception
 - C. Intrauterine device
 - D. Injectable contraceptives
225. Which intervention should be advocate to address the problem among teenagers?
- A. Forums on safe sex and population education in school
 - B. Conducting a population education seminar for the parents
 - C. Offering abortion to interested parties
 - D. Accepting that there is no way to control teenage pregnancies
226. Which among the following is an expected long term complication on women's health in the town if safe sex practices are not initiated?
- A. Incresed incidence of ectopic pregnancies
 - B. Incresed incidence of suicide among females
 - C. Incresed incidence of diabetes mellitus and hypertension
 - D. Incresed incidence of cervical cancer
227. Which among the following is the only method of contraception that has 100% success rate?
- A. Injectable contraceptives
 - B. Withdrawal method
 - C. Abstinence
 - D. Daily oral contrseptive pills

For numbers 228-232, refer to the vignette that follows. Choose the letter of the best answer from the choices that follow.

The Bataan Nuclear Power Plant is a nuclear power plant based in MOrong, Bataan, Philippines. It was commissioned by President Ferdinand Marcus and building commence in 1976. The plant's construction was completed in 1984. When Marcos was overthrown and replaced by Corazon Aquino, the powerplant project was crapped. A major concern is that the nuclear plant is located in an area where aearthquakes are likely to occur. To this day, th Bataan Power Plant has remained unused. I+UP until April 2007, the Philippine government had to pay 155,000 dollars every day to pay for the loan that funded the power plant's construction.

228. The following are known advantages of the use of nuclear power EXCEPT _____.
- A. decreased release of greenhouse gases
 - B. increased reliance on fossil fuels
 - C. astronomical amounts of energy generation
 - D. decreased cost of energy expenditure
229. Which among the following represents the single most important deterrent for the use of nuclear power?
- A. Disposal of radioactive wastes
 - B. Possibility of radioactive elements
 - C. Time frame needed for formalities, planning and building of a new nuclear plant

230. Nuclear power relies on which of the following chemical reactions?
A. Nuclear fusion C. chemiosomosis
B. Binary fusion D. Nuclear fission
231. Which among the following world events sparked international debate against nuclear power?
A. Chernobyl accident C. Haiti incident
B. Minamata accident D. Ormoc tragedy
232. Which among the following is the single most important effect of radiation exposure on human health?
A. Hypertension C. Heart disease
B. Cancer D. Skin, muscle and bone problems

For numbers 233-237, refer to the scientific case described below. Choose the best answer to the questions that follow.

Waste disposal is a huge challenge for the urban municipality of Metropolis. it's expensive and time consuming to collect millions of tons of trash every year, and there are risks to the environment no matter how waste disposal is done. The city government is presently determining which method of waste disposal is best suited for their municipality.

233. Which among the following is NOT a suitable option for waste disposal in this city?
A. Vaporization C. Incineration
B. Landfills D. Recycling
234. The following are possible adverse effects of the use of sanitary landfills, EXCEPT _____.
A. pollution of local government
B. fatal accidents (scavengers buried under waste piles)
C. decrease amount of disease vectors
D. dust, odor and noise pollution
235. Which is the single most important deterrent on the use of incinerators for garbage disposal?
A. Heavy metal toxicity
B. Dioxin and furan emission
C. Highly toxic ashes flying around incinerator site
D. Cost of operation
236. The following are solid waste products which can be recycled, EXCEPT _____.
A. leftover food C. beverage cans
B. pet bottles D. pvc materials
237. At the level of people's homes, which among the following interventions can best help in solid waste management?
A. Backyard burning of trash
B. Composting
C. Four o'clock habit
D. Trash sorting prior to disposal

What did they accuse the government of as suggested by the underlined word?
 - A. a rule of the few rich
 - B. a form of dictatorship
 - C. anti-poor
 - D. elitist
6. With the Batasang Pambansa performing legislative and executive powers in the Marcos regime, which form of government implemented?
 - A. Parliamentary
 - B. Dictatorial
 - C. Monarchial
 - D. Presidential
7. What form of government is characterized by the separation of powers?
 - A. Parliamentary
 - B. Presidential
 - C. Aristocracy
 - D. Monarchial

8. To which type of political system do we belong?
 - A. Colonialism
 - B. Totalitarianism
 - C. Democracy
 - D. Capitalism
9. In which form of government does power and authority reside in a few persons who govern for their own interest?
 - A. Oligarchy
 - B. Monarchy
 - C. Democracy
 - D. Parliamentary
10. Which of the following represents the smallest subunit of government in the Philippines at present?
 - A. Purok
 - B. Barangay
 - C. Sitio
 - D. Zone
11. The Philippine Government is divided into three branches: Executive, Legislative and judiciary. Which among the following best describes this division of the legislative body of the country?
 - A. Tricameralism
 - B. Separation of powers
 - C. Emancipation of state
 - D. Division of labor
12. The Philippine Legislature is divided into two major bodies, the Senate and the House of Representative. Which among the following best describes this division of the legislative body of the country?
 - A. Bipartisanism
 - B. Co-legislative power
 - C. Unicameralism
 - D. Bicameralism
13. Which type of governance is characterized by a union of partially self-government states or regions united by a central government?
 - A. Federalism
 - B. Socialism
 - C. Democracy
 - D. Totalitarianism
14. In England, Queen Elizabeth acts as head of state. This country has a parliament and a Prime Minister. Which among the following best describes the form of government in this country?
 - A. Absolute monarchy
 - B. Constitutional monarchy
 - C. Oligarchy
 - D. Aristocracy
15. In which form of government are all citizens treated as equals on certain dimensions such as religion, politics, economics, social status and culture?
 - A. Totalitarianism
 - B. Democracy
 - C. Socialism
 - D. Egalitarianism

1.2 Explain the nature and provisions of the present Constitution, its advantages and disadvantages over the others and the past and its function as fundamental law of the state

16. What human right is violated when one opens a letter without permission from the addressee?
 - A. Right to privacy of communication and correspondence
 - B. Right to read the letter
 - C. Right to open the envelope without permission
 - D. Right to private affairs

17. When an individual is imprisoned without proper investigation what right is violated?
- A. Right to process of law
 - B. Right to secure persons
 - C. Right to process paper
 - D. Right to protection
18. What law was passed by Philippine Congress in 1995 which affirms the total integration of persons with disabilities into the mainstream of society?
- A. Republic act No. 7277
 - B. Republic act No. 7784
 - C. Republic act No. 7722
 - D. Republic act No. 7776
19. Which is the best definition of inclusive education endorsed by DepEd?
- A. It is a flexible and individualized support system for children and youth with special education needs
 - B. It is a mandate to include all children and youth in community activities.
 - C. It is a system to support children and youth in exclusive schools.
 - D. It is a special support for children and youth who cannot attend school.

Read the text below then answer item # 20.

Inclusion is a basic right of every Filipino child with special needs to education, rehabilitation, support services, work training and employment opportunities, community participation and independent living.

20. To prepare teachers to handle inclusive education what specialization is offered in teacher educational institution?
- A. Special Education
 - B. Special Course
 - C. Kindergarten courses
 - D. Pre school education

Read the text below then answer items 21-22

Article XIV Section of the 1987 Philippine Constitution mandates that the “State shall protect and promote the right of all citizens to quality education at all levels and shall take appropriate steps to make such educational accessible to all.

21. Which of the goals of EFA 2015 aims to achieve the above mentioned constitutional mandate?
- A. Universal completion of full cycle of basic education schooling with satisfactory achievement levels by all at every grade or year
 - B. Universal completion of primary education with satisfactory achievement levels at every grade level
 - C. Universal completion of secondary education with satisfactory achievement levels at every grade level
 - D. Universal elimination of drop outs and repetition by all at every grade or year including satisfactory achievement levels
22. What is the best indicator of “quality education” as invoked in the constitution?
- A. Generation of reliable measurements on dropout rate
 - B. Generation of reliable measurements on cohort survival rate
 - C. Generation of reliable measurements of educational outcomes
 - D. Generation of reliable measurements on participation rate

23. An individual has the right to file writ of amparo before the investigation of an administrative case against him/her. What fundamental right is invoked by the individual?
- A. Right to life, liberty and security
 - B. Right to due process
 - C. Right to be defended by a public attorney.
 - D. Right to self-defence
24. What is the writ of habeas data?
- A. Right to information privacy
 - B. Right to accumulate data
 - C. Right to transmit data
 - D. Right to search private information
25. The code of ethics of Professional Teachers provides that a teacher has the right and duty to determine the academic marks and the promotion of learners. What the obligation of the teacher in relation to the aforementioned right is as mandated in the Education Act of 1982?

- A. NO, except in writing and in the presence of the counsel.
 - B. Yes, if there is no counsel offering his service.
 - C. No, it cannot be waived.
 - D. Yes, if he voluntarily does so.
33. Which right is violated in wiretapping?
- A. Freedom of expression
 - B. The right to private property
 - C. The right to privacy of communication
 - D. The right to information on matters of public concern
34. Which act is deprivation of life without due process?
- A. Killing in self-defense
 - B. Salvaging
 - C. Imposition of the death penalty
 - D. Death resulting from illness.
35. Is land grabbing an act of deprivation of property without due process?
- A. Yes.
 - B. No.
 - C. Yes, if the land grabber is rich.
 - D. No, if the land grabber is landless.
36. Can you be arrested without warrant of arrest?
- A. No, if you are a minor.
 - B. No, if you are more than 60 years old.
 - C. Yes, if you were reported to have committed a crime.
 - D. Yes, if you are in the act of committing a crime.
37. Can religious instruction be taught in schools?
- I. Yes, if given free.
 - II. Yes, if given outside class hours.
 - III. Yes, only to those children whose parents give their consent in writing.
- A. I and III
 - B. II and III
 - C. I, II, and III
 - D. III only
38. Can an accused avail of free legal assistance?
- A. No, there is no such thing as free lunch.
 - B. Yes, provided he is classified as poor litigant by the court.

A. P15,000.00
B. P12,000.00
C. 9,000.00
D. 8,000.00
7. If 500 or 25% of a graduating class are girls, how many are graduating?
A. 2,000
B. 5,000
C. 10,000
D. 20,000
8. A man sleeps 6 hours a day. What is the ratio of the time he is asleep to the time he is awake?
A. 1:6
B. 1:4
C. 1:3
D. 1:2

9. A recipe calls for $\frac{3}{4}$ cup of sugar. How much sugar should be used if only $\frac{1}{2}$ of the quantities given in the recipe is to be prepared?
A. $\frac{3}{4}$ C. $\frac{1}{2}$
B. $\frac{2}{3}$ D. $\frac{3}{8}$
10. If a picture frame is 27 cm long and 18 cm wide, what is the ratio of its length to its width?
A. 3:2 C. 3:5
B. 2:3 D. 5:3
11. Five bananas weigh as much as 3 star apples. In this rate, how many star apples will weigh as much as 45 bananas?
A. 27 C. 33
B. 30 D. 36
12. It takes 20 men to build a building for 60 days. Assuming that all men work at this rate, how many men will be needed to build the same building in 15 days?
A. 5 C. 100
B. 80 D. 120
13. The ratio of the number of carabaos, goats and cows in a farm is 5:1:2. If there are 48 animals of these kinds in his backyard, how many of them are goats?
A. 2 C. 6
B. 4 D. 8
14. A defective ruler was found to be 11.5 in long. Using this ruler, Samuel was found to be 4 ft tall. What is Samuel's actual height?
A. 4 ft 2 in C. 3 ft 11.5 in
B. 4 ft 4 in D. 3 ft 10 in
15. Which of the following lengths is the longest?
A. 555 cm C. .005 km
B. 5.5 m D. 5555 mm
16. One-fifth of the width and one-fourth of the length of a rectangular cardboard is cut off. What part of the original cardboard is the area of the remaining piece?
A. 30% of the original area C. 50% of the original area
B. 40% of the original area D. 60% of the original area
17. If the area of a triangle is 1 sq unit and its height is unit, what is the length of its base?
A. 1 unit C. 3 units
B. 2 units D. 4 units
18. What is the radius of a circle whose area is 25 cm²?
A. 25 cm C. 5 cm
B. 25 cm D. 5 cm

19. Refer to the figure given: $m\angle 2 = 55^\circ$ and $m\angle 3 = 80^\circ$. What is $m\angle 4$?

- A. 95°
 B. 105°
 C. 115°
 D. 135°
20. The sum of three consecutive integers is 96. What are the integers?
 A. 31, 32, 33
 B. 32, 33, 34
 C. 30, 32, 34
 D. 33, 34, 35
21. What is the simplest form of the expression?
 A. $-2x + 4y - 17$
 B. $2x + 4y + 17$
 C. $2x + 4y - 17$
 D. $2x + 4y$
22. If $x = 1$ and $y = 2$, what is the value of the expression $\frac{x^2}{2xy} - 4x + \frac{3x}{y^2}$?
 A. $-\frac{9}{2}$
 B. $-\frac{15}{2}$
 C. $-\frac{7}{2}$
 D. $-\frac{17}{4}$
23. At 25% discount, Ms. Barat paid P150.75 for a bag. What was the original price of the bag?
 A. P37.69
 B. P150.75
 C. 201.00
 D. 603.00
24. An elevator can carry a maximum load of 605 kg. How many passengers of weight 50.5 kg each can the elevator hold?
 A. 12
 B. 11.9
 C. 11
 D. 10
25. The ratio of the number of red, green and blue balls in a box is 2:5:6. How many green marbles are there if there are 52 marbles in all?
 A. 4
 B. 8
 C. 20
 D. 24

26. Mrs. Dinah Tah Tanda divided her lot among her 4 children. The first got $3\frac{1}{2}$ ha, the second $3\frac{1}{3}$ ha, the third $3\frac{1}{4}$ ha and the fourth $3\frac{2}{5}$ ha. How big is Mrs. Tanda's lot?
- A. $12\frac{5}{14}$ ha C. $13\frac{29}{60}$ ha
B. 13 ha D. 14 ha
27. A room is 30 ft long, 25 ft wide and 14 ft high. If 42 balloons are inside the room. How many cubic feet of space does this allow for each balloon?
- A. 25 C. 250
B. 69 D. 690
28. What is the volume of air in an atmospheric balloon with a diameter of 24 cm?
- A. 144 cm³ C. 570 cm³
B. 240 cm³ D. 2304 cm³
29. A photograph measuring $7\frac{1}{2}$ cm by 5 cm is enlarged so that the longer side is 24 cm. What is the length (in cm) of the shorter side?
- A. 36 C. 6
B. 16 D. 1.6
30. A man accepts a position at P14,250 basic salary with an agreement that he will receive a 2% increase every year for 3 years. What will his salary be at the end of 3 years?
- A. P14,950.00 C. P15,122.21
B. P15,105.00 D. P16,500.00
31. In a university, the ratio of female professors to the male professors is 8:5. If there are 75 male professors, how many are female professors?
- A. 120 C. 225
B. 180 D. $375/8$
32. A farmer can plow $\frac{2}{3}$ of a hectare in 1 hr. At this rate, in how many hours will 5 farmers plow the same field?
- A. $\frac{1}{5}$ C. $\frac{15}{2}$
B. $\frac{10}{3}$ D. 10
33. A building 25 m tall casts a shadow 10 m long. How long is the shadow of a 5-foot girl standing beside the building?
- A. 2 ft C. 10 ft
B. 2.5 ft D. 250 ft

34. What is the maximum number of books, each 1.4 cm thick that can be put vertically in a shelf which is 64 cm long?
- A. 44
B. 45
C. 46
D. 64
35. If the exchange rate of US dollars to pesos is \$1 = Php47.90. What is the value of Php1 in American cents?
- A. 02
B. 479
C. 2
D. 4.79
36. In a bundle of new 100 bills, the bills are consecutively numbered RTC3432260 to RTC343228. How much is the total amount of the bills?
- A. 3200
B. 3300
C. 3400
D. 3500
37. In a card game, a player got the following scores: 35, -60, -40, 80, -100, 25, -25. What is his final score?
- A. -115
B. -85
C. 85
D. 115
38. A meter stick was cut into 2 at the 25 cm mark. What is the ratio of the a smaller piece to the larger piece?
- A. 1:3
B. 2:5
C. 3:4
D. 4:5
39. How many cm are there in 2 m and 550 mm?
- A. 75
B. 255
C. 2055
D. 2550
40. The first 5 numbers in a sequence are 2,3,5,8 and 12. What is the 7th number in the sequence?
- A. 15
B. 19
C. 23
D. 25
41. A teacher wants to group her pupils into groups of 3 or 5 or 6. However, she found out that if she do that there will always be 1 pupil left. What is the least possible number of pupils in the class?
- A. 81
B. 31
C. 21
D. 11
42. What measure of central tendency can best describe the size of t-shirts commonly used by teenagers?
- A. Mean
B. Median
C. Mode
D. Both A and C

43. The following are the results of the recent achievement test in Mathematics of the four divisions.

Division	Mean	Standard deviation
I	34	4.5
II	34	3.0
III	23	1.0
IV	20	2.0

Which division performed best?

- A. I
- B. II
- C. III
- D. IV

44. An empty box weighs 1.3 kilos. A Math book weighs 1.5 kilos. Which expression gives the weight of the box when filled with y Math books?

- A. $1.3y + 1.5$
- B. $1.5y + 1.3$
- C. $1.3 + 1.5y$
- D. $1.3y + 1.5y$

45. A man invested Php100,000. He put part of it in a bank at 5% interest. On the other hand, he invested the remainder on bonds with a 9% yearly return. How much did he put in the bank if his yearly income from the two investments was Php7,400?

- A. Php40,000.00
- B. Php50,000.00
- C. Php60,000.00
- D. Php70,000.00

46. How much liquid containing 6% boric acid should to be mixed with 2 quarts of a liquid that is 15% boric acid in order to obtain a solution that is 12% boric acid?

- A. 1 quart
- B. 2 quarts
- C. 3 quarts
- D. 5 quarts

47. A man, 32 years old, has a son 8 years of age. In how many years will the man be twice as old as his son?

- A. 16 years
- B. 24 years
- C. 32 years
- D. 48 years

48. What is the probability of getting a multiple of 3 when a die is tossed?

- A. $\frac{1}{6}$
- B. $\frac{1}{4}$
- C. $\frac{1}{3}$
- D. $\frac{1}{2}$

49. In how many ways can 5 basketball players be chosen from a group of 9 players?

- A. 126
- B. 212
- C. 15,120
- D. 362,880

50. The graph shows the number of socks, belts, Handkerchiefs and neckties sold by a store in one week.

The names of the items are missing from the graph. Socks were the item most often sold, and fewer neckties than any other item were sold. More belts than handkerchiefs were sold. How many belts were sold?

- A. 80
B. 90
C. 120
D. 140

SCIENCE

1. Why do you seasons occur on Earth?
 - A. The sun rotates on its axis.
 - B. Earth revolves on its axis.
 - C. Earth's axis is tilted.
 - D. Earth rotates on its axis.

2. Which part of the flower develops into fruits?
 - A. Ovule
 - B. Ovary
 - C. Petal
 - D. Anther

3. Trace the energy transformation when a flashlight is on.
 - A. chemical $\longrightarrow$ light $\longrightarrow$ electrical
 - B. electrical $\longrightarrow$ chemical $\longrightarrow$ light
 - C. chemical $\longrightarrow$ electrical $\longrightarrow$ light
 - D. electrical $\longrightarrow$ light $\longrightarrow$ chemical

4. Which of the following is the unit of structure all living thing?
 - A. Tissue
 - B. Organ
 - C. Cell
 - D. Muscle

5. Which is the correct sequence of the stages of mitosis?
 - A. Telophase, Anaphase, Metaphase, Prophase
 - B. Metaphase, Anaphase, Telophase, Prophase
 - C. Anaphase, Prophase, Metaphase, Telophase
 - D. Prophase, Metaphase, Anaphase, Telophase

6. The Propulsion of jets and rockets is based on Newton's Law of _____.
 - A. Acceleration
 - B. Interaction
 - C. Inertia
 - D. Gravitation

7. Why are shadows formed?
 - A. Light travels through opaque objects.
 - B. Light is reflected.
 - C. Light is refracted.
 - D. Light travels in a straight line.

8. What produces the tremendous energy of the sun?
 - A. Nuclear disintegration
 - B. Nuclear fission
 - C. Nuclear fusion
 - D. Nuclear decomposition

9. Which has a higher specific heat?
 - A. Sand
 - B. Water
 - C. Soil
 - D. Wood

10. Sound travels fastest in _____.
 - A. Gas
 - B. Liquid
 - C. Solid
 - D. Air

11. Which explain the absence of weather on the moon?
 - A. Moon rotates on its axis fast.
 - B. Moon revolves very fast.
 - C. Moon's gravity is high.
 - D. Moon has no atmosphere.

12. Which law states that heat flows from bodies at high temperature to one at low temperature?
 - A. Thermodynamics
 - B. Energy change
 - C. Transformation of Energy
 - D. Retention of Energy

13. Which atomic particle determines the isotope of an element?
 - A. Positron
 - B. Proton
 - C. Electron
 - D. Neutron

14. Who proposed the theory of evolution that is based on natural selection?
 - A. Watson
 - B. Darwin
 - C. Lamarck
 - D. Mendel

15. What gas is released during photosynthesis?
 - A. Carbon Dioxide
 - B. Oxygen
 - C. Nitrogen

- D. Hydrogen
16. Which instrument is used to detect earthquake intensity?
- A. Anemometer
 - B. Barograph
 - C. Seismograph
 - D. Clinometer
17. Which of the following radioactive emissions are arranged in the order of increasing penetrating power?
- A. Alpha, Gamma, Alpha
 - B. Alpha, Beta, Gamma
 - C. Gamma, Beta, Alpha
 - D. Beta, Gamma, Alpha
18. When light falls on soap bubbles, the band of seven colors seen is due to _____
- A. Diffraction
 - B. Reflection
 - C. Scattering
 - D. Interference
19. Why can mirrors form clear images?
- A. Light is regularly refracted.
 - B. Light is irregularly reflected.
 - C. The angle of incidence is equal to angle of reflection.
 - D. The angle of reflection is equal to the angle of refraction.
20. Why do we see the sun rising in the east?
- A. Earth rotates from west to east.
 - B. Earth revolves from east to west.
 - C. Earth rotates from east to west.
 - D. Earth's axis is tilted.
21. A community of living organisms interacting with their nonliving environment constitutes a/an.
- A. Population
 - B. Ecosystem
 - C. Species
 - D. Biosphere
22. Choose a possible food chain.
- A. Corn ——— rat ——— cat
 - B. Corn ——— man ——— cat
 - C. Rice ——— rat ——— man
 - D. Rice ——— eat ——— rat

23. In the energy pyramid which is at the highest point?
- A. Second order producers
 - B. Producers
 - C. First order consumers
 - D. Third order consumers
24. Which of the following pairs demonstrates symbiosis?
- A. Man and lice
 - B. Monkey and banana
 - C. Chick and corn plant
 - D. Butterfly and bean flower
25. The zigzag road to Baguio represents which kind of simple machine?
- A. Lever
 - B. Wheel and axle
 - C. Wedge
 - D. Inclined Plane
26. Why does mercury in a thermometer rise when in contact with hot water?
- A. Heat increases the number of molecules.
 - B. Heat makes molecules become bigger and farther apart.
 - C. Heat makes molecules move faster and farther apart.
 - D. Heat makes the molecules move slower.
27. Which blood type is a universal donor?
- A. A
 - B. O
 - C. AB
 - D. B
28. Which nerve transmits the message received to the center of hearing in the brain?
- A. Sensory
 - B. Optic
 - C. Olfactory
 - D. Auditory
29. Which disease affects the air sacs of the lungs and is common among cigarette smokers?
- A. Asthma
 - B. Tuberculosis
 - C. Emphysema
 - D. Tracheal disorder
30. What type of joint is responsible for bending our arms and legs?
- A. Hinge
 - B. Pivot
 - C. Ball and socket

- D. Sliding
31. Which protein found in the plasma is responsible for blood clotting?
- A. Globulin
 - B. Albumin
 - C. Serum
 - D. Fibrinogen
32. Which part of the brain is responsible for memory and intelligence?
- A. Cerebellum
 - B. Cerebrum
 - C. Medulla
 - D. Thalamus
33. The Philippines belong to a type of biome called _____.
- A. deciduous forest
 - B. taiga
 - C. tropical rainforest
 - D. grassland
34. The factors that significantly contribute to an increase in human population are _____.
- A. immigration and natality
 - B. emigration and natality
 - C. immigration and mortality
 - D. emigration and mortality
35. What is the common cause of the temporary wilting of plants at noon?
- A. Increased condensation
 - B. Rapid respiration
 - C. Rapid transpiration
 - D. Increased oxidation
36. How can we identify a dicot leaf from a monocot leaf?
- A. A dicot leaf has a smooth surface
 - B. A dicot leaf has netted venation.
 - C. A dicot leaf has parallel venation.
 - D. A dicot leaf has a wide margin.
37. When the stems of vines grow around poles of fences, what kind of response is exhibited?
- A. Geotropism
 - B. Thigmotropism
 - C. Hydrotropism
 - D. Phototropism

38. Which of the following is the greatest contributor to our “greenhouse effect”?
- A. Increase of Oxygen
 - B. Leaching of the soil
 - C. Increase of herbivores
 - D. Cutting forest trees
39. Why does a tree slowly die when its bark all around it is removed?
- A. The cambium is injured.
 - B. The phloem vessels are cut.
 - C. The tree cannot manufacture food.
 - D. Its protective layer is cut.
40. Which of the method of growing vegetables and low plants in a nutrient-packed, aerated solution with no soil at all?
- A. Vegetative cultivation
 - B. Natural farming
 - C. Hydroponics
 - D. Aerial cultivation
41. When you carry a heavy load with one arm, you tend to hold your free hand away from your body in order to _____
- A. Change the weight of your body and load
 - B. Change the mass of your body
 - C. Be ready to grab something in case you fall
 - D. Change the center of gravity of your body and load
42. Why are door knobs placed at the edge of a door rather than in the center?
- A. To increase the lever arm
 - B. To increase the force on the door
 - C. To help give more momentum to the door
 - D. Closer to the edge of the doorway
43. Why is the dam built wider at the bottom than at the top?
- A. To withstand the greater pressure at the bottom
 - B. To balance the pressure at the top
 - C. It holds up the dam better than at the center
 - D. It anchors the dam better
44. Archimedes’ principle states that an object is buoyed up by a force that is equal to the _____.
- A. volume of the fluid
 - B. weight of the fluid displaced
 - C. mass of the fluid displaced
 - D. mass of the object

45. When an ice cube in a glass of water melts, the water level _____.
A. falls
B. remains the same
C. rises
D. varies
46. Two pots of the same size are filled with boiling water. One pot is colored white and the other is black. In which pot will water cool faster?
A. Will cool at the same rate
B. In white pot
C. In black pot
D. In both pots
47. You inherited tallness from your father. Physical traits are transmitted from parents to offsprings through _____.
A. gametes
B. chromosomes
C. alleles
D. genes
48. The handle of a spoon dipped in a cup of hot water becomes warm. What is the method of heat transfer?
A. Condensation
B. Radiation
C. Convection
D. Conduction
49. The force required to maintain an object at a constant speed in free space is equal to _____.
A. weight of the object
B. mass of the object
C. zero
D. force required to stop
50. Two people pull on a rope in a tug-of-war, each pull with a 400 N force. What is the tension of the rope?
A. 800 N
B. 0
C. 400 N
D. 200 N

51. Why does a pressure cooker cook food faster?
- I. Water boils faster.
 - II. It raises the boiling point of water.
 - III. It raises the cooking temperature of food.
 - IV. It is tightly closed.
- A. II and III
 - B. I, II and IV
 - C. I, II and III
 - D. II and IV
52. You noticed that big industries have tower – like tall stacks. What is the structure for?
- A. To control emission of hazardous gases
 - B. To induce rain and air pressure
 - C. To get enough air from the atmosphere
 - D. To make the interior cool
53. Steam burns are more damaging than burns caused by boiling water because steam _____.
- A. Has a higher temperature than boiling water
 - B. Has more energy per kilogram than boiling water
 - C. Is vapor of water molecules during boiling
 - D. Occupy more spaces than water during boiling
54. The removal of broken pieces of rocks from the parent rock by the action of wind or water is termed _____.
- A. Erosion
 - B. Deposition
 - C. Weathering
 - D. Silting
55. The voltage across a transformer primary coil that has 100 turns is 10 V. What is the voltage across the secondary coil which has 20 V turns?
- A. 100 V
 - B. 10 V
 - C. 2 V
 - D. 20V
56. Trace the conversion of energy that occurs when plants manufacture food.
- A. Radiant energy to chemical energy
 - B. Radiant energy to kinetic energy
 - C. Mechanical energy to potential energy
 - D. Light energy to kinetic energy
57. Riders in a bus are pushed forward during a sudden stop. Which law of motion provides an explanation?
- A. Law of Inertia
 - B. Law of Interaction
 - C. Law of Universal Gravitation
 - D. Hooke's Law

58. What type of eclipses occurs when the moon is directly between the sun and the earth?
- A. Partial Lunar
 - B. Lunar
 - C. Stellar
 - D. Solar
59. In our daily weather forecast, the region where two tropical wind system converge, characterized by showers and widespread thunderstorm is called _____.
- A. Warm and cold fronts
 - B. Intertropical convergent zone
 - C. Tradewinds
 - D. Local disturbance
60. While travelling at night, you lost direction. Which star should you look for and in what constellation?
- I. Polaris
 - II. Rigel
 - III. Ursa Minor
 - IV. Ursa Major
- A. I and IV
 - B. II and III
 - C. II and III
 - D. II and IV
61. At present, a patient fights cancer either by surgery or by drug treatment called _____.
- A. Irradiation
 - B. Viral treatment
 - C. Chemotherapy
 - D. Immune therapy
62. The U.S was able to produce a test-tube baby through a process called _____.
- A. Gene pairing
 - B. Internal fertilization
 - C. Protoplast fusion
 - D. In vitro fertilization
63. Patients suffering from malfunction of the kidney are now assisted by a machine that serves as artificial kidney called _____.
- A. Hemoscope
 - B. Pacemaker
 - C. Hemodializer
 - D. Homeostatic machine

64. The sun appears more reddish at sunset than at noon. Which of the following phenomena is responsible for this effect?
- A. Dispersion
 - B. Reflection
 - C. Scattering
 - D. Interference
65. Why do we hear thunder some seconds after seeing lightning?
- A. Light travels faster than sound.
 - B. Sound travels at 1,331 m/s.
 - C. Sound is released later actually.
 - D. Light appears brighter in the sky.

SOCIAL SCIENCE

1. What does a professional code of ethics prescribe for all?
 - A. Moral standards and ethical behavior.
 - B. Rules and regulations in practicing the profession
 - C. Strict implementation of laws of the land
 - D. Civic-mindedness and social consciousness

2. “Man is to be hailed as a social being.” What does this line mean?
 - A. He necessarily attends social events.
 - B. He must introduce himself in social gatherings.
 - C. He does not live only for himself.
 - D. He does not need other people

3. At the base of a triangle that shapes us into what we are, is one of the following. Which one?
 - A. Environment
 - B. Heredity
 - C. Training
 - D. School attended

4. What does “presumption of innocence” mean in so far as human rights is concerned?
 - A. A suspect is considered guilty until proven otherwise.
 - B. A suspect has the right to remain silent.
 - C. A suspect has the right to legal counsel.
 - D. A suspect remains innocent until proven guilty.

5. No person may be elected as President of the Philippines unless he/she is a _____.
 - A. natural born citizen
 - B. residents for at least 2 year
 - C. at least 21 years old
 - D. professional

6. What do we call a typical social structure which describe a pattern through which relationships at work are ordered?
 - A. Technological
 - B. Communistic
 - C. Capitalistic
 - D. Bureaucratic

7. A society cannot exist without a government. Which word is synonymous with government?
 - A. Domination
 - B. Authority
 - C. Restraint
 - D. Check-and-balance

8. What does a “nuclear family” consist of?
 - A. Grandfathers, and grandmothers
 - B. Father, mother, sons and daughters
 - C. Sons, daughters and cousins
 - D. Sons, daughters and in-laws
9. What does “capital” in economic refer to?
 - A. Investment and loss computed
 - B. Outcome of a business transaction
 - C. Money/ machines invested to transact business
 - D. Profit and labor spent for the business
10. Which of the four pillars of education for the 21st century is crucial in the light of conflicts between Israel and Palestine?
 - A. Learning to do
 - B. Learning to be
 - C. Learning to live together
 - D. Learning to know
11. Which is the most important element of a state?
 - A. People
 - B. Government
 - C. Territory
 - D. Sovereignty
12. According to the Universal Declaration of Human Rights, what are the three fundamentals human rights?
 - A. Life, liberty and Self-development
 - B. Life, liberty and Security
 - C. Life, dignity and security
 - D. Life, dignity and self-development
13. What form of government is characterized by the separation of power?
 - A. Parliamentary
 - B. Presidentially
 - C. Aristocracy
 - D. Monarchical
14. Who does the canvassing of votes for Presidents and Vice President in every election?
 - A. Comelec and Chief Justice
 - B. Senate and Congress
 - C. Supreme Court and Congress
 - D. Joint committee of Congress

15. All appropriations, revenue or tariff bills shall originate exclusively from the _____.
A. Senate
B. Sangguniang Panlalawigan
C. House of Representatives
D. Department of Budget
16. What occurs when the government spends more than what it collects in the form of taxes?
A. Excessive allotment
B. Fiscal overspending
C. Fiscal deficit
D. Erroneous appropriations
17. Which department has the authority to make laws and to alter them when needed?
A. Executive
B. Legislative
C. Judicial
D. Administrative
18. When can we say that a person has values?
A. Lives a life of integrity, sincerity and commitment
B. Enjoys life of leisure and pleasure
C. Works towards self-aggrandizement
D. Lives a life of joy in the company of others
19. What is the type of cooperative which promotes thrift among members and creates funds in order to be able to grant loans?
A. Service
B. Producers
C. Consumers
D. Credit
20. One of the major functions of taxes is to finance real government expenditures. This function can simply be stated as _____.
A. To promote development
B. To ensure price stability
C. To raise revenues
D. Raise national security
21. Who is the general who said, "I shall return"? A monument in his honor stands in Corregidor by the bay.
A. William H. Taft
B. Douglas McArthur
C. John Dewey
D. Schurmann

22. A bill becomes a law even if not signed by the Presidents.
- A. 60
 - B. 40
 - C. 20
 - D. 30
23. Which refers to the act of the President to stay the execution of a convict?
- A. Commutation
 - B. Amnesty
 - C. Pardon
 - D. Reprieve
24. Who has the power to declare the existence of a state of war?
- A. Chief Justice
 - B. President
 - C. Senate Presidents
 - D. Congress
25. A losing senatorial candidate may file a protest against the winner. What body will assume jurisdiction over the case?
- A. Supreme Court
 - B. Electoral Tribunal
 - C. Comelec
 - D. Regional Trial Court
26. Which was the main vision of the DECS when it formulated Values Education Program?
- A. A productive society
 - B. A globally competitive nation
 - C. A just and humane society
 - D. An industrialized nation
27. In 1565 Legaspi concluded a blood compact with the chief of Bohol. Who is referred to?
- A. Raja Sulayman
 - B. Sikatuna
 - C. Lakandula
 - D. Rajah Tupas
28. How is the crime of rape classified?
- A. Heinous
 - B. Homicide
 - C. Slander
 - D. Malicious Mischief
29. When is the United Nations Day celebrated?
- A. March 17
 - B. October 21
 - C. September 21
 - D. October 24

30. Which landmark located in New York City was attacked by terrorists on September 11, 2001?
- A. Sears Tower
 - B. Empire State Building
 - C. Rockefeller Center
 - D. World Trade Center
31. The Japanese successful invasion was climaxed by the surrender of the joint Filipino – American forces on May 6, 1942. Where did it happen?
- A. Bataan
 - B. Corregidor
 - C. Capas
 - D. Manila
32. The Philippines objected to the advisory on travels to Mindanao by the Australian Government. What should the government do?
- A. Declare war against the country
 - B. File diplomatic protest
 - C. Recall all nationals
 - D. Arrest their nationals
33. Foreign investors are discouraged in doing business with our country. What condition is being blamed for this?
- A. Deteriorating peace and order
 - B. Poor technology
 - C. High tariffs
 - D. Poor standards
34. Which term refers the measures undertaken by the government which would remove anything that hinders the entry of foreign products, services and capital between countries?
- A. Liberalization
 - B. Globalization
 - C. Privatization
 - D. Internationalization
35. Which is one of the World Heritage Sites of our country?
- A. Intramuros Walled City
 - B. Palawan Underground River
 - C. Banawe Rice Terraces
 - D. Batanes Stone Houses
36. What do we call the sum of money collected for our use for a road, bridge and highway?
- A. Tax
 - B. Assessment
 - C. Penalty
 - D. Toll

37. Which term refers to duties payable on goods, whether imported or exported?
- A. Assessment
 - B. Tariff
 - C. Subsidiary
 - D. Revenue
38. What is the principal means through which culture is transmitted from generation to generation?
- A. Community action
 - B. Education
 - C. Family
 - D. Language
39. When people are experiencing problems which may be considered global in perspective, what set of values must they possess in order to cope successfully?
- A. Personal authority, independence, vision
 - B. Security, survival, self-restraints
 - C. Intimacy, independence, security
 - D. Work ethics, positive vision and self-acceptance
40. Material culture refers to the tangible and concrete objects produced by man. Which is a material culture?
- A. Stone walls of Tasadays
 - B. Ceremonies of Ivatans
 - C. Sinulog celebrations
 - D. Moriones festival
41. Which human need is considered basic?
- A. Pleasure
 - B. Security
 - C. Wealth
 - D. Order
42. Which factors determine population growth?
- A. Industry, investments and societal demands
 - B. Birth rate, death rate and migration trends
 - C. Mortality, birth control and economic growth
 - D. Laws, government and civic responsibility
43. Which term to the social aspects of sex or to socially defined roles and expectations that are associated with sex?
- A. Social differentiations
 - B. Social class
 - C. Gender
 - D. Cultural context

44. To which type of political system do we belong?
- A. Colonialism
 - B. Totalitarianism
