- In English verse, a poetic foot having one stressed syllable followed by one unstressed syllable is **trochaic**.
- **/p/** sound is voiceless.
- In The Count of Monte Cristo, Edmond Dante was wrongfully imprisoned in **The Devil's Island**.
- The line from the Koran, "Woe to every backbiter," talks of **misery for those who talks ill of others**.
- The area and perimeter of a square are numerically equal if the **side length is 4**.
- The **hardware** is the physical components of the computer.
- **Uploading** refers to the process of sending a file from the computer to another computer in a network.
- When coal is burned, stored energy is being released in the form of **thermal energy**.
- In the process in manufacturing food, plants **store the energy from the sun**.
- **Hydrogen** is much lighter than air.

LET TOP NOTES 2019 GENERAL EDUCATION

- An object floating in water displaces **less than its own volume**.
- The Earth travels around the Sun once each year. The Earth spins on its axis once each **day**.
- The secretion given off by the liver which helps in the digestion of fats is the **bile**.
- Taxonomy is the branch of Biology concerned with the classification of organisms. They are arranged in the following hierarchy: kingdom- phylum-class-order-family-genus-species. **Members of the same species** have the most in common with one another.
- A plant growing on a shady side of a tall fence bends around the corner of the fence towards the sunlight. This illustrates **positive phototropism**.
- The **vacuole** is the part of the plant cell that stores water, sugar and minerals.
- Sound waves travel the slowest in **gases**.
- Plants need carbon dioxide, water, light and chlorophyll in order to make starch by photosynthesis. Carbon dioxide enters plants through holes in the leaves called **stomata**.
- Sugar and starches are **carbohydrates**.
- **Monera** is considered as the most primitive kingdom.
- Not all microorganisms are harmful. Yeasts **promote the rising of bread for baking**.
- **Heterotrophs** are organisms that cannot manufacture their own food.
- **The use of auxins** may stimulate the growth of the roots in plant cuttings.
- Chloroplasts play an active role in the chemical processes required by plant cells to make food. On the other hand, animal cells no chloroplasts, **animals must obtain food from outside sources**.

- A group of student researchers believe that high blood pressure is due to too much salt in the diet. This is best classified as a **hypothesis**.
- The weight of an atom comes mostly from its **protons**.
- **Positive geotropism** is exhibited by the roots of plants.
- The **ozone layer** is the region of the atmosphere which absorbs harmful ultraviolet radiation.
- **Amphibians** are the animals which live on land but return to the water to breed.
- Dolphins and whales are mammals that live in the sea. **They feed their young on milk with mammary glands** is the characteristic possessed only by mammals.
- The liquid portion of the blood is the **plasma**.
- The building blocks from which all matter is composed are known as **atoms**.
- **Xylem** is a vascular tissue that conducts water and minerals; **phloem** is a vascular tissue that conducts food.
- **Eutrophication** is an environmental condition that has been blamed for the usual occurrence of fish kills.
- A **chemical change** is any change that results in the production of one or more substances that differ in chemical properties and composition from the original substances.
- Phenotype may be defined as **visible expression of genotype**.
- Cell walls present in plant cells are made up of **cellulose**.
- Our diet must include three types of food: energy foods, body-building foods and maintenance foods. The energy foods are carbohydrates and **fats**.
- Aspirin has been known to retard the blood-clotting process allowing us to use aspirin to **reduce the possibility of stroke**.

- Elements are classified according to the **number of protons in its nucleus**.
- The **lizard** is an organism which is cold blooded with a dry scaly skin.
- **Decomposers** are organisms responsible for the return of substances in the bodies of the dead plants and animals to the soil.
- **Testosterone** promotes the development of secondary male sexual characteristics.
- **Hemoglobin** is the iron-containing compound which give the red corpuscles its color.
- Night blindness in children and adults is attributed to the deficiency in **Vitamin A** in the diet.
- **Boyle's law** states that at constant temperature, the volume of a gas in inversely proportional to the pressure.
- The **red light** has the least frequency but the longest wavelength.
- **Technology** is the application of scientific concepts and principles.
- The **ecosystem** is the interaction of a colony of ant to the nonliving and living things in its habitat.
- **Solid**, of the state of matter, has the strongest intermolecular force of attraction.
- A **seismograph** can detect the magnitude of an earthquake.
- **The speed increases** as sound waves travel from a less dense medium to a denser medium.
- The Bill of Rights guaranteed that no private property shall be taken for public use without **just compensation**.
- **Sikatuna** was the chieftain of Bohol with whom Miguel Lopez de Legaspi had blood compact with in 1565.
- **Political party** is not an element of a state.

- In connection with government transaction involving public interest, the **full disclosure** policy is adopted by the Constitution to ensure the public accountability and transparency.
- A young girl left her baby at the household of a monastery. The child grew up without knowing her mother and father. The right of **self-assertion** is deprived of the child.

- To **shape the culture of their schools, improve student learning, and influence practice among their peers** are roles that teacher-leaders play.
- A global teacher is **Able to teach learners from diverse groups and cultures**.
- Education Service Contracting Scheme point to **the complementary roles of public and private institutions in the educational system**.
- TRUE of Alternative Delivery Modes (ADMs) are **I. Addressing the learning needs of the marginalized pupils and those learners at risk of dropping out and II. Helping learners overcome social and economic constraints in their schooling**

- If the school acts as an agent of change, what is it expected to **Enhance curriculum by localizing and indigenizing it with the help of community.**
- An indicator of cultural sensitivity is **knowing that differences exist between cultures.**
- The aforecited provisions of RA 10533 make clear that schools should be **community-centered.**
- The way/s by which schools can be learner-centered, according to the aforementioned provisions of RA 10533 are: **I. Using Mother Tongue as language of instruction II. By making curriculum flexible and responsive to community needs III. By indigenizing curriculum**
- NOT implied in the aforementioned provisions of RA 10533 is **that schools be independent of the community.**
- In a knowledge-based economy, schools can act as agents of changes by **equipping learners with lifetime skills such as knowledge retrieval, comprehension, application and utilization.**
- A progressive approach in transforming education that holistically critiques current shortcomings, failures, and discriminatory practices in education is **Multicultural education.**
- To enable learners to respond to the demands of the present world, should schools **Teach application-based, creative, critical, and innovative thinking.**
- An offshoot of the pillar of learning to live together is that **Students learn how to understand others and appreciate diversity among people.**
- Not TRUE of globalization is that **As advanced by the ASEAN Heads of States it has three distinct pillars: economic, socio-cultural, and political community.**
- Education plays a vital role in sustainability by promoting **health and teaching care for the environment.,**
- The following are attributes of a peace educator EXCEPT one that is **motivated by service but expects rewards for services.**
- A correct statement for Education for Sustainable Development (ESD) is that **It concerns economic and social development and environmental protection.**

LET TOP NOTES 2019 PROFESSIONAL EDUCATION

- What pedagogy should schools adopt to help learners acquire the basic skills is to **Demonstrate skills needed and then let students perform the skills until mastery is achieved.**
- TRUE of the Alternative Learning System is that it is a **Learning system parallel to the formal system.**
- An integrated school **offers complete basic education in one school site and has unified instructional programs.**
- According to RA 9155, the heart of the formal educational system is the **school.**
- **Yes**, an alien qualified to take the Licensure Examination for Teachers, **provided his/her country has reciprocity with the Philippines in the practice of the teaching profession.**
- **Yes**, after 2002, there is another way of obtaining a professional teacher's license other than passing the LET, and that is **by applying for the conversion of one's Professional Board Examination for Teachers (PBET) passing rating to a license.**
- **No**, a licensed professional teacher cannot teach after continuous five years of not practicing the teaching profession **unless he/she has earned 12 units of refresher courses in education.**
- Provided for in Article XIV of the 1987 Philippine Constitution is the **Protection of intellectual property rights.**
- A statement is not TRUE of CHED is that **it is in charge of education programs in all levels.**
- The goal that does NOT achieve global education is the **Increase in adult illiteracy by 50%.**
- Modesty has not practiced her teaching profession for the past five years. She should take **12 units of education courses** before she is allowed to teach.
- The pillar of education developed most when one prepares and does PowerPoint presentation is **learning to do.**
- When the teacher encourages the students to analyze issues, think critically about information given them, and help develop their skills on their own, the pillar of learning that she tries to develop is **learning to know.**

- Based on the Preamble, teachers are duly licensed who possess dignity and reputation with high moral values as well as technical and professional **competence**.
- Professor Santos should **Continually improve herself/himself personally and professionally** to uphold the highest possible standard of education.
- According to the Professional Code of Ethics for Professional Teachers, NOT stated as quality of a professional teacher is that he/she **Has passion for teaching**.
- Miss Arscil can connect with her students like a magnet. Her personal quality is **passion and humor**.
- A person is held responsible for his action because he **has choice**.
- The process by which children become participating and functioning members of society by fitting into an organized way of life is **Socialization**.
- Approach every pupil as he/she is without allowing yourself to be influenced by your knowledge of his/her background" is an advice from a/an **existentialist-phenomenologist**.
- Best describes the role of a teacher from a perennialist perspective is **To reveal the wisdom of the ages such as those contained in the bible/Koran**.
- The recent educational development relates with perennialism is **Exercising the students' Higher Order Thinking Skills (HOTS)**.
- The teacher believes that it is better to use the old and traditional methods than to experiment with new techniques in classroom teaching. She is a/an **essentialist**.
- The idea that the pragmatic teacher reject is that **Values are objective**.
- In problem-based learning, the kind of problem that the teacher should give are those **with many possible answers**
- Problem-based learning makes use of problems with **no clear cut answer**.
- Cooperative learning ends **with members reflecting on the cooperative process they went through**.
- Good discipline is characterized by **self-direction**.

Most appropriate or best strategy/technique:

- **Forum.** Teacher Karla, wants her Grade 7 students to express their opinions, sentiments, and ideas regarding a certain government issue in the national level.
- **Laboratory activity.** Miss Demi wants to let her class learn that in the formation of ice cubes, the surrounding surface of the water freezes first before the others and to show that water expands rather than contracts when frozen.
- **Inquiry.** Teacher Gretch designed a lesson where she wanted her students to design an activity on the effect of changing the temperature of water on the dissolving rate of sugar.
- **Mnemonics.** Mrs. Rivera wants to help her students retain new information learned from their lesson in Earth Science.
- **Discussion.** To yield greater interaction.
- **Reflection log.** Jenieca showed a video in her class about the life in an urban poor community. She wants to determine how the video changed students' thoughts about the life of these underprivileged people.
- Teacher Ruen is trying to develop the learners' ability to derive the meaning of words co-occurring with the unknown word, is an example of using **semantics**.
- The strategies that belong to both expository and exploratory approach are **deductive and cooperative**.
- The teacher exemplifies the generative approach of instruction if the teacher **provides opportunities to students to make own linkages to prior knowledge**.
- A student is late to school every morning. It would be best for the teachers **to investigate the student's home condition**.
- A bright student asks the teacher a difficult question that the latter cannot answer. The teacher should **tell the student frankly that she does not know**.
- A slow learner completely learn a particular skill in school by **Presenting to him the lesson thrice or more in varied forms**.
- A technique may be successful in one situation but may fail in another because **Instructional situations vary**.

- **Substandard teaching competence of teachers** may cause a poor classroom instruction.
- Teachers may manifest good time management in school **By devoting their time in instructional activities.**
- There is a district Math contest. The best way of selecting the representatives to showcase the human/social functions of school is for the **teacher to conduct competitive exams in Math to determine the best representative.**
- The correct practice in handling students' records are the following: **I. Records are kept for safekeeping in filing cabinets; II. Feedbacks about children's performance are given to parents.**
- The best way to do when the lesson is done ahead of time allotment is to **provide filler activities.**
- A teacher who says "Girls are emotional and very sensitive while boys are not" is practicing gender **stereotyping.**
- A correct example of the deductive method of teaching is when **The teacher starts by defining a term then gives examples..**
- Teacher A consults students and parents but she makes the decision. The classroom management style that Teacher A observe is **consultative.**
- A democratic teacher will allow the group to make the decision together. **Yes**, this is correct.
- Continuously scanning the classroom even when Teacher is working with small groups illustrates Robert Kounin's **with-it-ness.**
- A child who is having difficulty containing himself is asked to do an errand. **Antiseptic bouncing** was employed.
- The question that could NOT be answered when curricularists do curriculum mapping is **"Are my students learning?"**

LET TOP NOTES 2019 PROFESSIONAL EDUCATION

- The condition that most likely could help in the fast and smooth implementation of the K to 12 curriculum in schools of the Philippines is the **Decrease the restraining forces.**
- An outcomes-based approach to lesson planning begins with **Outcomes.**
- Constructive alignment means in outcomes -based lesson planning that **The learning outcomes are the bases of teaching-learning activities and assessment tasks.**
- Teacher M wants to treat a particular lesson from the point of view of different subjects. The lesson planning that he observes is **Thematic.**
- At the association/comparison phase, the **Lesson is linked to daily life.**
- The phase/s of the lesson where a teacher would know if the student really learn what was intended for him to learn are **application and generalization.**
- In a backward design approach to curriculum and lesson planning, the one that comes ahead is **Identifying results desired.**
- **No**, in Understanding by Design (UbD), developing instructional plan does not come right after identifying desired results.
- UbD insist on identifying assessment evidence of learning right after identifying desired learning results so that **Teaching-learning becomes more focused and organized.**
- Teacher has been constructivist in his approach to lesson planning. The features of his lessons are: **I. Students are engaged in learning. II. Students guide their own learning and meaning-making.**
- TRUE of a constructivist lesson planning approach is that **Students are building their own understanding.**
- In a constructivist lesson planning approach, UNACCEPTABLE is that **Learners accept blindly what teacher teaches because she is an authority on the subject.**

- If curriculum is planned following the behavioral approach, the sequence that is **CORRECT: II. Start with the setting of objectives and goals. III. Learning outcomes are evaluated along goals and objectives set at the start. IV. Change in behavior indicates the measure of the accomplishments.**
- If curriculum is planned following the humanistic approach, the feature applies is that it is **very child-centered.**
- A humanistic approach to curriculum planning has the following features, **EXCEPT subject matter is not necessary in curriculum planning.**
- When a school applies the systems approach to curriculum planning, expected is that **The parts of the school system are considered in terms of how they relate to each other.**
- In a systems approach to curriculum planning, yes, external stakeholders should be a part since **they are part of the school system.**
- When one wants children to develop positive attitude toward life and life] problems, the approach in curriculum planning that is most appropriate is **Problem-centered approach.**
- E-learning may either be synchronous or asynchronous. What apply/ies to' synchronous learning is that **All participants interact at the same time.**
- Applies to asynchronous learning is that **it is self-paced.**
- Stay on the **Right side view as you talk** when you write on the chalkboard while busy discussing your lesson in front of the class.
- In preparing instructional materials, the kind of graphics that is effective on computer screens are **Simple graphics with corresponding text.**
- The combination promotes legibility on projected materials are **Dark letters against light background.**

LET TOP NOTES 2019 PROFESSIONAL EDUCATION

- The main reason for leaving a silent space around the edge of a chart is **to increase readability**.
- The main purpose of using audio-visual aids in teaching **To get the interest and hold the attention of the learners**.
- The part of the screen of a computer has a strong influence among learners is the **Left half of the screen**.
- Learners learn better when all their senses are involved. The activity classified under direct purposeful experience is **setting the table**.
- The purpose of music in a media presentation is to **Provide continuity**.
- To increase the readability of printed media, the kind of letters that should be used for long statements or paragraphs is a **Combination of upper- and lower-case letters**.
- **Mock-up** can be used by a teacher to show the functioning of a part of a whole.
- Teacher B wants to make use of simulated life condition suitable for animals and plants living on land. She can use a **Terrarium**.
- Images are key elements of a PowerPoint presentation. Your reason for not using them is to **Use images to decorate**.
- The 6-6 principle in PowerPoint presentation mean? **I. 6 lines only or less and IV. 6 words only or less**
- A cluttered chalkboard may confuse your students. **Don't write too much** is a teacher's action that follow this thought.
- In the learning situation described before this item, the best assessment type that Teacher Marie may employ is **product-based type**.

- Learning outcome: distinguish between plant and animal cell. The test item aligned is to **Distinguish between a plant and an animal cell.**
- Learning outcome: Dance tango to the tune of “La Cumparsita”. The test item aligned is to **Dance tango as the music, “La Cumparista” is played.**
- Learning outcome: Construct valid test item. The test item aligned is to **Formulate a valid test item for this learning outcome: “the students must be able to supply the correct end or tag question.**
- Learning outcome: Use the correct tense of verb in sentences. The aligned test item is **“I (am going, go) to school everyday.”**
- Learning outcome: Draw conclusion from observations. The aligned test item is **“What conclusion can you draw on the basis of your observations?”**
- Learning outcome: Take a stand on the issue on same sex marriage and defend the same. The aligned test item is **“Do you favor same sex marriage? Why or why not?”**
- A proof of constructive alignment is when **The intended learning outcomes are aligned to the learning activities and performance tasks.**
- Teacher wants her students learn how to live in collaboration with others. The teaching-learning activity that will be aligned is **project-based learning.**
- A school wants to make its students globally aware by **Making students understand others’ perspectives and cultures.**
- If schools want students to become self-directed learners, should they employ more **metacognitive** strategy.
- Teacher R’s lesson for Grade 3 is on the history of the town. There is no existing reference material in the library. He/she can tap **The elders in the community.**

LET TOP NOTES 2019 PROFESSIONAL EDUCATION

- Truancy is getting to be a problem in School B. Students cut classes after recess after morning class. Parents and community can help **By serving as “security guards” to check on truant students.**
- The statement is TRUE about teaching vocabulary is that **Vocabulary can be taught directly and indirectly.**
- A limited vocabulary is a setback to efficient reading. This statement implies about the learner to **Be equipped with certain skills to attack unfamiliar words.**
- Jessa lacks originality and imagination in his speech. The words he uses and his speech patterns reveal a dull, unquestioning mind. Jessa’s speech may be described as **banal.**
- NOT a characteristic of a good question is that **It is self-answering.**
- A reader uses metacognition when **I. She previews the text and makes predictions II. makes connections to personal experience or other texts III. asks clarifying questions**
- A reader uses metacognition when she **I. identifies difficult sentences or passages II. restates a sentence/passage in her own words III. reacts to the text.**
- the following is/are examples of “thinking stems,” or sentence starter that can prompt reflective thinking: **I. “I’m thinking...” II. “I’m wondering...” and IV. “From what I read, I realize ...”**
- **Enjoyment of reading** does NOT belong to the external factors that affect reading point of reference.
- The factors relate to high reading achievement are **I. Rich home literacy environment, II. Reading enjoyment and III. Confidence in reading.**
- The following are metacognitive processes that enhance learning: **I. Monitoring progress as one learns II. Adjusting strategies if they are perceived ineffective III. Goal setting**
- **Remembering** does NOT belong to metacognitive processes.

- **There is no single best method in motivating learners.**
- The elements that must be present for goal setting to be an effective motivation tool are **I. Goal acceptance, II. Specificity, III. Challenge, IV. Performance monitoring and V. Performance feedback.**
- In the formal operational stage, adolescents are capable of doing the following to solve a problem: **I. Formulate hypotheses II. Systematically test hypotheses III. Reason out**
- **Metacognition** refers to the act of a learner who reflects on his/her own thinking.
- **Health** does NOT belong to cognitive factors affecting learning.
- Noncognitive processes related to learning and aging include the following EXCEPT **IV. Intelligence.**
- **I. Using cues, II. Establishing learning conditions that reduce interference and III. Using advanced organizers** can help minimize memory deficit in learning.
- The following characterize successful learners: **I. Active II. Goal-directed III. Self-regulating IV. Assume personal responsibility for contributing to their own learning.**
- In Bruner's three-tiered learning, **enactive learning** is action-based.
- The law that states that we tend to fill the gaps in figures as we perceive them is **law of closure.**
- Based on Freud's theory, the **superego** operates when Anjo lends his bicycle to his friend Julius who was crying for it.
- Prof. Pacis measures learning by the outward expression of new behaviors only such as ability to solve math with ease. The theory she applies is **behaviorist theory.**
- If you provide positive reinforcement whenever a learner performs an acceptable behavior on her own, your conviction is based on the principle of **behaviorism.**

- Maturationist theory advance that **Development is a biological process that occurs automatically on predictable, sequential stage overtime.**
- Scaffolding encourage children to discover and learn **Above their level but with help from the teacher.**
- Kenn likes to go to school. He enjoyed school on Day 1. The **Behaviorist theory** explains this.
- Learning is viewed as collections of responses to external stimuli. This is the thought of the **Behaviorist.**
- **A person's behavior, environment, and personal qualities all reciprocally influence each other** correctly and completely explains Bandura 's reciprocal determinism.
- NOT TRUE of behaviorists is that **Free will plays a role in a person's development.**
- TRUE of behaviorists is that **They focus solely on students' observable behaviors as the indicators of learning.**
- The successful learner can link new information with existing knowledge in meaningful ways. **The constructivist** subscribes to such thought.
- Jerome Bruner and Edgar Dale agree that for effective teaching-learning, teachers should begin with the **concrete.**
- Jerome Bruner and Edgar Dale advise teachers to for effective teaching-learning to **move from concrete to abstract.**
- **Local politics** does NOT belong to the Bronfenbrenner's microsystem as a factor on human development.
- **The child's parent and teacher are at odds** is an example of a child's mesosystem that does NOT work favorably for the child.
- **Based on Ausubels' subsumption theory,** Present the most general ideas of a subject first and then progressively differentiate in terms of detail and specificity.

- Tolman's term of latent learning means **Learning which is not manifested at the time of learning but which manifests later when a suitable motivation and circumstances appear.**
- Behaviorists explain forgetting as I. **Gradual cessation of a response as a result of passage of time** and II. **No repetition of the behavior for a time**
- **Highlighting student's failure** does not belong with teacher scaffolds in mind.
- **Social reconstructionism** asserts that learners generate knowledge and meaning from an interaction between their experiences and their ideas.
- **Infancy** is when physical growth fastest.
- Redmund often wears a headphone while working with his school projects in school campus. When asked why, he said he just wants to stay focused with I work. Redmund is an **Analytical and intrapersonal** kind of learner.
- Well-liked children can read and respond to peers' emotions better than children who are not-well liked. This research application is **Erikson's psychosocial theory of development.**
- The condition that most likely brings about a classroom climate that is business-like yet non-threatening is when **Rules, limits, and expectations are made clear during the first day of classes.**
- SLA child with hearing loss is likely to have language delay as well. This proves that **Speech is easily influenced by other aspects.**
- Studies on delinquent students recommend effective **authoritative** parenting style for adolescents.
- Researchers have found that executive functioning is a better predictor of school readiness rather than IQ. An implication of this to the teaching-learning process is to **Strengthen executive functioning among learners.**

- **I. Self-control II. Working memory III. Flexible thinking** are dimensions of executive functioning that are most important to child cognitive development.
- A teacher should have more **I. Nurturing of learners' sense of independence and self-efficacy** in class to create a growth mindset
- To build strong and healthy relationship in class, **I. Criticizing and IV. Blaming** should be out of the picture.
- **Differentiated** instruction is when there is atmosphere that is favorable for learning ensures that what a student learns, how he or she learns it is a match for his/her readiness level, interests, and preferred mode of learning.
- In a favorable learning environment, which competition promotes learning? **Against standards set**
- For a positive learning environment it is good to make clear that an individual's beliefs and activities should be understood by others in terms of that individual's own culture. Which concept is explained? **Cultural relativism**
- A test was given to the students by Mr. Lapid to determine what the student already know and not know about the subject before he taught. He gave a **pretest**.
- Mrs Dy is doing an assessment of learning. Which of the following questions would she likely consider? **I would ask "What grade should I assign to each student?"**
- An achievement test measure **Quality and quantity of previous learning**.
- **Students do an actual demonstration of their skill** is an administrative use of tests.
- Considering that tests were found to have poor psychometric status, psychologist- recommend that **tests be supplemented by other assessment methods**.

- **Essay** is the assessment task is aligned to this outcome. - Analyze the socio-cultural factors that affect learning.
- Here is a learning outcome: interpret assessment results. How should this be assessed? **Present data on score distribution, mean, standard deviation then ask the students to interpret the meaning of the data.**
- By means of a diagram, compare a plant and an animal cell. This should be assessed **By means of a Venn diagram, compare a plant and an animal cell.**
- Which should be one of the criteria? **Quality of answers to questions**
- What can be an additional criterion against which the defense of the research paper can be assessed? **Ability to integrate/connect one part of the research paper to other parts to explain a point.**
- What is an advantage of a 4-point scale rubric? **There is no column for undecided, everyone has to make a choice.**
- If you have to re-label the levels of the criteria, **does not meet expectations** can be a substitute for poor.
- _____ is a part of speech that describes a verb and an adjective. What is wrong with this completion test item? **The blank is at the beginning of the sentence.**
- Here is a True-False test: Based on research findings, girls usually develop earlier than boys. What is faulty with the test item? **I. It makes use of a specific determiner, "usually". II. The word "usually" gives clue to the answer.**
- Mrs. Rosal deducting points in students' test scores due to poor penmanship **lowers the validity of the test.**
- Which statement CORRECTLY applies to a student who got a score of 70 in a given test? **He obtained a raw score of 70.**
- The raw score of a student in a Mathematics test is equivalent to a Tscore of 70. What does his score mean? **Two SDs above the mean**

LET TOP NOTES 2019 PROFESSIONAL EDUCATION

- **Skewed to the left/negatively skewed:** good students/ most got high scores. Effective teaching.

Mode > Median > Mean.

- **Skewed to the right/positively skewed:** poor students/ most got low scores. Ineffective Teaching.

Mode < Median < Mean.

- A score distribution follows a normal curve. What does this mean?
Most of the scores pile up between -1SD to +1SD.
- Anne wanted to determine students' attitude toward cheating. She asked them to rate several statements on the extent to which they agree. What assessment tool did she use? **Attitude Scale**
- What does a test item with a negative discrimination index indicate?
The test item may not be reliable.
- What is a probable cause of a test item with a negative discrimination index? **Item vague and is open to many interpretations**
- Student Queenie got a percentile score of 85. What does this mean?
She belongs to the upper 15% of the examinees.
- Students were asked to nominate the first 3 classmates he/she wants to be with, for this project using a sheet of paper is an example **sociometric technique**
- Which of the following information about a student is the least confidential? **Periodical test record**
- Responding (doing something, taking action) is the second level in the objectives in the affective domain manifested in agreeing to try and volunteering for. **Frequency Inventory** is an appropriate tool for this.
- Which assessment tool is most appropriate in the assessment of the internalization of a value? **Conflict story**
- Norm-referenced grading **explains score type in percentile, stanine, quartile or decile.**

- Why is performance given the largest weight in TLE and MAPEH? **They are dominantly physical skill subjects.**
- Based on DepEd Order 8, s. 2015, how are Kinder pupils graded? **By the use of checklists and portfolios**
- What does DepEd consider most significant aspect in grade giving? **The demonstration of what was learned.**
- Are the core values - maka-Diyos, makatao, maka-kalikasan and maka-bansa - graded in the Report Card? **Yes, by the use of non-numerical rating scale.**
- When is a learner retained in the same grade level? When he doesn't meet expectations in **three** subject/s.
- What happens if a learner fails in two subjects? **He gets promoted on condition that he goes through a remedial class and finally gets an average of 75 with his last failing grade.**
